## Fund overview

**Objective:** To grow your investment and provide an average annual net return greater than the FTSE® All-Share Index over a rolling 5-year period by investing in shares of UK companies.

**Investments:** At least 80% of the Fund is invested in shares of UK companies, and non-UK companies which are listed in the UK or which have significant trading activities in the UK. The Fund may also invest in shares of unlisted companies, other funds, cash and deposits.

**Strategy & Environmental, Social and Governance (ESG) criteria:** The Fund is actively managed. The Investment Manager assembles a high-conviction portfolio of companies of any size and stage of development that appear to offer strong earnings growth or dividend prospects, as well as some asset value or recovery ideas. Whilst ESG factors are integrated into the investment process, the Manager retains discretion over investment selection. The Manager actively engages with companies with the aim of influencing behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment (RI) policy framework. Full details of the Fund's Objective & Investment Policy, and the associated RI policy is available on our website and prospectus.

Fund's performance not available between inception date and 30th September 2001.

## Risk measurement (As at 10th Apr 2024)

**Lower risk**

Potentially lower returns

**Higher risk**

Potentially higher returns

The indicator is based on historical data and may not be a reliable indication of the future risk profile. The category shown may change over time. The lowest category does not mean 'risk free'.

## Performance

	Cumulative (%)					Annualised (%)		
	1M	3M	6M	YTD	1Y	5Y	10Y	Since inception
Fund	-0.25	5.61	15.41	5.84	6.54	6.95	7.01	-
Benchmark	2.47	7.55	14.23	6.13	7.50	5.40	5.80	6.64

### Past performance is not a guide to future performance.

Performance basis: Month end returns, Mid to mid, net income reinvested, net of ongoing charges and fees, in the share class currency and net of tax payable by the fund. The figures do not include the effect of any exit or entry charge. The Fund's performance is measured against the FTSE All Share Index.

## Calendar year returns

	2019	2020	2021	2022	2023
Fund net	22.24%	0.95%	22.11%	-5.38%	6.51%
Benchmark	19.17%	-9.82%	18.32%	0.34%	7.92%

	2014	2015	2016	2017	2018
Fund net	0.49%	9.50%	10.65%	13.88%	-12.13%
Benchmark	1.18%	0.98%	16.75%	13.10%	-9.47%

## Cumulative performance (%) (last 5 years, if applicable)

## Rolling annual net performance (%)

## Tracking error (%)\*

	Mar 19 - 20	Mar 20 - 21	Mar 21 - 22	Mar 22 - 23	Mar 23 - 24
FUND	10.95	14.82	5.58	6.91	5.53

### Past performance is not a guide to future performance.

\*The Fund is expected to have an average yearly tracking error of between 3% and 8% when compared to the FTSE All Share index.

The fund breakdown by sector shown in the factsheet excludes cash and equivalents.

Market cap

Rather than using a fixed number of cap stocks, Morningstar uses a flexible system that isn't adversely affected by overall movements in the market. Stocks are divided into seven regions based on their country of domicile, organised in descending order by size and the cumulative capitalisation as a percentage of the total is calculated for each stock. Giant-cap stocks refer to the top 40% of the cumulative capitalisation of each region, large-cap represents the next 30%, mid-cap represents the next 20%, small-cap the next 7% with micro covering the balance.

Top 5 overweights & underweights by security

Security	Fund (%)	Relative to benchmark (%)
Melrose Industries Plc	5.07	+4.72
Sage Group Plc	5.06	+4.57
Intermediate Capital Group Plc	4.31	+4.06

Fund targets

The Index has been selected as a benchmark for performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

Fund risks

Investment Risk

The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

Full information on risks applicable to the Fund are in the Prospectus and the Key Investor Information Document (KIID).

Ongoing Charges

This Share Class integrates Economies of Scale discounts to the Fund Management Fee ("FMF") which is a component of the Ongoing Charge Figure. Consequently, when a Fund reaches a certain size (a pre-defined "trigger point") a discount will automatically apply to the FMF. However, at all other times the FMF will be charged at the rate as set out in the Fund's prospectus. For further details on the Economies of Scale discounts and the trigger points at which they apply, please refer to the Fund's prospectus.

Glossary

Alpha

Indicates the excess return provided by the Fund over the benchmark.

Annualised performance

An annualised total return is the geometric average amount of money earned by an investment each year over a given time period.

Volatility (%)

A measure of the fund's dispersion of returns. A higher volatility implies that a fund's return is spread over a larger range of values whilst a lower volatility implies that a fund's return is spread over a smaller range of values.

Beta

A measure of the fund volatility in comparison to the market. A beta of less than 1 implies that the fund will be less volatile than the market whilst a beta greater than 1 implies the fund is more volatile than the market. As an example, a fund with a beta of 1.2 would be expected to rise to 1.2 if there was a 1 unit rise of the benchmark, or to fall 1.2 units if there was a 1 unit fall in the benchmark.

Correlation (%)

Measures the extent to which the Fund and the benchmark move together, a correlation of 1 indicates the Fund matched the benchmark exactly.

Entry fee

A one-off charge may be taken from your money before it is invested. The charge is usually a percentage of the amount invested and is additional to the price paid for the units/shares. The entry charge is deducted from the investment before units/shares are bought and is also known as the "initial charge".

Exit charge

A one-off charge levied on redemption of units/shares before the proceeds of your investment are paid out. This is also known as a “redemption charge”.

**Fund Management fee**

The fund management fee is a single fixed rate charge to cover the underlying fees, costs and expenses of operating and administering the fund. It accrues daily and is calculated as a percentage of the net asset value of the fund. The underlying fees, costs and expenses covered by the fund management fee may fluctuate.

**Historic yield**

The Historic Yield reflects distributions declared over the past 12 months as a percentage of the share / unit price, on the date shown. This does not include entry charges and investors may be subject to further tax on their distributions.

**Information ratio**

A measure of the manager's ability to generate excess and consistent returns relative to the funds benchmark. The greater the IR, the more consistent a manager is.

**Ongoing charge**

The ongoing charge figure represents the costs you can expect to pay annually based on last year's expenses. The ongoing charges figure is made up of various elements such as the fund management fee, professional fees, audit fees and custody fees. Performance fees (if payable) are not included in this figure.

**Performance fee**

The percentage of any outperformance of the hurdle rate and/or benchmark that will be taken as a performance fee.

**Sharpe ratio**

A measure of the fund's risk-adjusted performance. The greater the fund's Sharpe ratio, the better its historical risk-adjusted performance has been. This ratio is best used to compare a number of funds rather than used in isolation for a single fund.

**Tracking error (%)**

A measure of how closely the fund follows its benchmark. A passive fund should have a tracking error close to zero, while an actively managed fund would normally have a higher tracking error.

**NAV**

NAV is typically an End Of Day valuation using close of market prices to value the individual securities with the portfolio or fund, rolling up to a total portfolio or fund level.
