Launch date	20/10/2008

Fund Charges

Annual Management Charge (AMC)	2.50%
Further Costs	0.00%
Yearly Total	2.50%

Aims

Objective: The investment strategy of the fund is to purchase units in the Jupiter Merlin Balanced Portfolio - the underlying fund.

Underlying Fund Objective: The portfolio aims to provide a return, net of fees, that is higher than the IA Mixed Investment 40%-85% Shares Sector average over the long term (at least five years). Jupiter seek to attain the objective by investing at least 70% of the underlying fund in collective investment schemes, such as unit trusts, OEICs, SICAVs, exchange traded funds (ETFs) and closed or open-ended funds (which may include funds managed or operated by Jupiter or an associate of Jupiter). The underlying fund will invest in collective investment schemes, which may have exposure to shares of companies globally, fixed interest securities, derivatives for investment purposes, commodities or Property.

FE Crown

Important Information

- Because of changes in exchange rates the value of your investment, as well as any money you take from it, can go down as well as up.
- Some funds may invest in ‘underlying’ funds or other investment vehicles. The performance of our fund, compared to what it’s invested in won’t be exactly the same. That can be due to additional charges, cash management (needed to help people to enter and leave our fund when they want), tax and the timing of investments (this is known as a fund’s dealing cycle, it varies between managers and can be several days).
- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can’t predict the future. Past performance isn’t a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of product charges, or any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with gross income reinvested. The value of your investment can go down as well as up so you might get back less than you put in.
