

CT Managed Growth Fund

Share Class C Acc

31-Mar-24

Fund manager

Paul Niven

Fund objective and policy

The Fund seeks to provide medium to long term capital growth. The Fund is actively managed. It is not constrained by its comparator benchmark, the IA Flexible Investment sector median, and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition. The Fund aims to achieve its objective by investing mainly in other collective investment schemes and exchange traded funds in order to gain exposure to a mixture of equities and fixed interest securities. The portfolio usually consists of Columbia Threadneedle Funds. Funds of other managers may be included from time to time as appropriate. The equity exposure may include companies anywhere in the world and in any industry sector. The fixed interest exposure may include government and corporate bonds from issuers globally.

Risk warning

The value of your investments and any income from them can go down as well as up and you may not get back the original amount invested. This fund invests principally in units of collective investment schemes. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.
