Authorised Corporate Director's report

Director's report

The Directors present the report and financial statements for Quilter Investors Multi-Asset OEIC (the "Company") for the period from 1 May 2023 to 31 October 2023.

Authorised status

The Company is an Open-Ended Investment Company incorporated as an Investment Company with Variable Capital ("ICVC") under Regulation 12 (Authorisation) of the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228) (the "OEIC Regulations"). It is incorporated in England and Wales and authorised by the Financial Conduct Authority under the OEIC Regulations and the Financial Conduct Authority's Collective Investment Schemes Sourcebook (the "COLL Sourcebook"). The Company is a non-UCITS retail scheme for the purposes of the COLL Sourcebook and an umbrella scheme. The Company is also an Alternative Investment Fund for the purposes of the Alternative Investment Fund Managers Directive 2011/61/EU ("AIFMD") as it applies in the UK from time to time.

Liability

The Company is under the "protected cell" regime. As such each sub-fund has a specific portfolio of securities to which that sub-fund's assets and liabilities are attributable. So far as investors are concerned each sub-fund will be treated as a separate entity. The assets of a sub-fund shall not be used or made available to discharge (directly or indirectly) the liabilities of, or claims against, any other person or body, including the Company and any other sub-fund and shall not be available for any such purpose.

Developments

From 1 July 2023, a discount will be applied when Quilter Investors funds reach a certain threshold of assets under management ("AUM"). The move will see a discount of up to 0.05% applied to the Fixed Ongoing Charge of the funds when a fund's AUM reaches £3bn. The discounts will begin to be applied when a fund reaches more than £750m AUM. The discount is available to all share classes of Quilter Investors funds domiciled in the UK, except for Quilter Investors Global Dynamic Equity Fund and Quilter Cheviot Global Income and Growth Fund at this time. These funds operate different charging structure with existing discount provisions. Further information is available at the ACD's website at https://www.quilter.com/news-and-views/all-articles/aum-discounts-on-fund-and-portfolio-pricing.

On 1 November 2023, the Fixed Ongoing Charge for the Class A share classes of the five Creation sub-funds was reduced from 1.85% to 1.50%. For further information, please see the shareholder noticed from 14 September 2023 and the prospectus at the ACD's website www.guilter.com.

On 14 November 2023, Quilter Investors Creation Adventurous Portfolio U1 accumulation share class opened and five Creation sub-funds R share classes closed following the conversion into the sub-funds' corresponding U1 share classes. For further information please see the shareholder notice from 14 September 2023 and the prospectus at the ACD's website www.quilter.com.

Where a shareholder requests redemption of a number of shares, the ACD at its discretion may, where it considers the deal to be substantial in relation to the total size of the subfund concerned or in some way detrimental to the sub-fund, by serving notice to the shareholder (subject to time limits set out in the prospectus) electing that the shareholder shall not be paid the price of their shares, but instead there shall be a transfer to that shareholder of property of the relevant sub-fund having the appropriate value. On 24 November 2023, the ACD removed the right of shareholders where they receive such a notice from the ACD, to serve notice on the ACD requiring the ACD, instead of arranging for a transfer of property, to arrange for a sale of that property and pay the shareholder the net proceeds of that sale.

Russia invasion of Ukraine

The Russian invasion of Ukraine continues to be monitored and assessed by the ACD to ensure any potential disruption for our clients is kept to a minimum. The sub-funds did not have any direct exposure to Russia, Ukraine or Belarus. The impact of the invasion has resulted in an increase in overall global market volatility. The sub-funds continue to be managed according to their investment objectives and policies during this period of uncertainty. Valuations of the sub-funds are carried out without any necessary deviation from the ACD's valuation policy.

Assessment of value

The COLL Sourcebook requires the ACD to conduct an "assessment of value" at least annually for each of the sub-funds in the Company which includes, amongst other things,

- (i) an assessment of whether the payments out of scheme property set out in the Prospectus are justified in the context of the overall value delivered to shareholders;
- (ii) an assessment of the range and quality of services provided to shareholders;
- (iii) an assessment of performance over an appropriate timescale; and
- (iv) an assessment of comparable market rates for the services provided by the ACD.

The ACD's assessment of value of the sub-funds in the Company as at 31 March 2023 was published on 31 July 2023. The report provided the assessment of value for all schemes managed by the ACD. The report is available on the ACD's website at https://www.quilter.com/siteassets/documents/quilter-investors/legal/assessment-of-value-report-2023-for-multi-asset-investment-portfolios.pdf.

Authorised Corporate Director's report (continued)

Additional information

These financial statements have been prepared in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds issued by the Investment Association (formerly the Investment Management Association) in May 2014 and as amended in June 2017.

The Company is an umbrella scheme which complies with the COLL Sourcebook and as at 31 October 2023 had seven sub-funds (listed below). Additional sub-funds may be launched in the future.

Sub-fund name	Launch date
Quilter Investors Creation Adventurous Portfolio	3 July 2017
Quilter Investors Creation Balanced Portfolio	28 April 2008
Quilter Investors Creation Conservative Portfolio	28 April 2008
Quilter Investors Creation Dynamic Portfolio	28 April 2008
Quilter Investors Creation Moderate Portfolio	28 April 2008
Quilter Investors Monthly Income Portfolio	26 June 2019
Quilter Investors Monthly Income and Growth Portfolio	26 June 2019

In accordance with the requirements of the Financial Services and Markets Act 2000, we hereby certify these financial statements on behalf of the ACD.

L Williams

Cross Holdings

There were no cross holdings held by the sub-funds throughout the period to 31 October 2023 (30 April 2023: No cross holdings).

Securities Financing Transactions Regulation Disclosure

The Company does not currently undertake securities financing transactions (as defined in Article 3 of Regulation (EU) 2015/2365) or use total return swaps.

Statement of the Authorised Corporate Director's responsibilities

The COLL Sourcebook requires the ACD to prepare financial statements for each annual and semi-annual accounting period which give a true and fair view of the financial position of the Company and of the net revenue and net capital gains or losses on the property of the Company for the period.

In preparing the financial statements the ACD is responsible for:

- · selecting suitable accounting policies and then applying them consistently;
- making judgements and estimates that are reasonable and prudent;
- following UK accounting standards, including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland;
- complying with the disclosure requirements of the SORP for UK Authorised Funds issued by the Investment Association (formerly the Investment Management Association) in May 2014 and as amended in June 2017;
- · keeping proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements;
- · assessing the Company and its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern;
- using the going concern basis of accounting unless it either intends to liquidate the Company or its sub-funds or to cease operations, or has no realistic alternative but to do so;
- such internal control as it determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and
- · taking reasonable steps for the prevention and detection of fraud and irregularities.

The ACD is responsible for the management of the Company in accordance with its Instrument of Incorporation, the Prospectus and the COLL Sourcebook.

Quilter Investors Creation Adventurous Portfolio

Launch date3 July 2017IA SectorFlexible InvestmentInvestment ManagerQuilter Investors LimitedNet asset value£2,183,324

Objective

To achieve capital growth over a period of five years or more.

The portfolio is diversified across asset classes, with exposure to equities between 80% and 100% and with volatility of between 15% and 19%.*

*The volatility range is a target, based on long term actuarial assumptions and the sub-fund is managed to stay within this range most of the time. The volatility range is regularly reviewed and may change from time to time due to changes in these assumptions.

Policy

The sub-fund invests in a diversified portfolio of assets. It is expected that exposure will be to equities, fixed income, cash, money market instruments and currencies. Such investment will be made either directly by investing in such instruments or indirectly by investing in collective investment schemes. In addition, the portfolio may indirectly hold property and commodities by investing in collective investment schemes, transferable securities and derivatives. The collective investment schemes in which the sub-fund invests may include schemes which are managed or operated by the ACD or an associate of the ACD.

The sub-fund targets a volatility level reflective of its asset allocation.

The sub-fund may use derivative instruments for investment purposes or Efficient Portfolio Management. The use of derivatives for the purpose of investment may affect the risk profile of the sub-fund although this is not the ACD's intention. The use of derivatives for Efficient Portfolio Management is unlikely to affect the risk profile of the sub-fund.

Investment Manager's review

Market Review

Over the review period, markets tangled with the balance between strong economic data in the short term, versus the impact of policy tightening in the future. Fixed income markets, measured by the Bloomberg Global Aggregate index delivered a -3.3% returns (£H) as interest rates rose to reflect the stronger than expected data, and the consequent expectation of higher rates. Over the full period, global equity markets were up for a Sterling investor (MSCI All Countries World +1.6%) although this single data point masks both the benefit of Pound Sterling weakness (GBP -2.5% relative to USD over the period) as well as the concentration of the performance in the stock market over this period. In fact, the large cap growth segment of the US market was the main driver of returns. Other regions, such as the broad UK market or continental European market were negative (-5.2%, -7% respectively).

Portfolio Review

Against this backdrop the sub-fund delivered a -2.4% return, outperforming its performance comparator by 0.5%. Equity market losses over this period were notably in holdings across the 'growth' space in Europe (contrary to the strong performance in the US) hurt performance. Holdings such as Premier Miton European Opportunities Fund or Quilter Investors UK Equity Mid- Cap Growth Fund were examples of this impact. That being said equity managers were generally able to outperform their benchmarks which helped to mitigate these losses – an example of this was Quilter Investors Europe (ex UK) Equity Fund which outperformed its benchmark by over 5% over this period.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the sub-fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Sub-funds in category 6 have in the past shown relatively high volatility. With a sub-fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

Investment risk - there is no guarantee that the sub-fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

Strategy risk - as the sub-fund invests in other collective investment schemes, which themselves invest in assets such as bonds, company shares, cash and currencies, it will be subject to the collective risks of these other sub-funds. This may include emerging markets risk and sub-investment grade credit risk and smaller companies risk.

Company shares (i.e. equities) risk - the value of company shares may rise and fall due to the performance of individual companies or because of general market and economic conditions.

Emerging markets risk - less developed countries may face more political, economic or structural challenges than developed countries.

Credit risk - the issuer of a bond or a similar investment within the sub-fund may not pay income or repay capital to the sub-fund when due. Bonds which are rated below investment grade are considered to have a higher risk exposure with respect to meeting their payment obligations.

Interest rate risk - investments in bonds are affected by interest rates and inflation trends which may affect the value of the sub-fund.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the sub-fund's ability to meet redemption requests upon demand.

Currency risk - the sub-fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your shares may rise and fall as a result of exchange rate movements.

Derivative risk - the sub-fund may use derivatives for investment purposes and/or for Efficient Portfolio Management (EPM). Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the sub-fund takes its charges from the income of the sub-fund in the first instance. The impact of sub-fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the sub-fund to cover these charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the Prospectus.

[†] The share class closed on 15 June 2021.
** The operating share and the share share share and the share sha

^{**} The operating charges include all costs borne by the sub-fund, except for direct transaction costs. They include the operating charges of any collective investment schemes in which the sub-fund invests.

^{***} The direct transaction costs are made up of fees and commissions paid to agents, advisers, brokers and dealers, levies by regulatory agencies and securities exchanges as well as transfer taxes and duties. They do not include any difference between the quoted bid and offer prices or internal administrative or holding costs. These costs arise as a result of transactions undertaken both for efficient portfolio management and the meeting of the sub-fund's objectives. These costs exclude any effect of dilution adjustments used to offset the costs.

^{****} The operating charges percentage is the ratio of the sub-fund's ongoing charges (including the ongoing charges of any collective investment schemes in which the sub-fund invests but excluding interest on borrowings) to the average net assets of the sub-fund. This includes a synthetic element of 0.28% (30.04.2023 - 0.28%) (30.04.2022 - 0.27%) to incorporate the ongoing charge figures of the underlying sub-funds.

Notes to the financial statements

for the period from 1 May 2023 to 31 October 2023

1 Accounting policies

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice (SORP) for Authorised Funds, issued by the Investment Association (formerly the Investment Management Association) in May 2014 and as amended in June 2017.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 April 2023.

2 Distributions

The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:

	01.05.23 to	01.05.22 to
	31.10.23	31.10.22
	£'000	£'000
Interim – Accumulation shares (31 October)	14	17

Reconciliation of distributions:		
Net revenue after taxation	13	16
Equalisation on Collective Investment Schemes	1	1
Total distributions	14	17

Distribution table

Interim distribution

Group 1: Shares purchased prior to 1 May 2023

Group 2 : Shares purchased from 1 May 2023 to 31 October 2023

	Revenue pence per share	Equalisation pence per share*	·	Distribution paid 30.12.22 pence per share
Accumulation 'A' Shares Group 1	0.4949	-	0.4949	0.6014
Group 2	0.4949	0.0000	0.4949	0.6014
Accumulation 'R' Shares Group 1	1.0372	-	1.0372	1.0970
Group 2	0.2719	0.7653	1.0372	1.0970
Accumulation 'U2' Shares Group 1	1.1482	-	1.1482	1.2001
Group 2	1.0655	0.0827	1.1482	1.2001

^{*} Equalisation only applies to shares purchased during the distribution period (Group 2 shares). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

Quilter Investors Creation Balanced Portfolio

Launch date28 April 2008IA SectorMixed Investment 20-60% SharesInvestment ManagerQuilter Investors LimitedNet asset value£106,952,419

Objective

To achieve capital growth over a period of five years or more.

The portfolio is diversified across asset classes, with exposure to equities between 15% and 55% and with volatility of between 6% and 10%.*

*The volatility range is a target, based on long term actuarial assumptions and the sub-fund is managed to stay within this range most of the time. The volatility range is regularly reviewed and may change from time to time due to changes in these assumptions.

Policy

The sub-fund invests in a diversified portfolio of assets. It is expected that exposure will be to equities, fixed income, cash, money market instruments and currencies. Such investment will be made either directly by investing in such instruments or indirectly by investing in collective investment schemes. In addition, the portfolio may indirectly hold property and commodities by investing in collective investment schemes, transferable securities and derivatives. The collective investment schemes in which the sub-fund invests may include schemes which are managed or operated by the ACD or an associate of the ACD.

The sub-fund targets a volatility level reflective of its asset allocation.

The sub-fund may use derivative instruments for investment purposes or Efficient Portfolio Management. The use of derivatives for the purpose of investment may affect the risk profile of the sub-fund although this is not the ACD's intention. The use of derivatives for Efficient Portfolio Management is unlikely to affect the risk profile of the sub-fund.

Investment Manager's review

Market Review

Over the review period, markets tangled with the balance between strong economic data in the short term, versus the impact of policy tightening in the future. Fixed income markets, measured by the Bloomberg Global Aggregate index delivered a -3.3% returns (£H) as interest rates rose to reflect the stronger than expected data, and the consequent expectation of higher rates. Over the full period, global equity markets were up for a Sterling investor (MSCI All Countries World +1.6%) although this single data point masks both the benefit of Pound Sterling weakness (GBP -2.5% relative to USD over the period) as well as the concentration of the performance in the stock market over this period. In fact, the large cap growth segment of the US market was the main driver of returns. Other regions, such as the broad UK market or continental European market were negative (-5.2%, -7% respectively).

Portfolio Review

Against this backdrop the fund delivered a -2.1% return, outperforming its performance comparator by 0.7%. The negative return was roughly equally split between falls in fixed income and equity markets. In bond allocations, large weights and weaker performance from government bond holdings were a key cause of losses. That being said, relative to peers and long-term allocations, the portfolio held an underweight to government bonds, and an overweight to credit allocations both of which helped to mitigate losses. Equity markets also had a detractive effective on returns notably where holdings across the 'growth' space in Europe (contrary to the strong performance in the US) hurt performance. Holdings such as Premier Miton European Opportunities Fund or Quilter Investors UK Equity Mid-Cap Growth were examples of this impact. Holdings in the alternatives part of the portfolio were mixed – uncorrelated strategies such as AQR Managed Futures Strategy Fund or Ardea Global Alpha UCITS Fund helped to add positive returns. However, holdings with an inflation linkage struggled (notably holdings in the infrastructure space).

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the sub-fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Sub-funds in category 5 have in the past shown moderately high volatility. With a sub-fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

Investment risk - there is no guarantee that the sub-fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

Strategy risk - as the sub-fund invests in other collective investment schemes, which themselves invest in assets such as bonds, company shares, cash and currencies, it will be subject to the collective risks of these other sub-funds. This may include emerging markets risk and sub-investment grade credit risk and smaller companies risk.

Company shares (i.e. equities) risk - the value of company shares may rise and fall due to the performance of individual companies or because of general market and economic conditions.

Emerging markets risk - less developed countries may face more political, economic or structural challenges than developed countries.

Credit risk - the issuer of a bond or a similar investment within the sub-fund may not pay income or repay capital to the sub-fund when due. Bonds which are rated below investment grade are considered to have a higher risk exposure with respect to meeting their payment obligations.

Interest rate risk - investments in bonds are affected by interest rates and inflation trends which may affect the value of the sub-fund.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the sub-fund's ability to meet redemption requests upon demand.

Currency risk - the sub-fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your shares may rise and fall as a result of exchange rate movements.

Derivative risk - the sub-fund may use derivatives for investment purposes and/or for Efficient Portfolio Management (EPM). Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the sub-fund takes its charges from the income of the sub-fund in the first instance. The impact of sub-fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the sub-fund to cover these charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the Prospectus.

^{**} The operating charges include all costs borne by the sub-fund, except for direct transaction costs. They include the operating charges of any collective investment schemes in which the sub-fund invests.

^{***} The direct transaction costs are made up of fees and commissions paid to agents, advisers, brokers and dealers, levies by regulatory agencies and securities exchanges as well as transfer taxes and duties. They do not include any difference between the quoted bid and offer prices or internal administrative or holding costs. These costs arise as a result of transactions undertaken both for efficient portfolio management and the meeting of the sub-fund's objectives. These costs exclude any effect of dilution adjustments used to offset the costs.

^{****} The operating charges percentage is the ratio of the sub-fund's ongoing charges (including the ongoing charges of any collective investment schemes in which the sub-fund invests but excluding interest on borrowings) to the average net assets of the sub-fund. This includes a synthetic element of 0.27% (30.04.2023 - 0.28%) (30.04.2022 - 0.25%) to incorporate the ongoing charge figures of the underlying sub-funds.

Notes to the financial statements

for the period from 1 May 2023 to 31 October 2023

1 Accounting policies

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice (SORP) for Authorised Funds, issued by the Investment Association (formerly the Investment Management Association) in May 2014 and as amended in June 2017.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 April 2023.

2 Distributions

The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:

	01.05.23 to 31.10.23 £'000	01.05.22 to 31.10.22 £'000
Interim – Accumulation shares (31 October)	920	761
	920	761
Revenue deducted on cancellation of shares	63	28
Revenue received on issue of shares	(4)	(1)
Total distributions	979	788
Reconciliation of distributions:		
Net revenue after taxation	961	772
Equalisation on Collective Investment Schemes	11	13
Tax effect of fee rebates taken to capital	7	3
Total distributions	979	788

Distribution table

Interim distribution

Group 1: Shares purchased prior to 1 May 2023

Group 2: Shares purchased from 1 May 2023 to 31 October 2023

	Revenue pence per share	Equalisation pence per share*		Distribution paid 30.12.22 pence per share
Accumulation 'A' Shares Group 1	0.4753	-	0.4753	0.2773
Group 2	0.2491	0.2262	0.4753	0.2773
Accumulation 'R' Shares Group 1	0.7570	-	0.7570	0.5149
Group 2	0.4189	0.3381	0.7570	0.5149
Accumulation 'U1' Shares Group 1	1.2463	-	1.2463	0.8689
Group 2	0.2546	0.9917	1.2463	0.8689
Accumulation 'U2' Shares Group 1	1.2489	-	1.2489	0.8714
Group 2	0.7717	0.4772	1.2489	0.8714

^{*} Equalisation only applies to shares purchased during the distribution period (Group 2 shares). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

Quilter Investors Creation Conservative Portfolio

Launch date28 April 2008IA SectorMixed Investment 0-35% SharesInvestment ManagerQuilter Investors LimitedNet asset value£52,360,082

Objective

To achieve capital growth over a period of five years or more.

The portfolio is diversified across asset classes, with exposure to equities between 0% and 35% and with volatility of between 3% and 7%.*

*The volatility range is a target, based on long term actuarial assumptions and the sub-fund is managed to stay within this range most of the time. The volatility range is regularly reviewed and may change from time to time due to changes in these assumptions.

Policy

The sub-fund invests in a diversified portfolio of assets. It is expected that exposure will be to equities, fixed income, cash, money market instruments and currencies. Such investment will be made either directly by investing in such instruments or indirectly by investing in collective investment schemes. In addition, the portfolio may indirectly hold property and commodities by investing in collective investment schemes, transferable securities and derivatives. The collective investment schemes in which the sub-fund invests may include schemes which are managed or operated by the ACD or an associate of the ACD.

The sub-fund targets a volatility level reflective of its asset allocation.

The sub-fund may use derivative instruments for investment purposes or Efficient Portfolio Management. The use of derivatives for the purpose of investment may affect the risk profile of the sub-fund although this is not the ACD's intention. The use of derivatives for Efficient Portfolio Management is unlikely to affect the risk profile of the sub-fund.

Investment Manager's review

Market Review

Over the review period, markets tangled with the balance between strong economic data in the short term, versus the impact of policy tightening in the future. Fixed income markets, measured by the Bloomberg Global Aggregate index delivered a -3.3% returns (£H) as interest rates rose to reflect the stronger than expected data, and the consequent expectation of higher rates. Over the full period, global equity markets were up for a Sterling investor (MSCI All Countries World +1.6%) although this single data point masks both the benefit of Pound Sterling weakness (GBP -2.5% relative to USD over the period) as well as the concentration of the performance in the stock market over this period. In fact, the large cap growth segment of the US market was the main driver of returns. Other regions, such as the broad UK market or continental European market were negative (-5.2%, -7% respectively).

Portfolio Review

Against this backdrop the fund delivered a -2.4% return, outperforming its performance comparator by 0.4%. The negative return was largely a result of falls in fixed income markets particularly through large weights and weaker performance from government bond holdings. That being said, relative to peers and long-term allocations, the portfolio held an underweight to government bonds, and an overweight to credit allocations both of which helped to mitigate losses. Equity markets had a detractive effective on returns notably where holdings across the 'growth' space in Europe (contrary to the strong performance in the US) hurt performance. Holdings such as Premier Miton European Opportunities Fund or Quilter Investors UK Equity Mid-Cap Growth Fund were examples of this impact. Holdings in the alternatives part of the portfolio were mixed – uncorrelated strategies such as AQR Managed Futures Strategy Fund or Ardea Global Alpha UCITS Fund helped to add positive returns. However, holdings with an inflation linkage struggled (notably holdings in the infrastructure space).

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the sub-fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Sub-funds in category 4 have in the past shown moderate volatility. With a sub-fund of category 4, you have a moderate risk of losing money but your chance for gains is also moderate.

Investment risk - there is no guarantee that the sub-fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

Strategy risk - as the sub-fund invests in other collective investment schemes, which themselves invest in assets such as bonds, company shares, cash and currencies, it will be subject to the collective risks of these other sub-funds. This may include emerging markets risk, sub-investment grade bond credit risk and smaller companies risk.

Company shares (i.e. equities) risk - the value of company shares may rise and fall due to the performance of individual companies or because of general market and economic conditions.

High cash risk - the sub-fund invests in cash which reduces the potential change in the sub-fund's price. In rising markets this could reduce returns and in falling markets this could reduce losses.

Emerging markets risk - less developed countries may face more political, economic or structural challenges than developed countries.

Credit risk - the issuer of a bond or a similar investment within the sub-fund may not pay income or repay capital to the sub-fund when due. Bonds which are rated below investment grade are considered to have a higher risk exposure with respect to meeting their payment obligations.

Interest rate risk - investments in bonds are affected by interest rates and inflation trends which may affect the value of the sub-fund.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the sub-fund's ability to meet redemption requests upon demand.

Currency risk - the sub-fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your shares may rise and fall as a result of exchange rate movements.

Derivative risk - the sub-fund may use derivatives for investment purposes and/or for Efficient Portfolio Management (EPM). Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the sub-fund takes its charges from the income of the sub-fund in the first instance. The impact of sub-fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the sub-fund to cover these charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the Prospectus.

^{**} The operating charges include all costs borne by the sub-fund, except for direct transaction costs. They include the operating charges of any collective investment schemes in which the sub-fund invests.

^{***} The direct transaction costs are made up of fees and commissions paid to agents, advisers, brokers and dealers, levies by regulatory agencies and securities exchanges as well as transfer taxes and duties. They do not include any difference between the quoted bid and offer prices or internal administrative or holding costs. These costs arise as a result of transactions undertaken both for efficient portfolio management and the meeting of the sub-fund's objectives. These costs exclude any effect of dilution adjustments used to offset the costs.

^{****} The operating charges percentage is the ratio of the sub-fund's ongoing charges (including the ongoing charges of any collective investment schemes in which the sub-fund invests but excluding interest on borrowings) to the average net assets of the sub-fund. This includes a synthetic element of 0.24% (30.04.2023 - 0.22%) (30.04.2022 - 0.20%) to incorporate the ongoing charges figure of the underlying sub-funds.

Notes to the financial statements

for the period from 1 May 2023 to 31 October 2023

1 Accounting policies

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice (SORP) for Authorised Funds, issued by the Investment Association (formerly the Investment Management Association) in May 2014 and as amended in June 2017.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 April 2023.

2 Distributions

The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:

	01.05.23 to 31.10.23	01.05.22 to 31.10.22
	£'000	£'000
Interim – Accumulation shares (31 October)	435	309
	435	309
Revenue deducted on cancellation of shares	38	19
Total distributions	473	328
Reconciliation of distributions:		
Net revenue after taxation	468	324
Equalisation on Collective Investment Schemes	2	3
Tax effect of fee rebates taken to capital	3	1
Total distributions	473	328

Distribution table

Interim distribution

Group 1: Shares purchased prior to 1 May 2023

Group 2: Shares purchased from 1 May 2023 to 31 October 2023

	Revenue pence per share	Equalisation pence per share*	•	Distribution paid 30.12.22 pence per share
Accumulation 'A' Shares Group 1	0.4152	-	0.4152	0.1524
Group 2	0.2237	0.1915	0.4152	0.1524
Accumulation 'R' Shares Group 1	0.6702	-	0.6702	0.3917
Group 2	0.3905	0.2797	0.6702	0.3917
Accumulation 'U1' Shares Group 1	1.0828	-	1.0828	0.6601
Group 2	0.5960	0.4868	1.0828	0.6601
Accumulation 'U2' Shares Group 1	1.1090	-	1.1090	0.6767
Group 2	0.5953	0.5137	1.1090	0.6767

^{*} Equalisation only applies to shares purchased during the distribution period (Group 2 shares). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

Quilter Investors Creation Dynamic Portfolio

Launch date28 April 2008IA SectorFlexible InvestmentInvestment ManagerQuilter Investors LimitedNet asset value£66,903,570

Objective

To achieve capital growth over a period of five years or more.

The portfolio is diversified across asset classes, with exposure to equities between 60% and 90% and with volatility of between 12% and 16%.*

*The volatility range is a target, based on long term actuarial assumptions and the sub-fund is managed to stay within this range most of the time. The volatility range is regularly reviewed and may change from time to time due to changes in these assumptions.

Policy

The sub-fund invests in a diversified portfolio of assets. It is expected that exposure will be to equities, fixed income, cash, money market instruments and currencies. Such investment will be made either directly by investing in such instruments or indirectly by investing in collective investment schemes. In addition, the portfolio may indirectly hold property and commodities by investing in collective investment schemes, transferable securities and derivatives. The collective investment schemes in which the sub-fund invests may include schemes which are managed or operated by the ACD or an associate of the ACD.

The sub-fund targets a volatility level reflective of its asset allocation.

The sub-fund may use derivative instruments for investment purposes or Efficient Portfolio Management. The use of derivatives for the purpose of investment may affect the risk profile of the sub-fund although this is not the ACD's intention. The use of derivatives for Efficient Portfolio Management is unlikely to affect the risk profile of the sub-fund.

Investment Manager's review

Market Review

Over the review period, markets tangled with the balance between strong economic data in the short term, versus the impact of policy tightening in the future. Fixed income markets, measured by the Bloomberg Global Aggregate index delivered a -3.3% returns (£H) as interest rates rose to reflect the stronger than expected data, and the consequent expectation of higher rates. Over the full period, global equity markets were up for a Sterling investor (MSCI All Countries€ World +1.6%) although this single data point masks both the benefit of Pound Sterling weakness (GBP -2.5% relative to USD over the period) as well as the concentration of the performance in the stock market over this period. In fact, the large cap growth segment of the US market was the main driver of returns. Other regions, such as the broad UK market or continental European market were negative (-5.2%, -7% respectively).

Portfolio Review

Against this backdrop the fund delivered a -2.2% return, outperforming its performance comparator by 0.7%. Equity markets caused the majority of the losses over this period, notably where holdings across the 'growth' space in Europe (contrary to the strong performance in the US) hurt performance. Holdings such as Premier Miton European Opportunities Fund or Quilter Investors UK Equity Mid-Cap Growth Fund were examples of this impact. That being said, equity managers were generally able to outperform their benchmarks which helped to mitigate these losses – an example of this was Quilter Investors Europe (ex UK) Equity Fund which outperformed its benchmark by over 5% over this period. Fixed income allocations were a modest positive due to positive performance from credit allocations. Holdings in the alternatives part of the portfolio were mixed – uncorrelated strategies such as AQR Managed Futures Strategy Fund or Ardea Global Alpha UCITS Fund helped to add positive returns. However, holdings with an inflation linkage struggled (notably holdings in the infrastructure space).

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the sub-fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Sub-funds in category 6 have in the past shown relatively high volatility. With a sub-fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

Investment risk - there is no guarantee that the sub-fund will achieve its objective. A capital loss or some or all of the amount invested may occur.

Strategy risk - as the sub-fund invests in other collective investment schemes, which themselves invest in assets such as bonds, company shares, cash and currencies, it will be subject to the collective risks of these other sub-funds. This may include emerging markets risk, sub-investment grade bond credit risk and smaller companies risk.

Company shares (i.e. equities) risk - the value of company shares may rise and fall due to the performance of individual companies or because of general market and economic conditions.

Emerging markets risk - less developed countries may face more political, economic or structural challenges than developed countries.

Credit risk - the issuer of a bond or a similar investment within the sub-fund may not pay income or repay capital to the sub-fund when due. Bonds which are rated below investment grade are considered to have a higher risk exposure with respect to meeting their payment obligations.

Interest rate risk - investments in bonds are affected by interest rates and inflation trends which may affect the value of the sub-fund.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the sub-fund's ability to meet redemption requests upon demand.

Currency risk - the sub-fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your shares may rise and fall as a result of exchange rate movements.

Derivative risk - the sub-fund may use derivatives for investment purposes and/or for Efficient Portfolio Management (EPM). Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the sub-fund takes its charges from the income of the sub-fund in the first instance. The impact of sub-fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the sub-fund to cover these charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the Prospectus.

^{**} The operating charges include all costs borne by the sub-fund, except for direct transaction costs. They include the operating charges of any collective investment schemes in which the sub-fund invests.

^{***} The direct transaction costs are made up of fees and commissions paid to agents, advisers, brokers and dealers, levies by regulatory agencies and securities exchanges as well as transfer taxes and duties. They do not include any difference between the quoted bid and offer prices or internal administrative or holding costs. These costs arise as a result of transactions undertaken both for efficient portfolio management and the meeting of the sub-fund's objectives. These costs exclude any effect of dilution adjustments used to offset the costs.

^{****} The operating charges percentage is the ratio of the sub-fund's ongoing charges (including the ongoing charges of any collective investment schemes in which the sub-fund invests but excluding interest on borrowings) to the average net assets of the sub-fund. This includes a synthetic element of 0.28% (30.04.2023 - 0.28%) (30.04.2022 - 0.28%) to incorporate the ongoing charges figure of the underlying sub-funds.

Notes to the financial statements

for the period from 1 May 2023 to 31 October 2023

1 Accounting policies

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice (SORP) for Authorised Funds, issued by the Investment Association (formerly the Investment Management Association) in May 2014 and as amended in June 2017.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 April 2023.

2 Distributions

The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:

	01.05.23 to 31.10.23 £'000	01.05.22 to 31.10.22 £'000
Interim – Accumulation shares (31 October)	602	616
		616
Revenue deducted on cancellation of shares	23	17
Revenue received on issue of shares	(2)	(1)
Total distributions	623	632
Reconciliation of distributions:		
Net revenue after taxation	612	623
Equalisation on Collective Investment Schemes	11	9
Total distributions	623	632

Distribution table

Interim distribution

Group 1: Shares purchased prior to 1 May 2023

Group 2: Shares purchased from 1 May 2023 to 31 October 2023

	Revenue pence per share	Equalisation pence per share*		Distribution paid 30.12.22 pence per share
Accumulation 'A' Shares Group 1	0.5236	-	0.5236	0.4492
Group 2	0.3654	0.1582	0.5236	0.4492
Accumulation 'R' Shares Group 1	0.9289	-	0.9289	0.8284
Group 2	0.5800	0.3489	0.9289	0.8284
Accumulation 'U1' Shares Group 1	1.5734	- 0.5276	1.5734	1.4066 1.4066
Group 2 Accumulation 'U2' Shares	1.0458	0.5276	1.5734	1.4000
Group 1	1.5927	-	1.5927	1.4241
Group 2	0.8140	0.7787	1.5927	1.4241

^{*} Equalisation only applies to shares purchased during the distribution period (Group 2 shares). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

Quilter Investors Creation Moderate Portfolio

Launch date28 April 2008IA SectorMixed Investment 40-85% SharesInvestment ManagerQuilter Investors LimitedNet asset value£232,936,904

Objective

To achieve capital growth over a period of five years or more.

The portfolio is diversified across asset classes, with exposure to equities between 35% and 75% and with volatility of between 9% and 13%.*

*The volatility range is a target, based on long term actuarial assumptions and the sub-fund is managed to stay within this range most of the time. The volatility range is regularly reviewed and may change from time to time due to changes in these assumptions.

Policy

The sub-fund invests in a diversified portfolio of assets. It is expected that exposure will be to equities, fixed income, cash, money market instruments and currencies. Such investment will be made either directly by investing in such instruments or indirectly by investing in collective investment schemes. In addition, the portfolio may indirectly hold property and commodities by investing in collective investment schemes, transferable securities and derivatives. The collective investment schemes in which the sub-fund invests may include schemes which are managed or operated by the ACD or an associate of the ACD.

The sub-fund targets a volatility level reflective of its asset allocation.

The sub-fund may use derivative instruments for investment purposes or Efficient Portfolio Management. The use of derivatives for the purpose of investment may affect the risk profile of the sub-fund although this is not the ACD's intention. The use of derivatives for Efficient Portfolio Management is unlikely to affect the risk profile of the sub-fund.

Investment Manager's review

Market Review

Over the review period, markets tangled with the balance between strong economic data in the short term, versus the impact of policy tightening in the future. Fixed income markets, measured by the Bloomberg Global Aggregate index delivered a -3.3% returns (£H) as interest rates rose to reflect the stronger than expected data, and the consequent expectation of higher rates. Over the full period, global equity markets were up for a Sterling investor (MSCI All Countries World +1.6%) although this single data point masks both the benefit of Pound Sterling weakness (GBP -2.5% relative to USD over the period) as well as the concentration of the performance in the stock market over this period. In fact, the large cap growth segment of the US market was the main driver of returns. Other regions, such as the broad UK market or continental European market were negative (-5.2%, -7% respectively).

Portfolio Review

Against this backdrop the fund delivered a -1.9% return, outperforming its performance comparator by 1.3%. Equity markets caused the majority of the losses over this period, notably where holdings across the 'growth' space in Europe (contrary to the strong performance in the US) hurt performance. Holdings such as Premier Miton European Opportunities Fund or Quilter Investors UK Equity Mid-Cap Growth Fund were examples of this impact. That being said, equity managers were generally able to outperform their benchmarks which helped to mitigate these losses – an example of this was Quilter Investors Europe (ex UK) Equity Fund which outperformed its benchmark by over 5% over this period. Fixed income allocations also caused losses although relative to peers and long-term allocations, the portfolio held an underweight to government bonds, and an overweight to credit allocations both of which helped to mitigate losses. Holdings in the alternatives part of the portfolio were mixed – uncorrelated strategies such as AQR Managed Futures Strategy Fund or Ardea Global Alpha UCITS Fund helped to add positive returns. However, holdings with an inflation linkage struggled (notably holdings in the infrastructure space).

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the sub-fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Sub-funds in category 5 have in the past shown moderately high volatility. With a sub-fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

Investment risk - there is no guarantee that the sub-fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

Strategy risk - as the sub-fund invests in other collective investment schemes, which themselves invest in assets such as bonds, company shares, cash and currencies, it will be subject to the collective risks of these other sub-funds. This may include emerging markets risk, sub-investment grade bond credit risk and smaller companies risk.

Company shares (i.e. equities) risk - the value of company shares may rise and fall due to the performance of individual companies or because of general market and economic conditions.

Emerging markets risk - less developed countries may face more political, economic or structural challenges than developed countries.

Credit risk - the issuer of a bond or a similar investment within the sub-fund may not pay income or repay capital to the sub-fund when due. Bonds which are rated below investment grade are considered to have a higher risk exposure with respect to meeting their payment obligations.

Interest rate risk - investments in bonds are affected by interest rates and inflation trends which may affect the value of the sub-fund.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the sub-fund's ability to meet redemption requests upon demand.

Currency risk - the sub-fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your shares may rise and fall as a result of exchange rate movements.

Derivative risk - the sub-fund may use derivatives for investment purpose and/or for efficient portfolio management (EPM). Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the sub-fund takes its charges from the income of the sub-fund in the first instance. The impact of sub-fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the sub-fund to cover these charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the Prospectus.

Operating charges**** Direct transaction costs***	0.95% 0.01%	0.01%	0.01%

^{**} The operating charges include all costs borne by the sub-fund, except for direct transaction costs. They include the operating charges of any collective investment schemes in which the sub-fund invests.

^{***} The direct transaction costs are made up of fees and commissions paid to agents, advisers, brokers and dealers, levies by regulatory agencies and securities exchanges as well as transfer taxes and duties. They do not include any difference between the quoted bid and offer prices or internal administrative or holding costs. These costs arise as a result of transactions undertaken both for efficient portfolio management and the meeting of the sub-fund's objectives. These costs exclude any effect of dilution adjustments used to offset the costs.

^{****} The operating charges percentage is the ratio of the sub-fund's ongoing charges (including the ongoing charges of any collective investment schemes in which the sub-fund invests but excluding interest on borrowings) to the average net assets of the sub-fund. This includes a synthetic element of 0.27% (30.04.2023 - 0.28%) (30.04.2022 - 0.27%) to incorporate the ongoing charge figures of the underlying sub-funds.

Notes to the financial statements

for the period from 1 May 2023 to 31 October 2023

1 Accounting policies

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice (SORP) for Authorised Funds, issued by the Investment Association (formerly the Investment Management Association) in May 2014 and as amended in June 2017.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 April 2023.

2 Distributions

The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:

	01.05.23 to 31.10.23	01.05.22 to 31.10.22
	£'000	£'000
First Interim – Accumulation shares (31 October)	2,241	1,933
	2,241	1,933
Revenue deducted on cancellation of shares	100	57
Revenue received on issue of shares	(2)	(4)
Total distributions	2,339	1,986
Reconciliation of distributions:		
Net revenue after taxation	2,293	1,951
Equalisation on Collective Investment Schemes	35	27
Tax effect of fee rebates taken to capital	11	8
Total distributions	2,339	1,986

Distribution table

Interim distribution

Group 1: Shares purchased prior to 1 May 2023

Group 2: Shares purchased from 1 May 2023 to 31 October 2023

	Revenue pence per share	Equalisation pence per share*	Distribution paid 29.12.23 pence per share	Distribution paid 30.12.22 pence per share
Accumulation 'A' Shares Group 1	0.6552	-	0.6552	0.3864
Group 2	0.3942	0.2610	0.6552	0.3864
Accumulation 'R' Shares Group 1	0.8797	-	0.8797	0.6941
Group 2	0.4613	0.4184	0.8797	0.6941
Accumulation 'U1' Shares Group 1 Group 2	1.4625 0.9134	- 0.5491	1.4625 1.4625	1.1665 1.1665
Accumulation 'U2' Shares		0.0401		
Group 1 Group 2	1.4612 0.8292	0.6320	1.4612 1.4612	1.1656 1.1656

^{*} Equalisation only applies to shares purchased during the distribution period (Group 2 shares). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

Quilter Investors Monthly Income Portfolio

Launch date26 June 2019IA SectorMixed Investment 20-60% SharesInvestment ManagerQuilter Investors LimitedNet asset value£146,053,835

Objective

The sub-fund aims to provide income with the potential for some capital growth over a period of five years or more.

Policy

The risk profile of the sub-fund is broadly balanced, with between 20% and 60% invested in equities and the remainder in other asset classes and with volatility of between 6% and 10% *

The sub-fund will invest through collective investment schemes (up to 100% of the value of the sub-fund, including those that are managed or operated by the ACD or an associate of the ACD) in order to give exposure to a diversified portfolio of asset classes. It is expected that exposure will be to equities, fixed interest, property, commodities and currency. Whilst the sub-fund is actively managed, it will typically hold a minimum of 35% in passive investment vehicles or instruments. The use of passive investment vehicles or instruments when blended with active vehicles and instruments will form part of the overall strategy to meet the sub-fund's objective.

The sub-fund may also invest directly in transferable securities, derivative instruments and forward transactions (for investment purposes or Efficient Portfolio Management), cash, near cash, warrants, money market instruments, and permitted deposits. The sub-fund may sell call options over securities or portfolios of securities or indices in order to generate additional income. The use of derivatives for the purpose of investment may affect the risk profile of the sub-fund although this is not the ACD's intention. The use of derivatives for Efficient Portfolio Management is unlikely to affect the risk profile of the sub-fund.

*The volatility range is a target, based on long term actuarial assumptions and the sub-fund is managed to stay within this range most of the time. The volatility range is regularly reviewed and may change from time to time due to changes in these assumptions.

Investment Manager's review

Market Review

Equity markets were buoyant in the first part of the period as corporate earnings and economic growth in the US were both better than expected. The slowing and eventual pause in interest rate rises by the Fed gave rise to optimism that policy easing may be round the corner.

However, the mood soured in August with the dawning realisation that stronger than expected growth meant that future interest rate cuts that had come to be expected were less likely. This also helped drive a bond selloff and left stock markets a little lower at the end of the period than at the start, with the US as the top performer, assisted by strength in the US dollar.

Meanwhile, rising oil prices driven by supply cuts from Saudi Arabia and Russia began to push inflation higher once more in the US, further raising the risk that interest rates would need to remain elevated to squash inflation. This effect proved to be only temporary though, as despite the conflict in the Middle East, oil prices were on their way back down from the end of September.

Portfolio Review

The Quilter Investors Monthly Income portfolio lost 4.45% during the reporting period, 1.60% behind its IA Mixed Sector performance comparator.

UK and European equity holdings were the most significant drag on performance, and in particular smaller company exposures were hit hard, with Montanaro UK Income Fund and Montanaro European Income Fund both more than 10% lower. Japanese and US equity holdings fared better and the top positive contributor to portfolio returns was the Schroder US Equity Income Maximiser Fund.

Bond exposures were also a drag, although more modestly so. High yield credit focused holdings, such as Hermes Unconstrained Credit Fund, generally performed better than those with more interest rate exposure, like Allianz Strategic Bond Fund.

Meanwhile, the infrastructure and renewable energy investments trusts, which form part of the portfolio's alternative assets allocation, had a very weak six months, each down almost 20%. This was driven by rising bond yields as well as on-going selling pressure in the market.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the sub-fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Sub-funds in category 5 have in the past shown moderately high volatility. With a sub-fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

Investment risk - there is no guarantee that the sub-fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

Strategy risk - as the sub-fund invests in other collective investment schemes, which themselves invest in assets such as bonds, company shares, cash and currencies, it will be subject to the collective risks of these other sub-funds. This may include emerging markets risk, sub-investment grade bond credit risk and smaller companies risk.

Company shares (i.e. equities) risk - the value of company shares may rise and fall due to the performance of individual companies or because of general market and economic conditions.

Emerging markets risk - less developed countries may face more political, economic or structural challenges than developed countries.

Credit risk - the issuer of a bond or a similar investment within the sub-fund may not pay income or repay capital to the sub-fund when due. Bonds which are rated below investment grade are considered to have a higher risk exposure with respect to meeting their payment obligations.

Interest rate risk - investments in bonds are affected by interest rates and inflation trends which may affect the value of the sub-fund.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the sub-fund's ability to meet redemption requests upon demand.

Style bias risk - sub-funds that favour shares of either undervalued companies ("value stocks") or companies with the potential for growth ("growth stocks") may be subject to periods of underperformance, as value and growth stocks typically outperform each other, and markets generally, at different times.

Currency risk - the sub-fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your shares may rise and fall as a result of exchange rate movements.

Derivative risk - the sub-fund may use derivatives for investment purposes and/or for Efficient Portfolio Management (EPM). Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the sub-fund takes its charges from the capital of the sub-fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the sub-fund to cover the charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the Prospectus

^{**} The operating charges include all costs borne by the sub-fund, except for direct transaction costs. They include the operating charges of any collective investment schemes in which the sub-fund invests.

^{***} The direct transaction costs are made up of fees and commissions paid to agents, advisers, brokers and dealers, levies by regulatory agencies and securities exchanges as well as transfer taxes and duties. They do not include any difference between the quoted bid and offer prices or internal administrative or holding costs. These costs arise as a result of transactions undertaken both for efficient portfolio management and the meeting of the sub-fund's objectives. These costs exclude any effect of dilution adjustments used to offset the costs.

^{****} The operating charges percentage is the ratio of the sub-fund's ongoing charges (including the ongoing charges of any collective investment schemes in which the sub-fund invests but excluding interest on borrowings) to the average net assets of the sub-fund. If the share class launched during the period the operating figures are annualised. This includes a synthetic element of 0.28% (30.04.2023 - 0.26%) (30.04.2022 - 0.22%) to incorporate the ongoing charge figures of the underlying sub-funds.

Notes to the financial statements

for the period from 1 May 2023 to 31 October 2023

1 Accounting policies

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice (SORP) for Authorised Funds, issued by the Investment Association (formerly the Investment Management Association) in May 2014 and as amended in June 2017.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 April 2023.

2 Distributions

The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:

	01.05.23 to	01.05.22 to
	31.10.23	31.10.22

^{*} Equalisation only applies to shares purchased during the distribution period (Group 2 shares). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

Quilter Investors Monthly Income and Growth Portfolio

Launch date26 June 2019IA SectorMixed Investment 40-85% SharesInvestment ManagerQuilter Investors LimitedNet asset value£176,014,453

Objective

The sub-fund aims to provide income and capital growth over a period of five years or more.

Policy

The risk profile of the sub-fund is broadly moderate, with between 40% and 85% invested in equities and the remainder in other asset classes and with volatility of between 9% and 13%*

The sub-fund will invest through collective investment schemes (up to 100% of the value of the sub-fund, including those that are managed or operated by the ACD or an associate of the ACD) in order to give exposure to a diversified portfolio of asset classes. It is expected that exposure will be to equities, fixed interest, property, commodities and currency. Whilst the sub-fund is actively managed, it will typically hold a minimum of 35% in passive investment vehicles or instruments. The use of passive investment vehicles or instruments when blended with active vehicles and instruments will form part of the overall strategy to meet the sub-fund's objective.

The sub-fund may also invest directly in transferable securities, derivative instruments and forward transactions (for investment purposes or Efficient Portfolio Management), cash, near cash, warrants, money market instruments, and permitted deposits. The sub-fund may sell call options over securities or portfolios of securities or indices or order to generate additional income. The use of derivatives for the purpose of investment may affect the risk profile of the sub-fund although this is not the ACD's intention. The use of derivatives for Efficient Portfolio Management is unlikely to affect the risk profile of the sub-fund.

*The volatility range is a target, based on long term actuarial assumptions and the sub-fund is managed to stay within this range most of the time. The volatility range is regularly reviewed and may change from time to time due to changes in these assumptions.

Investment Manager's review

Market Review

Equity markets were buoyant in the first part of the period as corporate earnings and economic growth in the US were both better than expected. The slowing and eventual pause in interest rate rises by the Fed gave rise to optimism that policy easing may be round the corner.

However, the mood soured in August with the dawning realisation that stronger than expected growth meant that future interest rate cuts that had come to be expected were less likely. This also helped drive a bond selloff and left stock markets a little lower at the end of the period than at the start, with the US as the top performer, assisted by strength in the US dollar.

Meanwhile, rising oil prices driven by supply cuts from Saudi Arabia and Russia began to push inflation higher once more in the US, further raising the risk that interest rates would need to remain elevated to squash inflation. This effect proved to be only temporary though, as despite the conflict in the Middle East, oil prices were on their way back down from the end of September.

Portfolio Review

The Quilter Investors Monthly Income portfolio lost 4.68% during the reporting period, 1.53% behind its IA Mixed Sector performance comparator.

UK and European equity holdings were the most significant drag on performance, and in particular smaller company exposures were hit hard, with Montanaro UK Income Fund and Montanaro European Income Fund both more than 10% lower. Japanese and US equity holdings fared better and the top positive contributor to portfolio returns was the iShares Core S&P 500 ETF.

Bond exposures were also a drag, although more modestly so. High yield credit focused holdings, such as Hermes Unconstrained Credit Fund, generally performed better than those with more interest rate exposure, like Allianz Strategic Bond Fund.

Meanwhile, the infrastructure and renewable energy investments trusts, which form part of the portfolio's Alternative Assets allocation, had a very weak six months, each down almost 20%. This was driven by rising bond yields as well as on going selling pressure in the market.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the sub-fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the sub-fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Sub-funds in category 5 have in the past shown moderately high volatility. With a sub-fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

Investment risk - there is no guarantee that the sub-fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

Strategy risk - as the sub-fund invests in other collective investment schemes, which themselves invest in assets such as bonds, company shares, cash and currencies, it will be subject to the collective risks of these other sub-funds. This may include emerging markets risk, sub-investment grade bond credit risk and smaller companies risk

Company shares (i.e. equities) risk - the value of company shares may rise and fall due to the performance of individual companies or because of general market and economic conditions.

Emerging markets risk - less developed countries may face more political, economic or structural challenges than developed countries.

Credit risk - the issuer of a bond or a similar investment within the sub-fund may not pay income or repay capital to the sub-fund when due. Bonds which are rated below investment grade are considered to have a higher risk exposure with respect to meeting their payment obligations.

Interest rate risk - investments in bonds are affected by interest rates and inflation trends which may affect the value of the sub-fund.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the sub-fund's ability to meet redemption requests upon demand.

Style bias risk - sub-funds that favour shares of either undervalued companies ("value stocks") or companies with the potential for growth ("growth stocks") may be subject to periods of underperformance, as value and growth stocks typically outperform each other, and markets generally, at different times.

Currency risk - the sub-fund is denominated in British Pounds but may hold assets denominated in, or with exposure to, other currencies. The value of your shares may rise and fall as a result of exchange rate movements.

Derivative risk - the sub-fund may use derivatives for investment purposes and/or for Efficient Portfolio Management (EPM). Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the sub-fund takes its charges from the capital of the sub-fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the sub-fund to cover the charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the Prospectus.

^{**} The operating charges include all costs borne by the sub-fund, except for direct transaction costs. They include the operating charges of any collective investment schemes in which the sub-fund invests.

^{***} The direct transaction costs are made up of fees and commissions paid to agents, advisers, brokers and dealers, levies by regulatory agencies and securities exchanges as well as transfer taxes and duties. They do not include any difference between the quoted bid and offer prices or internal administrative or holding costs. These costs arise as a result of transactions undertaken both for efficient portfolio management and the meeting of the sub-fund's objectives. These costs exclude any effect of dilution adjustments used to offset the costs.

^{****} The operating charges percentage is the ratio of the sub-fund's ongoing charges (including the ongoing charges of any collective investment schemes in which the sub-fund invests but excluding interest on borrowings) to the average net assets of the sub-fund. If the share class launched during the period the operating figures are annualised. This includes a synthetic element of 0.30% (30.04.2023 - 0.29%) (30.04.2022 - 0.22%) to incorporate the ongoing charge figures of the underlying sub-funds.

Notes to the financial statements

for the period from 1 May 2023 to 31 October 2023

1 Accounting policies

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice (SORP) for Authorised Funds, issued by the Investment Association (formerly the Investment Management Association) in May 2014 and as amended in June 2017.

The accounting policies applied are consistent with those disclosed within the annual Financial Statements for the year ended 30 April 2023.

2 Distributions

The distributions take account of revenue received on the issue of shares and revenue deducted on the cancellation of shares, and comprise:

	01.05.23 to 31.10.23 £'000	01.05.22 to 31.10.22 £'000

^{*} Equalisation only applies to shares purchased during the distribution period (Group 2 shares). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.
