Aims

Objective: The fund aims to produce growth over the medium to long-term (5 to 10 years or more) while smoothing some of the ups and downs of short-term investment performance. The fund spreads investment risk by investing in a range of different asset types, which currently includes UK and international equities, property, fixed interest securities, index-linked securities and other specialist investments. The fund is actively managed and aims to limit the fluctuations ('volatility') the fund experiences, to 17% per annum (before smoothing). There is no guarantee that the fund will achieve its objective of managing the volatility below this limit.

Important Information

- Because of changes in exchange rates the value of your investment, as well as any money you take from it, can go down as well as up.
- We can't predict the future. Past Performance isn't a guide to future performance. For the range of PruFund funds, what you receive will depend on the value of the underlying investments, the smoothing process, our charges, and when you take your money out.
- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of product charges. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with gross income reinvested. The value of your investment can go down as well as up so you might get back less than you put in.

Commentary

31 March 2025 Financial markets experienced turbulence as investors reacted to President Trump's tariff campaign, fiscal shifts in Europe and a ground-breaking new Chinese AI model. In the bond market, rising risk aversion and recession fears drove US Treasuries higher. UK government bonds registered a modest gain. Concurrently, Germany's suspension of its so-called debt brake to increase defence spending pushed up government bond yields. Japanese government bond yields reached their highest levels since 2008. Corporate bonds were relatively resilient.

Global equity markets were volatile. The US declined due to new tariff measures and growing concerns about valuations of big technology firms. The S&P 500 fell 4.3%, most significant quarterly drop since Q3 2022. Notably, the 'Magnificent Seven' group of mega-cap US tech stocks, which have driven the market lately, were weak and lost nearly US\$2 trillion.

In a reversal of recent trends, US equities trailed other regions. Proposals to ramp up European defence spending propelled regional equities. UK equities also began positively. Optimism about China's AI development boosted the MSCI Emerging Markets Index, which outperformed the declining MSCI World and S&P 500 indices.

From a sector perspective, energy and financials led the gains, whereas information technology and consumer discretionary experienced the most significant declines. The US dollar declined against major currencies.

The M&G Treasury & Investment Office (T&IO) outlook is cautious as much uncertainty remains.
