Settlement Period: Sell	4 days
Pricing Basis	Forward
Dealing Decimals	3

Distribution Dates

Ex dividend date(s)	Income payment date(s)
01 December	31 January
01 June	31 July

Aims

To provide total returns, comprised of income and capital growth, over the long-term, being five years or more. Five years is also the minimum recommended period for holding shares in this fund. This does not mean that the fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested. A minimum of 80% of the fund's assets will be invested in shares of companies listed in Europe, excluding the UK. The fund is actively managed which means that the fund manager will manage and adapt the portfolio depending on their assessment of the broad economic environment and market conditions. The fund manager may invest in large, medium and smaller sized companies across all industry sectors although it is expected that there will be a bias towards medium sized companies, which the fund manager considers to be of a market value of between £2 billion and £15 billion. The exposure to different sized companies may change over time according to economic and stock market conditions. The fund may also hold other investments such as companies in other geographical jurisdictions such as the UK and the USA, government and corporate (company) bonds, convertible bonds (bonds that can convert into company shares), collective investment schemes and cash and cash-like investments. The fund may invest in derivatives and forward transactions (these are contracts whose value is based on the change in price of an underlying investment) for the purposes of efficient portfolio management, including hedging (hedging is designed to offset the risk of another investment falling in price).

Important Information

- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of ongoing charges, but take no account of product charges. Ongoing charges may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with income reinvested. The value of your investment can go down as well as up so you might get back less than you put in.
