

Aims

Objective: The investment strategy of the fund is to purchase units in the M&G PP Long-Term Gilt Passive Fund - the underlying fund.

Underlying Fund Objective: The fund invests in UK Government gilts with over 15 years to maturity. The fund is passively managed against its benchmark, the iBoxx Sterling Gilts (15+) Index. Tracking this index is achieved by fully replicating the stocks in the index.

Prudential Risk Rating

Medium Risk

These funds may invest in multi-asset strategies with a higher weighting in equities (or with significant derivative use), while funds investing mainly in property, high yield or government bonds (such as UK Gilts) are also in this category.

These risk ratings have been developed by Prudential to help provide an indication of a fund's potential level of risk and reward based on the type of assets which may be held by the fund. Other companies may use different descriptions and as such these risk ratings should not be considered as generic across the fund management industry.

We regularly review our fund risk ratings, so they may change in the future. If, in our view, there is a material change in the fund's level of risk, for example due to a significant change to the assets held by the fund or in the way the fund is managed, we will provide information on the new risk rating. We recommend that you make sure you understand the risk rating of any fund before you invest.

Fund Managers

Name: Robert Burrows
Manager of the underlying fund for: 12 years, 10 months

Important Information

- Some funds may invest in 'underlying' funds or other investment vehicles. The performance of our fund, compared to what it's invested in won't be exactly the same. That can be due to additional charges, cash management (needed to help people to enter and leave our fund when they want), tax and the timing of investments (this is known as a fund's dealing cycle, it varies between managers and can be several days).
- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with gross income reinvested. The value of your client's investment can go down as well as up and the amount your client gets back may be less than they put in.
- This factsheet is intended for the advisers of occupational pension schemes using Prudential group pension contracts and Prudential grouped personal pensions and Stakeholder pension contracts. Its purpose is to provide an insight into how investment markets and funds have performed over the period and is provided for information only. You should refer to your client's scheme documentation (e.g. Fund Guide) for fund availability, investment strategy, any scheme information and charges. Every care has been taken in populating this output, however it must be appreciated that neither Broadridge, Prudential nor their sources guarantee the accuracy, adequacy or completeness of this information or make any warranties regarding results from its usage.

- 'Prudential' is a trading name of Prudential Pensions Limited. Prudential Pensions Limited is registered in England and Wales. Registered office at 10 Fenchurch Avenue, London EC3M 5AG. Registered number 992726. Authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

Commentary

Performance as at Q2 2025 - The price of UK government bonds (gilts) rose in the second quarter of 2025, outperforming both US Treasuries and German bunds (in local currency terms). The yield of the 10-year UK gilt fell to 4.5% from 4.7% at the start of the period (bond yields and prices move in opposite directions). Concerns were raised during the quarter as the Chancellor of the Exchequer, Rachel Reeves, delivered a spending review that set out £2 trillion of public spending in the coming years. This caused gilt yields to spike as investors digested the potential strain on the government's financial position, as well as the increased likelihood of tax rises later in the year. The Bank of England cut interest rates by 25 basis points to 4.25% in May; policymakers emphasised that interest rates remain on a gradual downward path, pointing to signs of a softening labour market. Short and medium-dated gilts outperformed longer-dated gilts, while inflation-linked gilts were notable laggards. UK corporate bonds outperformed government debt, returning 3.1%.
