Aims

The Fund aims to protect the value of capital and income from inflation by providing a total return (the combination of capital growth and income), net of the Ongoing Charge Figure, that is consistent with or higher than UK inflation (as measured by the UK Consumer Prices Index), over any three-year period. There is no guarantee that the Fund will achieve its objective over this, or any other, period. The income distributions and the value of your investment may rise and fall, and investors may not recoup the original amount they invested.

Important Information

- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of ongoing charges, but take no account of product charges. Ongoing charges may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with income reinvested. The value of your investment can go down as well as up so you might get back less than you put in.
