OBJECTIVE AND INVESTMENT POLICY

Objective

To grow capital over a five year period.

Investment policy

What the fund invests in

- 80% to 100% in company shares.
- Up to 20% in bonds, cash and near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, money market instruments, and derivatives.

Use of derivatives

The fund may use derivatives for efficient portfolio management purposes to:

- reduce risk
- manage the fund efficiently.

Where the fund invests

- Emerging market countries, including companies in other countries that are headquartered or have a significant part of their activities in emerging market countries. In this context, emerging market countries means countries included in the MSCI Emerging Markets Index and those included in the World Bank definition of developing economies or those countries which are, in the manager's opinion, developing countries.

Industries the fund invests in

- Any

Other limitations specific to this fund

- None

Investment strategy

- The fund is actively managed.
- A proprietary tool called 'SmartGARP' is used as the foundation of the investment process. It screens the financial characteristics of companies by identifying those that are growing faster than the market but are trading on lower valuations than the market.
- The manager selects companies that in aggregate have good 'SmartGARP' characteristics. This tends to mean that the portfolio contains stocks that have lower valuations than the market average, upgrades to profit forecasts, and are under-owned by the investment community, while at the same time benefiting from helpful trends in the wider economy.

Benchmarks

- MSCI EM (Emerging Markets) NR
A widely-used indicator of the performance of emerging markets stockmarkets, in which the fund invests. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.
- IA Global Emerging Markets NR
A group of other asset managers' funds that invest in similar asset types as this fund, collated by the Investment Association. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.

RISK CONSIDERATIONS

To ensure you understand whether this fund is suitable for you, please read the Key Investor Information which is available, along with the fund's Prospectus, from www.artemisfunds.com or www.fundinfo.com.

The fund is exposed to the following risks:

Market volatility risk	The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
Currency risk	The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value.
Charges from capital risk	Where charges are taken wholly or partly out of a fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.
Emerging markets risk	Compared to more established economies, investments in emerging markets may be subject to greater volatility due to differences in generally accepted accounting principles, less governed standards or from economic or political instability. Under certain market conditions assets may be difficult to sell.
China risk	The fund can invest in China A-shares (shares traded on Chinese stock exchanges in Renminbi). There is a risk that the fund may suffer difficulties or delays in enforcing its rights in these shares, including title and assurance of ownership.
