Prudential Risk Rating

**Higher Risk**

These are specialist equity funds that focus on set geographical regions or a particular type of share e.g. shares of smaller companies or those that conform to certain criteria.

These risk ratings have been developed by Prudential to help provide an indication of a fund's potential level of risk and reward based on the type of assets which may be held by the fund. Other companies may use different descriptions and as such these risk ratings should not be considered as generic across the fund management industry.

We regularly review our fund risk ratings, so they may change in the future. If, in our view, there is a material change in the fund's level of risk, for example due to a significant change to the assets held by the fund or in the way the fund is managed, we will provide information on the new risk rating. We recommend that you make sure you understand the risk rating of any fund before you invest.

You should also consider discussing your decision and the appropriateness of a fund's risk rating with an adviser.

Fund Managers

BLACKROCK

Name:	BlackRock Team Managed
Manager of the underlying fund for:	29 years, 6 months

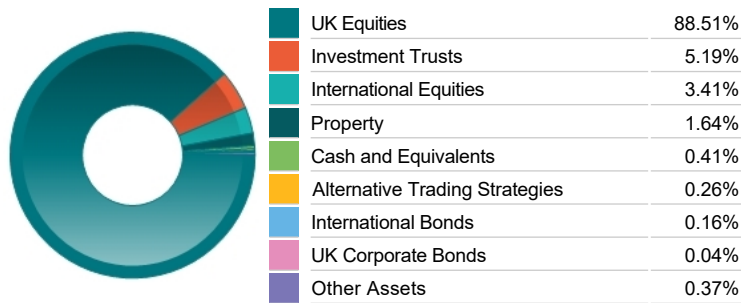

Important Information

- Some funds may invest in 'underlying' funds or other investment vehicles. The performance of our fund, compared to what it's invested in won't be exactly the same. That can be due to additional charges, cash management (needed to help people to enter and leave our fund when they want), tax and the timing of investments (this is known as a fund's dealing cycle, it varies between managers and can be several days).

- Prudential is a trading name of Prudential Pensions Limited. Prudential Pensions Limited is registered in England and Wales. Registered office at 10 Fenchurch Avenue, London EC3M 5AG. Registered number 992726. Authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

## Commentary

Performance as at Q4 2023 - The final month for 2023 delivered a mix of positive data alongside less positive forecasting by the Bank of England (BoE) all-the-while their Monetary Policy Committee (MPC) maintained their bank rate steady at 5.25%. UK Economic data showed strong retail sales and PMI's while economic and employment growth slowed alongside the continued cooling of inflation. The BoE marginally reduced their expectations for economic growth to one of stagnation, while business survey indicators of future growth remain more positive. It was a strong month for bonds as global government bond yields fell materially with gilt yields across the curve lower by circa 60 basis points (bps). The start of the month saw the Purchase Managers Index back above 50, indicating expansion in construction and services. The fund managers witnessed the first slowdown in wages since the start of 2023 with average earning ex-bonus growing at 7.3% down from 7.8%. The unemployment rate remained at 4.2% for the third consecutive month while inflation expectations over the next twelve months dropped to 3.3%. GDP month-on-month (MoM) showed a detraction of -0.3%, year-on-year (YoY) was also lower than expected at 0.3% versus (vs) expectations (exp) of 0.6% and previous of 1.3%. Gilt yields up until this point of the month we're relatively unchanged to marginally lower ahead of the BoE's interest rate decision. In a 6-3 vote the MPC left their bank rate unchanged at 5.25% for the third consecutive meeting, in line with expectations. The BoE indicated that the current level of interest rates are sufficiently restrictive and further hikes seem unlikely. This led to a strong rally in UK rates as the market pricing of interest rate cuts moved significantly forward to May 2024, with over 200bps priced in. Finally, inflation showed continued signs of slowing with headline YoY at 3.9% vs exp 4.3% and MoM -0.2% vs exp 0.2%. Core inflation also slowed, YoY 5.1% vs exp 5.5% and MoM -0.3% vs exp 0.2%.
