

VT Momentum Diversified Balanced Fund (A)

28 March 2024

For professional advisors only

INVESTMENT OBJECTIVE & STRATEGY

The VT Momentum Diversified Balanced Fund aims to deliver a real return for investors over the medium to long term of CPI +4% net of fees, with anticipated volatility in the range of 6-9%. The Fund aims to operate within the 'lowest medium' risk profile as defined by Distribution Technology, the independent fund rating agency. The Fund will invest across a range of asset classes using third party investment funds, and is classified in the IA Mixed Investment 20-60% Shares sector. The minimum investment horizon for the Fund should be thought of as five years.

FIVE YEAR HISTORICAL CUMULATIVE PERFORMANCE

Sources: Morningstar, Valu-Trac Investment Management, MGIM.

Fund performance is calculated on a total return basis, net of all fees and in GBP terms. The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations. Past performance is not a guide to future performance.

MONTHLY COMMENTARY

- Spirent Communications, a recent addition to our portfolio, announced a recommended cash acquisition by industry peer Viavi, offering a 61% premium to the prior day's closing price. A subsequent offer from Keysight Technologies at 201.5p per share, 15.1% higher than Viavi's initial offer, saw Spirent's shares rise by 91% over the month.
- While Spirent's rapid success is not the norm, ongoing corporate activity in the UK market suggests significant value opportunities remain, with companies initiating share buyback programs and attracting interest from industry and private equity acquirers. We anticipate continued momentum in such activity over the next year.
- Elsewhere, Synthomer rallied 78% over the month as it released encouraging comments around current trading, suggesting there are tentative signs that the chemicals cycle is beginning to turn. Cost saving initiatives and asset disposals are part of management's efforts to deleverage the business, and progression of these in tandem with improved demand over the next few years, means the equity offers very attractive returns at current levels.
- Over the month, reductions were made to the Morant Wright Fuji Yield fund. The fund has delivered 51% returns over three years versus an index return of 21%. While Morant Wright remains attractively valued with a forward P/E ratio of 11.5x, its price-to-book ratio has aligned with long-term averages, suggesting diminished undervaluation in Japanese equities. Valuation remains our guiding principle, and so with the Japanese market at its highest price-to-book ratio since 2008, our enthusiasm has tempered as investor sentiment grows.
- Elsewhere, the Ninety One Global Gold fund was a top contributor to returns over the month, driven by gold reaching an all-time high.

OCF = Ongoing Charge Figure IC = Underlying charges of closed ended funds.

The OCF is the total expenses paid by the Fund, annualised, against its average net asset value. The OCF will fluctuate as the average net assets and costs change.

Important note: The OCF calculation includes synthetic costs from underlying closed ended investments (IC) such as Investment Trusts, which optically increases the costs. For the avoidance of doubt the actual amount charged has not changed, and advisers and investors should refer to the KIID document available [here](#) for the actual fees payable.
