Letter to Shareholders

We are pleased to present the 22nd annual report for UBS (Lux) Fund Solutions formerly UBS ETF covering the reporting period from 1 January 2023 to 31 December 2023. In 2023, Inflation has started to surprise by coming in lower than expected across a number of leading economies. Consumption in developed economies is supported by middle income families, but the increasing interest rate burden and erosion of savings is slowing consumer momentum. As a result purchases of goods are stagnant or slowing, pushing down global trade as a share of the global economy and affecting the exports of manufacturing economies.

The Fund range saw growing assets by EUR 5.6 billion, increasing the total AuM in UBS (Lux) Fund Solutions to EUR 43.6 billion as of 31 December 2023.

In 2023, sales activities were heavily influenced by volatile markets and economic uncertainties. Positive momentum continued to be driven by our Sustainable offering, as these topical ETFs remained front-of-mind with our clients despite the overall challenging environment.

In line with this focus, for two Sub-Funds the indices have been changed to ESG benchmarks, the SFDR classification was changed from article 6 to article 8. As a consequence, the Sub-Fund names also changed:

1) UBS (Lux) Fund Solutions - Factor MSCI EMU Quality UCITS ETF was changed to UBS (Lux) Fund Solutions - Factor MSCI EMU Quality ESG UCITS ETF and

2) UBS (Lux) Fund Solutions - Factor MSCI EMU Prime Value UCITS ETF was changed to UBS (Lux) Fund Solutions - Factor MSCI EMU Prime Value ESG UCITS ETF.

We have further extended our Fixed Income Sustainable offering with the launch of the UBS (Lux) Fund Solutions - Global Green Bond ESG 1-10 UCITS ETF which tracks the Bloomberg MSCI Global Green Bond 1-10 Year Sustainability Select Index.

Furthermore, the demand for tailored index funds increased which focused on the continued expansion of our Index Fund shelf with the launch of the UBS (Lux) Fund Solutions - Sustainable Development Bank Bonds 1-5 Index Fund and the UBS (Lux) Fund Solutions - Sustainable Development Bank Bonds 5-10 Index Fund.

In order to rationalize and simplify the fund offering the UBS (Lux) Fund Solutions - Bloomberg Euro Area Liquid Corporates UCITS ETF has been merged into UBS (Lux) Fund Solutions - Bloomberg MSCI Euro Area Liquid Corporates Sustainable UCITS ETF.

In closing 2023, UBS ETFs remained the 5th largest ETF provider in Europe (by AuM), as markets remained challenging due to the Ukraine and Gaza wars, interest rate movements, and muted flows into sustainable investment solutions. The ETF business of UBS Asset Management finished the year with negative NNM overall, however ending on a positive note, with a strong December that saw the largest trade in business history transacted for a Wholesale client in the UK. The German, Austrian, Nordic, UK, and French markets closed the year with positive NNM contributions, despite considerable local headwinds and market volatility. The remaining core markets saw net outflows, with the Swiss market specifically focusing on integrating Credit Suisse and its offering into the existing AM business landscape. As always, moving forward, the ETF & Index Fund Sales activities will remain focused on clients and best-in-class services, the expansion of our channel reach into the retail space, when possible, the promotion of our sustainable ETF shelf, and the continued optimization of our entire shelf during the integration of existing Credit Suisse solutions. The servicing of our investors in the after-sales space remains essential for the continued success of the business. The ETF and Index Fund offering of UBS AM will continue to drive the growth of the Indexed offering of the asset management division in the coming quarters.

Worries over the health of the banking system on both sides of the Atlantic were the main preoccupation for investors in first quarter of the year. Market sentiment was undermined in early March by the collapse of two mid-sized lenders in the US-Silicon Valley Bank and Signature Bank-forcing US regulators to take urgent action to shore up confidence. That was followed by news a week later that UBS would acquire Credit Suisse, in a move that Swiss regulator FINMA said would "ensure stability for the bank's

Letter to Shareholders (continued)

customers and the financial center". The concerns contributed to a sharp fall in government bond yields, with investors assuming that economic headwinds from the banking system would lead to an early end to central bank rate hikes. Equity markets gained in March and over the first quarter, pointing to confidence that regulators had acted with sufficient speed and force to avert a full-blown banking crisis.

High-quality fixed income had a positive first quarter of the year, bolstered by growing confidence that central banks are nearing the end of the rate hiking cycle. The yield on the 2-year US Treasury, which hit a peak of 5.06% prior to the turmoil in the Banking sector, ended the quarter at 4.03%. The yield on the 10-year US Treasury declined from a high of over 4% to 3.47% by the end of the quarter. The Bloomberg US Treasury Index returned 2.9% in March, for a quarterly gain of 3%. The Bloomberg Pan-European Aggregate gained 1.9% in March and over the quarter. Investment grade credit also performed well, against a backdrop of expectations for slowing economic growth. The Bloomberg US Credit index returned 3.5% in the first quarter.

Global equities rallied in June amid renewed optimism that the Federal Reserve will pull off an economic soft landing along with continued enthusiasm over the potential of artificial intelligence (AI) to boost the technology sector. For the second quarter as a whole, the MSCI All Country World Index gained 6.2%, its third consecutive quarter of positive returns. US stocks were at the forefront of the advance, returning 8.7% for the quarter. The gain in both global and US stocks pushed both more than 20% above the low point of October 2022, meeting a popular definition of a bull market. The rally in equities came despite further indications from central banks that the hiking cycle was not yet over. While the Federal Reserve left rates unchanged at its June meeting, the projections of top officials pointed to a further 50 basis points of tightening. The European Central Bank, Bank of England, Swiss National Bank, Reserve Bank of Australia, and Norway's Norges Bank also tightened policy over the month.

US government bond yields rose in the second quarter as the Fed signalled further policy tightening ahead. The 2-year US Treasury ended the quarter with a more than 1% higher yield than the 10-year bond, the largest inversion since the collapse of Silicon Valley Bank in early March. An inversion has historically preceded recessions. The yield on 2-year US Treasuries rose from 4.06% at the start of the second quarter—to 4.90% at the end. The yield on 10-year US Treasuries climbed from 3.49% at the start of the quarter to 3.82% at the end.

Yields also rose in the Eurozone in June. The 2-year Bund yield climbed from 2.70% at the start of the quarter to 3.27%. The 10-year yield rose from 2.26% at the start of the quarter to 2.40%.

Credit markets delivered a muted performance. US high yield returned 1.6% for the second quarter, while Euro high yield returned 1.7% for the quarter. In both the US and the Eurozone, investment grade corporate credit delivered a broadly flat performance for the quarter.

Global equities and bonds fell in tandem in September, capping off a difficult third quarter for investors. The main driver for losses came from central bank rhetoric and moves, with many making it clear that it remains too soon to declare victory against inflation by firmly signaling an end to monetary tightening. At their latest policy meetings, some central banks raised rates—including the European Central Bank, Sweden's Riksbank, and Norway's Norges Bank. Others—including the Federal Reserve, the Swiss National Bank, and the Bank of England—kept rates on hold. All, however, stressed that more work may need to be done to bring inflation back to their targets. As the threat of a US recession has faded, markets have followed the Fed and scaled back expectations for US rate cuts in 2024 from 150 basis points at the start of August to just 50 basis points at the end of September. Markets have been too aggressive in pricing rate cuts in light of more-resilient-than-expected US economic growth. This contributed to weakness in most major markets. The MSCI All Country World Index fell 3.4% in the third quarter.

Fixed income markets came under pressure in the third quarter, reflecting concerns that the Federal Reserve will keep rates higher for longer. For the third quarter overall, 10-year US government bond yields jumped around 74 basis points. The 89-basis-point rise in the US 30-year yield over the quarter was the largest move since the start of 2009. The yield on the 10-year German bund rose from 2.47% at the start of September to 2.86% at the end of the month. That translated into a negative return of 3.1% on the Bloomberg US Treasury Index and a 0.4% loss on the Pan-European Aggregate in the quarter. Credit also lost ground, with US investment grade and high yield markets producing negative

Letter to Shareholders (continued)

returns. Euro high yield credit was more resilient, delivering a net return of 1.7% in the quarter.

Global equities rallied in the last two months of the year. The strong rise in equity markets partly reflected growing confidence that the US economy is headed for a soft economic landing, with growth slowing sufficiently to permit rate cuts without tipping into recession. Inflation, which remained stubbornly high for much of 2023 in both the US and Europe, decelerated late in the year. This allowed the Federal Reserve to signal a likely end to the fastest series of rate hikes since the 1980s. At its final policy meeting of the year, the Fed laid the groundwork for easing in 2024, with the median forecast by top officials for three 25-basis-point cuts over the course of the year. Global stocks returned 22.2% over the course of the year, with roughly half of this gain coming in the fourth quarter alone. The year-end rally was spearheaded by the US market, which returned 11.7% in the fourth quarter and 4.5% in December.

Fixed Income delivered strong returns in the final quarter of 2023 when evidence of slowing inflation rekindled optimism that the Fed would be able to cut rates in 2024. The Bloomberg US Treasury index returned 5.7% in the fourth quarter and 3.4% in December alone. Credit also experienced widespread rally with spreads tightening across most sectors. In general, low-quality fixed income outperformed high-quality fixed income. Corporate credit outperformed government bonds and high yield outperformed investment grade on excess return basis.

Our Sub-Funds seek to closely track the performance of the underlying market indices. The investment returns of the sub-funds reflected the underlying market environment in 2023 and are shown in the table on the following page, expressed in the base currency of each share class as well as the tracking difference and the tracking error.

We thank you for the confidence you have shown in our family of UBS (Lux) Fund Solutions funds. We look forward to your continued support and to meeting your investment goals in the years ahead.

Sincerely, 12 March 2024

Chairman of the Board of Directors

* Management fee changes took place during the reporting year. Please refer to Note 3 within the notes of the Financial Statements for further details.

**** The ETF Share Class launched during the reporting year. Please refer to Note 3 within the notes of the Financial Statements for further details.

**** The ETF Share Class launched during the reporting year. Please refer to Note 1 within the notes of the Financial Statements for further details.

**** The ETF Share Class launched during the reporting year. Please refer to Note 1 within the notes of the Financial Statements for further details.

**** The ETF Share Class was launched during the reporting year. Therefore, no tracking error (ex post) has been calculated for this ETF Share Class.

(a) Effective 31 July 2023 the index changed from MSCI EMU Prime Value Index (Net Return) (M7CXEMUP) to MSCI EMU Quality ESG Low Carbon Index (Net Return) (NU75296).

(b) Effective 31 July 2023 the index changed from MSCI EMU Quality 100% hedged to CHF Index (Net Return) (M3CXUBJ) to MSCI EMU Quality ESG Low Carbon 100% hedged to CHF Index (Net Return) (H752980).

⁽d) MSCI notes that this Index related to this Sub-Fund and Class was affected by a technical implementation issue from launch until the November 2023 Index Review. This technical issue was resolved as of the 1 December 2023 rebalance and did not undermine the stated objective nor any of the defining characteristics of the index. Additional details are available on Website (News section): https://www.ubs.com/cit/en/assetmanagemen/fabourleven/selfs-news-display-ndp/en-20240/bis-issue-disclosue-msci. htm?/casallD=CAS-ActivitySciencem

¹⁾ The figures relating to the performances of the Sub-Funds reflect the percentages changes of official NAV's per shares (cum dividends) over the reporting period. 29 December was the last official NAV's per

shares unless otherwise stated. The same period was used for the figures relating to the performance of the tracked index.

2) The figures relating to the performances of the index against which an investment fund's performance is measured. The tracking difference is attributable to fund expenses (see "TER"), as well as non

reclaimable withholding taxes and to generation of securities lending income.

The Sub-Fund's portfolio manager aims to achieve a level of tracking accuracy whereby the expected annual difference in returns, after expenses, between the performance of the shares of a Sub-Fund and that Sub-Fund's portfolio manager aims to achieve a level of tracking accuracy whereby the expected annual difference in returns, after expenses, between the performance of the shares of a Sub-Fund and that Sub-Fund's and Sub-Fund's and

exceed 1%, it is expected that the normal annual return differences will be no more than 5%.

3) Tracking error: annualised standard deviation.

The Sub-Fund's portfolio manager aims to keep the tracking error, defined as the volatility of the tracking difference between the performance of the shares of a Sub-Fund and that Sub-Fund's index, below or equal to 1% for ETF Sub-Funds and 1.5% for index Sub-Funds, under normal market conditions. However, exceptional circumstances may arise which cause a Sub-Fund's tracking error to exceed 1%. In relation to those certain Sub-Funds where such accuracy is not practicably possible, it is expected that the annual tracking error will be no more than 3%.

Tracking error calculation:

The tracking error for the last 12 months is calculated as follows: =STANDARD DEVIATION(Monthly Excess calculated each month over a 12-month period)*SQUARE ROOT(12)

4) Total Expense Ratio (TER): this ratio is calculated in accordance with the Asset Management Association Switzerland (AMAS) "Guidelines on the calculation and disclosure of the TER* in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Performance from 1 January 2022 to 31 December 2022

Performance from 1 January 2022 to 31 December 2022 (continued)

- **Management fee changes took place during the reporting year. Please refer to Note 3 within the notes of the 2022 Financial Statements for further details.

 **The ETF Share Class launched during the reporting year. Please refer to Note 1 within the notes of the 2022 Financial Statements for further details.

 **The ETF Share Class was launched less than 12 months before the end of the reporting year. Therefore, no tracking error (ex post) has been calculated for this ETF Share Class.

 ***Usb-Fund's name change took place during the reporting year. Please refer to Note 3 within the notes of the 2022 Financial Statements for further details.

 ****Effective 1 April 2022 the index changed from Bloomberg Euro HQLA 1-5 Years Bond Index (Total Return) (133712EU) to Bloomberg MSCI Euro Area Liquid Corporates 1-5 Year Sustainable Index (Total Return) (13689EU).
- ****** The positive relative performance was mainly driven by the exposure in Russian bonds given that Russia was excluded from the index on 31 March 2022 and that the index market value for all Russian debt was set to zero, reflecting a total return loss (i.e. price and accrued interest set to zero) on index level.
- 1) The figures relating to the performances of the Sub-Funds reflect the percentages changes of official NAV's per shares (cum dividends) over the reporting period. 30 December was the last official NAV's per shares

- 1) The figures relating to the performances of the Sub-Funds reflect the percentages changes of official NAV's per shares (cum dividends) over the reporting period. 30 December was the last official NAV's per shares unless otherwise stated. The same period was used for the figures relating to the performance of the tracked index.
 2) The figures relating to the performances of the index against which an investment fund's performance is measured. The tracking difference is attributable to fund expenses (see "TER"), as well as non reclaimable withholding taxes and to generation of securities lending income.
 The Sub-Fund's portfolio manager aims to achieve a level of tracking accuracy whereby the expected annual difference in returns, after expenses, between the performance of the shares of a Sub-Fund and that Sub-Fund's portfolio manager aims to achieve a level of tracking accuracy whereby the expected annual difference between the performance of the shares of a Sub-Fund and that Sub-Fund's manager aims to keep the tracking error, defined as the volatility of the tracking difference between the performance of the shares of a Sub-Fund and that Sub-Fund's manager aims to keep the tracking error, defined as the volatility of the tracking difference between the performance of the shares of a Sub-Fund and that Sub-Fund's index, below or equal to 1% under normal market conditions. However, exceptional circumstances may arise which cause a Sub-Fund's tracking error to exceed 1%.

 Tracking error calculation:
 The tracking error for the last 12 months is calculated as follows: =STANDARD DEVIATION(Monthly Excess calculated each month over a 12-month period) "SQUARE ROOT(12)

 4) Total Expense Ratio (TER): this ratio is calculated in accordance with the Asset Management Association Switzerland (AMAS) "Guidelines on the calculation and disclosure of the TER" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a perc

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

Performance from 1 January 2021 to 31 December 2021

 **Sub-Fund's name change took place during the reporting year. Please refer to Note 1 within the notes of the 2021 Financial Statements for further details.

 **The ETF Share Class launched during the reporting year. Please refer to Note 1 within the notes of the 2021 Financial Statements for further details.

 ***The ETF Share Class unched during the reporting year. Please refer to Note 1 within the notes of the 2021 Financial Statements for further details.

 ***The ETF Share Class unched during the reporting year. Please refer to Note 1 within the notes of the 2021 Financial Statements for further details.

 ***The ETF Share Class was launched less than 12 months before the end of the reporting year. Therefore, no tracking error (ex post) has been calculated for this ETF Share Class.

 (a) effective 1 December 2021 the index changed from MSCI China ESG Universal 5% Issuer Capped Index (Net Return) (NU723009) to MSCI China ESG Universal Low Carbon Select 5% Issuer Capped Total Return Net (NU738333).
- (b) effective 1 September 2021 the index changed from SBI® Foreign AAA-BBB 1-5 Index (Total Return) (SF15T) to SBI® ESG Foreign AAA-BBB 1-5 Total Return (SESF5T). (c) effective 1 September 2021 the index changed from SBI® Foreign AAA-BBB 5-10 Index (Total Return) (SF51T) to SBI® ESG Foreign AAA-BBB 5-10 Total Return (SEF51T).
- 1) The figures relating to the performances of the Sub-Funds reflect the percentages changes of official NAV's per shares (cum dividends) over the reporting period. 31 December was the last official NAV's per

- 1) The figures relating to the performances of the Sub-Funds reflect the percentages changes of official NAV's per shares (cum dividends) over the reporting period. 31 December was the last official NAV's per shares unless otherwise stated. The same period was used for the figures relating to the performance of the tracked index.

 2) The tracking difference is attributable to fund expenses (see "TER"), as well as non reclaimable withholding taxes and to generation of securities lending income.

 The Sub-Fund's portfolio manager aims to achieve a level of tracking accuracy whereby the expected annual difference in returns, after expenses, between the performance of the shares of a Sub-Fund and that Sub-Fund's protriolio manager aims to keep the tracking accuracy whereby the expected annual difference in returns, after expenses, between the performance of the shares of a Sub-Fund and that Sub-Fund's tracking accuracy to exceed 1%.

 3) Tracking error: annualised standard deviation.

 The Sub-Fund's portfolio manager aims to keep the tracking error, defined as the volatility of the tracking difference between the performance of the shares of a Sub-Fund and that Sub-Fund's index, below or equal to 1% under normal market conditions. However, exceptional circumstances may arise which cause a Sub-Fund's tracking error to exceed 1%.

 Tracking error calculation:

 The tracking error for the last 12 months is calculated as follows: =STANDARD DEVIATION(Monthly Excess calculated each month over a 12-month period) SQUARE ROOT(12)

 4) Total Expense Ratio (TER): this ratio is calculated in accordance with the Asset Management Association Switzerland (AMAS) "Guidelines on the calculation and disclosure of the TER" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming units.

Independent auditor's report

To the Shareholders of UBS (Lux) Fund Solutions 49, Avenue J.F. Kennedy L-1855 Luxembourg

Opinion

We have audited the financial statements of UBS (Lux) Fund Solutions (the "Fund") and of each of its subfunds, which comprise the statement of net assets and the statement of investments as at 31 December 2023 and the statement of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with EU Regulation N° 537/2014, the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the EU Regulation N° 537/2014, the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of the audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matters

How our audit addressed the Key audit matter

Valuation of investment portfolio

Valuation of investment portfolio is considered to be a Key Audit Matter as potential misstatements could have a significant impact as investments comprise virtually all of the Fund's net assets and are the source of income, gains and losses.

- Obtaining an understanding and evaluating the key controls that have been implemented over the valuation process for of all investment securities.
 This includes obtaining the service auditor's report of the Administrator and identifying the key controls in place at the Administrator over the investment valuation process.
- Performing an independent valuation testing for all securities as at 31 December 2023.

Existence of Investment portfolio

Existence of investment portfolio is considered to be a Key Audit Matter as potential misstatements could have a significant impact as investments comprise virtually all of the Fund's net assets and are the source of income, gains and losses.

- Obtaining an understanding and evaluating the key controls that have been implemented over the reconciliation process of all investment securities. This includes obtaining the service auditor's report of the Administrator and identifying the key controls in place at the Administrator over the investment reconciliation process.
- Obtaining independent confirmations of all investment securities held at year-end and investigating any material differences identified to confirm the existence of these securities.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund and of those charged with governance for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and of each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with EU Regulation N° 537/2014, the Law of 23 July 2016 and with the ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with EU Regulation N° 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or
 error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is
 sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
 misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
 collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
 are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.

- Conclude on the appropriateness of the Board of Directors of the Fund use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the
 disclosures, and whether the financial statements represent the underlying transactions and events in a
 manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter.

Report on other legal and regulatory requirements

We have been appointed as "réviseur d'entreprises agréé" at the General Meeting of the Shareholders on 17 April 2023 and the duration of our uninterrupted engagement, including previous renewals and reappointments, is 3 years.

We confirm that the prohibited non-audit services referred to in EU Regulation No 537/2014 were not provided and that we remained independent of the Fund in conducting the audit.

Ernst & Young Société anonyme Cabinet de révision agréé

Isabelle Nicks Luxembourg, 9 April 2024

A separate cash account is opened at the Company level in different currencies (the "Company Cash Account"). The Company Cash Account is held with the Depositary and is solely used for fee and cost processing related to the Sub-Funds and the SICAV. The Company Cash Account is excluded in the regular NAV calculation of the share-classes as it serves as a transit account for the fee and invoice payment process. The Company Cash Account is subject neither to fees nor interest. As at 31 December 2023, the total balance of the Company Cash Account amounted to a position of EUR 7,440,062. This amount is not recognised on the Company's Statement of Net Assets as at 31 December 2023 and is noted here only.

^(**) The Share Class is in the Sub-Fund's base currency.

Note 1 Description of the Fund

UBS (Lux) Fund Solutions, formerly UBS ETF (the "Company") was incorporated in the Grand Duchy of Luxembourg as an open-ended investment company (a "Société d'Investissement à Capital Variable") on 7 September 2001 for an unlimited period under the original name of "Fresco". The Company is governed by the Luxembourg Law of 10 August 1915 on commercial companies, as amended, and by Part I of the Luxembourg Law of 17 December 2010 on undertakings for collective investments, as amended. Accordingly, each Sub-Fund has been established for an unlimited period. The registered office of the company is established at 49, Avenue J.F. Kennedy, L-1855 Luxembourg.

The Company has appointed UBS Fund Management (Luxembourg) S.A. to act as its management company (the "Management Company") with effect as of 1 July 2012.

The Company's Articles of Incorporation (the "Articles") have been published in their original version in the Mémorial, Recueil des Sociétés et Associations (the "Mémorial") dated 11 October 2001. The notarial deed containing the minutes of the extraordinary general meeting held on 29 November 2004 deciding the change of the denomination of the company into UBS ETF has been published in the Mémorial dated 23 December 2004. Additionally, the notarial deed containing the minutes of the extraordinary general meeting held on 27 December 2005, amending the Articles related to the compliance by the Company with the rules of the amended directive 85/611/EEC, has been published in the Mémorial dated 30 January 2006. Finally, the notarial deed containing the minutes of the extraordinary general meeting held on 18 January 2016, amending the Articles as to allow for the issuance of registered shares only has been published in the Mémorial dated 7 April 2016. All bearer shares were converted to registered shares as of 8 February 2016. Moreover, the consolidated version of the Articles has been deposited with the Luxembourg company register. On 7 April 2021 an extraordinary meeting of shareholders was held, amending the Articles, in order to, inter alia, update outdated references to laws and regulations contained and change the name of the Company from "UBS ETF" to "UBS (Lux) Fund Solutions. Articles has been published in the Mémorial dated 30 April 2021. On 22 December 2023 an extraordinary meeting of shareholders was held, amending the Articles, inter alia, update outdated references to laws and regulations. Articles have been published in the Mémorial dated 23 January 2024.

The Company has been established to provide investors with an opportunity to purchase Shares in its Sub-Funds, the investment objective of each of which is to aim to track a specific Index. Each Sub-Fund aims to replicate or track, before expenses, the price and income performance of its Index by holding a portfolio of transferable securities that comprises all or substantially all of the component securities of its Index.

Each Sub-Fund will have Shares listed on one or more Listing Stock Exchanges to be an Exchange Traded Fund ("ETF"). With the exceptions detailed in the prospectus, only institutions qualifying as Authorised Participants are able to subscribe or redeem Shares by delivery of in kind stocks, which mostly are stocks composing the relevant index or versus cash. Those subscriptions and redemptions minimise fund turnover and lower trading expenses. A secondary market is created through such Authorised Participants. Persons who are not Authorised Participants are able to buy or sell Shares in a Sub-Fund on a Listing Stock Exchange at prices which should approximate to the Indicative Intra-Day NAV per Share from other investors in Shares who are acting as market makers or broker/dealers.

In order to allow participants in the secondary market to have access to a real-time estimate of the Daily NAV per Share, an Indicative Intra-Day NAV per Share is calculated by a calculation agent.

For Index Sub-Funds the Board of directors is authorised without limitation to issue shares of any subfund and share class at any time; and shareholders have the right to request, at any time, to have their shares redeemed by the Management Company, under the conditions as described in the prospectus.

The Index Sub-fund must invest its net assets predominantly in shares, transferable securities, money market instruments, units of UCIs, deposits with credit institutions, structured notes listed or dealt in on a Regulated Market, other assets and derivatives detailed in the prospectus.

Note 1 Description of the Fund (continued)

As of 31 December 2023, the following ETF and Index share classes of the following Sub-Funds are available:

Sub-Funds	Share Classes	Initial Dealing Day

The Index Funds are listed on the Luxembourg Stock Exchange.

Note 2 Summary of Significant Accounting Policies

A) Presentation of Financial Statements

The Financial Statements have been prepared in accordance with the generally accepted accounting principles for investment funds in Luxembourg.

Note 2 Summary of Significant Accounting Policies (continued)

B) Main Investment Valuation Principles

Securities listed on a recognised stock exchange or dealt in on any other Regulated Market are valued at their last available closing prices, or, in the event that there are several such markets, on the basis of their last available closing prices on the principal market for the relevant security provided that such closing prices used are normally the same as those used by the Index Provider in calculating the value of each Sub-Fund's Index, but in the event that the last available price does not truly reflect the fair market value of the relevant securities, the value of such securities is defined by the Board of Directors based on the reasonably foreseeable sales price determined prudently and in good faith.

Securities not listed or traded on a stock exchange or not dealt in on another Regulated Market are valued on the basis of the probable sales price determined prudently and in good faith by the Board of Directors.

The liquidating value of futures, forward or options contracts traded on exchanges or on other Regulated Markets are based upon the last available settlement prices of these contracts on exchanges and Regulated Markets on which the particular futures, forward or options contracts are traded by the Company; provided that if a futures, forward or options contract cannot be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract is such value as the Board of Directors may deem fair and reasonable.

C) Treatment of Currencies

The books and records of each Sub-Fund are denominated in the Base Currencies. All assets and liabilities of the Sub-Funds expressed in a currency other than the Base Currency are converted into the Base Currency at the exchange rate prevailing on the principal Regulated Market of such asset on the Dealing Day preceding the Valuation Time.

In order to prepare combined financial statements, financial statements of each Sub-Fund that is not EUR denominated have been converted into EUR at the following exchange rates:

1 EUR = 1.4566 CAD 1 EUR = 0.9297 CHF 1 EUR = 7.8344 CNY 1 EUR = 0.8665 GBP 1 EUR = 1.4571 SGD 1 EUR = 1.1047 USD

D) Security Transactions and Investment Income

The net realised gain or loss on portfolio securities sold or paid out in kind as part of the redemption price for shares is determined on the average cost basis.

The assets of the Company include all stocks, stock dividends, cash dividends and cash distributions receivable by the Company to the extent that information therein is reasonably available to the Company and all interest accrued on any interest-bearing portfolio securities owned by the Company, except to the extent that it is included or reflected in the principal amount of such security. Dividends and interest income are accrued net of related withholding tax.

E) Options and Future Contracts

For the purpose of efficient portfolio management, the Company may enter into future contracts as set forth in the prospectus.

Initial margin deposits made upon entering into future contracts are included in deposits on financial future contracts in the Statement of Net Assets. The unrealised appreciation or depreciation on open future contracts is calculated as the difference between the contract price at trade date and the current day price on the last Business Day of the reporting year or period.

For the purpose of efficient portfolio management, the Company may furthermore purchase and write (sell) options as set forth in the prospectus.

Note 2 Summary of Significant Accounting Policies (continued)

E) Options and Future Contracts (continued)

The risk associated with purchasing an option is that the Company pays a premium whether or not the option is exercised. Additionally, the Company bears the risk of loss of the premium and any change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of portfolio securities acquired through the exercise of call options is increased by premium paid. The proceeds from portfolio securities sold through the exercise of put options are decreased by the premiums paid.

When the Company writes an option the premium received by the Company is recorded as a liability and is subsequently adjusted to the current market value of the option written. The Company records premiums received from written options that expire unexercised on the expiration date as realised gains from option transactions. The difference between the premium and the amount paid on the effective closing purchase transaction, including brokerage commissions, is also treated as a realised gain, or if the premium is less than the amount paid for the closing purchase transaction, as a realised loss.

If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the Company has realised a gain or a loss.

If a written put option is exercised, the premium reduces the cost basis of the security purchased by the Company.

In writing covered options, the Company bears the market risk of unfavourable change in the price of the security underlying the written option. Exercise of an option written by the Company could result in the Company selling or buying a security at a price different from the current market value. Losses from written market index options may be unlimited.

As of 31 December 2023, the Company had no outstanding options contracts and had outstanding future contracts as disclosed in the Schedule of Investments.

F) Forward Foreign Exchange Contracts

As described in the prospectus, each Sub-Fund is authorised to enter into forward foreign exchange contracts in order to protect a Sub-Fund against adverse movement in the value of a Sub-Fund's Base Currency. Each Sub-Fund may enter into contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date as a hedge or cross hedge against either specific transactions or portfolio positions.

The aggregate principal amounts are reflected net in the accompanying Statement of Net Assets if a Sub-Fund intends to settle the contract prior to delivery. All commitments are marked-to-market at the applicable translation rates and any resulting unrealised gains or losses are recorded in each Sub-Fund's financial statements.

Each Sub-Fund/share class records realised gains or losses at the time the forward foreign exchange contract is offset by entry into a closing transaction or extinguished by delivery of the currency. Risks may arise upon entering these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the Base Currency.

As of 31 December 2023, the Company had outstanding forward foreign exchange contracts as disclosed in the Schedules of Investments.

G) Swap Contracts

The Company may enter into swap contracts in which the Company and the counterparty agree to exchange the returns generated by a security, instrument, basket or index thereof for the return generated by another security, instrument, basket or index thereof. The payments made by the

Note 2 Summary of Significant Accounting Policies (continued)

G) Swap Contracts (continued)

Company to the counterparty and vice versa are calculated by reference to a specific security, index, or instrument and an agreed upon notional amount. The relevant indices include, but are not limited to, currencies, fixed interest rates, prices and total return on interest rate indices, fixed income indices and stock indices.

The commitment arising on a swap transaction is equal to the value of the net position under the contract marked to market daily.

As of 31 December 2023, the Company had no outstanding swap contracts.

H) Cross sub-fund investments

As of 31 December 2023, the Company had no cross investment.

Note 3 Agreements

In principle and unless specified in the Prospectus, for all share classes, each Sub-Fund pays a Management Fee which may be different for the various share classes of the Sub-Fund. The Management Fee is allocated by the Company among the Sub-Funds and paid directly, less any fees to the Distributor, if any, by the Company of the Depositary and the Management Company. The Management Company will pay out of its fees the Company administrator and the portfolio manager, each of which is a service provider. The fees for the Distributor, if any, are directly paid by the Company to the distributors.

The Management Fee is a flat fee calculated on the average daily NAV of the Sub-Fund attributable to the relevant class of shares and is payable monthly in arrears.

Francesca Prym, Member, Managing Director, UBS Fund Management (Luxembourg) S.A., Luxembourg, Luxembourg

Miriam Uebel, Member, Executive Director, UBS Asset Management (Deutschland) GmbH, Frankfurt am Main, Germany, resigned 30 October 2023

The Management Company appointed:

UBS Asset Management (UK) Ltd, 5 Broadgate, EC2M 2QS London

UBS Asset Management Switzerland AG, Bahnhofstrasse 45, CH-8098 Zurich

UBS Asset Management (Americas) Inc., UBS Tower, One North Wacker Drive, IL 60606, Chicago.

to act as Portfolio Manager of all the current equity based or fixed income based listed Sub-Funds.

The Portfolio Manager is commissioned to manage the securities portfolio, to meet decisions regarding foreign exchange spot and forward transactions and will instruct all relevant equity transactions in conformity with the specified investment restrictions.

UBS Asset Management Switzerland AG (the "Distributor") is acting as distributor and is responsible for the marketing of the Shares and promoting the establishment and operation of a secondary market in Shares as well as other general marketing activities.

Directors Andreas Haberzeth and Clemens Reuter are employees of UBS Asset Management Switzerland AG which acts as the distributor and as the portfolio manager.

Director Marie Antoinette Petrini is an employee of UBS Asset Management Spain.

Director Josée Lynda Denis is an Independent Board Member.

Director Anke Jager is an Independent Board Member.

Non-Independent Directors of the Company do not receive any additional fees for their role as Directors. Only Independent Directors are entitled to a Director's fee.

UBS Information Agents and UBS as Lending Service Providers

Agents for Swiss residents only

The Company has appointed UBS Fund Management (Switzerland) AG, Aeschenvorstadt 1, CH-4051 Basel as representation agent of the Company in Switzerland.

The Company has appointed UBS Switzerland AG, Bahnhofstrasse 45, CH-8098 Zurich and its branches in Switzerland as paying agent of the Company in Switzerland.

The Prospectus, Packaged Retail and Insurance-based Investment Products (PRIIPs), management regulations, annual and semi-annual reports as well as the portfolio movements of the investment fund mentioned in this publication are available free of charge from UBS Switzerland AG, Bahnhofstrasse 45, CH-8098 Zurich and from UBS Fund Management (Switzerland) AG, Aeschenvorstadt 1, CH-4051 Basel.

Note 3 Agreements (continued)

Agents for UK residents only

The Company has appointed UBS Asset Management (UK) Ltd, 5 Broadgate, EC2M 2QS London as paying agent in the United Kingdom.

Company Administrator, Domiciliary, Depositary, Corporate, Paying Agent, Securities Lending Agent and Transfer Agent

State Street Bank International GmbH, Luxembourg Branch, 49, Avenue J.F. Kennedy, L-1855 Luxembourg, acts as the Company's administrator, domiciliary, depositary, corporate and paying agent in Luxembourg, registrar and transfer agent and is responsible for the general administrative duties involved in administering the Company as prescribed by Luxembourg laws and acting as the transfer agent. These duties include domiciliation, calculation of the Daily NAV per Share and the keeping of the Company's accounts, as well as reporting. Moreover, the administrative agent will be responsible for the issue and redemption of shares in the Company, and all related operations, including processing all subscriptions, redemptions and conversions to or from Authorized Participants.

State Street Bank International GmbH Frankfurt Branch, Solmsstrasse 83, 60486 Frankfurt am Main, Germany acts as the Company's securities lending agent.

Note 4 Taxation

Investors should be aware that tax regulations and their application or interpretation by the relevant taxation authorities can change periodically. The following should not be taken as constituting legal or tax advice. Investors should obtain information and, if necessary, should consult their professional advisers on the possible tax or other consequences of buying, holding, transferring or selling the Shares under the laws of their countries of origin citizenship, residence or domicile.

Under current laws and practice, the Company is not liable to any Luxembourg income tax, nor are dividends paid by the Company liable to any Luxembourg withholding tax.

No stamp duty or other tax is payable in Luxembourg on the issue of shares by the Company.

In general the Directors intend that each Fund available to UK investors will be certified by HM Revenue & Customs in the UK as reporting funds. The reporting fund status will remain in place permanently provided that the annual reporting requirements are satisfied. In broad terms, a "reporting fund" is an offshore fund that meets certain annual reporting requirements to HM Revenue & Customs and its investors. The Directors intend to manage the affairs of the Company so that these annual duties are met and will continue to be met on an ongoing basis.

Each Sub-Fund of the Company is subject to taxation on capital gains, interest and dividends in certain jurisdictions in which each Sub-Fund invests. It is the policy of each Sub-Fund to accrue for such taxes when the dividend is declared or interest is earned. At each valuation date, taxation on unrealised appreciation of securities is accrued for at applicable rates.

The Common Reporting Standard ("CRS") has been developed by the OECD to address the issue of offshore tax evasion on a global basis. Prospective investors will be required to provide to the Fund information about themselves and their tax status prior to investment in order to enable the Fund to satisfy its obligations under CRS, and to update that information on a continuing basis. Prospective investors should note the Fund's obligation to disclose such information to the Luxembourg tax authority. The Luxembourg tax authorities will exchange the information with other tax authorities in participating CRS jurisdictions on an annual basis. Each investor acknowledges that the Fund may take such action as it considers necessary in relation to such investor's holding in the Fund to ensure that any withholding tax suffered by the Fund and any other related costs, interest, penalties and other losses and liabilities arising from such investor's failure to provide the requested information to the Fund is economically borne by such investor.

German equity ratios are calculated and distributed daily.

Note 4 Taxation (continued)

FATCA is the Foreign Account Tax Compliance Act which aims to gather information on overseas accounts held by US Persons and ultimately ensure that the correct amount of tax is paid by US taxpayers.

FATCA enforces reporting obligations on foreign Financial Institutions ("FIs") where these accounts are held.

UBS (Lux) Fund Solutions has been classified as a Sponsored Investment Entity. The sponsoring entity is UBS Fund Management (Luxembourg) S.A. with the GIIN: 9D0VT6.00000.SP.442

Section 871(m) of the US Tax Code requires withholding (up to 30%, depending on whether a treaty applies) on certain financial instruments to the extent that the payments or deemed payments on the financial instruments are contingent upon or determined by reference to U.S.-source dividends. Under these regulations, withholding may be required even in the absence of any actual dividend-related payment or adjustment made pursuant to the terms of the instrument. If the Company becomes subject to a withholding tax as a result of 871(m), the value of the Shares held by the Shareholders may be materially affected. All prospective investors/Shareholders should consult with their own tax advisors regarding the possible implications of 871(m) on an investment in the Company.

DAC6 - Disclosure requirements for reportable cross-border tax arrangements

On 25 June 2018, Council Directive (EU) 2018/822 ("DAC6") entered into force introducing rules regarding the mandatory automatic exchange of information in the field of taxation in relation to reportable cross-border arrangements ("RCBAs"). DAC6 is intended to provide the tax authorities of EU member states with comprehensive and relevant information about potentially aggressive tax-planning arrangements with the aim that this information will enable the authorities to react promptly against harmful tax practices and close loopholes by enacting legislation or by undertaking adequate risk assessments and carrying out tax audits.

The DAC6 obligations apply from 1 July 2020, but may require reporting of arrangements implemented between 25 June 2018 and 30 June 2020. The Directive generally requires EU intermediaries to report to their local tax authorities information about RCBAs, including details of the arrangement as well as identification information about the involved intermediaries and relevant taxpayers, i.e. the persons to whom the RCBA is made available. Subsequently, the local tax authorities exchange the information with the tax authorities of other EU member states. As such, the Fund may be legally required to file information that is within its knowledge, possession or control on any RCBA to the respective tax authorities. This legislation is capable of applying to arrangements that do not necessarily constitute aggressive tax planning.

Note 5 Distribution

Within the limits provided by Luxembourg law, the Board of Directors determines how the income of each Sub-Fund shall be dealt with, and may from time to time declare distributions. The Board of Directors may decide to pay interim dividends in compliance with the conditions set forth by Luxembourg law.

The Company intends for each Sub-Fund to distribute its net income in order to achieve the maximum tracking accuracy of the relevant Index. An income equalization amount will be calculated by reference to the amount of the Daily NAV Per Share representing the accrued net income (or deficit) at the time when a subscription or a redemption in kind is made so that the dividend representing the net investment income corresponds to the net income return of the Index.

For UK dis share classes, as defined in the prospectus, Net Investment Income used for determination of distributions may be different that Net Investment Income as per accounting records due to UK tax reporting requirements.

Note 5 Distribution (continued)

During the period from 1 January 2023 to 31 December 2023, the Company resolved to pay to all shareholders of the Sub-Funds mentioned below dividends which are intended to be paid out of the income net of all costs and expenses incurred by the relevant Sub-Funds during the relevant period as detailed in the following table.

^{*} Dividend was paid in Share Class currency. Currency of Share Class is included in column Sub-Funds (ETF Share Classes).

^{**} Sub-Fund's name changed. Please refer to Note 17 within the notes of the Financial Statements for further details.

^{***} Sub-Funds merged during period. Please refer to Note 17 within the notes of the Financial Statements for further details.

Note 6 Transactions by the Company

As a result of each Sub-Fund typically receiving (or delivering) securities through in kind subscriptions (or redemptions) made by Authorized Participants or versus cash, Sub-Funds will normally not incur high levels of investment transactions. In accordance with the investment policy of each Sub-Fund investment transactions may be entered into periodically by the Company in seeking to achieve the Sub-Fund's Investment Objectives.

Authorized Participants are in general not involved in subscriptions and redemptions in the Index Funds.

Subject to the investment policy established by the Board of Directors, the Portfolio Manager of each Sub-Fund is responsible for the execution of each Sub-Fund's investment transactions and the allocation of the brokerage commissions and will select brokers who will provide the best overall service to the Company. The Company has no obligation to deal with any specific broker or group of brokers in execution of transactions in securities for a Sub-Fund. However, the Company contemplates that a substantial amount of such transactions will be conducted through Authorized Participants or their affiliates or affiliates of the relevant Portfolio Manager; provided always that any such person will endeavor to transact such transactions on a best execution basis. Certain transactions may be subject to a commission or dealer mark-up which may not be the lowest commission or spread available.

Note 7 Securities Lending

Securities lending is the temporary transfer of securities from the lender (UBS (Lux) Fund Solutions) to a third party borrower through an appointed lending agent. In exchange for the lent security the borrower provides collateral, prior to the delivery of securities, and pays a fee over the period of the loan. All loans within the lending program are open and rolled daily such that they can be terminated on demand.

UBS (Lux) Fund Solutions engage in securities lending for selected, physically replicated Funds with the aim of reducing the investor's net costs. Securities lending with UBS (Lux) Fund Solutions is always overcollateralised with at least 105% margin across all asset classes. An additional safeguard, introduced 1 April 2014, is that on loan balances are capped at 50% of each Sub-Fund's AUM except for UBS (Lux) Fund Solutions – EURO STOXX 50 UCITS ETF. For this Sub-Fund on-loan balance is capped at 25% of the sub-fund's AUM.

Effective 4 May 2017, Sub-Funds tracking fixed Income Indices and "ESG", "Paris Aligned" and "Socially Responsible" indexes were not in the security lending program anymore.

In general, lending may only be effected via the Securities Lending Agent (State Street Bank International GmbH, Frankfurt Branch) with the protection of an indemnity against borrower default provided for by State Street Bank and Trust Company. Collateral is held in a depositary account that is ring-fenced from the lending agents balance sheet. Mark to markets take place on a daily basis to ensure that the required margin levels are consistently maintained. Whilst State Street Bank and Trust Company provides a borrower indemnity and carefully selects its underlying list of borrowers an additional level of oversight is provided for by UBS Credit & Risk to structure a bespoke approved borrower list.

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions cannot be sold, re-invested or pledged.

It should be noted that securities lending is subject to a certain risk where the borrower does not return the borrowed securities according to their obligation, and where the value of the collateral provided does not cover the costs of repurchase of the securities. In such cases, State Street Bank and Trust Company, under the terms of the borrower default indemnity, shall cover the cost of purchasing the replacement securities, subject to certain conditions.

Note 7 Securities Lending (continued)

Currently, at least 60 percent of the gross revenue received in the context of securities lending transactions is credited to the relevant sub-fund while UBS Asset Management Switzerland AG receives approximately 20% of the gross revenues to cover the due diligence and 20% of the gross revenues are paid to the Securities Lending Agent as normal compensation for its services in the context of such efficient portfolio management techniques.

UBS Asset Management Switzerland AG receives approximately 20% of the gross revenues to cover for services performed by UBS Asset Management Switzerland AG and the Securities Lending Agent approximately 20% to cover operational costs resulting from the transactions carried out in relation to the securities lending. The services include due diligence on the borrowers (careful borrower selection and monitoring), website disclosure of daily adjusted lending data like daily publication of collateral assets, disclosure in the financial statements. In terms of collateral liquidity checks are performed and collateralization level are monitored.

Note 9 Changes in Investment Portfolio

A copy of the list of changes in the portfolio during the reference period may be obtained free of charge at the depositary, at the paying agents and information agent in Germany, at the Swiss representation office in Switzerland as well as at the Austrian representative and French centralizing and financial agent.

Note 10 For Swiss residents only

The Company has appointed UBS Fund Management (Switzerland) AG, Aeschenvorstadt 1, CH-4051 Basel as representation agent of the Company in Switzerland.

The Company has appointed UBS Switzerland AG, Bahnhofstrasse 45, CH-8098 Zurich and its branches in Switzerland as paying agent of the Company in Switzerland.

The prospectus, Packaged Retail and Insurance-based Investment Products (PRIIPs), management regulations, annual and semi-annual reports as well as the portfolio movements of the investment fund mentioned in this publication are available free of charge from UBS Switzerland AG, Bahnhofstrasse 45, CH-8098 Zurich and from UBS Fund Management (Switzerland) AG, Aeschenvorstadt 1, CH-4051 Basel

Note 11 Commission arrangements

During the year ended 31 December 2023, no commission sharing arrangements (CSAs) were entered into on behalf of UBS (Lux) Fund Solutions.

Note 12 Transaction Fees

Transaction Fees are the brokerage costs and commissions and correspondence fees for transferring securities or investments or other interests.

Note 13 Auditor's Remuneration

The remuneration for all work carried out by the statutory audit firm in respect of the financial year ended 31 December 2023 is as follows:

	EUR
Statutory audit of company financial statements*	317,900**
Separate report in relation to CSSF Circular 21/790*	11,886**
Merger report*	5,499**
Total	335.285

^{*} Inclusive of VAT.

Auditor's out of pocket expenses for the financial year ended 31 December 2023 amounted to EUR Nil.

Note 14 Risk Management

In terms of risk management the Board of Directors of the Management Company decided to adopt the commitment approach as a method of determining the global exposure.

Note 15 Applicable law, place of performance and authoritative language

The Luxembourg District Court is the place of performance for all legal disputes between the shareholders, the Company, the Management Company and the Depositary. Luxembourg law applies. However, in matters concerning the claims of investors from other countries, the Company, Management Company and/or depositary can elect to make themselves subject to the jurisdictions of the

^{**} These numbers are rounded to the nearest euro.

Note 15 Applicable law, place of performance and authoritative language (continued)

countries in which the shares were bought and sold. The English version of the prospectus is the authoritative version. This prospectus may also be translated into other languages. To the extent that there is any inconsistency between the English language prospectus and a version in another language, the English language prospectus will prevail, except, to the extent required by the law of any jurisdiction where the shares are sold.

Note 16 Replication Strategy

Our approach to passive equity investment is to use full replication where possible depending on the characteristics of the benchmark index, the size of portfolio and the client's desired tracking accuracy. In some situations, the portfolio manager may utilize stratified sampling where the portfolio manager deems this to be more efficient.

We typically utilize "stratified sampling" approach for our passive fixed income funds. "Stratified Sampling" is a quantitative based process, bolstered with qualitative input from our portfolio managers, that aims to construct an optimal portfolio that efficiently replicates benchmark risk characteristics with fewer securities that are sufficiently liquid and diversified. However, for certain cases, the optimal portfolio may be achieved by full replication.

In practice, the majority of our Equity ETFs are typically full replication (holding all or virtually all the underlying constituents at weights at or close to the index) and Fixed Income ETFs utilize stratified sampling.

As at 31 December 2023 the following Fixed Income sub-funds utilize full replication:

UBS (Lux) Fund Solutions - Bloomberg EUR Treasury 1-10 UCITS ETF

UBS (Lux) Fund Solutions - Bloomberg Euro Inflation Linked 1-10 UCITS ETF

UBS (Lux) Fund Solutions - Bloomberg Euro Inflation Linked 10+ UCITS ETF

UBS (Lux) Fund Solutions - Bloomberg Japan Treasury 1-3 Year Bond UCITS ETF

UBS (Lux) Fund Solutions – Bloomberg TIPS 1-10 UCITS ETF

UBS (Lux) Fund Solutions - Bloomberg TIPS 10+ UCITS ETF

UBS (Lux) Fund Solutions - Bloomberg US 1-3 Year Treasury Bond UCITS ETF

UBS (Lux) Fund Solutions - Bloomberg US 7-10 Year Treasury Bond UCITS ETF

UBS (Lux) Fund Solutions - Bloomberg US 10+ Year Treasury Bond UCITS ETF

For equity ETFs investing in emerging markets we may make use of stock substitutions such as Depository Receipts or foreign listings where we deem this to be more efficient.

ETF-JDRs of UBS (Lux) Fund Solutions were de-registered in Japan and delisted from the Tokyo Stock Exchange as of 21 July 2023.

Cross Border Directive

On 2nd August 2021, the EU Cross Border Distribution of Funds Directive (EU 2019/1160) came into effect. Notable changes include the new concept of pre-marketing, a de-notification process to cease cross-border fund marketing and changes around the local facilities available to retail investors. Where applicable, UBS Asset Management has amended its internal processes accordingly. As of 1st of August 2019, the EU Regulation on Cross-border Fund Distribution (EU 2019/1156) entered into force, which introduced requirements around marketing communications. On 2nd February 2022, ESMA's guidelines on marketing communications started to apply. UBS updated the content and format of marketing materials and the associated production processes to align to the revised requirements.

Central Securities Depositories Regulation

The European Union has adopted a settlement discipline regime under Regulation (EU) No 909/2014 and the settlement discipline regulatory technical standards with phased compliance dates from February 2022 onwards ("CSDR"). CSDR aims to reduce the number of settlement fails that occur in EEA central securities depositories (CSDs) and to address settlement fails where they occur. The implementation of the CSDR settlement discipline regime for the Company when it enters into in-scope

Note 17 Significant events during the reporting period (continued)

transactions may result in increased operational and compliance costs being borne directly or indirectly by the Company. CSDR may also affect liquidity and increase trading costs associated with relevant securities.

Note 18 Portfolio Turnover Ratio

The Portfolio Turnover Ratio (PTR), expressed as a percentage, reflects the volume of dealing in the Sub-Fund. It is equal to the total of purchases and sales of securities netted against the value of the subscriptions and redemptions, over the average net assets of the Sub-Fund for the year.

The PTR for the year ending 31 December 2023 is as follows:

Sub-Funds	Portfolio

The Company has collateral both bilaterally (State Street Bank and Trust) and via tri-party agents (Bank of New York and JP Morgan Chase). In the case of Bank of New York and JP Morgan Chase agents, State Street Bank and Trust delegates some collateral management duties to these tri-party agents. In all cases the depository has delegated collateral management duties to State Street Bank and Trust. State Street Bank and Trust are then permitted to further delegate responsibilities to tri-party agents if they see fit.

Appendix II - Remuneration Policy (unaudited)

Remuneration disclosure

The Board of Directors of UBS Fund Management (Luxembourg) S.A. (the "Management Company" or the "AIFM") has adopted a remuneration framework (the "Framework") whose objectives are:

on one hand; to ensure that the remuneration framework is in line with the applicable laws and regulations, and more specifically with provisions defined under

- (i) the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment in Transferable Securities as amended from time to time (the "UCITS Law") transposing the UCITS Directive 2009/65/EC (the "UCITS Directive") as amended by Directive 2014/91/EU (the "UCITS V Directive");
- (ii) the Alternative Investment Fund Managers Directive ("AIFMD") 2011/61/EU, transposed into the Luxembourg AIFM Law dated from 12 July 2013, as amended from time to time;
- (iii) the ESMA's guidelines on sound remuneration policies under the UCITS Directive ESMA/2016/575 and ESMA's guidelines on sound remuneration policies under the AIFMD ESMA/2016/579 both published on 14 October 2016;
- (iv) the CSSF Circular 10/437 on Guidelines concerning the remuneration policies in the financial sector issued on 1 February 2010;
- (v) the Directive 2014/65/EU on markets in financial instruments (MiFID II);
- (vi) the Commission Delegated Regulation 2017/565/EC of 25 April 2016 supplementing Directive 2014/65/EU (MiFID II Level 2);
- (vii) Regulation (EU) 2019/2088 of the European parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ("SFDR");
- (viii) the CSSF Circular 23/841, transposing the ESMA Guidelines on certain aspects of the MiFID II remuneration requirements (ESMA 35-43-3565) (MiFID ESMA Guidelines).

and on the other hand, to comply with the UBS Group AG (the "UBS Group") Total Reward Principles.

The Framework is meant not to encourage excessive risk taking, to contain measures to avoid conflicts of interest, to be consistent with, and promote, sound and effective risk management, including sustainability risk where applicable, and to be consistent with the UBS Group business strategy, objectives and values.

More details about the Framework of the Management Company/the AIFM, which describes, but not limited to, how remuneration and benefits are determined, are available at https://www.ubs.com/global/en/asset-management/investment-capabilities/white-labelling-solutions/fund-management-company-services/fml-procedures.html

The Framework is subject to an annual review by the control functions of the Management Company/the AIFM after review and update by the Human Resources department; and is approved by the Board of Directors of the Management Company/the AIFM. Last approval by the Board of Directors took place on 4 October 2023. No material change was made to the Framework.

Application of the requirements and remuneration disclosure

In accordance with the Article 151 of the UCITS Law and Article 20 of the AIFM Law, the Management Company/the AIFM is required to disclose at least annually certain information concerning its remuneration framework and the practices for its Identified Staff.

The Management Company/the AIFM complies with the UCITS Directive/AIFMD principles in a way and to the extent that is appropriate to its size, internal organization and the nature, scope and complexity of its activities.

Considering the total size of funds under management, both UCITS and AIFs although a significant portion is not complex or risky investment, the Management Company/the AIFM judges that the proportionality principle may not be applicable at the level of the company but at the level of the Identified Staff.

By application of the proportionality principle for the Identified Staff, the following requirements on pay-out processes for Identified Staff are not applied:

- The payment of variable remuneration in instruments related mainly to the funds in relation to which they perform their activities;
- Deferral requirements;

Appendix II - Remuneration Policy (unaudited) (continued)

- · Retention periods;
- Incorporation of ex-post risk factors (i.e. malus or clawback arrangements).

The deferral requirements remain however applicable when the employee's total annual compensation is exceeding the threshold defined under the UBS Group Compensation Framework; the variable compensation will be treated in line with the plan rules defined under the UBS Group Compensation Framework.

Remuneration of Management Company/AIFM staff

The aggregate amounts of total remuneration, split into fixed and variable, paid by the Management Company/the AIFM to its staff and its Identified Staff during the financial year ended as at 31 December 2023 are as follows:

EUR 1000	Fixed remuneration	Variable remuneration	Total remuneration	No of beneficiaries
All staff	12,161	2,787	14,948	104
- whereof Identified Staff	6,794	2,159	8,953	44
- thereof Senior Management*	1,937	677	2,614	10
- thereof Other Identified Staff	4,857	1,482	6,339	34

^{*}Senior Management includes the CEO, the Conducting Officers, the Head of Compliance, the Branch Managers and the Independent Director.

Remuneration of the delegates' identified staff

As market or regulatory practice develops the Portfolio Manager(s) may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made and in case of changes to the identified staff and/or in case of change in the number of sub-funds over the year, this may result in disclosures in relation to the Fund not being comparable to the disclosures made in the prior year.

For the year ending 31 December 2022 (last available information), the aggregate total remuneration paid by all delegated Investment Managers to their Identified Staffs in relation to the Fund amounted to EUR 239,679 of which EUR 156,658 represented the variable remuneration (3 beneficiaries).

Sustainable Finance Disclosure Regulation (unaudited)

ESG is an abbreviation for Environmental, Social and Governance (factors). These factors are used to evaluate companies and countries on how advanced they are with respect to sustainability. Once sufficient data on these factors is available, they can be used to assess and compare assets and also to inform the investment process when deciding what assets to buy, hold or sell.

MSCI ESG scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. ESG scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the Environmental, Social and Government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies. In addition, sectoral differences are taken into account through key industry specific ESG issues. This makes the ESG score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time.

Passive ESG: Benchmark selection is driven by portfolio implementation considerations, in particular to closely reflect the financial and ESG objectives of the fund. For passively managed strategies, an ESG benchmark would be selected for the purpose of balancing between reasonable tracking error and high ESG alignment. In order to assess the magnitude of ESG improvements, the fund's ESG performance is also shown against a selected broad market index which closely represents the parent investment universe on which the ESG benchmark is based on.

Weighted Average Carbon Intensity (tons CO2e /USDm sales): The Weighted Average Carbon Intensity (WACI) measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. These metrics are applicable across asset classes, including fixed income, as it's not based on equity ownership basis. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales). Data provider: MSCI ESG Research.

Principal Adverse Impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

As at 31 December 2023 the following Sub-Funds have been classified as Article 6:

UBS (Lux) Fund Solutions - J.P. Morgan USD EM Corporate ESG UCITS ETF.

The sustainability indicators in the annexes like the MSCI ESG Score or the Carbon Intensity (1, 2) emissions indicator for the portfolio, the reference index and the broad market index are calculated as an annual average.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The **EU Taxonomy** is

Product name:	Legal entity identifier
UBS (Lux) Fund Solutions – EURO STOXX 50 ESG UCITS ETF	549300XYJK1EYGOERY56

Environmental and/or social characteristics

Did this fin	Did this financial product have a sustainable investment objective?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 2.50% higher than that of the parent benchmark (EURO STOXX 50® Index (Net Return)) (8.19 vs. 7.99)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

Please note that while the parent benchmark is provided by STOXX Ltd., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

...and compared to previous periods?

The ESG Score (MSCI ESG Score) was 0.37% percent higher as per 31 December 2023 vs 31 December 2022. (8.19 vs 8.16)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental and/or social objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family. Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

The financial product exclude investments in companies which are involved in the following business activities: Controversial Weapons, Tobacco, Thermal Coal and Military Contracting.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

STOXX monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the United Nations Global Compact (UNGC) Principles, the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights (UNGPs), and Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters. their underlying conventions, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

Largest investments	Sector	% Assets	Country
ASML Holding NV	Technology	10.39	Netherlands
TotalEnergies SE	Energy	4.62	France
L'Oreal SA	Non Cyclical Goods & Services	4.55	France
SAP SE	Technology	4.44	German
Schneider Electric SE	Industrials	4.34	France
Allianz SE	Finance	4.07	German
Siemens AG	Industrials	3.97	German
Sanofi	Non Cyclical Goods & Services	3.20	France
Deutsche Telekom AG	Communication Services	3.15	German
Air Liquide SA	Materials	2.87	France
Iberdrola SA	Utility	2.86	Spain
BNP Paribas SA	Finance	2.83	France
Banco Santander SA	Finance	2.54	Spain
AXA SA	Finance	2.34	France
Muenchener Rueckversicherung	Finance	2.13	Germany
	I .		

*Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.97%. The minimum proportion of sustainable investments of the financial product was 76.23%.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
 - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 40.19%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The index is designed to reflect the EURO STOXX 50 Net Return index withstandardized ESG exclusion screens. The EURO STOXX 50 ESG Net Return index is a free float-adjusted market capitalization index which excludes companies that are facing controversies pertaining to ESG issues. The exclusion criteria are described in the methodology of index provider. The ESG rating is generated by Sustainalytics' research and is based on an analysis of each company's management of its environmental, social and governance (ESG) performance. The index is rebalanced on a quarterly basis and may also be rebalanced at other times in order to comply with applicable investment restrictions or to reflect corporate activity such as mergers and acquisitions. At least 90% of the securities have an ESG rating. As the investment policy of the UBS(Lux) Fund Solutions - EURO STOXX 50 ESG UCITS ETF sub-fund is to track the Index, the portfolio management of the sub-fund is passive. As a result, the approach taken in relation to the consideration of ESG criteria is the one taken by STOXX and therefore dependent on the approach and methodology defined by a third party.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was -0.12% lower than that of the reference benchmark (EURO STOXX 50 ESG Net Return Index) (8.19 vs. 8.20).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

Please note that while the parent benchmark is provided by STOXX Ltd., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the reference benchmark?

The ESG Score was -0.12% lower than that of the reference benchmark (EURO STOXX 50 ESG Net Return Index) (8.19 vs. 8.20).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the broad market index?`

The ESG Score was 2.50% higher than that of the parent benchmark (EURO STOXX 50® Index (Net Return)) (8.19 vs. 7.99)

Please note that while the parent benchmark is provided by STOXX Ltd., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier UBS (Lux) Fund Solutions – Factor MSCI 54930008QUA3F2RUU054 EMU Prime Value ESG UCITS ETF

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
• • Yes	• No		
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 84.18% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy		
It made sustainable investments with a social objective:%	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did not make any sustainable investments		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 10.7% higher than that of the parent benchmark (MSCI EMU Index) (8.59 vs. 7.76)

The Weighted average carbon intensity (Scope 1+2) MSCI was 29.88% lower than that of the parent benchmark (MSCI EMU Index) (72.10 vs 102.83)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2023 was the first period the indicators were calculated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI EMU Prime Value ESG Low Carbon Select Index aims to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

Largest investments	Sector	% Assets	Country
Siemens AG	Industrials	4.78	Germany
Schneider Electric SE	Industrials	4.10	France
Allianz SE	Finance	3.97	Germany
Henkel AG & Co KGaA	Non Cyclical Goods & Services	3.59	Germany
Iberdrola SA	Utility	3.47	Spain
Stellantis NV	Cyclical Goods & Services	3.07	Netherlands
Mercedes-Benz Group AG	Cyclical Goods & Services	3.03	Germany
Deutsche Post AG	Industrials	2.97	Germany
Muenchener Rueckversicherungs	Finance	2.90	Germany

*Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.89%. The minimum proportion of sustainable investments of the financial product was 84.18%.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- $\hbox{- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.}\\$
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 39.23%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the MSCI EMU Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in Euro. The Index tracks the total return net dividend performance of large and mid-capitalisation companies across 10 Developed Markets (DM) in the EMU. More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal to that of the reference benchmark (MSCI EMU Prime Value ESG Low Carbon Select Index) (8.59 vs. 8.59).

A combined weighted Scope 1 and 2 average carbon intensity was 0.25% lower than that of the reference benchmark (MSCI EMU Prime Value ESG Low Carbon Select Index) (72.10 vs. 72.28).

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal to that of the reference benchmark (MSCI EMU Prime Value ESG Low Carbon Select Index) (8.59 vs. 8.59).

A combined weighted Scope 1 and 2 average carbon intensity was 0.25% lower than that of the reference benchmark (MSCI EMU Prime Value ESG Low Carbon Select Index) (72.10 vs. 72.28).

How did this financial product perform compared with the broad market index?`

The ESG Score was 10.7% higher than that of the parent benchmark (MSCI EMU Index) (8.59 vs. 7.76)

The Weighted average carbon intensity (Scope 1+2) MSCI was 29.88% lower than that of the parent benchmark (MSCI EMU Index) (72.10 vs 102.83)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier UBS (Lux) Fund Solutions – Factor MSCI 549300I6HWB06KI3BU81 EMU Quality ESG UCITS ETF

Environmental and/or social characteristics

Did this financial product have a	Did this financial product have a sustainable investment objective?		
• • Yes	• No		
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 88.21% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 7.73% higher than that of the parent benchmark (MSCI EMU Index) (8.36 vs. 7.76)

The Weighted average carbon intensity (Scope 1+2) MSCI was 70.41% lower than that of the parent benchmark (MSCI EMU Index) (30.85 vs 102.83)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

2023 was the first period the indicators were calculated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI EMU Quality ESG Low Carbon Select Index aims to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- $\hbox{- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.}\\$
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 40.52%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the MSCI EMU Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in Euro. The Index tracks the total return net dividend performance of large and mid-capitalisation companies across 10 Developed Markets (DM) in the EMU. More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal to that of the reference benchmark (MSCI EMU Prime Value ESG Low Carbon Select Index) (8.36 vs. 8.36).

A combined weighted Scope 1 and 2 average carbon intensity was 0.23% higher than that of the reference benchmark (MSCI EMU Quality ESG Low Carbon Select Index) (30.85 vs. 30.78).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal to that of the reference benchmark (MSCI EMU Quality ESG Low Carbon Select Index) (8.36 vs. 8.36).

A combined weighted Scope 1 and 2 average carbon intensity was 0.23% higher than that of the reference benchmark (MSCI EMU Quality ESG Low Carbon Select Index) (30.85 vs. 30.75).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. How did this financial product perform compared with the broad market index?`

The ESG Score was 7.73% higher than that of the parent benchmark (MSCI EMU Index) (8.36 vs. 7.76)

The Weighted average carbon intensity (Scope 1+2) MSCI was 70.00% lower than that of the parent benchmark (MSCI EMU Index) (30.85 vs 102.83)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: UBS (Lux) Fund Solutions – MSCI China ESG Universal Low Carbon Select UCITS ETF Legal entity identifier 549300PJQCMOYXTY3T68

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
• • Yes	• No		
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 42.32% of sustainable investments		
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in		
	economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 14.52% higher than that of the parent benchmark (MSCI China Index) (5.52 vs. 4.82)

The Weighted average carbon intensity (Scope 1+2) MSCI was 70.02% lower than that of the parent benchmark (MSCI China Index) (66.86 vs. 223.03)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

The ESG Score (MSCI ESG Score) was 7.87% percent higher as per 31 December 2023 vs 31 December 2022. (5.52 vs 5.12)

The combined Scope 1 and 2 average carbon intensity was 16.23% higher as per 31 December 2023 vs 31 December 2022. (66.86 vs 57.52)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI China ESG Universal Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

climate risk & opportunities into their investment strategy and processes. It supports investors

seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family. Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.92%. The minimum proportion of sustainable investments of the financial product was 42.32%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

 $^{^{1}}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
 - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 31.63%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The Index draws its constituents from the MSCI China Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation Chinese companies. The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index. The Index constituent selection is based on research provided by MSCI ESG Research which provides research, ratings and analysis of ESG-related business practice. The Index Provider excludes companies facing controversies (MSCI Red Flag, being an indication of at least one very severe controversy), companies which have a poor ESG Rating (rating of CCC), companies which have revenues in certain business activities (controversial weapons, nuclear weapons, civilian firearms, tobacco, thermal coal, fossil fuel extraction), as well as the top 5% companies by number based on carbon emission intensity levels (being scope 1 and 2 emissions as categorised by the Greenhouse Gas Protocol) up to a cumulative weight of less than 30% of the weight of that sector in the Parent Index. The index also selects companies with low exposure to fossil fuel reserves and ranks the Parent Index constituents in descending order of the potential carbon emissions per dollar of the market capitalization of the company. Securities are than excluded until the cumulative potential carbon emission of the excluded securities reaches 50% of the sum of the potential carbon emission of the constituents of the Parent Index. The free-float adjusted market cap weight is adjusted by a "Combined ESG score" that is a combined product of an "ESG rating score" based on the MSCI ESG Research rating (i.e. 1.5 (AAA, AA), 1 (A, BBB, BB) or 0.5 (B)) and a "ESG Rating trend score" based on the change in a company's ESG rating score against the previous assessment carried out by the Index Provider (i.e.1.2 for an increased rating, 1.0 for a neutral rating and 0.8 for a decreased rating). The Combined ESG Score of a company is determined by multiplying the ESG Rating Score by the ESG Rating Trend Score. This Combined ESG Score is used to re-weight the constituent from the Parent Index by multiplying the Combined ESG Score by the market capitalisation weight of the security in the Parent Index. The maximum weight of any issuer of the Parent Index is capped at 5% in order to construct the Index..

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal to that of the reference benchmark (MSCI China ESG Universal 5% Issuer Capped Index) (5.52 vs. 5.52).

A combined weighted Scope 1 and 2 average carbon intensity was 0.21% lower than that of the reference benchmark (MSCI China ESG Universal 5% Issuer Capped Index) (66.86 vs. 67.00).

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal to that of the reference benchmark (MSCI China ESG Universal 5% Issuer Capped Index) (5.52 vs. 5.52).

A combined weighted Scope 1 and 2 average carbon intensity was 0.21% lower than that of the reference benchmark (MSCI China ESG Universal 5% Issuer Capped Index) (66.86 vs. 67.00).

How did this financial product perform compared with the broad market index?`

The ESG Score was 14.52% higher than that of the parent benchmark (MSCI China Index) (5.52 vs. 4.82)

The Weighted average carbon intensity (Scope 1+2) MSCI was 70.02% lower than that of the parent benchmark (MSCI China Index) (66.86 vs. 223.03)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

]

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: UBS (Lux) Fund Solutions – MSCI 549300V0V31FTXWODA07 Emerging Markets Socially Responsible UCITS ETF

Environmental and/or social characteristics

	Did this financial product have a sustainable investment objective?		
••	Yes	• No	
	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 54.39% of sustainable investments with an environmental objective in economic activities that qualify as	
	sustainable under the EU Taxonomy	environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective	
	It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments	

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 31.02% higher than that of the parent benchmark (MSCI Emerging Markets Index) (7.35 vs. 5.61)

The Weighted average carbon intensity (Scope 1+2) MSCI was 76.50% lower than that of the parent benchmark (MSCI Emerging Markets Index) (74.69 vs. 317.89)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

... and compared to previous periods?

The ESG Score (MSCI ESG Score) was 2.99% percent higher as per 31 December 2023 vs 31 December 2022. (7.35 vs 7.14)

The combined Scope 1 and 2 average carbon intensity was 10.53% higher as per 31 December 2023 vs 31 December 2022. (74.69 vs 67.58)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI Emerging Markets SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Resear ch+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co	Technology	5.14	Taiwan
Infosys Ltd	Technology	3.60	India

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.94%. The minimum proportion of sustainable investments of the financial product was 54.39%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental

objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance. are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

by investee companies, e.g. for a transition to a green economy.

 operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 54.39%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI Emerging Markets Index. The reference benchmark is the MSCI Emerging Markets SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI Emerging Markets SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI Emerging Markets Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.14% lower than that of the reference benchmark (MSCI Emerging Markets SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (7.35 vs. 7.36).

A combined weighted Scope 1 and 2 average carbon intensity was 1.07% higher than that of the reference benchmark (MSCI Emerging Markets SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (74.69 vs. 73.90).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.14% lower than that of the reference benchmark (MSCI Emerging Markets SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (7.35 vs. 7.36).

A combined weighted Scope 1 and 2 average carbon intensity was 1.07% higher than that of the reference benchmark (MSCI Emerging Markets SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (74.69 vs. 73.90).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 31.02% higher than that of the parent benchmark (MSCI Emerging Markets Index) (7.35 vs. 5.61)

The Weighted average carbon intensity (Scope 1+2) MSCI was 76.50% lower than that of the parent benchmark (MSCI Emerging Markets Index) (74.69 vs. 317.89)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

1

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852					
	Product name:	Legal entity identifier			
	UBS (Lux) Fund Solutions – MSCI EMU Socially Responsible UCITS ETF	549300396NMQ603QA011			
Environmental and/or social characteristics					

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 11.98% higher than that of the parent benchmark (MSCI EMU Index) (8.69 vs. 7.76)

The Weighted average carbon intensity (Scope 1+2) MSCI was 71.37% lower than that of the parent benchmark (MSCI EMU Index) (29.44 vs. 102.83)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

... and compared to previous periods?

The ESG Score (MSCI ESG Score) was 1.47% percent lower as per 31 December 2023 vs 31 December 2022. (8.69 vs 8.82)

The combined Scope 1 and 2 average carbon intensity was 29.72% lower as per 31 December 2023 vs 31 December 2022. (29.44 vs 41.89)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI EMU SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by reweighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

*Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 100%. The minimum proportion of sustainable investments of the financial product was 87.85%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste

Enabling activities

management rules.

 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 54.39%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI EMU Index. The reference benchmark is the MSCI EMU SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI EMU SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI EMU Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal to that of the reference benchmark (MSCI EMU SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (8.69 vs. 8.69).

A combined weighted Scope 1 and 2 average carbon intensity was 2.19% higher than that of the reference benchmark (MSCI EMU SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (29.44 vs. 28.81).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal to that of the reference benchmark (MSCI EMU SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (8.69 vs. 8.69).

A combined weighted Scope 1 and 2 average carbon intensity was 2.19% higher than that of the reference benchmark (MSCI EMU SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (29.44 vs. 28.81).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 11.98% higher than that of the parent benchmark (MSCI EMU Index) (8.69 vs. 7.76)

The Weighted average carbon intensity (Scope 1+2) MSCI was 71.37% lower than that of the parent benchmark (MSCI EMU Index) (29.44 vs. 102.83)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

1

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: UBS (Lux) Fund Solutions – MSCI Europe Socially Responsible UCITS ETF Environmental and/or social characteristics Did this financial product have a sustainable investment objective?

Yes No made sustainable It promoted Environmental/Social investments (E/S) characteristics and environmental objective: % while it did not have as its objective a sustainable investment, it had a proportion of 84.45% of sustainable in economic activities that qualify as environmentally sustainable under investments the EU Taxonomy in economic activities that do not with an environmental objective environmentally qualify economic activities that qualify sustainable under the EU Taxonomy environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective made sustainable It promoted E/S characteristics, but did investments with not sustainable anv objective: ___% investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 12.10% higher than that of the parent benchmark (MSCI Europe Index) (8.71 vs. 7.77)

The Weighted average carbon intensity (Scope 1+2) MSCI was 66.92% lower than that of the parent benchmark (MSCI Europe Index) (25.77 vs. 77.91)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

The ESG Score (MSCI ESG Score) was 1.25% percent lower as per 31 December 2023 vs 31 December 2022. (8.71 vs 8.82)

The combined Scope 1 and 2 average carbon intensity was 38.48% lower as per 31 December 2023 vs 31 December 2022. (25.77 vs 41.89)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI SRI Low Carbon Select Indices are designed to represent the performance of companies that have lower carbon exposure than that of the underlying Global Investable Market Index and exclude companies that are inconsistent with specific values based criteria focused on products with high negative social or environmental impact. Additionally, these indexes are designed to represent the performance of companies that have high Environmental, Social and Governance (ESG) ratings relative to their sector peers.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

Largest investments	Sector	% Assets	Country
ASML	Technology	5.12	Netherlands
Roche Holding	Non Cyclical Goods & Services	5.08	Switzerland
Novo Nordisk	Non Cyclical Goods & Services	4.70	Denmark

*Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 100%. The minimum proportion of sustainable investments of the financial product was 84.54%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
 - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 54.26%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI Europe Index. The reference benchmark is the MSCI Europe SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI Europe SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI Europe Index (the "Parent Index"), being an equity index calculated, maintained and

published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.01% lower than that of the reference benchmark (MSCI Europe SRI Low Carbon Select 5% Issuer Capped Index) (8.71 vs. 8.72).

A combined weighted Scope 1 and 2 average carbon intensity was 1.23% lower than that of the reference benchmark (MSCI Europe SRI Low Carbon Select 5% Issuer Capped Index) (25.77 vs. 25.46).

It is not the intention of the sub-fund to have an indicator which is worse than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.01% lower than that of the reference benchmark (MSCI Europe SRI Low Carbon Select 5% Issuer Capped Index) (8.71 vs. 8.72).

A combined weighted Scope 1 and 2 average carbon intensity was 1.23% lower than that of the reference benchmark (MSCI Europe SRI Low Carbon Select 5% Issuer Capped Index) (25.77 vs. 25.46).

It is not the intention of the sub-fund to have an indicator which is worse than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 12.23% higher than that of the parent benchmark (MSCI Europe Index) (8.71 vs. 7.77)

The Weighted average carbon intensity (Scope 1+2) MSCI was 66.92% lower than that of the parent benchmark (MSCI Europe Index) (25.77 vs. 77.91)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

]

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:	Legal entity identifier
UBS (Lux) Fund Solutions – MSCI Japan Socially Responsible UCITS ETF	549300KYJGFWC8UBD468

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
• • Yes	● No		
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39.30% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 18.63% higher than that of the parent benchmark (MSCI Japan Index) (8.66 vs. 7.30)

The Weighted average carbon intensity (Scope 1+2) MSCI was 46.91% lower than that of the parent benchmark (MSCI Japan Index) (42.21 vs. 79.50)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

... and compared to previous periods?

The ESG Score (MSCI ESG Score) was 5.48% percent higher as per 31 December 2023 vs 31 December 2022. (8.66 vs 8.21)

The combined Scope 1 and 2 average carbon intensity was 14.36% higher as per 31 December 2023 vs 31 December 2022. (42.21 vs 36.91)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI Japan SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.94%. The minimum proportion of sustainable investments of the financial product was 39.30%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

directly enable other activities to make a substantial contribution to an environmental objective.

Enabling activities

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities? There were no investments in transitional and enabling activities.
 - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 17.73%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI Japan Index. The reference benchmark is the MSCI Japan SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI Japan SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI Japan Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI Japan SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (8.66 vs. 8.67).

A combined weighted Scope 1 and 2 average carbon intensity was 1.59% higher than that of the reference benchmark (MSCI Japan SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (42.21 vs. 41.55).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI Japan SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (8.66 vs. 8.67).

A combined weighted Scope 1 and 2 average carbon intensity was 1.59% higher than that of the reference benchmark (MSCI Japan SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) (42.21 vs. 41.55).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 18.63% higher than that of the parent benchmark (MSCI Japan Index) (8.66 vs. 7.30)

The Weighted average carbon intensity (Scope 1+2) MSCI was 46.91% lower than that of the parent benchmark (MSCI Japan Index) (42.21 vs. 79.50)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

]

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:	Legal entity identifier
UBS (Lux) Fund Solutions – MSCI Pacific Socially Responsible UCITS ETF	549300RBA5E83JYHLW03

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
• • Yes	• No		
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 41.02% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 17.21% higher than that of the parent benchmark (MSCI Pacific Index) (8.58 vs. 7.32)

The Weighted average carbon intensity (Scope 1+2) MSCI was 49.07% lower than that of the parent benchmark (MSCI Pacific Index) (56.75 vs 111.43)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

... and compared to previous periods?

The ESG Score (MSCI ESG Score) was 1.43% percent higher as per 31 December 2023 vs 31 December 2022. (8.58 vs 8.39)

The combined Scope 1 and 2 average carbon intensity was 31.95% higher as per 31 December 2023 vs 31 December 2022. (56.75 vs 43.01)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI SRI Low Carbon Select Indices are designed to represent the performance of companies that have lower carbon exposure than that of the underlying Global Investable Market Index and exclude companies that are inconsistent with specific values based criteria focused on products with high negative social or environmental impact. Additionally, these indexes are designed to represent the performance of companies that have high Environmental, Social and Governance (ESG) ratings relative to their sector peers.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

Largest in	nvestments	Sector	% Assets	Country
Shin-Etsu C	Chemical Co Ltd	Materials	5.26	Japan

*Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.94%. The minimum proportion of sustainable investments of the financial product was 41.02%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
 - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 20.59%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI Pacific Index. The reference benchmark is the MSCI Pacific SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI Pacific SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI Pacific Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI Pacific SRI Low Carbon Select 5% Issuer Capped Index) (8.58 vs. 8.59).

A combined weighted Scope 1 and 2 average carbon intensity was 2.40% higher than that of the reference benchmark (MSCI Pacific SRI Low Carbon Select 5% Issuer Capped Index) (56.75 vs. 55.42).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI Pacific SRI Low Carbon Select 5% Issuer Capped Index) (8.58 vs. 8.59).

A combined weighted Scope 1 and 2 average carbon intensity was 2.40% higher than that of the reference benchmark (MSCI Pacific SRI Low Carbon Select 5% Issuer Capped Index) (56.75 vs. 55.42).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 17.21% higher than that of the parent benchmark (MSCI Pacific Index) (8.58 vs. 7.32)

The Weighted average carbon intensity (Scope 1+2) MSCI was 49.07% lower than that of the parent benchmark (MSCI Pacific Index) (56.75 vs 111.43)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

]

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

CDRHWLT1S36

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
• • Yes	● No		
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.78% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 5.92% higher than that of the parent benchmark (MSCI Switzerland IMI Extended Index) (8.23 vs. 7.77)

The Weighted average carbon intensity (Scope 1+2) MSCI was 89.57% lower than that of the parent benchmark (MSCI Switzerland IMI Extended Index) (15.59 vs 149.50)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

The ESG Score (MSCI ESG Score) was 4.84% percent higher as per 31 December 2023 vs 31 December 2022. (8.23 vs 7.85)

The combined Scope 1 and 2 average carbon intensity was 11.37% lower as per 31 December 2023 vs 31 December 2022. (15.59 vs 17.59)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI SRI Low Carbon Select Indices are designed to represent the performance of companies that have lower carbon exposure than that of the underlying Global Investable Market Index and exclude companies that are inconsistent with specific values based criteria focused on products with high negative social or environmental impact. Additionally, these indexes are designed to represent the performance of companies that have high Environmental, Social and Governance (ESG) ratings relative to their sector peers.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 56.87%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI Switzerland IMI Extended Index. The reference benchmark is the MSCI Switzerland IMI SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI Switzerland IMI SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI Switzerland IMI Extended Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was -0.48% lower than that of the reference benchmark (MSCI Switzerland IMI SRI Low Carbon Select 5% Issuer Capped Index) (8.23 vs. 8.27).

A combined weighted Scope 1 and 2 average carbon intensity was 1.70% lower than that of the reference benchmark (MSCI Switzerland IMI SRI Low Carbon Select 5% Issuer Capped Index) (15.59 vs. 15.86).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was -0.48% lower than that of the reference benchmark (MSCI Switzerland IMI SRI Low Carbon Select 5% Issuer Capped Index) (8.23 vs. 8.27).

A combined weighted Scope 1 and 2 average carbon intensity was 1.70% lower than that of the reference benchmark (MSCI Switzerland IMI SRI Low Carbon Select 5% Issuer Capped Index) (15.59 vs. 15.86).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 5.92% higher than that of the parent benchmark (MSCI Switzerland IMI Extended Index) (8.23 vs. 7.77)

The Weighted average carbon intensity (Scope 1+2) MSCI was 89.57% lower than that of the parent benchmark (MSCI Switzerland IMI Extended Index) (15.59 vs 149.50)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

]

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
• • Yes	● No			
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.36% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 22.87% higher than that of the parent benchmark (MSCI USA Index) (8.06 vs 6.56)

The Weighted average carbon intensity (Scope 1+2) MSCI was 71.98% lower than that of the parent benchmark (MSCI USA Index) (30.12 vs 107.49)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

... and compared to previous periods?

The ESG Score (MSCI ESG Score) was 1.9% percent higher as per 31 December 2023 vs 31 December 2022. (8.06 vs 7.91)

The combined Scope 1 and 2 average carbon intensity was 11.65% lower as per 31 December 2023 vs 31 December 2022. (30.12 vs 34.09)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI SRI Low Carbon Select Indices are designed to represent the performance of companies that have lower carbon exposure than that of the underlying Global Investable Market Index and exclude companies that are inconsistent with specific values based criteria focused on products with high negative social or environmental impact. Additionally, these indexes are designed to represent the performance of companies that have high Environmental, Social and Governance (ESG) ratings relative to their sector peers.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

*Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 100%. The minimum proportion of sustainable investments of the financial product was 76.36%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

directly enable other activities to make a substantial contribution to an environmental objective.

To comply with the

EU Taxonomy, the

include limitations on emissions and switching to fully renewable power or

low-carbon fuels by

the end of 2035. For

nuclear energy, the

criteria include comprehensive

safety and waste

management rules.

Enabling activities

criteria for fossil gas

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

In fossil gas In i

In nuclear energy

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 36.24%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI USA Index. The reference benchmark is the MSCI USA SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI USA SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI USA Index (the "Parent Index"), being an equity index calculated, maintained and published by

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. international index supplier MSCI® and denominated in USD. ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier UBS (Lux) Fund Solutions – MSCI World Socially Responsible UCITS ETF Legal entity identifier 549300BP1CDRHWLT1S36

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
• • Yes	• No			
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.45% of sustainable investments			
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 20.09% higher than that of the parent benchmark (MSCI World Index) (8.31 vs. 6.92)

The Weighted average carbon intensity (Scope 1+2) MSCI was 73.86% lower than that of the parent benchmark (MSCI World Index) (31.12 vs 119.06)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

The ESG Score (MSCI ESG Score) was 1.59% percent higher as per 31 December 2023 vs 31 December 2022. (8.31 vs 8.18)

The combined Scope 1 and 2 average carbon intensity was 4.04% lower as per 31 December 2023 vs 31 December 2022. (31.12 vs 32.43)

We changed the methodology how we calculated the score. In 2023 we took the average of the year while we used for 2022 data as per year end only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI SRI Low Carbon Select Indices are designed to represent the performance of companies that have lower carbon exposure than that of the underlying Global Investable Market Index and exclude companies that are inconsistent with specific values based criteria focused on products with high negative social or environmental impact. Additionally, these indexes are designed to represent the performance of companies that have high Environmental, Social and Governance (ESG) ratings relative to their sector peers.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 38.50%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to fully replicate the index and to minimize the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The broad market index is the MSCI World Index. The reference benchmark is the MSCI World SRI Low Carbon Select 5% Issuer Capped Index (Net Return). The Index (MSCI World SRI Low Carbon Select 5% Issuer Capped Index (Net Return)) is part of the MSCI Global Socially Responsible (SRI) Index series. The Index draws its constituents from the MSCI World Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation US companies.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI World SRI Low Carbon Select 5% Issuer Capped Index) (8.31 vs. 8.32).

A combined weighted Scope 1 and 2 average carbon intensity was 0.48% higher than that of the reference benchmark (MSCI World SRI Low Carbon Select 5% Issuer Capped Index) (31.12 vs. 30.97).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.12% lower than that of the reference benchmark (MSCI World SRI Low Carbon Select 5% Issuer Capped Index) (8.31 vs. 8.32).

A combined weighted Scope 1 and 2 average carbon intensity was 0.48% higher than that of the reference benchmark (MSCI World SRI Low Carbon Select 5% Issuer Capped Index) (31.12 vs. 30.97).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 20.09% higher than that of the parent benchmark (MSCI World Index) $(8.31 \, vs. \, 6.92)$

The Weighted average carbon intensity (Scope 1+2) MSCI was 73.86% lower than that of the parent benchmark (MSCI World Index) (31.12 vs 119.06)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The **EU Taxonomy** is

Product name:

UBS (Lux) Fund Solutions – Bloomberg

MSCI Euro Area Liquid Corporates 1-5

Year Sustainable UCITS ETF

Legal entity identifier

5493006V3ZY2I2S0MF87

S493006V3ZY2I2S0MF87

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	• No			
It made sustainable investments with an environmental objective: in economic activities the qualify as environmental sustainable under the E Taxonomy in economic activities the not qualify as environme sustainable under the E Taxonomy	sustainable investment, it had a proportion of 69.86% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in with an environmental objective in			
It made sustainable investre with a social objective:				

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 13.60% higher than that of the parent benchmark (Bloomberg Euro Area Liquid Corp 1-5 Years Index) (7.60 vs. 6.69)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

The ESG Score (MSCI ESG Score) was 5.3% percent higher as per 31 December 2023 vs 31 December 2022. (7.60 vs. 7.22)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends tomake, is to contribute to environmental and/or social characteristics the financial product promotes.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. Bloomberg MSCI Sustainability Indices positively screen issuers from existing Bloomberg parent indices based on MSCI ESGRatings, which are a "best in class" assessment of how well an issuer manages ESG risks relative to its industry peer group. The minimum threshold applied to Bloomberg flagship indices is an ESG rating of BBB or better.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/oranti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

principles.https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Resear ch+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

*Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.89%. The proportion of sustainable investments of the financial product was 69.86%.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 39.88%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period? The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund. The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error. The investment manager reviews the index methodology when the product is set up and the

Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The Bloomberg MSCI Euro Area Liquid Corporates 1-5 Year Sustainable Index is a market capitalization weighted index. The Index represents liquid corporate bonds with a time to maturity of at least 1 year, but no more than 5 years, issued by investment grade companies that are consistent with specific values based criteria such as religious beliefs, moral standards or ethical views, and targets companies with high sustainability ratings relative to their sector peers and that are available to investors worldwide. Bonds are screened by age, type, size and sustainability rating. Debt issued by financial and non-financial companies is eligible for the Index so that bonds from issuers of different sectors are in the index including such from the financial industry. The issuer domicile is relevant and only an issuer from the Euro zone member state, as defined by Bloomberg Indices, and issuing in EUR is included. The bonds are valued daily based on Bid prices, however on rebalancing new bonds enter the index at the Ask price and they are removed based on the Bid Price. The index is rebalanced on a monthly basis.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.13% lower than that of the reference benchmark (MSCI Euro Area Liquid Corporates 1-5 Year Sustainable Index) (7.60 vs. 7.61).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?					
•	Yes	• No			
	in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 55.84% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
	It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product

are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 7.82% higher than that of the parent benchmark (Bloomberg MSCI Global Liquid Corporates Bond Index Total Return Index) (7.03 vs. 6.52).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

The ESG Score (MSCI ESG Score) was 1.63% percent higher as per 31 December 2023 vs 31 December 2022. (7.03 vs. 6.92)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental and/or social characteristics the financial product promotes.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. Bloomberg MSCI Sustainability Indices positively screen issuers from existing Bloomberg parent indices based on MSCI ESG Ratings, which are a "best in class" assessment of how well an issuer manages ESG risks relative to its industry peer group. The minimum threshold applied to Bloomberg flagship indices is an ESG rating of BBB or better.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

— — How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/oranti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

*Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.72%. The proportion of sustainable investments of the financial product was 55.84%.

Asset allocation describes the share of investments in

specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 32.86%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Bloomberg MSCI Global Liquid Corporates Sustainable Bond Index tracks the performance of US, Euro Area, UK, and Canada local currency fixed-rate, investment grade corporate debt. The index applies additional liquidity criteria to securities from each of the four markets based on minimum amount outstanding and time from issuance. The index includes issuers with MSCI ESG Ratings of BBB or higher and excludes issuers that are involved in business activities that are restricted according to pre-defined Business Involvement Screens and issuers with a "Red" MSCI ESG Controversy score. The index's four currency weights are rescaled monthly to match the currency exposure of a market value weighted combination of these four currencies in the Global Corporate Index. The index was created in December 2019, with history back-filled to January 1, 2014. The index is rebalanced on a monthly basis.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score is equal to that of the reference benchmark (Bloomberg MSCI Global Liquid Corporates Sustainable Bond Index) (7.03 vs. 7.03).

How did this financial product perform compared with the reference benchmark?

The ESG Score is equal to that of the reference benchmark (Bloomberg MSCI Global Liquid Corporates Sustainable Bond Index) (7.03 vs. 7.03).

How did this financial product perform compared with the broad market index?`

The ESG Score was 7.82% higher than that of the parent benchmark (Bloomberg MSCI Global Liquid Corporates Bond Index Total Return Index) (7.03 vs. 6.52).

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

]

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: UBS (Lux) Fund Solutions – Bloomberg MSCI US Liquid Corporates Sustainable UCITS ETF Legal entity identifier 549300BP4JBCNGDTWW69

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 7.29% higher than that of the parent benchmark (Bloomberg MSCI US Liquid Corporates Total Return Index) (6.77 vs. 6.31)

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

...and compared to previous periods?

The ESG Score (MSCI ESG Score) was 3.52% percent higher as per 31 December 2023 vs 31 December 2022. (6.77 vs. 6.54)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental and/or social characteristics the financial product promotes.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. Bloomberg MSCI Sustainability Indices positively screen issuers from existing Bloomberg parent indices based on MSCI ESG Ratings, which are a "best in class" assessment of how well an issuer manages ESG risks relative to its industry peer group. The minimum threshold applied to Bloomberg flagship indices is an ESG rating of BBB or better.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Assessment of good governance practices of the investee companies are performed by the index provider.

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities? There were no investments in transitional and enabling activities.
 - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 37.83%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Portfolio Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The Portfolio Manager reviews the index methodology when the product is set up and the Indexprovider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The designated index (Bloomberg MSCI US Liquid Corporates Sustainable Index) is a market capitalization weighted index. The Index represents liquid corporate bonds, issued by investment grade companies that are consistent with specific values-based criteria such

as religious beliefs, moral standards or ethical views, and targets companies with high sustainability ratings relative to their sector peers and that are available to investors worldwide. Bonds are screened by age, type, size and sustainability rating. Debt issued by financial and non-financial companies is eligible for the Index so that bonds from issuers of different sectors are in the index including such from the financial industry. The issuer domicile is relevant and only an issuer from the USA, as defined by Bloomberg Indices, and issuing in USD is included. The bonds are valued daily based on Bid prices, however on rebalancing new bonds enter the index at the Ask price and they are removed based on the Bid Price. The index is rebalanced on a monthly basis.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.44% lower than that of the reference benchmark (Bloomberg MSCI US Liquid Corporates Sustainable Index) (6.77 vs. 6.80).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

Sustainability indicators measure how the environmental or social characteristics promoted by the

financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 6.92% higher than that of the parent benchmark (Bloomberg US Liquid Corporates 1-5 Year Index) (6.64 vs. 6.21).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

... and compared to previous periods?

The ESG Score (MSCI ESG Score) was 3.98 % percent lower as per 31 December 2023 vs 31 December 2022 (6.64 vs. 6.92).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental and/or social characteristics the financial product promotes.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. Bloomberg MSCI Sustainability Indices positively screen issuers from existing Bloomberg parent indices based on MSCI ESG Ratings, which are a "best in class" assessment of how well an issuer manages ESG risks relative to its industry peer group. The minimum threshold applied to Bloomberg flagship indices is an ESG rating of BBB or better.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

— — How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/oranti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

Largest investments	Sector	% Assets*	Country
Morgan Stanley	Finance	4.92	USA
Goldman Sachs Group Inc	Finance	4.90	USA

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.22%. The proportion of sustainable investments of the financial product was 45.70%.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental

objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities? There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 29.41%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The Bloomberg MSCI US Liquid Corporates 1-5 Year Sustainable Index is a market capitalization weighted index. The Index represents liquid corporate bonds with a time to maturity of at least 1 year, but no more than 5 years, issued by investment grade companies that are consistent with specific values-based criteria such as religious beliefs, moral standards or ethical views, and targets companies with high sustainability ratings relative to their sector peers and that are available to investors worldwide. Bonds are screened by age, type, size and sustainability rating. Debt issued by financial and non-financial companies is eligible for the Index so that bonds from issuers of different sectors are in the index including such from the financial industry. The issuer domicile is relevant and only an issuer from the USA, as defined by Bloomberg Indices, and issuing in USD is included. The bonds are valued daily based on Bid prices, however on rebalancing new bonds enter the index at the Ask price and they are removed based on the Bid Price. The index is rebalanced on a monthly basis.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.02% lower than that of the reference benchmark (Bloomberg MSCI US Liquid Corporates 1-5 Year Sustainable Index) (6.64 vs. 6.65).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.02% lower than that of the reference benchmark (Bloomberg MSCI US Liquid Corporates 1-5 Year Sustainable Index) (6.64 vs. 6.65).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

How did this financial product perform compared with the broad market index?`

The ESG Score was 6.92% higher than that of the parent benchmark (Bloomberg US Liquid Corporates 1-5 Year Index) (6.64 vs. 6.21).

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier UBS (Lux) Fund Solutions – Global Green Bond ESG 1-10 UCITS ETF Legal entity identifier 5493000LBA65ZPRI5023

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
• • Yes	● No			
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 93.24% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The financial product is passively managed and tracks an Index, securities are only eligible for the Index if they meet the MSCI ESG Research Green Bond Principles. Green bonds are committed to a stated use of proceeds and there are processes for evaluating and

selecting these green projects which are funded by the bond.

The classification as green bonds is based on external providers and relates to:

-Green bonds: Use of proceeds to finance projects that advance environmental objectives (e.g. renewable energy, clean transportation).

For the Bloomberg MSCI Global Green Bond 1-10 Year Sustainability Select Index (Total

Return), securities are independently evaluated by MSCI ESG Research along four dimensions to determine whether they should be classified as a green bond. These eligibility criteria reflect themes articulated in the Green Bond Principles and require commitments about a bond's:

- Stated use of proceeds;
- Process for green project evaluation and selection;
- Process for management of proceeds; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Issuers with relevant environmental or social revenue would origin from:

-Environmental revenues: related to alternative energy, energy efficiency, green building, pollution prevention, sustainable water, or sustainable agriculture.

...and compared to previous periods?

2023 was the first period the indicators were calculated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental characteristics the financial product promotes.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index, indicators for adverse impactson sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Securities are only eligible for the Index if they meet the MSCI ESG Research Green Bond Principles. Green bonds are committed to a stated use of proceeds and there are processes for evaluating and selecting these green projects which are funded by the bond.

How were the indicators for adverse impacts on sustainability factors taken into account?

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons. The financial product also excludes treasury or sovereign issuers that are classified as "Not Free" by Freedom House.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex

Securities are only eligible for the Index if they meet the MSCI ESG Research Green Bond Principles.

Green bonds are committed to a stated use of proceeds and there are processes for evaluating and selecting these green projects which are funded by the bond. The issuer must clearly delineate and outline either specific projects or criteria of activities to be financed which fall into one of the six eligible environmental categories. By definition of the Green Bond Principles themselves, investment into these bonds do not cause significant harm to any environmental or social investment objective.

The financial product exclude investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or antipersonnel landmines, nuclear weapons, biological weapons or chemical weapons.

What were the top investments of this financial product?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 22.25%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Portfolio Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The Portfolio Manager reviews the index methodology when the product is set up and the Indexprovider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The broad market index is the Bloomberg Global Aggregate Index. The Bloomberg MSCI Global Green Bond 1-10 Year Sustainability Select Index is based on the Bloomberg Global Aggregate Index. The Bloomberg MSCI Global Green Bond 1-10 Year Sustainability Select Index offers investors an objective and robust measure of the global market for fixed income securities issued to fund projects with direct environmental benefits. An independent research driven methodology is used to evaluate index-eligible green bonds to ensure they adhere to established Green Bond Principles and to classify bonds by their environmental use of proceeds. The Bloomberg MSCI Global Green Bond 1-10 Year Sustainability Select Index shall have a higher market capitalization value percentage of Green Bonds than the Bloomberg Global Aggregate Index (Parent Benchmark).

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.27% higher than that of the reference benchmark (Bloomberg MSCI Global Green Bond 1-10 Year Sustainability Select Index) (7.42 vs. 7.40).

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.27% higher than that of the reference benchmark (Bloomberg MSCI Global Green Bond 1-10 Year Sustainability Select Index) (7.42 vs. 7.40).

How did this financial product perform compared with the broad market index?`

The ESG Score was 46.06% higher than that of the parent benchmark (Bloomberg Global Aggregate Index) (7.42 vs. 5.08)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier UBS (Lux) Fund Solutions – J.P. Morgan EMU Government ESG Liquid Bond UCITS

Environmental and/or social characteristics

Did this financial product have a	Did this financial product have a sustainable investment objective?				
Yes	● No				
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 79.09% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in				
	economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective				
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments				

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 6.44% higher than that of the parent benchmark (J.P. Morgan EMU Government Bond Index (6.45 vs 6.06).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

Please note that while the parent benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

...and compared to previous periods?

The ESG Score (MSCI ESG Score) was 4.07% percent higher as per 31 December 2023 vs 31 December 2022. (6.45 vs. 6.20)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental characteristics the financial product promotes. The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index.

The index applies an Environmental, Social and Governance (ESG) scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight or remove issuers that rank lower.

J.P. Morgan ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The J.P. Morgan Global EMU ESG Liquid Bond Index applies J.P. Morgan ESG (JESG) issuer scores to adjust the market value of index constituents from the respective baseline indices. JESG issuer scores are a 0-100 %ile rank calculated based on normalized raw ESG scores from third-party research providers Sustainalytics and RepRisk. An issuer's finalized

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

JESG score incorporates a 3-month rolling average. The JESG scores are divided into ten bands that are used to scale each issue's baseline index market value, with the band rebalance occurring with a one-month lag.

Issuers in Bands 4-10 will be excluded from the index, as well as issuers identified as violating Freedom House principles. If an instrument is categorized as a "green bond" by the Climate Bonds Initiative, the security will receive a upgrade.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The Index applies J.P. Morgan ESG (JESG) issuer scores to adjust the market value of index constituents from the respective baseline indices. JESG issuer scores are a 0-100 percentile rank calculated based on normalized raw ESG scores from third-party research providers Sustainalytics and RepRisk. An issuer's finalized JESG score incorporates a 3-month rolling average. The JESG scores are divided into ten bands that are used to scale each issue's baseline index market value, with the band rebalance occurring with a one-month lag. Issuers in Band 6-10 will be excluded from the index, as well as sovereign issuers identified as violating Freedom House principles. If an instrument is categorized as a "green bond" by the Climate Bonds Initiative, the security will receive a upgrade.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Assessment of good governance practices of the investee companies are performed by the index provider.

Issuers identified as violating Freedom House principles will be removed from the index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 70.65%

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Portfolio Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The Portfolio Manager reviews the index methodology when the product is set up and the Indexprovider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The J.P. Morgan EMU Government ESG Liquid Bond Index (Total Return) is based on a market capitalization weighting and designed to track the performance of liquid local government bonds issued by Eurozone governments across all level of maturities. The index further applies an environmental, social and governance (ESG) scoring and screening methodology of the issuer countries to tilt towards issuers ranked higher on ESG criteria and to underweight or remove issuers that rank lower. Countries are categorized into 10

bands based on their ESG score (1 = best, 10 = worst) and the countries in the lowest 5 ESG bands will be removed from the index. The ESG methodology is described in the methodology of the index provider. The index is rebalanced on a monthly basis.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal to the score of the reference benchmark (J.P. Morgan EMU Government ESG Liquid Bond Index) (6.45 vs. 6.45).

Please note that while the reference benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal to the score of the reference benchmark (J.P. Morgan EMU Government ESG Liquid Bond Index) (6.45 vs. 6.45).

Please note that while the reference benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the broad market index?`

The ESG Score was 6.44% higher than that of the parent benchmark (J.P. Morgan EMU Government Bond Index (6.45 vs 6.06).

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

]

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: UBS (Lux) Fund Solutions – J.P. Morgan Global Government ESG Liquid Bond UCITS ETF Legal entity identifier 549300GCASB3XOL5BY76

Environmental and/or social characteristics

Did this financial product have a	Did this financial product have a sustainable investment objective?				
• • Yes	• No				
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 88.58% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective				
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments				

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 1.69% higher than that of the parent benchmark (J.P. Morgan GBI Aggregate Index) (6.01 vs 5.91).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

Please note that while the parent benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

...and compared to previous periods?

The ESG Score (MSCI ESG Score) was 0.95% percent higher as per 31 December 2023 vs 31 December 2022. (6.01 vs. 5.98)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental characteristics the financial product promotes. The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index.

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental and/or social objectives.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. The index applies an Environmental, Social and Governance (ESG) scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight or remove issuers that rank lower.

J.P. Morgan ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

corruption and anti-

bribery matters.

The J.P. Morgan Global Government ESG Liquid Bond Index applies J.P. Morgan ESG (JESG) issuer scores to adjust the market value of index constituents from the respective baseline indices. JESG issuer scores are a 0-100 %ile rank calculated based on normalized raw ESG scores from third-party research providers Sustainalytics and RepRisk. An issuer's finalized JESG score incorporates a 3-month rolling average. The JESG scores are divided into ten bands that are used to scale each issue's baseline index market value, with the band rebalance occurring with a one-month lag.

Issuers in Bands 6-10 will be excluded from the index, as well as issuers identified as violating Freedom House principles. If an instrument is categorized as a "green bond" by the Climate Bonds Initiative, the security will receive a upgrade.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The Index applies J.P. Morgan ESG (JESG) issuer scores to adjust the market value of index constituents from the respective baseline indices. JESG issuer scores are a 0-100 percentile rank calculated based on normalized raw ESG scores from third-party research providers Sustainalytics and RepRisk. An issuer's finalized JESG score incorporates a 3-month rolling average. The JESG scores are divided into ten bands that are used to scale each issue's baseline index market value, with the band rebalance occurring with a onemonth lag. Issuers in Band 6-10 will be excluded from the index, as well as sovereign issuers identified as violating Freedom House principles. If an instrument is categorized as a "green bond" by the Climate Bonds Initiative, the security will receive a upgrade.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Assessment of good governance practices of the investee companies are performed by the index provider.

Issuers identified as violating Freedom House principles will be removed from the index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

Largest investments	Sector	% Assets*	Country
United States Treasury	Government	27.77	USA

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.85%. The minimum proportion of sustainable investments of the financial product was 88.58%.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities? There were no investments in transitional and enabling activities.
 - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 85.35%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Portfolio Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The Portfolio Manager reviews the index methodology when the product is set up and the Indexprovider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The J.P. Morgan Global Government ESG Liquid Bond Index (Total Return) is designed to track the performance of liquid global government bonds. The index is based on a market capitalization weighting. The index further applies an environmental, social and governance (ESG) screening and scoring of issuer countries. Countries are categorized into 10 bands based on their ESG score (1 = best, 10 = worst) and the countries in the lowest 5 ESG bands will be removed from the index.

The ESG methodology is described in the methodology of the index provider.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was equal to the score of the reference benchmark (J.P. Morgan Global Government ESG Liquid Bond Index) (6.01 vs. 6.01).

Please note that while the reference benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the reference benchmark?

The ESG Score was equal to the score of the reference benchmark (J.P. Morgan Global Government ESG Liquid Bond Index) (6.01 vs. 6.01).

Please note that while the reference benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the broad market index?`

The ESG Score was 1.69% higher than that of the parent benchmark (J.P. Morgan GBI Aggregate Index) (6.01 vs 5.91).

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

]

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: UBS (Lux) Fund Solutions – J.P. Morgan USD EM IG ESG Diversified Bond UCITS ETF Legal entity identifier 5493000JQHLJLU284029

Environmental and/or social characteristics

	Did this financial product have a sustainable investment objective?			
••	Yes	• No		
	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 36.03% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
	It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 0.19% lower than that of the parent benchmark (J.P. Morgan USD EM IG Diversified Bond Index (Total Return)) (5.24 vs. 5.25).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

Please note that while the parent benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

...and compared to previous periods?

2023 was the first period the indicators were calculated.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental and/or social objectives.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. The index applies an Environmental, Social and Governance (ESG) scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight or remove issuers that rank lower.

J.P. Morgan ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The J.P. Morgan USD EM IG ESG Diversified Bond Index applies J.P. Morgan ESG (JESG) issuer scores to adjust the market value of index constituents from the respective baseline indices. JESG issuer scores are a 0-100 %ile rank calculated based on normalized raw ESG scores from third-party research providers Sustainalytics and RepRisk. An issuer's finalized JESG score incorporates a 3-month rolling average. The JESG scores are divided into five bands that are used to scale each issue's baseline index market value, with the band rebalance occurring with a one-month lag.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Issuers in Band 5 will be excluded from the index, as well as corporate issuers earning revenue from tobacco, weapons, thermal coal mining or power generation, corporate issuers identified as violating UN Global Compact (UNGC) principles and sovereign issuers identified as violating Freedom House principles. If an instrument is categorized as a "green bond" by the Climate Bonds Initiative, the security will receive a one-band upgrade. Green bonds by issuers already in Band 1 will not receive any further upgrades, while those in Band 5 will still be excluded.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Corporate issuers earning revenue from tobacco, weapons, thermal coal mining, oil sands or power generation will be removed from the index.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Assessment of good governance practices of the investee companies are performed by the index provider.

Corporate issuers identified as violating UN Global Compact (UNGC) principles and sovereign issuers identified as violating Freedom House principles will be removed from the index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex.

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 99.25%. The minimum proportion of sustainable investments of the financial product was 36.03%.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 20.33%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Portfolio Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The Portfolio Manager reviews the index methodology when the product is set up and the Indexprovider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The parent index, the J.P. Morgan USD EM IG Diversified Bond Index (Total Return) tracks instruments that are classified as investment grade (IG) in the established J.P. Morgan EMBI Global Diversified and J.P. Morgan CEMBI Broad Diversified indices, and combines them with a market capitalization based weighting.

In addition the J.P. Morgan USD EM IG ESG Diversified Bond Index applies J.P. Morgan ESG (JESG) issuer scores to adjust the market value of index constituents from the respective baseline indices. JESG issuer scores are a 0-100 %ile rank calculated based on normalized raw ESG scores from third-party research providers Sustainalytics and RepRisk. An issuer's finalized JESG score incorporates a 3-month rolling average. The JESG scores are divided into five bands that are used to scale each issue's baseline index market value, with the band rebalance occurring with a one-month lag.

Issuers in Band 5 will be excluded from the index, as well as corporate issuers earning revenue from tobacco, weapons, thermal coal mining or power generation, corporate issuers identified as violating UN Global Compact (UNGC) principles and sovereign issuers identified as violating Freedom House principles. If an instrument is categorized as a "green bond" by the Climate Bonds Initiative, the security will receive a one-band upgrade. Green bonds by issuers already in Band 1 will not receive any further upgrades, while those in Band 5 will still be excluded.

More information can be found in the annex of the prospectus.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.77% higher than that of the reference benchmark (J.P. Morgan USD EM IG Diversified Bond Index (Total Return)) (5.24 vs. 5.20).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

Please note that while the parent benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.77% higher than that of the reference benchmark (J.P. Morgan USD EM IG Diversified Bond Index (Total Return)) (5.24 vs. 5.20).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

Please note that while the parent benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the broad market index?`

The ESG Score was 0.19% lower than that of the parent benchmark (J.P. Morgan USD EM IG Diversified Bond Index (Total Return)) (5.24 vs. 5.25).

Please note that while the parent benchmark is provided by JPMorgan Chase & Co., the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable

investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:	Legal entity identifier

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 2.77% higher than that of the parent benchmark (SBI® Foreign AAA-BBB 1-5 Total Return Index) (7.04 vs 6.85).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

Please note that while the parent benchmark is provided by SIX Index AG, the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

...and compared to previous periods?

The ESG Score (MSCI ESG Score) was 5.23% percent higher as per 31 December 2023 vs 31 December 2022. (7.04 vs. 6.69)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental characteristics the financial product promotes.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The Inrate Controversies monitoring tests the company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

Largest investments		Sector	% Assets*	Country
Muenchener Hypothekenba	nk eG Fi	nance	3.34	Germany
Corp Andina de Fomento	G	overnment	3.14

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 95.04%. The proportion of sustainable investments of the financial product was 56.16%.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

 $^{^1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 32.62%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

The SBI® Foreign AAA–BBB 1–5 Total Return Index mirrors developments in the CHF bond markets and encompasses investment grade-rated bonds with a fixed coupon that are listed on SIX Swiss Exchange, that are issued in CHF currency from issuers domiciled outside of Switzerland and that have a term to maturity of 1 to less than 5 years.

In contrast to the SBI® Foreign AAA–BBB 1–5 Total Return Index the SBI® ESG Foreign AAA–BBB 1–5 Total Return Index applies additionally a ESG screening and scoring of issuers is based on the Inrate ESG methodology, removing those with a lower Inrate ESG rating then C+, those that are involved in controversies and those that are involved in restricted business activities based on given revenues thresholds.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.56% lower than that of the reference benchmark (SBI® ESG Foreign AAA-BBB 1-5 Total Return Index) (7.04 vs. 7.08).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

Please note that while the reference benchmark is provided by SIX Index AG, the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.56% lower than that of the reference benchmark (SBI® ESG Foreign AAA-BBB 1-5 Total Return Index) (7.04 vs. 7.08).

It is not the intention of the sub-fund to have an indicator which is better than that of the reference benchmark. The intention is to have an indicator which is better than that of the parent benchmark (broad market index). The portfolio manager aims to be in line with the reference benchmark and will review the deviation.

Please note that while the reference benchmark is provided by SIX Index AG, the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the broad market index?`

The ESG Score was 2.77% higher than that of the parent benchmark (SBI® Foreign AAA-BBB 1-5 Total Return Index) (7.04 vs 6.85).

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

How did the sustainability indicators perform?

The ESG promotion characteristics are measured using the following indicators respectively:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental,

social and employee matters, respect for

human rights, anti-

corruption and anti-

bribery matters.

The ESG promotion characteristics are measured using the following indicators respectively:

The ESG Score was 2.31% higher than that of the parent benchmark (SBI® Foreign AAA-BBB 5-10 Total Return Index) (7.09 vs 6.93).

Indicator definitions can be found in the first page of the SFDR level 2 disclosures.

The parent benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product.

Please note that while the parent benchmark is provided by SIX Index AG, the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

...and compared to previous periods?

The ESG Score (MSCI ESG Score) was 2.75% percent higher as per 31 December 2023 vs 31 December 2022. (7.09 vs. 6.90)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental characteristics the financial product promotes.

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The Inrate Controversies monitoring tests the company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

% Assets*	Country

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

What was the proportion of sustainability-related investments?

As per the end of the reference period the proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product was 98.27%. The proportion of sustainable investments of the financial product was 49.38%.

What was the asset allocation?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Please refer to the section "Schedule of Investments" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product had 0% Taxonomy Aligned Investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of:

- turnover

sustainable
economic activities
under Regulation
(EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

 There were no investments in transitional and enabling activities.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments..

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 24.51%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments may also include securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager tracks the Index in line with the limits set out in the investment policy of Fund

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.

The investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

How does the reference benchmark differ from a broad market index?

The SBI® ESG Foreign AAA-BBB 5-10 Total Return Index mirrors developments in the CHF bond markets and encompasses investment grade-rated bonds with a fixed coupon that are listed on

SIX Swiss Exchange, that are issued in CHF currency from issuers domiciled outside of Switzerland and that have a term to maturity of 5 to less than 10 years. The index is rebalanced on a monthly basis and may also be rebalanced at other times in order to comply with applicable investment restrictions or to reflect corporate activity such as mergers and acquisitions.

In contrast to the SBI® Foreign AAA–BBB 5–10 Total Return Index the SBI® ESG Foreign AAA–BBB 5–10 Total Return Index applies additionally a ESG screening and scoring of issuers is based on the Inrate ESG methodology, removing those with a lower Inrate ESG rating then C+, those that are involved in controversies and those that are involved in restricted business activities based on given revenues thresholds.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The ESG Score was 0.57% higher than that of the reference benchmark (SBI® ESG Foreign AAA-BBB 5-10 Total Return) (7.09 vs. 7.05).

Please note that while the reference benchmark is provided by SIX Index AG, the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the reference benchmark?

The ESG Score was 0.57% higher than that of the reference benchmark (SBI® ESG Foreign AAA-BBB 5-10 Total Return) (7.09 vs. 7.05).

Please note that while the reference benchmark is provided by SIX Index AG, the Portfolio Manager has also relied on data provided by MSCI to calculate the ESG Score, the benchmark and the parent benchmark. As a result, there might be a discrepancy between the figures disclosed by the Portfolio Manager and the Index / parent Index provider.

How did this financial product perform compared with the broad market index?`

The ESG Score was 2.31% higher than that of the parent benchmark (SBI® Foreign AAA-BBB 5-10 Total Return Index) (7.09 vs 6.93).

ANNEX IV

'ANNEX V

Sustainable investment means

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The financial product has sustainable investment as its objective and aims track, before expenses, the price and income performance of the Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped 1-5 Index (Total Return)(the "Index"). An independent research-driven screening is used by the Index provider to evaluate index-eligible issuer which must be a Multilateral Development Bank, having a credit quality rating of AA- (S&P) or Aa3 (Moody's) and higher (if several ratings are available, the lowest rating is considered).

The Reference Benchmark (the "Index") designated for the purpose of attaining the sustainable investment objective of this financial product is the Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped 1-5 Index (Total Return).

How did the sustainability indicators perform?

The attainment of the sustainable investment objective is measured using the following

indicators respectively:

• Whether the issuer of the securities is classified as a Multilateral Development Bank Issuer.

A Multilateral Development Bank (MDB) is an international financial institution chartered by two or more countries for the purpose of encouraging economic development in poorer nations. Multilateral development banks consist of member nations from developed and developing countries. MDBs provide loans and grants to member nations to fund projects that support social and economic development, such as the building of new roads or providing clean water to communities. MDBs are supranational institutions set up by sovereign states, which are their shareholders The objective of the use of proceeds of the MDBs are very aligned to the SDG 17.

Please note that while the Reference Benchmark is provided by Solactive, the Portfolio manager will rely on data provided by MSCI. As a result, there might be a discrepancy between the figures disclosed by the Portfolio manager and the Reference Benchmark provider.

...and compared to previous periods?

2023 was the first period the indicators were calculated.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex for each fund.

Securities are only eligible for the Index if they meet the rule set by the index methodology that the index-eligible issuerwhich must be a Multilateral Development Bank, having a credit

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

quality rating of AA- (S&P) or Aa3 (Moody's) and higher (if several ratings are available, the lowest rating is considered).

Unlike commercial banks, MDBs do not seek to maximize profits for their shareholders. Instead, they prioritize development goals (aligned with the SDG 17), such as ending extreme poverty and reducing economic inequality. They often lend at low or no interest or provide grants to fund projects in infrastructure, energy, education, environmental sustainability, and other areas that promote development.

— How were the indicators for adverse impacts on sustainability factors taken into account?

The sub-fund excludes exposure to controversial weapons (anti-personnel mines, clustermunitions, chemical weapons and biological weapons).

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

There is no controversies screening on the index issuers.

How did this financial product consider principal adverse impacts on sustainability factors?

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

Further details can be found in the prospectus annex.

The issuer of all securities held by the financial product is classified as a Multilateral Development Bank and due to the nature of these supranational institutions, not all principal adverse impact indicators are relevant.

At present and where relevant, exclusions are based on the following PAI indicators:

- "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":
- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons.
- UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023

^{*}Minor differences with "Schedule of Investments" might occur due to rounding and valuation differences in production systems.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The proportions of investments of the financial product were calculated as per the end of the reference period, which is: 31 December 2023

What was the asset allocation?

In which economic sectors were the investments made?

Please refer to the section "Structure of the Securities Portfolio" of the relevant sub-fund of this Annual report to review the breakdown of the economic sectors where the investments were made.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:				
	In	fossil	gas	In	nuclear energy
×	No				

fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

To comply with

the EU Taxonomy, the criteria for

Enabling activitiesdirectly enable other activities to make a

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 97.32%

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under the EU
Taxonomy.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Included in "#2 not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments for hedging purposes including in the event of a re-balance of the index constituents by the index provider.

What actions have been taken to attain the sustainable investment objective during the reference period?

The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the Index provider rebalances the index on a regular basis and the Portfolio manager will track the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of its investment objective it seeks to achieve.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the Index by applying stratified sampling managing the tracking error.

How did this financial product perform compared to the reference sustainable benchmark?

How did the reference benchmark differ from a broad market index?

The broad market index is the Solactive World All Bond IG Index.

The Solactive GlobalMultilateral Development Bank Bond USD 25% Issuer Capped 1-5 Index (Total Return) offers investors exposure to Multilateral Development Banks (known as supranationals) which are backed by multiple sovereigns incl. all G7 countries. Bonds issued by the MDBs are mostly AAA-rated and the credit risk profile and returns are comparable to US Treasuries while the MDB providing guarantees and knowledge for developing countries to end global poverty and to promote sustainable economic growth (aligned to the SDG 17). The Parent Index provides a broadbased measure of the global fixed income markets.

The Solactive World All Bond IG Index give access to the global investment grade universe, a multicurrency, flexible and comprehensive benchmark to track global investable bonds as well as securitized debt instruments.

The Solactive World All Bond IG Index give access to the global investment grade universe, a multicurrency, flexible and comprehensive benchmark to track global investable bonds as well as securitized debt instruments.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective. The investments in Multilateral Development Banks Issuer was 0.44% lower than that of the reference benchmark (Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped 1-5 Index) (99.56% vs 100%).

How did this financial product perform compared with the reference benchmark?

The investments in Multilateral Development Banks Issuer was 0.44% lower than that of the reference benchmark (Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped 1-5 Index) (99.56% vs 100%).

How did this financial product perform compared with the broad market index?

The investments in Multilateral Development Banks Issuer was 11.70% higher than that of the parent benchmark (Solactive World All Bond IG Index (99.56% vs 89.13%).

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?

There were no investments in transitional and enabling activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

No change. 0% Taxonomy Aligned Investments.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The financial product had a proportion of sustainable investment with an environmental objective not aligned with the EU Taxonomy as stated in the asset allocation section of this annex.

What was the share of socially sustainable investments?

The financial product had a proportion of socially sustainable investment as stated in the asset allocation section of this annex of 97.59%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under the EU
Taxonomy.

Included in "#2 not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments for hedging purposes including in the event of a re-balance of the index constituents by the index provider.

What actions have been taken to attain the sustainable investment objective during the reference period?

The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the Index provider rebalances the index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of the fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the investment objective it seeks to achieve.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the Index by applying stratified sampling managing the tracking error.

The investment manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

How did this financial product perform compared to the reference sustainable benchmark?

How did the reference benchmark differ from a broad market index?

The broad market index is the Solactive World All Bond IG Index.

The Solactive Global Multilateral Development Bank Bond USD 25% Issuer Capped Index offers investors exposure to Multilateral Development Banks (known as supranationals) which are backed by multiple sovereigns incl. all G7 countries. Bonds issued by the MDBs are mostly AAA-rated and the credit risk profile and returns are comparable to US Treasuries while the MDB providing guarantees and knowledge for developing countries to end global poverty and to promote sustainable economic growth (aligned to the SDG 17).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?
