

abrdn UK Value Equity Fund

Institutional Acc GBP

30 April 2024

Objective

To generate growth over the long term (5 years or more) by investing in UK equities (company shares).

Performance Target: To achieve the return of the FTSE 350 ex Investment Trusts (Equally Weighted) Index, plus 3% per annum over rolling five year periods (before charges). There is no certainty or promise that the Performance Target will be achieved.

Performance Comparator: The Investment Association UK All Companies Equity Sector Average. The FTSE 350 ex Investment Trusts (Equally Weighted) Index (the "Index") is a representative index of the UK stock market. The Investment Association UK All Companies Equity Sector Average (the "Sector") is a representative group of investment funds with a focus on UK equities.

Portfolio securities

- The fund will invest at least 70% in UK equities.
- The fund may also invest in other funds (including those managed by abrdn), cash and assets that can be turned into cash quickly.

Risk and reward profile

This indicator reflects the volatility of the fund's share price. See the relevant UCITS Key Investor Information Document (KIID) or PRIIPs Key Information Document (KID) for details

Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested.
- Equity Risk** - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Concentration Risk** - A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.

Management process

- The management team use their discretion (active management) to maintain a concentrated asset mix at sector and company level.
- Their primary focus is on company selection using research techniques to select individual holdings.
- The research process follows a "value" investment approach, focussing on finding companies whose valuation is typically considered to be at a significant discount to the value of the component parts of their business, their sales or their earnings.
- Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the Index.

Derivative usage

- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset.
- Derivative usage for the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to equities.

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents and Prospectus which are available on our website www.abrdn.com The Prospectus also contains a glossary of key terms used in this document.

¹The Historic Yield as at 31/03/2024 reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

²These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

³The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 0.80% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.

The fund is a sub-fund of abrdn OEIC V, an authorised open-ended investment company (OEIC).
