Multi-Manager Team

Fund objective and policy

The Fund aims to deliver capital growth with some income. The Fund is actively managed and not managed with reference to a benchmark. The allocation to particular asset classes or geographies may vary over time at the manager's discretion. The manager uses a strategic asset allocation model matched to a specific target risk and volatility band (the volatility band is supplied by an external provider). The Fund invests at least 70% in collective investment schemes to obtain exposure to a wide range of asset classes. To reflect the risk profile of the Fund, around 70% of the Fund's exposure will be to UK and global equities, including emerging markets. The remaining exposure will be to UK corporate and government, and global high yield bonds, property & cash.

Risk warning

The value of your investments and any income from them can go down as well as up and you may not get back the original amount invested. This fund invests principally in units of collective investment schemes. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.
