FUND MANAGER(S)

Robert McElvanney

Robert joined Santander Asset Management in 2016 as Head of Strategic Investment Solutions. He is a Fellow of the Institute and Faculty of Actuaries.

DEFINITIONS

Pay Date: This is the date on which the fund will reinvest income for eligible investors.

XD Date: This is the date after which new investors who buy shares in the fund will not be eligible to receive the next income reinvestment.

Historic Yield: The sum of income payments announced in the previous 12 months, divided by the fund price as at the date of the factsheet.

Distribution Yield: The amount that may be expected to be distributed over the next 12 months as a percentage of the fund price as at the date of the factsheet. This is based on a snapshot of the portfolio on that day, and not guaranteed.

Underlying Yield: The annualised income (net of expenses) as a percentage of the market value of the fund as at the factsheet date. This is based on a snapshot of the portfolio on that day, and not guaranteed.

Investors may be subject to tax on income payments they receive.

FUND OBJECTIVE AND POLICY

The Fund's objective is to provide capital growth with the potential for income over 5+ years. It aims to outperform (after fees) the Target Benchmark (Target BM) over a rolling 3 year period. Average outperformance will typically not exceed 0.45% per year (not guaranteed). The Fund is actively managed by the Sub-Investment Manager (Sub-IM). It invests globally (up to 15% in non-developed markets) directly, or indirectly via index tracking funds (up to 10%) or derivatives: 40-80% in investment grade Sterling bonds; 20-50% in company shares/equity related securities; and up to 10% in cash. Bonds will be issued by companies, supranationals/non-sovereigns, or the UK Government (can exceed 35%). The Fund regularly (at times extensively) uses derivatives for efficient portfolio management (inc. hedging), and exposure is managed by investing up to 100% in cash like and/or money market instruments. The Sub-IM aims to achieve the objectives with similar volatility and lower drawdown than the Target BM. It uses its systematic rules-based investment process to inform the Fund's efficient asset type exposure (represented by the Target BM). The Process uses 2 strategies. A Risk Parity Strategy (55% of Fund) aims to generate less volatile returns than the Target BM over 5+ years (without leverage or borrowing). A Momentum Strategy (45%) seeks exposure to bonds and shares with more favourable returns over specific periods compared to others in the Target BM. It considers consistency and stability of returns and favours assets with higher and more stable returns. The Sub-IM seeks to efficiently replicate the indices' performance via investment in significantly fewer constituents and in different weights than the indices. The Target BM has been selected as it includes the assets the Fund invests in.

CUMULATIVE PERFORMANCE

5 YEAR CUMULATIVE PERFORMANCE

Max 50% Shares Portfolio
Max 50% Shares Target Benchmark

Share Class Launch Date

18/02/2015

Negative weightings may result from the use of certain financial instruments, including derivatives. Derivatives used to gain or reduce market exposure are shown in the relevant asset class. Derivatives used for risk management (including duration management) are shown alongside cash.

Past performance is not a reliable indicator of future results. The value of investments and revenue from them can fall as well as rise and investors may not get back the amount originally invested. Please note that the value of any foreign investments may be affected by changes in currency exchange rates.

RISK AND REWARD PROFILE

LOWER RISK

HIGHER RISK

Typically lower rewards ← → Typically higher rewards

Risk and Reward Indicator: The Risk and Reward Indicator table shown above demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money, and the lowest risk and reward indicator does not mean risk free. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The value of your investment is not guaranteed and you may get back less than the original amount you invested. Investors should refer to the most up to date Key Investor Information Document available from our website.
