Aims

This is one of a range of actively managed Global Sustainable Multi-Asset Portfolios offered at different risk levels. The asset allocation of each fund in the range reflects the risk level. The Fund is managed with the aim of maximising returns in line with its agreed long term risk profile of 5, where 1 is a lower level of risk and 5 is a higher level of risk therefore any potential returns are likely to be limited by the risk profile of the Fund. The starting point for the Global Sustainable Multi-Asset Portfolios is the asset allocation for each risk level. The asset allocation positions are regularly monitored in order to make timely adjustments to the portfolios' allocations to reflect the Fund manager's views on the current market environment. The final stage in the investment process is deciding how best to take exposure to each asset class. This may be achieved by investing in collective investment schemes, investing directly in asset classes and investing in derivatives. The focus on sustainable investment strategies is taken into consideration at each stage, when deciding which asset classes the Fund will invest in and how the Fund achieves exposure to those asset classes. Under typical market conditions, the portfolio will have the following asset class exposures, achieved through investment in collective investment schemes where applicable. It should be noted that these percentages will fluctuate based upon market movement and adjustments to the asset allocation to enable the Fund to meet its aim. The Fund aims to provide growth in line with its risk profile in the long term, which is a period of five years or more. The Fund's risk profile is rated as 5 where 1 is a lower level of risk and 5 is a higher level of risk.

Important Information

- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of ongoing charges, but take no account of product charges. Ongoing charges may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with income reinvested. The value of your investment can go down as well as up so you might get back less than you put in.
