

VT Momentum Diversified Income Fund

28 March 2024

For professional advisors only

INVESTMENT OBJECTIVE & STRATEGY

To generate a high level of income with the prospect of maintaining the real value of capital over the long term, by investing in a multi-asset portfolio managed with a focus on value. The Fund may include directly invested UK equities with a bias towards mid-cap stocks, and overseas equity, fixed income, specialist assets and managed liquidity held through third party funds.

Fund performance is calculated on a total return basis (including distributions), net of all fees and in GBP terms. The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations. The CPI +5% target was introduced in 2020. Past performance is not a guide to future performance.

MONTHLY COMMENTARY

- We introduced luxury goods manufacturer, Burberry, to the portfolio over the month. After facing challenges in the early 2000s due to a shift in its target market and negative associations, Burberry has successfully repositioned itself as a desirable luxury brand, particularly in the UK and globally. Despite setbacks in luxury spending during economic downturns, there has been a notable rebound post-Covid. While Chinese tourism expenditure on luxury goods recovered to around 30% of total global spend in 2023, it still lags behind the pre-Covid level of 40%. Burberry aims to strengthen its position in the luxury segment by adjusting its pricing strategy and improving product quality.
- Over the month, reductions were made to the Morant Wright Fuji Yield Fund. The fund has delivered 51% returns over three years versus an index return of 21%. While Morant Wright remains attractively valued with a forward P/E ratio of 11.5x, its price-to-book ratio has aligned with long-term averages, suggesting diminished undervaluation in Japanese equities. Valuation remains our guiding principle, and so with the Japanese market at its highest price-to-book ratio since 2008, our enthusiasm has tempered as investor sentiment grows.
- Elsewhere, the Ninety One Global Gold Fund was a top contributor to returns over the month, driven by gold reaching an all-time high.

FUND RATINGS

Sources: Bloomberg Finance LP, Morningstar, MGIM, unless otherwise stated.

¹The Fund performance refers to the 'B' Inc share class with the exception of performance prior to 26.03.2012 which is calculated using the 'A' Inc share class, unadjusted for the lower fees of the 'B' Inc share class. ²The Historic Net Yield reflects distributions declared over the past twelve months as a percentage of the unit price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. A portion of the Fund's expenses are charged to Capital. This has the effect of increasing the distribution(s) for the year end constraining the Fund's capital performance to an equivalent extent.

²As at 29.12.2023.

OCF = Ongoing Charge Figure IC = Underlying charges of closed ended funds.

The OCF is the total expenses paid by the Fund, annualised, against its average net asset value. The OCF will fluctuate as the average net assets and costs change.

Important note: The OCF calculation includes synthetic costs from underlying closed ended investments (IC) such as Investment Trusts, which optically increases the costs. For the avoidance of doubt the actual amount charged has not changed, and advisers and investors should refer to the KIID document available [here](#) for the actual fees payable.

All fund performance quoted in this factsheet is NET of all fees.
