

Strategy

The fund primarily invests in emerging market government and corporate bonds, including local and US dollar denominated securities, nominal and inflation linked debt instruments. The fund may achieve exposure to such investments through the use of financial derivative instruments. The fund is managed according to Fidelity's active philosophy and approach to fixed income investing and is not managed against a reference index. The investment team conducts fundamental sovereign and corporate research which helps to formulate investment decisions. Furthermore, the team uses a range of in-house quantitative tools to capture and process information specific to emerging markets. This data is used to assess countries according to their potential investment attractiveness, but all investment decisions for the fund are made with subjective judgement from the Portfolio Managers.

Objectives & Investment Policy

Objective: The fund aims to achieve capital growth over time and provide income.

Investment Policy: The fund invests at least 70% of its assets, in government and corporate debt securities from emerging markets, including those that are denominated in local or globally traded major currencies ('hard currencies'), nominal and inflation linked debt securities. The fund may also invest in money market instruments on an ancillary basis. The fund invests at least 50% of its assets in securities of issuers with favourable environmental, social and governance (ESG) characteristics.

The fund may invest in the following assets according to the percentages indicated: Listed China onshore bonds (directly and/or indirectly): less than 30% (in aggregate) hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos.

The fund may also invest in other subordinated financial debt and preference shares. The fund's exposure to distressed securities is limited to 10% of its assets.

The fund is unconstrained in the amount it may invest in below investment grade securities or issuers.

Investment Process: In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations. The Investment Manager also considers ESG factors when assessing investment risks and opportunities. In determining favourable ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process, the Investment Manager aims to ensure that investee issuers and countries follow good governance practices.

The fund adheres to the Fidelity Sustainable Investing Framework standards. For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

Derivatives and Techniques: The fund may use derivatives for hedging, efficient portfolio management and investment purposes (including derivatives which focus on currency, interest rates, equities and volatility). The fund may use long or short positions.

OCF takes into account annual management charge per year: 0.65%

Share Class Risk and Reward Profile

This risk indicator is taken from the key information document at the relevant month-end. Because it may be updated during a month, please refer to the key information document for the most up-to-date information.

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

Important Information

The value of your investment may fall as well as rise and you may get back less than you originally invested. The use of financial derivative instruments may result in increased gains or losses within the fund. This fund invests in emerging markets which can be more volatile than other more developed markets. The fund may be exposed to the risk of financial loss if a counterparty used for derivative instruments subsequently defaults. The use of derivatives to enhance income may reduce growth potential in certain market conditions. Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner. There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. When interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall. The investment policy of this fund means it can be more than 35% invested in Government and public securities. These can be issued or guaranteed by other countries and Governments. For a full list please refer to the fund's prospectus. The Investment Manager's focus on securities of issuers which maintain favourable ESG characteristics or that are sustainable investments may affect the fund's investment performance favourably or unfavourably in comparison to similar funds without such focus. When referring to sustainability - related aspects of the promoted fund, the decision to invest should take into account all characteristics or objectives of the promoted fund as detailed in the Prospectus. Information on sustainability-related aspects is provided pursuant to SFDR at <https://www.fidelity.lu/sfdr-entity-disclosures>.

Past performance does not predict future returns. Currency hedging is used to substantially reduce the risk of losses from unfavourable exchange rate movements on holdings in currencies that differ from the dealing currency. The investment which is promoted concerns the acquisition of units or shares in a fund, and not in a given underlying asset owned by the fund.

Fund annualised growth	-	-	-	4.7	-5.9	-3.0	-0.9
Index annualised growth	-	-	-	5.3	-3.3	-1.2	0.0

Source of fund performance and volatility and risk measures is Fidelity. Performance is excluding initial charge. Basis: nav-nav with income reinvested, in EUR, net of fees. If you took an initial charge of 5.25% from an investment, this is the equivalent of reducing a growth rate of 6% per annum over 5 years to 4.9%. This is the highest initial charge applicable, if the initial charge you pay is less than 5.25%, the impact on the overall performance will be less. Market indices are sourced from RIMES and other data is sourced from third-party providers such as Morningstar.

*Performance commencement date.

Introduction

This factsheet contains information about the composition of the fund at a particular point in time. It aims to help you understand how the manager has positioned the fund to meet its objectives. Each table shows a different breakdown of the fund's investments. Where data is presented as a percentage of TNA, this stands for Total Net Assets (the value of all the fund's assets after the deduction of any liabilities).

Portfolio Characteristics

	Fund
Distribution Yield (%)	4.5
Effective Duration	7.1
Average Coupon (%)	5.9
Number of Holdings	227
Number of Names	112

Effective Duration

Effective Duration is a measure of sensitivity of the fund value to changes in interest rates. It takes into account all investments in the fund, including derivatives.

Average Coupon (%)

The coupon is the interest rate stated on a bond when it is issued. Average Coupon is the weighted average coupon of bonds held in the portfolio. Derivatives are excluded from the calculation.

Number of Holdings

The number of bonds and derivatives held in the fund. Where the fund invests in another fund, it is counted as one holding. FX (foreign exchange) forwards are excluded. These are forward contracts that allow currency to be bought or sold at an agreed price on a future date.

Number of Names

The total number of individual issuers whose bonds are held in the fund. Since the fund will often hold more than one bond from an issuer, this figure is generally lower than the number of holdings.

Average Credit Rating (% TNA) (including derivatives)

Average Credit Rating (Linear)	BBB
--------------------------------	-----

This is the weighted average of all the bond credit ratings in the fund, expressed using the industry standard letter system. The system is shown in the credit rating table on the right and is ranked in descending order of credit quality. It takes into account all investments in the fund, including derivatives. This measure gives an idea of how risky the fund's bonds are overall: the lower the average credit rating, the riskier the fund.

Credit Rating (% TNA) (excluding derivatives)

	Fund
AAA/Aaa	0.00
AA/Aa	3.03
A	8.29
BBB/Baa	25.77
BB/Ba	23.51
B	8.67
CCC and Below	8.19
Not Rated	3.95
Interest Rate Derivatives	0.00
FX / Derivative P&L	0.37
Cash	18.21
Rounding adjustment	0.01
TOTAL	100.00

For each bond in the fund, Fidelity looks at the rating given by three rating agencies (S&P, Moody's and Fitch) and applies the worst of the two best ratings (commonly known as the Basel method). The AAA/Aaa rating is the highest and indicates the borrower has the lowest probability of defaulting on its debt.

The table above is a categorisation of the fund's individual bonds into their credit ratings. If any derivatives are being used to adjust the credit quality of the fund, these are reflected in the Average Credit Rating on the left.

Interest Rate Derivatives are used to adjust the fund's sensitivity to interest rate changes.

FX / Derivatives P&L (Profit & Loss) is the category that accounts for the collateral required by counterparty companies issuing derivatives held by the fund.

Top Long Exposures By Issuer (% TNA)

	Fund
(SAGB) Republic Of South Africa	8.91
(BNTNF) Nota Do Tesouro Nacional	5.19
(MBONO) United Mexican States	5.10
(CFELEC) Comision Federal De Elec	3.78
(INDOGB) Republic of Indonesia	3.64
(COLTES) Titulos De Tesoreria B	2.63
(THAIGB) THAILAND GOVT 2% 12/17/31	2.40
(CZGB) Czech Republic	2.40
(MGS) Federation of Malaysia	2.21
(PERU) PERU GOVT 7.3% 08/12/33 RGS	1.95

Long positions are created through purchases of bonds or derivatives. Investors benefit if these long positions rise in value.

Credit derivatives relating to any specific issuer are included, but derivatives relating to government bonds and to bond indices are excluded.

Where bonds are issued by different entities within the same corporate group/complex, the aggregated exposure may not be reflected in the data above.

Sector Positioning (% TNA) (excluding derivatives)

	Fund
Treasury	43.88
Quasi / Sov / Supra / Agency	28.72
Agency Mortgages	0.00
Banks & Brokers	2.14
Insurance	0.00
Property	0.07
Other Financials	0.62
Basic Industry	3.37
Capital Goods	0.40
Consumer Cyclical	0.25
Consumer Non Cyclical	0.30
Energy	0.67

Interest Rate Derivatives	0.00
FX / Derivative P&L	0.37
Cash	18.21
Rounding adjustment	0.02
Total	100.00

Quasi / Sov / Supra / Agency are bonds issued by institutions like the European Investment Bank. Covered bonds are backed by cash flows from mortgages or public sector loans. ABS (Asset-backed Securities) / MBS (Mortgage-backed Securities) are backed by specific assets. Index Credit Default swaps can be used to increase or decrease the credit quality of the fund.

ESG Metrics

The factsheet is a snapshot of the portfolio at the date indicated above. ESG ratings distribution may vary over time. Representation of this data is for informational purposes only. If the SFDR classification is shown as 6 below then this fund does not promote environmental or social characteristics nor does it have a sustainable investment objective. If it is shown as 8, the fund promotes environmental or social characteristics. If it is shown as 9, the fund has a sustainable investment objective. Product-specific information can be found on our website at www.fidelityinternational.com

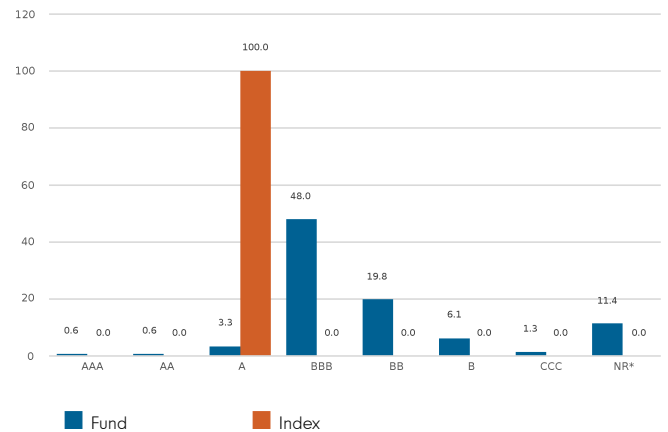

Sustainability Characteristics (31.03.2024)

	Fund	Index
MSCI ESG Fund Rating (AAA-CCC)	BBB	N/R
Weighted Average Carbon Intensity (tCo2e/\$M Revenue)	N/R	N/R
SFDR Classification	8	N/A

N/A - Not Applicable

N/R - Not Rated

MSCI Ratings Distribution % (31.03.2024)

ESG Fund rating based on holding as at 31.01.24 with 85.1% security coverage. Carbon intensity data based on holdings as at 31.03.24 with 7.7% security coverage.

Glossary

MSCI ESG Fund Rating: This shows the fund's ESG rating based on the Quality Scores given to the fund by MSCI. This ranges from AAA, AA (Leader), A, BBB, BB (Average) to B, CCC (Laggard). To be included in MSCI ESG Fund Ratings, 65% of the fund's gross weight must come from covered securities (and excluding cash), the fund's holdings date must be less than one year old and the fund must have at least ten securities.

Weighted Average Carbon Intensity: is calculated as the sum of each portfolio weight multiplied by the Co2e per \$M of Revenue of each holding. This metric provides a snapshot of the fund's exposure to carbon-intensive companies and includes scope 1 and scope 2 carbon emissions. For carbon data, the coverage of underlying securities must be over 50% for data to be shown.

SFDR Classification: Shows the classification given to each fund as part of the EU Sustainable Finance Disclosure Regulation (SFDR). Article 9 funds aim to achieve an ESG outcome and are products with ESG objectives. Article 8 funds focus on promoting ESG characteristics and this must be a primary focus of the product. Article 6 funds integrate sustainability risks (unless specified otherwise in the prospectus) into investment analysis and decision-making, without the funds promoting environmental or social characteristics or having sustainable investments as their objective.

MSCI Ratings Distribution: This shows the percentage distribution of ESG ratings in the fund, based on the Net Asset Value of holdings excluding cash, liquidity funds, derivatives and Exchange Traded Funds.

Information on sustainability-related aspects is provided pursuant to SFDR at <https://www.fidelity.lu/sfdr-entity-disclosures>

SFDR Classification is assigned by Fidelity in line with the EU Sustainable Financial Disclosure Regulation.

Glossary

Volatility & Risk

Annualised volatility: a measure of how variable returns for a fund or comparative market index have been around their historical average (also known as “standard deviation”). Two funds may produce the same return over a period. The fund whose monthly returns have varied less will have a lower annualised volatility and will be considered to have achieved its returns with less risk. The calculation is the standard deviation of 36 monthly returns presented as an annualised number. Volatility for funds and indices are calculated independently of each other.

Relative volatility: a ratio calculated by comparing the annualised volatility of a fund to the annualised volatility of a comparative market index. A value greater than 1 indicates the fund has been more volatile than the index. A value less than 1 shows the fund has been less volatile than the index. A relative volatility of 1.2 means the fund has been 20% more volatile than the index, while a measure of 0.8 would mean the fund has been 20% less volatile than the index.

Sharpe ratio: a measure of a fund’s risk-adjusted performance, taking into account the return on a risk-free investment. The ratio allows an investor to assess whether the fund is generating adequate returns for the level of risk it is taking. The higher the ratio, the better the risk-adjusted performance has been. If the ratio is negative, the fund has returned less than the risk-free rate. The ratio is calculated by subtracting the risk-free return (such as cash) in the relevant currency from the fund’s return, then dividing the result by the fund’s volatility. It is calculated using annualised numbers.

Annualised alpha: the difference between a fund’s expected return (based on its beta) and the fund’s actual return. A fund with a positive alpha has delivered more return than would be expected given its beta.

Beta: a measure of a fund’s sensitivity to market movements (as represented by a market index). The beta of the market is 1.00 by definition. A beta of 1.10 shows that the fund could be expected to perform 10% better than the index in up markets and 10% worse in down markets, assuming all other factors remain constant. Conversely, a beta of 0.85 indicates that the fund could be expected to perform 15% worse than the market return during up markets and 15% better during down markets.

Annualised tracking error: a measure showing how closely a fund follows the index to which it is being compared. It is the standard deviation of the fund’s excess returns. The higher the fund’s tracking error, the higher the variability of fund returns around the market index.

Information ratio: a measure of a fund’s effectiveness in generating excess return for the level of risk taken. An information ratio of 0.5 shows the fund has delivered an annualised excess return equivalent to half the value of the tracking error. The ratio is calculated by taking the fund’s annualised excess return and dividing it by the fund’s tracking error.

R²: a measure representing the degree to which a fund’s return can be explained by the returns of a comparative market index. A value of 1 signifies the fund and index are perfectly correlated. A measure of 0.5 means only 50% of the fund’s performance can be explained by the index. If the R² is 0.5 or lower, the fund’s beta (and therefore its alpha too) is not a reliable measure (due to a low correlation between fund and index).

Ongoing charges

The ongoing charges figure represents the charges taken from the fund over a year. It is calculated at the fund’s financial year end and may vary from year to year. For classes of funds with fixed ongoing charges, this may not vary from year to year. For new classes of funds or classes undergoing corporate actions (eg amendment to annual management charge), the ongoing charges figure is estimated until the criteria are met for an actual ongoing charges figure to be published.

The types of charges included in the ongoing charges figure are management fees, administration fees, custodian and depositary fees and transaction charges, shareholder reporting costs, regulatory registration fees, Directors fees (where applicable) and bank charges.

It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges (including details of the fund’s financial year end), please consult the charges section in the most recent Prospectus.

Independent Assessment

Primary share class: is identified by Morningstar when the analysis calls for only one share class per fund to be in the peer group. It is the share class Morningstar recommends as the best proxy for the portfolio for the relevant market and category/GIF combination. In most cases the share class chosen will be the most retail version (based upon actual management charge, inception date, distribution status, currency and other factors) unless a share class that is less retailed focused has a much longer track record. It is different to the oldest share class data point in that it is on an available for sale level and not all markets will have the oldest share class for sale in that region. The Primary share class is also based on category so each available for sale/category combination for the fund will have its own primary share class.

Important Information

This is a marketing communication. This information must not be reproduced or circulated without prior permission.

Fidelity only offers information on products and services and does not provide investment advice based on individual circumstances, other than when specifically stipulated by an appropriately authorised firm, in a formal communication with the client.

Fidelity International refers to the group of companies which form the global investment management organisation that provides information on products and services in designated jurisdictions outside of North America. This communication is not directed at, and must not be acted upon by persons inside the United States and is otherwise only directed at persons residing in jurisdictions where the relevant funds are authorised for distribution or where no such authorisation is required.

Unless otherwise stated all products are provided by Fidelity International, and all views expressed are those of Fidelity International. Fidelity, Fidelity International, the Fidelity International logo and F symbol are registered trademarks of FIL Limited. FIL Limited assets and resources as at 28/02/2023 - data is unaudited. Research professionals include both analysts and associates. The performance figures shown do not take into account the fund's Initial Charge. If you took an initial charge of 5.25% from an investment, this is the equivalent of reducing a growth rate of 6% per annum over 5 years to 4.9%. This is the highest initial charge applicable, if the initial charge you pay is less than 5.25%, the impact on the overall performance will be less.

Investors/ potential investors can obtain information on their respective rights regarding complaints and litigation on the following link: <https://www.fidelity.lu> in English.

Fidelity Funds "FF" is an open-ended investment company (UCITS) established in Luxembourg with different classes of shares. FIL Investment Management (Luxembourg) S.A. reserves the right to terminate the arrangements made for the marketing of the sub-fund and/ or its shares in accordance with Article 93a of Directive 2009/65/EC and Article 32a of Directive 2011/61/EU. Prior notice of this cessation will be made in Luxembourg.
