The last six months has seen a continuation of a process of progressively reducing the outperforming overweight position to the Far East and Emerging Markets whilst at the same time acting with alacrity to remove underperforming elements from the portfolio, against a general background of our ongoing effort to ensure that the amount paid for underlying management is kept to an absolute minimum. We trust you will agree that these disciplines have begun to bear fruit.

Leverage

In accordance with the Alternative Investment Fund Managers Directive (AIFMD) we are required to disclose the 'leverage' of the Fund. Leverage is defined as any method by which the Fund increases its exposure through borrowing or the use of derivatives. 'Exposure' is defined in two ways: 'gross method; and 'commitment method'. The Fund must not exceed maximum exposures under both methods. 'Gross method' exposure is calculated as the sum of all positions of the Fund (both positive and negative), that is, all eligible assets, liabilities and derivatives, including derivatives held for risk reduction purposes. 'Commitment method' is also calculated as the sum of all positions of the Fund (both positive and negative), but after netting off any derivative and security positions as specified by AIFMD rules.

Therefore, the total amount of leverage calculated as at 31 August 2017 is as follows:

Gross method: 90.99% Commitment method: 90.99%

All investments are units/shares in unit trusts and ICVCs which are authorised or 'recognised' by the FCA with the exception of * which are open ended exchange traded funds and ** which are unregulated ICVCs.

The investments of the Fund have been valued at their fair value at 12 noon on 31 August 2017. Fair value is normally the bid value of each security by reference to quoted prices from reputable sources; that is the market price. If the authorised fund manager believes that the quoted price is unreliable, or if no price exists, a valuation technique is used whereby fair value is the authorised fund manager's best estimate of a fair and reasonable value for that investment. The fair value excludes any element of accrued interest.
