Aims

Objective: The fund aims to produce growth over the medium to long-term (5 to 10 years or more) while smoothing some of the ups and downs of short-term investment performance. The fund spreads investment risk by investing in a range of different asset types, which currently includes UK and international equities, property, fixed interest securities, index-linked securities and other specialist investments. The fund is actively managed and aims to limit the fluctuations ('volatility') the fund experiences, to 10% per annum (before smoothing). There is no guarantee that the fund will achieve its objective of managing the volatility below this limit.

Important Information

- Because of changes in exchange rates the value of your investment, as well as any money you take from it, can go down as well as up.
- We can't predict the future. Past Performance isn't a guide to future performance. For the range of PruFund funds, what you receive will depend on the value of the underlying investments, the smoothing process, our charges, and when you take your money out.
- Source of portfolio data: Broadridge. Source of performance data: FE fundinfo. We can't predict the future. Past performance isn't a guide to future performance. The figures shown are intended only to demonstrate performance history of the fund, after allowing for the impact of fund charges and further costs, but take no account of product charges, or any Annual Management Charge paid for by the deduction of units. Charges and further costs may vary in the future and may be higher than they are now. For PruFund, as further costs are factored into the setting of Expected Growth Rates, they are not shown separately here. Fund performance is based upon the movement of the daily price and is shown as total return in GBP with net income reinvested. The value of your client's investment can go down as well as up and the amount your client gets back may be less than they put in.

Commentary

31 December 2025 Financial markets proved resilient despite slowing growth, supported by a pivot to monetary easing and ongoing enthusiasm for AI-related stocks. Global equities extended recent gains. The S&P 500 rose 2.7%, closing 2025 up nearly 18% (in US dollars), while the FTSE 100 gained 6.9% (in sterling), its strongest annual performance since 2009. Emerging markets outperformed, with the MSCI Emerging Markets Index advancing 4.8% (in US dollars) and delivering full-year gains above 30%, buoyed by a weaker dollar and improving sentiment across Asia and Latin America.

Bond markets strengthened as central banks shifted to rate cuts and investors priced in looser policy. UK government bonds led gains, with the 10-year yield edging lower. US Treasuries gained, taking their return for the year to 6.2% (in US dollars). European government bonds also rose, with the exception of German bunds. Corporate bonds also posted positive returns.

Commodities delivered contrasting moves. Precious metals soared, with gold and silver posting their strongest annual gains since 1979 as investors sought safe havens amid falling real yields. Oil prices continued to weaken, marking a third consecutive annual decline. The US dollar logged its worst year since 2017, sliding broadly against major peers, while the euro and sterling strengthened on policy easing and improved risk appetite.

Despite macro headwinds, sentiment ended the year constructive, anchored by expectations of continued policy support and a gradual normalisation of inflation.
