Number of holdings	327
Launch date	19/06/2006

Fund Charges

Annual Management Charge (AMC)	1.75%
Further Costs	0.01%
Yearly Total	1.76%

Aims

Objective: The investment strategy of the fund is to purchase units in the M&G Strategic Corporate Bond Fund - the underlying fund. Underlying Fund Objective: The Fund aims to provide a higher total return (the combination of capital growth and income), net of the Ongoing Charge Figure, than the average return of the iBoxx Sterling Corporates GBP Index (the benchmark), over any five-year period. At least 70% of the fund is invested, directly or indirectly through derivatives, in investment grade corporate debt securities including investment-grade Asset-Backed Securities. These securities can be issued by companies from anywhere in the world, including Emerging Markets. These securities can be denominated in any currency. Other investments may include:

- below investment grade and unrated corporate debt securities.
- debt securities issued or guaranteed by governments and their agencies, public authorities, quasi-sovereigns, and supranational bodies.
- below investment grade and unrated Asset-Backed Securities: and
- other transferable securities, cash, and near cash, directly or via collective investment schemes (including funds managed by M&G).

Investments in Asset-Backed Securities are limited to 20% of the fund. The fund aims to hedge any non-sterling assets to sterling. Derivatives may be used for investment purposes, efficient portfolio management and hedging.

The Fund is diversified across a range of investment grade debt securities from a variety of sectors and geographies. The Fund's investment approach is based on the principle that returns from corporate bond markets are driven by a combination of macroeconomic, asset class, sector, geographic and stock-level factors. As different factors dominate returns at different stages of the economic cycle, the manager applies a flexible investment approach, changing the blend of duration and credit exposure in the portfolio to weight them appropriately. The fund manager has the freedom to take a high-conviction approach when selecting credits for the Fund. Individual credit selection is carried out with the assistance of an in-house team of credit analysts to complement the fund manager's views

Fund Managers

Important Information

- Some funds may invest in 'underlying' funds or other investment vehicles. The performance of our fund, compared to what it's invested in won't be exactly the same. That can be due to additional charges, cash management (needed to help people to enter and leave our fund when they want), tax and the timing of investments (this is known as a fund's dealing cycle, it varies between managers and can be several relaying.
- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history fall@fwmd, after allowing for the impact of fund charges and further costs, but take no account of predict charges or any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with net income reinvested. The value of your investment can go down as well as up so you might get back less than you put in.
