Aims

The fund aims to produce growth over the medium to long-term (5 to 10 years or more) while smoothing some of the ups and downs of short-term investment performance. The fund spreads investment risk by investing in a range of different asset types, which currently includes UK and international equities, property, fixed interest securities, index-linked securities and other specialist investments. The fund is actively managed and aims to limit the fluctuations ('volatility') the fund experiences to 10% per annum (before smoothing). There is no guarantee the fund will achieve its objective of managing the volatility below this limit. In addition to generating financial returns most of the underlying funds apply at least one of the three ESG investing approaches: 1. Mitigating Environmental, Social and Governance risks and minimising negative outcomes 2. Pursuing Environmental, Social and Governance opportunities 3. Focussing on addressing environmental and social issues.

Important Information

- Because of changes in exchange rates the value of your investment, as well as any money you take from it, can go down as well as up.
- We can't predict the future. Past Performance isn't a guide to future performance. For the range of PruFund funds, what you receive will depend on the value of the underlying investments, the smoothing process, our charges, and when you take your money out.
- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of product charges. Charges and further costs may vary in the future and may be higher than they are now. For PruFund, as further costs are factored into the setting of Expected Growth Rates, they are not shown separately here. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with gross income reinvested. The value of your investment can go down as well as up so you might get back less than you put in.
