

Premier Miton UK Multi Cap Income Fund

Sterling class B - Accumulation shares

Objective

The objective of the Fund is to provide an income with capital growth over the long-term, being five years or more. Five years is also the minimum recommended period for holding shares in this Fund. This does not mean that the Fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested. The income will be paid four times a year by dividend distributions.

Fund facts

Fund size	£423.7m
Historic yield	5.08%
Launch dates	Fund - 14 Oct 2011 Share class - 14 Oct 2011

Investment overview

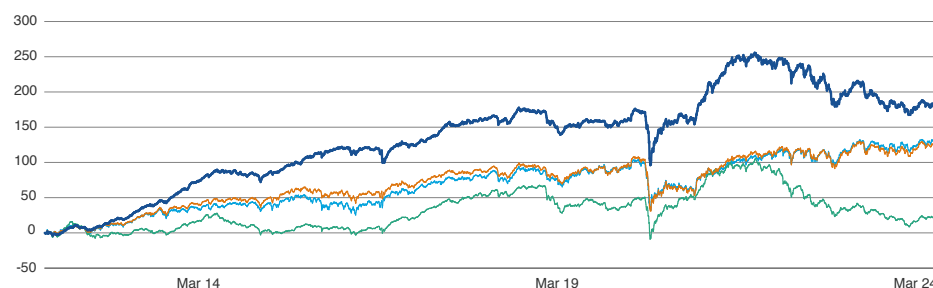

- An emphasis on finding opportunities to provide good and growing income.
- The flexibility to invest in UK companies of all market capitalisations typically with a bias towards medium and smaller sized companies.
- The fund is not constructed or managed against a specific index or benchmark.
- Income paid each quarter as dividend distributions.

Awards and ratings

Awards and ratings are based on past events and are not an indication of future performance. Ratings are not a recommendation. Please see page 4 for further information.

Source: FE Analytics. Based on Sterling class B - Accumulation shares, on a total return basis to 28 March 2024. Performance is shown net of fees with income reinvested. On 30.11.2020, this fund moved from a single pricing basis (mid) to a swing pricing basis.

Risks: The value of investments may fluctuate which will cause fund prices to fall as well as rise and investors may not get the original amount invested. The performance information presented on this page relates to the past. Past performance is not a reliable indicator of future returns. More information about the risks of investment is provided later in this document.

Charges

Ongoing charges figure (OCF)	0.83%
as at 31.05.2023	

The OCF is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the fund (unless these assets are shares of another fund). The OCF includes the annual management charge. Transaction charges will also apply. Please refer to the [total costs & charges document](#) on our website for more information.

Initial charge	5.00%
----------------	-------

The initial charge has been waived by Premier Miton until further notice. However, if you have invested via a financial adviser, the initial charge may still apply and be paid to your adviser.

Charges are taken from capital

As the objective of the fund is to treat the generation of income as either an equal or higher priority than capital growth, the fund's charges will be taken from capital instead of income. This may result in higher levels of income payments but could result in capital erosion or constrain capital growth.

Income

Historic yield	5.08%
----------------	-------

The historic yield reflects distributions declared over the past twelve months as a percentage of the fund price as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

The yield is not guaranteed and will fluctuate.

Payment frequency	Quarterly
-------------------	-----------

Payment dates	30 Apr, 31 Jul, 31 Oct, 31 Jan
---------------	--------------------------------

Ex dividend dates	1 Mar, 1 Jun, 1 Sep, 1 Dec
-------------------	----------------------------

Income distribution (pence per share)

Total income distributions in each of the fund's last 5 financial years.

The dividend amount that is paid each year can go down and up and is not guaranteed

Performance comparators

The Sub-fund's performance may be compared against the following benchmarks (referred to as 'comparator benchmarks'): FTSE All Share Total Return Index and FTSE AIM All Share Index are used as comparators which may assist investors in evaluating the fund's performance against equity returns.

The Sub-fund also uses the IA Equity Income Sector as a comparator as investors may find it useful to compare the performance of the fund with the performance of a group of the fund's peers. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that

represents UK investment managers), to help investors to compare funds with broadly similar characteristics. The Sub-fund is not constrained by the benchmarks and may take positions that differ significantly from the benchmark.

General risks

Reference to any stock or fund is not a recommendation for investment purposes. All types of investment carry a degree of risk. It is possible you could lose some, or all, of the money you invest. The level of risk varies depending on the type of investment. Typically, you are less likely to lose money over the long term from an investment that is considered low risk, although potential returns may also be lower. Investments considered higher risk typically offer greater opportunities for better long-term returns,

though the risk of losing money is also likely to be higher.

When you invest, it is important that you understand the risk to your money and are comfortable with that level of risk. If you are unsure, we would recommend that you consult a financial adviser.

The value of your investment might not keep up with any rise in the cost of living.

You could lose money if financial markets fall.

There is no guarantee that the investment objective of the fund will be achieved.

The levels of taxation that apply to income or capital gains from the fund, including any tax relief that may be available, will depend on your personal tax situation.

Funds with similar objectives may not perform in the same way as they are likely to have different holdings.

Fund performance will be affected by investment decisions made by the fund manager.

Other risks

Some of the main specific risks of investing in this fund are summarised here. Further detail is available in the prospectus for the fund.

Derivative

A contract whose value is based on the change in price of a specific asset or index. When derivatives are used within a fund, it doesn't necessarily increase risk. However, price changes in the underlying asset can translate into big swings in the value of derivatives (up and down), which has a direct effect on the value of the fund.

Equities

Equities (shares) can experience high levels of price fluctuation.

Geographic concentration

Funds that have a strong focus on a particular country or region can carry a higher risk than funds with a more diversified portfolio.

Hedging

A hedge is designed to offset the risk of another investment falling in price. It can also act as a limit on potential gains if the investment that has been hedged increases in value.

High volatility

This fund may experience high volatility due to the composition of the portfolio or the portfolio management techniques used.

Inflation

Higher inflation can lead to some investments falling in value, particularly those with a fixed level of interest, for example government bonds and corporate bonds.

Infrastructure

Investments are often in large-scale projects whose profitability can be affected by supply problems or rising prices for raw materials or natural resources. Changes in the wider economy and government regulation can also have a significant influence.

Interest rate

Changes in central bank interest rates can affect all types of assets, in particular, securities such as government bonds and corporate bonds that generally offer a fixed level of interest. If interest rates go up, the value of a bond may fall, and vice versa.

Legal and tax

The income or capital gains from investments can sometimes be affected by changes in legal and tax regulations or how these rules are applied.

Liquidity

In some instances, for example, when market conditions generally are difficult, holdings in a fund may be difficult to sell and buy at the desired price. The fund value could fall as a result.

Operational

Processes, systems and controls around your investment might fail. The more complex or unusual the investments that the fund holds, the more likely this is to happen. For example, developing markets may have less reliable systems or lower standards of governance than more developed markets.

Property and Real Estate Investment Trusts

Property values can rise and fall sharply depending on the strength of a country's economy.

Put-options

A type of derivative. Put-options can be used for a number of reasons. For example, they can be used to protect the value of an underlying investment or group of investments against a fall in value. They can be thought of as an insurance policy. These can make a fund more volatile from time to time.

Smaller companies

Investment in smaller companies is typically higher risk than investment in larger companies. Shares in smaller companies can experience greater levels of volatility.

Ratings, awards and other information

The methodology and calculations used by the third parties providing the ratings/awards are not verified by Premier Miton Investors and we are unable to accept responsibility for their accuracy, nor should they be relied upon for making an investment decision.

A swing pricing is where the price can swing to either a bid or an offer basis depending on the investment and redemption activity in the fund. This means the investor selling or buying fund shares bears the associated [dis] investment costs and protects the continuing holders in the fund. Performance could be

shown on a combination of bid, mid or offer prices, depending on the period of reporting. MSCI ESG Research LLC's ("MSCI ESG") Fund Metrics and Ratings (the "Information") provide environmental, social and governance data with respect to underlying securities within more than 31,000 multi-asset class Mutual Funds and ETFs globally. Glossary

Accumulation shares

A fund may have accumulation and income shares. If an investor selects this share type, any income generated by the fund is automatically reinvested. The amount of the reinvested income is reflected in the increased price of each accumulation share.

ACD

Authorised Corporate Directors (ACDs) are responsible for the running of an investment fund. They have a duty to act in the best interests of the fund's investors, and ensure that the fund is well managed in line with regulations and with the investment objectives and policies set out in its prospectus.

Annual management charge (AMC)

The yearly fee paid to Premier Miton for managing a fund, expressed as a percentage of your investment. The AMC does not typically change from year to year.

Assets

Different groups of investments such as company shares, bonds, commodities or property.

Bonds (or fixed income)

Types of investments that allow investors to loan money to governments and companies, usually in return for a regular fixed level of interest until the bond's maturity date, plus the return of the original value of the bond at the maturity date. The price of bonds will vary and the investment terms of bonds will also vary.

Capital

Describes financial assets, particularly cash, or other assets, such as shares, owned by a person or organisation.

Capital growth

The increase in the value of an asset or investment over time, measured by its current value compared to its purchase cost.

Dividends

The portion of its capital that a company chooses to return to its shareholders. For a fund or trust, this is the payment of fund's income to its shareholders.

Equities

Another name for shares (or stock) in a company.

Investment Association (IA)

The trade association that represents investment management firms in the UK.

IA sectors

To help with comparisons between the thousands of funds available, funds are categorised into different groups or sectors, organised and reviewed by the Investment Association (IA).

IA UK Equity Income sector

Funds which invest at least 80% in UK equities and which intend to achieve a historic yield on the distributable income in excess of 100% of the FTSE All Share yield at the fund's year end on a 3 year rolling basis and 90% on an annual basis.

Individual Savings Account (ISA)

A type of tax-free scheme, set up by the government, designed to help people make the most of their savings and investments. All income and gains from an ISA investment are exempt from UK Income Tax and Capital Gains Tax. HM Revenue and Customs sets the maximum amounts that

you are allowed to invest into an ISA each tax year.

Ongoing Charges Figure (OCF)

A measure of what it costs to invest in a fund over a year. It includes the fee paid to Premier Miton for the management of the fund (known as the annual management charge), with the remainder covering costs that have to be paid to external companies for other services relating to the ongoing administration and management of a fund, such as the fees paid to the depositary, custodian, regulator, auditor and administrator. The fee is deducted from the value of the fund and reflected in the fund's share price. The OCF is typically calculated once a year and can change from year to year.

Total return

A way of showing how an investment has performed, and is made-up of the capital appreciation or depreciation and includes any income generated by the investment. Measured over a set period, it is expressed as a percentage of the value of the investment at the start of that period.

Yield

The dividend per share divided by the stock's or fund's price per share and expressed as a percentage. The historic yield is the dividend income distributed during the past year and expressed as a percentage of the share price on a particular day.
