Aims

The investment strategy of the fund is to purchase units in the M&G Corporate Bond Fund. That fund aims to provide income and capital growth. At least 70% of the fund is invested in sterling-denominated corporate debt instruments. The fund's exposure to corporate debt may be gained through the use of derivatives. Derivatives may also be used for efficient portfolio management. Any currency exposures within the fund may be managed by currency hedges into sterling. The fund may also invest in collective investment schemes, other transferable securities and other debt instruments (including corporate debt and government and public securities denominated in any currency), cash, near cash, other money market securities, warrants and other derivative instruments.

Important Information

- Source of portfolio data: FundsLibrary. Source of performance data: Financial Express (FE). Please remember that past performance is not a reliable indicator of future performance. The figures shown are intended only to demonstrate performance history of the fund and take no account of product charges, or the Annual Management Charge for any available PruFund funds. The application of charges may impact the overall performance. Please also note that our charges may vary in the future and may be higher than they are now. Fund Performance is based upon the movement of the daily price and is shown as total return in GBP with net income reinvested. The value of your investment can go down as well as up and you may not get back the amount you put in.
