Fund objective and policy

The Fund aims to achieve long-term increase in the value of your investment. The Fund is actively managed. It is not constrained by its comparator benchmark, the EMIX Smaller European Companies NR Index, and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition. The Fund seeks to achieve its objective by investing at least 75% of its total assets in equities of European companies with at least 50% of the total assets invested in smaller companies (companies with a maximum stock exchange capitalisation of €3 billion at the time of purchase). Equity exposure is normally well above the minimum stated level.

Risk warning

Investment in a fund will place the investor's capital at risk and may, in a worst-case scenario, include the risk of total loss. Investments in smaller companies carry a higher degree of risk as their shares may be less liquid and investment values can be volatile. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.

Glossary

Active Engagement Report	We define engagement as dialogue between investors and companies with a focus on encouraging companies to address strategic issues including environmental, social and governance factors. The objective of such dialogue with companies is to reduce risk and support long-term performance. The table sets out, for the fund, the number of companies we have engaged with; the number of countries covered and the individual engagement themes.
Quartile Ranking	A measure of performance where all funds within the sector are ranked and split into 4 groups. The best 25% performing funds are in the first (1) quartile, the next 25% into the second (2) quartile and the worst 25% into the fourth (4) quartile.
