Yearly Total	1.63%

Aims

Objective: The investment strategy of the fund is to purchase units in the Baillie Gifford American Fund - the underlying fund.

Underlying Fund Objective: The objective is to produce capital growth over the long term. The fund will invest principally in equities of companies which are listed, quoted, traded, incorporated, domiciled or conducting a significant portion of their business in the United States of America. Investment may be direct or indirect and the portfolio will be concentrated, usually between 30-50 stocks. The fund may also invest in other equities, cash and near cash. Up to (but no more than) 10% in value of the-fund may be invested in each of the following: (1) collective investment schemes, including those managed or operated by the ACD and (2) deposits. The fund will be actively managed, and investment may be made in any economic sector.

Performance Objective: To outperform (after deduction of costs) the S&P 500 Index, as stated in sterling, over rolling five year periods.

Important Information

Ratings

as well as any money you take from it, can go down as well as up. Because of changes in exchange rates the value of your investment in the underlying fund will not be exactly the same. That can be due to additional charges, cash management (needed to help people to enter and leave our fund when they want), tax and the timing of investments (this is known as a fund's dealing cycle, it varies between managers and can be several days).

Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of product charges, or any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with net income reinvested. The value of your investment can go down as well as up so you might get back less than you put in.
