This marketing communication is directed at retail clients in the UK. Investors should read the legal documents prior to investing.

Summary of fund objective

The Fund seeks to achieve a positive gross return through a conservative allocation (low duration and high credit quality) to debt securities and cash as fully described in the prospectus. Due to the prevailing interest rate environment or other factors, it is possible that this may not be achieved. For the full objectives and investment policy please consult the current prospectus.

Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date. Changes in interest rates will result in fluctuations in the value of the fund. The fund uses derivatives (complex instruments) for investment purposes, which may result in the fund being significantly leveraged and may result in large fluctuations in the value of the fund. The fund may hold a large amount of Asset Backed Securities (ABS) (complex instruments) as well as other lower quality debt securities which may impact the liquidity of the fund under certain circumstances. As this fund is invested in a particular sector, you should be prepared to accept greater fluctuations in the value of the fund than for a fund with a broader investment mandate.

Fund Strategy

As an ultrashort duration strategy, the fund seeks to fill the risk/return void between money market and short-term bond funds by looking to achieve a yield and total return in excess of traditional money market funds while targeting a lower risk profile than short-term bond funds. The fund is conservatively managed, investing primarily in high quality, low duration debt instruments, with at least 70% invested in US dollar denominated securities. The fund is not a money market fund, does not utilise leverage, and non-USD exposure is hedged back to USD. The fund's duration will not exceed 18 months.

Past performance does not predict future returns. Data points are as at month end.

*At Invesco we continuously monitor any applicable sanctions, including those imposed by the UN/US/EU and UK. These sanctions may preclude investments in the securities of various governments/regimes/entities and as such will be included in our compliance guidelines and workflows (designed to ensure compliance with such sanctions). The wording of international sanctions is something that we pay particular attention to as there are occasions where sanctions can exist in limited form, for example allowing investments in the secondary market. In addition to sanctions targeting entire countries, there are other thematic regimes, which may focus for example on human rights, cyber attacks, terrorist financing and corruption, which may apply to both individuals and/or entities/corporations.

Any investment decision should take into account all the characteristics of the fund as described in the legal documents. For sustainability related aspects, please refer to: <https://www.invescomanagementcompany.lu/lux-manco/literature>.
