### Chairman's statement

Dear Shareholder,

I have great pleasure in presenting the Company's half-yearly report for the six month period ended 30 November 2020. The Company made excellent progress during the period despite delays caused by the COVID-19 pandemic.

The process of granting a full Mining Permit to develop the Company's diamond deposit at Lahtojoki continued, as did its diamond exploration programme. The work regarding ground rental compensation by the National Land Survey of Finland ("NLSF") on behalf of TUKES (The Finnish Mining Authority) also continued and is now in its final stages. Under Finnish regulations a public meeting is required before the process can be completed. This meeting will be held when COVID-19 regulations allow. TUKES can then proceed to issue a full Mining Permit to the Company over the Lahtojoki diamond deposit.

The National Land Survey of Finland has in the meantime, during the half-year, formally granted rights of way to the Company over the entire Naviskangas private forest road, together with a side road, giving vehicular access to the deposit, the adjacent Lahtojoki South exploration permit area and the surrounding reservation in the Kaavi region of Finland. The granting of vehicular rights of way will facilitate the Company in its technical assessment of the deposit.

The Lahtojoki deposit is situated in a highly favourable location with excellent infrastructure including good road access and power distribution, combined with local technical and logistics availability, which significantly reduces the likely capital and operating costs of a mine as compared with the situation in regions of the world with less adequate infrastructure.

The Lahtojoki deposit also appears to have a significant percentage of coloured diamonds, in particular pink diamonds, which could add to its financial attractiveness especially with the closure of the main source of pink diamonds - the Argyle mine in Western Australia.

The Company's diamond exploration programme in Finland has led to the discovery of a green diamond in till in the Kuhmo region of Finland which lies close to the Russian border. The Company believes that the Kuhmo region could be part of a new kimberlite province.

The Company is also engaged in exploration in the vicinity of the Lahtojoki diamond deposit.

### **COVID-19 Update**

The Company continued with measures in accordance with Government guidelines to protect the health, safety and well-being of its employees, contractors and partners in Finland and Ireland. COVID-19 continues to limit field and laboratory work given the restrictions on operations and movement. Directors and executives took a 50% reduction in fees and salaries during the period while technical and field staff took a 25% reduction in salaries.

#### Finance

The loss after taxation for the half year ended 30 November 2020 was €193,243 (for the six-month period ended 30 November 2019: €250,150) and the net assets as at 30 November 2020 were €9,393,315 (30 November 2019: €9,177,513).

During the half-year the Company raised a total of £420,000 through a placing of 10,500,000 ordinary shares at 4pence per ordinary share.

#### **Directors and Staff**

I would like to express my deep appreciation of the support of all the directors, consultants and staff, which has made possible the continued progress and success which the Company has achieved.

### Chairman's statement (continued)

### **Future Outlook**

I look forward to continued progress towards the development of a diamond mine at Lahtojoki and further exploration success.

Yours faithfully,

Richard Convey

Chairman

Exploration and evaluation assets relate to expenditure incurred in the development of mineral exploration opportunities. These assets are carried at historical cost and have been assessed for impairment in particular with regard to the requirements of IFRS 6: *Exploration for and Evaluation of Mineral Resources* relating to remaining licence or claim terms, likelihood of renewal, likelihood of further expenditure, possible discontinuation of activities as a result of specific claims and available data which may suggest that the recoverable value of an exploration and evaluation asset is less than its carrying amount.

The Board of Directors have considered the proposed work programmes for the underlying mineral resources. They are satisfied that there are no indications of impairment.

The Board of Directors note that the realisation of the intangible assets is dependent on further successful development and ultimate production of the mineral resources and the availability of sufficient finance to bring the resources to economic maturity and profitability.
