

BSF Emerging Markets Flexi Dynamic Bond Fund
Class D4 Hedged British Pound
BlackRock Strategic Funds

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 30-Apr-2024. All other data as at 14-May-2024.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets.
- The Fund seeks to gain at least 70% of any investment exposure to fixed income (FI) securities and FI-related securities denominated in both emerging market and nonemerging market currencies, issued by, or giving exposure to, governments, government agencies and supranationals (e.g. the International Bank for Reconstruction and Development) of emerging market countries, and companies domiciled or the main business of which is in, emerging market countries.
- This is achieved by investing at least 70% of its total assets in FI securities, FI-related securities, deposits and cash. FI securities include bonds (which may be unrated or have a low credit rating) as well as money market instruments (i.e. debt securities with short term maturities). FI-related securities include financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) which may generate market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Fixed income securities issued or guaranteed by government entities in emerging markets generally experience higher 'Credit Risk' than developed economies.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Comparator¹: 3 Month SOFR Compounded in Arrears

Comparator²: JP Morgan EMBI Global Diversified Index (50%) and JP Morgan GBI-EM Global Diversified Index (50%)

Asset Class : Fixed Income

Fund Launch Date : 12-Jun-2013

Share Class Launch Date : 20-Aug-2014

Fund Base Currency : USD

Share Class Currency : GBP

Use of Income : Distributing

Net Assets of Fund (M) : 1,149.91 USD

Morningstar Category : Other Bond

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

IMPORTANT INFORMATION:

'Negative weightings may result from specific circumstances (including timing differences between trade and settlement dates of securities purchased by the funds) and/or the use of certain financial instruments, including derivatives, which may be used to gain or reduce market exposure and/or risk management. Allocations are subject to change

In the UK and Non-European Economic Area (EEA) countries: this is issued by BlackRock Investment Management (UK) Limited, authorised and regulated by the Financial Conduct Authority. Registered office: 12 Throgmorton Avenue, London, EC2N 2DL. Tel: + 44 (0)20 7743 3000. Registered in England and Wales No. 02020394. For your protection telephone calls are usually recorded. Please refer to the Financial Conduct Authority website for a list of authorised activities conducted by BlackRock.

BSF Funds: This document is marketing material.
