Fund Objective & Policy

The Fund aims to provide income with the prospect of some investment growth over the long term. It looks to outperform the FTSE Actuaries UK Index-Linked Gilts All Stocks Index over rolling 3-year periods, after the deduction of charges. The Fund is actively managed, and invests at least 80% of its assets in index-linked bonds issued by the UK government (index-linked gilts). The Fund may also invest in conventional UK government bonds (gilts), as well as other sterling denominated index-linked bonds. In addition, the Fund may invest in bonds issued by governments (or government agencies) of other developed countries, international organisations, or companies. The bonds selected are usually investment grade and denominated in sterling (or hedged back to sterling, if a different currency). The Fund may also invest in other assets such as cash and deposits, and hold other funds (including funds managed by Columbia Threadneedle companies) when deemed appropriate. The Fund is not permitted to invest in derivatives for investment purposes, but derivatives may be used with the aim of reducing risk or managing the Fund more efficiently. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets. The FTSE Actuaries UK Index-Linked Gilts All Stocks Index is regarded as an appropriate performance measure of sterling-denominated index linked bonds, issued by the UK government. It provides a suitable target benchmark against which Fund performance will be measured and evaluated over time.

Risk & Reward Profile

UCITS SRRI

The Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward. Please see the Key Investor Information Document for more information.

Key Risks

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund invests in securities whose value would be significantly affected if the issuer refused, was unable to or was perceived to be unable to pay.
- Changes in interest rates are likely to affect the Fund's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- The Fund may invest in derivatives (complex instruments linked to the rise and fall of the value of other assets) with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- The fund may exhibit significant price volatility.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the prospectus.

Typical Investor Profile

The Fund may be suitable for investors with an investment horizon of more than five years seeking to secure the value of capital and income from the effects of inflation from a portfolio of UK index linked gilts and other Sterling denominated index linked securities, but who appreciate that this is not guaranteed, that their capital will be at risk and that the value of their investment and any derived income may fall as well as rise. If investors are uncertain if the Fund is suitable for them, they are advised to contact a financial adviser.

Share classes in the table may not be open to all investors, please refer to the Prospectus for further information. Overall impact of costs: Costs and expected returns may increase or decrease as a result of currency and exchange rate fluctuations, if costs are to be paid in another currency than your local currency. The ongoing charges figure (OCF), exit charges (maximum amount to be deducted shown in the table above) and transaction costs show the percentage that may be deducted from your expected returns. The OCF is usually based on the last year's expenses, includes charges such as the Fund's annual management charge and operating costs. Transaction costs displayed are based on a three year average total and are calculated based on FYE Report and Account figures. Where the fund is less than 3 years old the transaction costs are based on proxy and actual costs. All transaction costs are as at 30/04/23. Additional distributor or intermediary fees may not be included. In some cases, the OCF may be based on an estimate of future charges. For a more detailed breakdown please visit [www.columbiathreadneedle.com/fees](http://www.columbiathreadneedle.com/fees).
