Aims

Objective: The investment strategy of the fund is to purchase units in the M&G Managed Growth Fund - the underlying fund.

Underlying Fund Objective: The fund aims to provide a higher total return (the combination of capital growth and income) net of the Ongoing Charge Figure, than the average return of the IA Flexible Investment Sector over any five-year period. At least 70% of the fund is invested in other funds to give exposure to a range of assets from anywhere in the world. The fund may also invest directly in these assets and use derivatives. In aggregate, at least 70% of the fund's assets will be invested in company shares, either directly or via other funds. The fund has a flexible investment approach which combines in-depth research to determine the value of assets over the medium to long term, with analysis of investors' emotional reaction to events to identify investment opportunities.

Important Information

- Because of changes in exchange rates the value of your investment, as well as any money you take from it, can go down as well as up.
- Some funds may invest in 'underlying' funds or other investment vehicles. The performance of our fund, compared to what it's invested in won't be exactly the same. That can be due to additional charges, cash management (needed to help people to enter and leave our fund when they want), tax and the timing of investments (this is known as a fund's dealing cycle, it varies between managers and can be several days).
- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of product charges, or any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with net income reinvested. The value of your investment can go down as well as up so you might get back less than you put in.
