Prudential UK Equity Index S3

Pru part of M&G pi

Aims

Objective: The investment strategy of the fund is to purchase units in the M&G PP UK Equity Index Fund – the underlying fund.

Underlying fund objective: The fund gains its exposure via the M&G (ACS) BlackRock UK All Share Equity fund. The underlying fund aims to be fully invested in the equity securities and equity related securities of companies that are constituents of the FTSE All Share Index. Within the index-related limits, the Investment Manager uses a structured and systematic, bottom-up stock selection process to build a portfolio with similar risk-return characteristics as the Index in order to meet the fund's investment objective. In addition the Investment Manager aims to reflect a fundamental ESG approach by overweighting its investment in securities which score well against the Investment Manager's ESG research framework, and underweighting the securities which score less well.

Performance Objective: The fund aims to provide a total return (i.e. capital growth plus income), gross of the Ongoing Charges Figure, over any three year period.

Prudential Risk Rating

Higher Risk

These are specialist equity funds that focus on set geographical regions or a particular type of share e.g. shares of smaller companies or those that conform to certain criteria.

These risk ratings have been developed by Prudential to help provide an indication of a fund's potential level of risk and reward based on the type of assets which may be held by the fund. Other companies may use different descriptions and as such these risk ratings should not be considered as generic across the fund management industry.

We regularly review our fund risk ratings, so they may change in the future. If, in our view, there is a material change in the fund's level of risk, for example due to a significant change to the assets held by the fund or in the way the fund is managed, we will provide information on the new risk rating. We recommend that you make sure you understand the risk rating of any fund before you invest.

You should also consider discussing your decision and the appropriateness of a fund's risk rating with an adviser.

Fund Managers

Name: BlackRock Team Managed

Manager of the underlying fund for: 2 years, 3 months

Important Information

- Some funds may invest in 'underlying' funds or other investment vehicles. The performance of our fund, compared to what it's invested in won't be exactly the same. That can be due to additional charges, cash management (needed to help people to enter and leave our fund when they want), tax and the timing of investments (this is known as a fund's dealing cycle, it varies between managers and can be several days).

- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with gross income reinvested. The value of your investment can go down as well as up so you might get back less than you put in.
- This factsheet is intended for the trustees, sponsors, advisers and members of occupational pension schemes using Prudential group pension contracts and Prudential grouped personal pensions and Stakeholder pension contracts. Its purpose is to provide an insight into how investment markets and funds have performed over the period and is provided for information only. If you are not familiar with any of the investment terminology included, then please contact an adviser. Investors should refer to their scheme documentation (e.g. Fund Guide) for fund availability, investment strategy, any scheme information and charges. Every care has been taken in populating this output, however it must be appreciated that neither Broadridge, Prudential nor their sources guarantee the accuracy, adequacy or completeness of this information or make any warranties regarding results from its usage.

Prudential UK Equity Index S3

Commentary

Performance as at Q2 2025 - The UK stockmarket rose in the second quarter, although the positive headline performance masks some periods of heightened volatility. UK equities, along with other markets, dropped sharply following President Trump's tariff proposals on 2 April, before subsequently recovering all their losses. A US-UK trade deal and negotiations between the US and China helped lift investor confidence that a global trade war could be avoided. Concerns about the escalation of geopolitical tensions in the Middle East when Israel attacked Iran's nuclear facilities also proved short-lived and markets ended the period on a buoyant note. UK equities trailed the global equity market as well as shares in the US, Japan and emerging markets (in local currency terms). The large, blue-chip global companies in the FTSE 100 Index trailed their smaller, domestically focused counterparts over the quarter, partly because of weakness in international oil stocks and pharmaceutical firms.
