Source for all performance: Lipper as at 31 March 2024. Fund Performance for the Institutional Shares W (Income) calculated as total return, including reinvested income net of UK tax and charges, based on net asset value. All figures are in GBP terms. The impact of an initial charge (currently not applied) can be material on the performance of your investment. Further information is available upon request.

¹For Income Share Classes, Income Paid is the cash amount distributed, net of UK tax, for £1000 invested at the beginning of each period. This is for illustrative purposes only and does not take into account effects of inflation or other factors that may have a negative impact on an investment.

INVESTMENT MANAGER

Newton Investment Management: Newton aims to deliver outcomes for its clients across active equities, income, absolute return, multi-asset, thematic and sustainable strategies. Its capabilities are driven by its global investment research platform which harnesses a breadth of both fundamental and quantitative research.

PERFORMANCE BENCHMARK

The Fund will measure its performance against the ICE Bank of America Global High Yield ex Bank Capital & Junior Subordinated (100% Hedged into sterling) TR Index as a comparator benchmark (the "Benchmark"). The Fund will use the Benchmark as an appropriate comparator because it includes a broad representation of the asset class, credit quality, sectors and geographical areas in which the Fund predominantly invests. The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. While the Fund's holdings may include constituents of the Benchmark, the investment weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

KEY DATES

Fund launch	02 Oct 2000
Close of financial year	30 Jun
Distributions	Monthly

DISTRIBUTION YIELD (AS AT 31 MARCH 2024)

Share class	Yield
Institutional Shares W (Income)	6.24%

Distribution yield reflects the amounts that a fund may be expected to distribute over the forthcoming twelve months as a percentage of the fund's current price as at the date shown. Distribution yield is based on a snapshot of the portfolio as at the date shown. It does not include the impact of any initial charge and investors may be subject to tax on distributions.

BNY Mellon Global High Yield Bond Fund: As at 31 March 2024

KEY RISKS ASSOCIATED WITH THIS FUND

- There is no guarantee that the Fund will achieve its objectives.
- This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.
- The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- Emerging Markets have additional risks due to less-developed market practices.
- The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.
- The Fund may invest in China interbank bond market through connection between the related Mainland and Hong Kong financial infrastructure institutions. These may be subject to regulatory changes, settlement risk and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.
- Contingent Convertible Securities (CoCo's) convert from debt to equity when the issuer's capital drops below a pre-defined level. This may result in the security converting into equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.
- The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.
- A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

Before subscribing, investors should read the most recent Prospectus and KIID for each fund in which they want to invest. Go to www.bnymellonim.com

The Prospectus and KIID are available in English and in an official language of the jurisdictions in which the Fund is registered for public sale.
