

VT Greystone Cautious Managed Fund

Multi-Asset

GREYSTONE

Factsheet

July 2022

Objective

The fund targets 4% to 7% annualised growth over the recommended minimum time horizon for investment of at least five years, aiming to achieve this with less than half of equity market risk. The fund aims to deliver capital growth with outperformance of the Investment Association sector average and cash over a rolling 5-year period. The fund holds a minimum of 30% fixed interest (including cash) and between 20% and 60% equities.

Outlook

Asset prices have remained volatile so far in 2022, with markets pricing in the risk that inflation proves more persistent and the likely path of Central Bank monetary policy. Coupled with supply-chain disruptions and multi-year high energy costs, economic growth is expected to slow. Asset prices across both bonds and equities have declined year-to-date, with weakened sentiment and risk appetite. We favour shorter-dated fixed assets within fixed interest and conviction towards quality-growth businesses in equities, with robust balance sheets, strong cashflow management and good earnings.
