

Pictet - Japanese Equity Opportunities - HI GBP

INVESTMENT OVERVIEW

Objective

To increase the value of your investment.

Reference Index

Topix Net Return (JPY), an index that does not take into account environmental, social and governance (ESG) factors. Used for portfolio composition, risk monitoring, performance objective and performance measurement.

Portfolio Assets

The Compartment mainly invests in equities of companies that are domiciled, or do most of their business, in Japan.

Investment Process

In actively managing the Compartment, the investment manager uses fundamental company analysis to select securities that it believes offer favourable growth prospects at a reasonable price. The investment

manager considers ESG factors a core element of its strategy by adopting a tilted approach which seeks to increase the weight of securities with low sustainability risks and/or to decrease the weight of securities with high sustainability risks, subject to good governance practices. Activities that adversely affect society or the environment are also avoided. Voting rights are methodically exercised and there may be engagement with companies to positively influence ESG practices. For further information, please refer to our exclusion framework in the Responsible Investment policy*, SFDR product category Article 8. The performance of the Compartment is likely to be significantly different from that of the benchmark, because the Investment Manager has significant discretion to deviate from its securities and weightings.

RISK CONSIDERATIONS

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no capital guarantee or asset

protection measures.

The Compartment may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.

- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Sustainability risk:** ESG related risk events or conditions could cause a material negative impact on the value of the investment if they were to occur.

Further information can be found in the prospectus.

For the purposes of this marketing material, “the Fund” means the sub-fund of the fund referred to at the top of page 1 and “the share” designates either “the unit” or “the share”, depending on the legal form of the fund. The promoted fund concerns the acquisition of units or shares in a fund, and not in a given underlying asset such as building or shares of a company, as these are only the underlying assets owned by the fund. This marketing material is issued by the Fund Management Company, Pictet Asset Management (Europe) S.A., a company authorized and regulated by the Luxembourg regulator “Commission de Surveillance du Secteur Financier”. It is neither directed to, nor intended for distribution or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation. It cannot be used as a basis for subscription and does not form part of a contract. The latest version of the fund’s prospectus, Pre-Contractual Disclosures (PCD) when applicable, Key Investor Information Document (KIID), annual and semi-annual reports must be read before investing. Inflation was not taken into account. As a subscription fee calculation example, if an investor invests EUR 1000 in a fund with a subscription fee of 5%, he will pay to his financial intermediary EUR 47.62 on his investment amount, resulting with a subscribed amount of EUR 952.38 in fund shares. In addition, potential account keeping

costs (by your custodian) may reduce the performance. Indices do not include fees or operating expenses and you cannot invest in them.
