Report of the Authorised Corporate Director

abrdn OEIC VI (formerly Aberdeen Standard OEIC VI) (the "Company"), is an open-ended investment company with variable capital. The Company is incorporated in England and Wales under registered number IC000040 and is currently authorised pursuant to Regulation 14 of the Open-Ended Investment Companies Regulations 2001 (the "OEIC Regulations"). The effective date of the authorisation order made by the Financial Conduct Authority (the "FCA") was 31 August 1999.

The Company is also an UCITS for the purposes of the FCA Rules. Its FCA Product Reference Number ("PRN") is 189971. The Company is structured as an umbrella scheme for the purposes of the Collective Investment Schemes Sourcebook (COLL) and consists of four funds. European Income Fund is no longer open to investors, having redeemed all shares in 2012. Pan-European Equity Fund and Pan-European SRI Equity Fund are no longer open to investors, having redeemed all shares in 2011. It is the intention of the ACD to terminate the funds at a later date once the residual assets and liabilities are settled. As a result the financial statements for these funds have not been prepared on a going concern basis.

Report of the Authorised Corporate Director

Continued

The Authorised Corporate Director (the ACD), abrdn Fund Managers Limited (formerly Aberdeen Standard Fund Managers Limited), and the Investment Advisers, abrdn Investments Limited (formerly Aberdeen Asset Managers Limited) are wholly owned subsidiaries of abrdn plc, and are accordingly associates. The Investment Advisers have the authority of the ACD to make decisions on its behalf in all aspects of the investment management of the investments and other property of the Company. The significant activities of the investment adviser, other than providing services to the Company as investment adviser, are providing investment management services to various categories of client, together with providing marketing and administration services in connection with such investment management services. The investment adviser has responsibility for and full discretion in making all investment decisions in relation to each fund subject to and in accordance with the investment objectives and policies of the funds as varied from time to time, the provisions of the instrument of incorporation, the COLL Rules and any directions or instructions given from time to time by the ACD.

The Authorised Corporate Director (the ACD) of the Company is abrdn Fund Managers Limited, a private company limited by shares which was incorporated in England and Wales on 7 November 1962. Its ultimate holding company is abrdn plc, which is incorporated in Scotland.

Financial details and Fund Managers' reviews of the individual funds for the year ended 31 January 2023 are given in the following pages of this report.

Each fund has an individual investment objective and policy and each differs in regard to the extent to which they concentrate on achieving income or capital growth. There may be funds added to the umbrella of abrdn OEIC VI (with consent of the FCA and the Depositary) in the future.

The funds are valued on a mid-price basis and dealt at a single price regardless of whether a purchase or sale is being affected. The daily price for each fund appears on the abrdn website at **abrdn.com**.

The funds are segregated portfolios of assets and, accordingly, the assets of a fund belong exclusively to that fund and shall not be used to discharge directly or indirectly the liabilities of, or claims against, any other person or body, including the Company, or any other fund, and shall not be available for any such purpose.

Shareholders are not liable for the debts of the Company.

All fees charged by the Investment Adviser will be borne by the ACD.

Significant Events

On 24 February 2022, Russia launched a military offensive against Ukraine resulting in widespread sanctions on Russia and heightened security and cyber threats. Market disruptions associated with the geopolitical event have had a global impact, and uncertainty exists as to the implications. Such disruptions can adversely affect assets of funds and performance thereon, specifically Russian and Ukrainian assets.

The Management Company has delegated various tasks to abrdn's Investor Protection Committee (IPC). The IPC is responsible for ensuring the fair treatment of investors.

The IPC undertakes regular reviews of the following:

- · Market liquidity across each asset class and fund;
- · Asset class bid-offer spread monitoring;
- · Review of fund level dilution rate appropriateness;
- Review of daily subscriptions/redemptions to anticipate any potential concerns to meet redemption proceeds;
- · Any requirement to gate or defer redemptions;
- · Any requirement to suspend a fund(s);
- · Any fair value price adjustments at a fund level.

abrdn's Valuation and Pricing Committee (VPC) also continue to review the valuation of assets and the recoverability of income from those assets making appropriate adjustments where necessary. The VPC is made up of a wide range of specialists across abrdn with a wide range of experience in asset pricing. The Management Company has also evaluated, and will continue to evaluate, the operational resilience of all service providers. The Company's key suppliers do not have operations pertaining to the Company in Ukraine or Russia.

Developments and prospectus updates since 1 February 2022

- On 24 February 2022, Mr. Adam Shanks was appointed as a director of abrdn Fund Managers Limited.
- On 1 July 2022, the details of the operation of the Stock Lending on OEIC VI was updated to recognise a change to the division of the gross income generated by Stock Lending activity.
- On 1 August 2022, the prospectus was updated to reflect the increased level of share-dealing accuracy applied by the Company from 3 decimal points, to 4 decimal points.

Report of the Authorised Corporate Director

Continued

- On 1 August 2022 the Company changed its name from Aberdeen Standard OEIC VI to abrdn OEIC VI. At the same time the underlying sub-fund of the Company renamed to reflect the "abrdn" rebranding. Additionally the Authorised Corporate Director of the Company changed its name from "Aberdeen Standard Fund Managers Limited" to "abrdn Fund Managers Limited". Further details and a list of the renaming can be found at https://www.abrdn.com/en/uk/investor/fund-centre/ investor-communications.
- As of 1 August 2022, Citibank N.A., London Branch provide certain investment administration functions.
- On 7 December 2022, any references to the address Bow Bells House, 1 Bread Street, London, EC4M 9HH were replaced with 280 Bishopsgate, London, EC2M 4AG.
- On 7 December 2022, any references to Aberdeen Asset Managers Limited were updated to abrdn Investments Limited.
- On 31 December 2022, Mrs. Rowan McNay resigned as a director of abrdn Fund Managers Limited.
- The list of funds managed by the ACD was updated, where appropriate.
- Performance and dilution figures were refreshed, where appropriate.
- The list of sub-custodians was refreshed, where appropriate.
- The list of eligible markets was refreshed, where appropriate.
- The list of sub-investment advisors to the funds was refreshed, where appropriate.
- The risk disclosures in relation to the funds were refreshed, where appropriate.

Assessment of Value

In 2017 the Financial Conduct Authority (FCA) published the final Asset Management Market Study. This introduced (among other reforms) new governance rules with the aim of enhancing duty of care and ensuring the industry acts in investors' best interests. The rules were outlined in the FCA policy statement PS18/8 and came into effect from 30 September 2019. As a result, abrdn Fund Managers Limited is required to perform a detailed annual assessment, determining whether our funds are "providing value to investors". The resulting findings will be published on a composite basis throughout the year, and can be found on the 'Literature' pages of our website.

Statement of the Authorised Corporate Director's Responsibilities

The Collective Investment Schemes sourcebook published by the FCA, ("the COLL Rules") require the Authorised Corporate Director ("ACD") to prepare financial statements for each interim and annual accounting period which give a true and fair view of the financial position of the Company and of the net income and net gains on the property of the Company for the period.

In preparing the financial statements the ACD is responsible for:

- · selecting suitable accounting policies and then applying them consistently;
- · making judgements and estimates that are reasonable and prudent;
- following UK accounting standards, including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland;
- complying with the disclosure requirements of the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014;
- keeping proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements;
- assessing the Company and its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern;
- using the going concern basis of accounting unless they either intend to liquidate the Company or its sub-funds or to
 cease operations or have no realistic alternative but to do so. For the reasons stated in the Report of the Authorised
 Corporate Director, the financial statements of European Income Fund, Pan-European Equity Fund and Pan-European
 SRI Equity Fund have not been prepared on a going concern basis;
- such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and
- · taking reasonable steps for the prevention and detection of fraud and irregularities.

The ACD is responsible for the management of the Company in accordance with its Instrument of Incorporation, the Prospectus and the COLL Rules.

The ACD is responsible for the maintenance and integrity of the corporate and financial information included on its website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Authorised Corporate Director's Statement

In accordance with the requirements of the COLL Rules as issued and amended by the Financial Conduct Authority, we hereby certify the report on behalf of abrdn Fund Managers Limited, the Authorised Corporate Director.

Denise Thomas Director 22 May 2023

Statement of Depositary's Responsibilities in Respect of the Scheme and Report of the Depositary to the Shareholders of abrdn OEIC VI

The Depositary is responsible for the safekeeping of all the property of the Company (other than tangible moveable property) which is entrusted to it and ensuring proper registration of tangible moveable property, and for the collection of income arising from all such scheme property.

It is the duty of the Depositary to take reasonable care to ensure that the Company is managed and operated by the Authorised Corporate Director in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook ("the Sourcebook"), the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228) (the OEIC Regulations), the Company's Instrument of Incorporation, and the Prospectus, as appropriate, concerning: the pricing of and dealing in Shares in the Company; the application of income of the Company; and the investment portfolio and borrowing activities of the Company.

Having carried out procedures and enquiries considered duly necessary to discharge our responsibilities as Depositary of the Company, based on information and explanations provided to us, we believe that, in all material respects, the Company, acting through then Authorised Corporate Director:

- i. has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Sourcebook, and where applicable, the OEIC regulations, the Company's Instrument of Incorporation, and the Prospectus;
- ii. has observed the investment and borrowing powers and restrictions applicable to the Company; and iii. has, otherwise, ensured the proper operation of the Company.

Citibank UK Limited

22 May 2023

Independent Auditor's Report to the Shareholders of abrdn OEIC VI (the Company)

Opinion

We have audited the financial statements of the Company for the year ended 31 January 2023 which comprise the Statements of Total Return, the Statements of Change in Net Assets Attributable to Shareholders, the Balance Sheets, the Related Notes and Distribution Tables for each of the Company's sub-funds listed on page 2 and the accounting policies set out on pages 11 to 14.

In our opinion the financial statements:

- give a true and fair view, in accordance with UK accounting standards, including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland, of the financial position of each of the subfunds as at 31 January 2023, and of the net revenue/net expense and the net capital gains/net capital losses on the property of each of the sub-funds for the year then ended: and
- have been properly prepared in accordance with the Instrument of Incorporation, the Statement of Recommended Practice relating to Authorised Funds, and the COLL Rules.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We have fulfilled our ethical responsibilities under, and are independent of the Company in accordance with, UK ethical requirements including the FRC Ethical Standard.

We have received all the information and explanations which we consider necessary for the purposes of our audit and we believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion.

Emphasis of matter – non going concern basis of preparation

In respect of European Income Fund, Pan-European Equity Fund and Pan-European SRI Equity Fund, we draw attention to the disclosure made in accounting policy 1a. "Basis of preparation" to the financial statements which explains that the financial statements of the sub-funds have not been prepared on a going concern basis for the reason set out in that note. Our opinion is not modified in respect of this matter.

Going concern

The Authorised Corporate Director has prepared the financial statements on the going concern basis as they do not intend to liquidate the Company or its sub-funds or to cease their operations, and as they have concluded that the Company and its sub-funds' financial position means that this is realistic except for European Income Fund, Pan-European Equity Fund and Pan-European SRI Equity Fund. They have also concluded that there are no material uncertainties that could have cast significant doubt over their ability to continue as a going concern for at least a year from the date of approval of the financial statements ("the going concern period").

In our evaluation of the Authorised Corporate Director's conclusions, we considered the inherent risks to the Company's and its sub-funds' business model and analysed how those risks might affect the Company's and its sub-funds' financial resources or ability to continue operations over the going concern period.

Our conclusions based on this work:

- we consider that the Authorised Corporate Director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate;
- we have not identified, and concur with the Authorised Corporate Director's assessment that there is not, a material uncertainty related to events or conditions that, individually or collectively, may cast significant doubt on the Company's and its sub-funds' ability to continue as a going concern for the going concern period.

However, as we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgements that were reasonable at the time they were made, the above conclusions are not a guarantee that the Company or its sub-funds will continue in operation.

Fraud and breaches of laws and regulations – ability to detect

Identifying and responding to risks of material misstatement due to fraud

To identify risks of material misstatement due to fraud ("fraud risks") we assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. Our risk assessment procedures included:

 Enquiring of directors as to the Company's high-level policies and procedures to prevent and detect fraud, as well as whether they have knowledge of any actual, suspected or alleged fraud;

Independent Auditor's Report to the Shareholders of abrdn OEIC VI (the Company)

Continued

- Assessing the segregation of duties in place between the ACD, the Depositary, the Administrator and the Investment Adviser:
- · Reading ACD board minutes.

As required by auditing standards, we perform procedures to address the risk of management override of controls, in particular the risk that management may be in a position to make inappropriate accounting entries. On this audit we do not believe there is a fraud risk related to revenue recognition because the revenue is principally nonjudgemental and based on publicly available information, with limited opportunity for manipulation. We did not identify any additional fraud risks.

We evaluated the design and implementation of the controls over journal entries and other adjustments and made inquiries of the Administrator about inappropriate or unusual activity relating to the processing of journal entries and other adjustments. We identified and selected a sample of journal entries made at the end of the reporting period and tested those substantively including all material post-closing entries. Based on the results of our risk assessment procedures and understanding of the process, including the segregation of duties between the Directors and the Administrator, no further high-risk journal entries or other adjustments were identified.

Identifying and responding to risks of material misstatement due to non-compliance with laws and regulations

We identified areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general commercial and sector experience and through discussion with the ACD and the Administrator (as required by auditing standards) and discussed with the Directors the policies and procedures regarding compliance with laws and regulations.

The potential effect of these laws and regulations on the financial statements varies considerably.

Firstly, the Company is subject to laws and regulations that directly affect the financial statements including financial reporting legislation (including related authorised fund legislation maintained by the Financial Conduct Authority) and taxation legislation and we assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items.

Secondly, the Company is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: money

laundering, data protection and bribery and corruption legislation recognising the Company's activities. Auditing standards limit the required audit procedures to identify non-compliance with these laws and regulations to enquiry of the Directors and the Administrator and inspection of regulatory and legal correspondence, if any. Therefore if a breach of operational regulations is not disclosed to us or evident from relevant correspondence, an audit will not detect that breach.

Context of the ability of the audit to detect fraud or breaches of law or regulation

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remained a higher risk of non-detection of fraud, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. Our audit procedures are designed to detect material misstatement. We are not responsible for preventing non-compliance or fraud and cannot be expected to detect non-compliance with all laws and regulations.

Other information

The Authorised Corporate Director is responsible for the other information presented in the Annual Report together with the financial statements. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work:

- we have not identified material misstatements in the other information; and
- in our opinion the information given in the Authorised Corporate Director's Report is consistent with the financial statements.

Independent Auditor's Report to the Shareholders of abrdn OEIC VI (the Company)

Continued

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where under the COLL Rules we are required to report to you if, in our opinion:

- proper accounting records for the Company have not been kept; or
- the financial statements are not in agreement with the accounting records.

Authorised Corporate Director's responsibilities

As explained more fully in its statement set out on page 6 the Authorised Corporate Director is responsible for: the preparation of financial statements that give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Company and its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Company or its sub-funds or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsresponsibilities.

The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the Company's shareholders, as a body, in accordance with Rule 4.5.12 of the Collective Investment Schemes sourcebook ('the COLL Rules') issued by the Financial Conduct Authority under the Open-Ended Investment Companies Regulations 2001. Our audit work has been undertaken so that we might state to the Company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Grant Archer

22 May 2023

For the year ended 31 January 2023

1 Accounting Policies

a. Basis of preparation

The financial statements for each of the funds have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice (SORP) for Financial Statements of Authorised Funds issued by the Investment Management Association in May 2014 (IMA SORP 2014), Financial Reporting Standard (FRS) 102 and United Kingdom Generally Accepted Accounting Practice.

For abrdn Emerging Markets Equity Enhanced Index Fund the ACD has undertaken a detailed assessment, and continues to monitor, the fund's ability to meet its liabilities as they fall due, including liquidity, declines in global capital markets and investor redemption levels. Based on this assessment, the fund continues to be open for trading and the ACD is satisfied the fund has adequate financial resources to continue in operation for at least the next 12 months after the financial statements are signed, and accordingly it is appropriate to adopt the going concern basis in preparing the financial statements.

European Income Fund is no longer open to investors, having redeemed all shares in 2012. Pan-European Equity Fund and Pan-European SRI Equity Fund are no longer open to investors, having redeemed all shares in 2011. It is the intention of the ACD to terminate the funds at a later date once the residual assets and liabilities are settled. As a result the financial statements for these funds have not been prepared on a going concern basis.

For all funds that have not been prepared on a going concern basis noted above, no adjustments were required to the financial statements to adjust assets or liabilities to their realisable values or to provide for liabilities arising from the decision to terminate the funds. No liabilities have been recorded for costs of the terminations as the intention is that the Authorised Corporate Director will bear any such costs which may arise.

b. Valuation of investments

Investments have been valued at fair value as at the close of business on 31 January 2023. The SORP defines fair value as the market value of each security, in an active market, this is generally the quoted bid price.

Unlisted, unapproved, illiquid or suspended securities are valued at the Authorised Corporate Directors' best estimate of the amount that would be received from an immediate transfer at arm's length. The ACD has appointed a Fair Value Pricing committee to review valuations.

Collective Investment Schemes are valued by reference to their net asset value. Dual priced funds have been valued at the bid price. Single priced funds have been valued using the single price.

Any open positions in derivative contracts or forward foreign currency transactions at the year-end are included in the Balance Sheet at their mark to market value.

c. Foreign Exchange

Assets and liabilities denominated in foreign currencies are translated into Sterling at the prevailing exchange rates as at the close of business on the reporting date.

Foreign currency transactions are translated at the rates of exchange ruling on the date of such transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

d. Dilution

In certain circumstances (as detailed in the Prospectus) the ACD may apply a dilution adjustment on the issue or cancellation of shares, which is applied to the capital of the fund on an accruals basis. The adjustment is intended to protect existing investors from the costs of buying or selling underlying investments as a result of large inflows or outflows from the fund.

e. Revenue

Overseas dividends are grossed up at the appropriate rate of withholding tax and the tax consequences are shown within the tax charge.

Revenue from collective investment schemes is recognised when the investments are quoted ex dividend.

Continued

Accumulation distributions from shares held in collective investment schemes are reflected as revenue and form part of the distribution.

Equalisation received from distributions or accumulations on units or shares in underlying investments is treated as capital and deducted from the cost of the investment.

Revenue from offshore funds is recognised when income is reported by the offshore fund operator.

Interest on bank deposits is recognised on an accruals basis.

Interest from short-term deposits is recognised on an accruals basis.

Interest on debt securities is recognised on an accruals basis.

Stock dividends are recognised as revenue when they are quoted ex dividend. In the case of enhanced stock dividends, the value of the enhancement is recognised as capital.

Special dividends may be treated as repayments of capital or as revenue dependent on the facts of the particular case. Where receipt of a special dividend results in a significant reduction in the capital value of the holding, then the special dividend will be recognised as capital so as to ensure that the matching principle is applied to gains and losses. Otherwise, the special dividends are recognised as revenue.

Underwriting commission is taken to revenue and recognised when the issue takes place, except where the fund is required to take up all or some of the shares underwritten in which case an appropriate proportion of the commission received is deducted from the cost of the relevant shares.

Distributions from Brazilian corporations may take the form of interest on capital as an alternative to making dividend distributions. Interest on capital distributions are recognised on an accruals basis.

f. Expenses

All expenses other than those relating to the purchase and sale of investments are charged against revenue on an accruals basis in the Statement of Total Return.

Expenses relating to the purchases of investments are charged to the cost of investment and expenses relating to the sales of investments are deducted from the proceeds on sales.

g. Taxation

Provision is made for corporation tax at the current rate on the excess of taxable income over allowable expenses.

UK dividends are disclosed net of any related tax credit.

Overseas dividends are disclosed gross of any foreign tax suffered and the tax element is separately disclosed in the taxation note.

The tax accounting treatment follows that of the principal amount, with charges or reliefs allocated using the marginal basis regardless of any alternative treatment that may be permitted in determining the distribution.

Any windfall overseas tax reclaims received are netted off against irrecoverable overseas tax and therefore the irrecoverable overseas tax line in the taxation note may be negative.

The funds are party to certain claims and proceedings to recover tax suffered in respect of overseas income. These claims and proceedings are considered to be contingent assets of the funds and have not been recognised in these Financial Statements as the outcome of the claims and the potential recoveries are not sufficiently certain.

Deferred taxation is provided on all timing differences that have originated but not reversed by the balance sheet date other than those differences regarded as permanent. Any liability to deferred tax is provided at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

Deferred tax assets are only recognised to the extent that it is regarded more likely than not that there will be taxable profits against which the reversal of underlying timing differences can be offset.

Continued

h. Distributions

All of the net revenue available for distribution at the year end will be distributed. Where a fund has accumulation shareholders, this will be reinvested. Where a fund has income shareholders, this will be paid.

Gains and losses on non-derivative investments and currencies, whether realised or unrealised, are taken to capital and are not available for distribution. Cash flows associated with derivative transactions are allocated between the revenue and capital property of the sub-funds according to the motives and circumstances of the particular derivative strategy. The investment manager articulates the motives and circumstances underlying the derivative strategy and the ACD assesses these in association with financial reporting constraints enshrined within the SORP to allocate the cash flows accordingly.

i. Equalisation

Equalisation appears within the fund reports as part of the distribution. This represents the net revenue in the funds share price attached to the issue and cancellation of shares. It will form part of any distributions at the period end attributable to shareholders.

j. Derivatives

Funds with strategies that permit it, can make use of derivatives. Derivatives can be used to reduce risk or cost, or to generate additional capital or income consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management"). Some strategies may permit use of derivatives with a higher or lower frequency or for investment purposes. The accounting for each derivative is applied consistently in line with the derivative type; the valuation policy and market convention. Market convention for derivatives is often based on total return; however where a fund strategy or derivative type is defined with revenue in mind the accounting treatment can have a revenue element, forming part of the distribution, highlighted in the distribution policy. The Statement of Total Return captures all realised and unrealised gains regardless of nature. The Portfolio Statement will show the individual derivative contracts as net position in line with the valuation policy.

There are three broad transaction types: derivatives create a future asset or liability recognised as unrealised profit or loss until the date of maturity where cash is exchanged; swaps realise amounts of profit or loss in line with an agreed schedule until maturity; options recognise a premium paid or received, with the right or obligation to buy "call" or sell "put" an asset, exercised when the option owner is in the money. These transaction types break into three broad strategies.

Funds with strategies spanning multiple currencies can make use of the following transactions in line with their policy: forward currency exchange contracts (a derivative of the exchange rate); cross currency swaps; currency options and other currency derivatives. These transactions relate to the future expectations of foreign exchange rates. The future expectation is based on the current interest rates projected to a forward date. Currency derivatives exchange one currency for another currency at a future date.

Funds with strategies in debt instruments (bonds) can make use of the following transactions in line with their policy: bond future contracts (a derivative of the bond market or asset); credit default swaps; interest rate swaps; overnight index swaps; inflation swaps; interest rate options; swaptions; total return bond swaps and other bond related derivatives. These transactions relate to the future expectations on debt assets. The future expectations can be based on an individual asset or a market. Bond derivatives can relate to the future credit expectations; interest rate expectations; inflation expectations or a combination of these.

Funds with strategies in equity instruments (shares) can make use of the following transactions in line with their policy: equity future contracts (a derivative of the equity market or asset); variance swaps (differences in volatility between two assets); equity options; total return equity swaps and other equity related derivatives. These transactions relate to the future expectations on equity assets. The future expectations can be based on an individual asset or a market. Equity derivatives relate to the future expectations in equity markets. Equity markets are subject to the variables found in bond markets, however there is not an explicit relationship to derive a price.

Continued

k. Collateral and margin

Funds undertaking derivative transactions or stock lending exchange investment assets based on legal agreements. In line with collective investment scheme rules and abrdn policy collateral or margin must be exchanged to limit the exposure to investors should an agreement fail. Collateral is exchanged at an agreement level on a net basis following abrdn policy at a counterparty level within a fund. Collateral is monitored and where required exchanged daily. Collateral is bilateral in nature exchanged between the two counterparties in a transaction. Margin is similar to collateral limiting the risk for investors. The main difference is the exchange of initial margin, required before a contract is opened. Once opened the exchange of variation margin is monitored and where required exchanged daily. Both collateral and margin do not affect the valuation of the asset they are protecting or the fund unless rehypothecated (used to buy) into another investment asset. All funds do not re-hypothecate but may use liquidity collective investments to manage cash effectively.

I. Stock lending

Any income arising from stocklending is treated as revenue on a receipts basis and is disclosed in the notes to the Financial Statements net of directly attributable fees. The value of the collateral must always exceed the value of the stock on loan. The accepted collateral include cash, equities, certain types of bonds and money market instruments as agreed with the Depositary.

2 Risk Management Policies

Generic risks that the abrdn range are exposed to and the risk management techniques employed are disclosed below. Numerical disclosures and specific risks, where relevant, are disclosed within the financial statements.

The Financial Conduct Authority (FCA) Collective Investment Schemes Sourcebook (COLL) and FCA Funds Sourcebook (FUND) rules require the Management Company to establish, implement and maintain an adequate and documented Risk Management Process (RMP) for identifying the risks they manage, or might be, exposed to. The RMP must comprise of such procedures as are necessary to enable abrdn to assess the exposure of each fund it manages to market risk, liquidity risk, counterparty risk, operational risk and all other risks that might be material.

abrdn functionally and hierarchically separates the functions of risk management from the operating units and portfolio management functions, to ensure independence and avoid any potential or actual conflicts of interest. The risk management function has the necessary authority, access to all relevant information, staff and regular contact with senior management and the Board of Directors of the Company. The management of investment risk within abrdn is organised across distinct functions, aligned to the well-established 'three lines of defence' model.

- 1. Risk ownership, management and control.
- 2. Oversight of risk, compliance and conduct frameworks.
- 3. Independent assurance, challenge and advice.

The risk management process involves monitoring funds on a regular and systematic basis to identify, measure and monitor risk and where necessary escalate appropriately, including to the relevant Board, any concerns and proposed mitigating actions.

The risk team, in line with client expectations and the investment process, develops the risk profiles for the funds in order to set appropriate risk limits. Regulatory limits as well as those agreed, are strictly enforced to ensure that ASI does not inadvertently (or deliberately) breach them and add additional risk exposure. In addition, there is an early warnings system of potential changes in the portfolio risk monitoring triggers. Where possible, these are coded into the front office dealing system, in a pre-trade capacity, preventing exposures or breaching limits before the trade is actually executed.

Risk Definitions & Risk Management Processes

i) Market Risk

Market Risk is the risk that economic, market or idiosyncratic events cause a change in the market value of Client assets. Market Risk can be broadly separated into two types:

Continued

- (1) Systematic risk stems from any factor that causes a change in the valuation of groups of assets. These factors may emerge from a number of sources, including but not limited to economic conditions, political events or actions, the actions of central banks or policy makers, industry events or, indeed, investor behaviour and risk appetite.
- (2) Specific or Idiosyncratic Risk, which is the part of risk directly associated with a particular asset, outside the realms of, and not captured by Systematic Risk. In other words, it is the component of risk that is peculiar to a specific asset, and may manifest itself in various guises, for example: corporate actions, fraud or bankruptcy.

Portfolios are subject to many sub-categories of market risk. Many of these risks are interlinked and not mutually exclusive. Examples of these types of investment risk include: Country risk; Sector risk; Asset-class risk; Inflation/deflation risk; Interest rate risk; Currency risk; Derivatives risk; Concentration risk; and Default risk. Factors that cause changes in market risks include: future perceived prospects (i.e. changes in perception regarding the future economic position of countries, companies, sectors, etc.); shifts in demand and supply of products and services; political turmoil, changes in interest rate/inflation/taxation policies; major natural disasters; recessions; and terrorist attacks.

There are several ways in which to review and measure investment risk. The risk team recognises that each method is different and has its own unique insights and limits, and applies the following measurements for each Fund, where relevant:

Leverage: has the effect of gearing a Fund's expected performance by allowing it to gain greater exposure to underlying investment opportunities (gains and losses). The higher the leverage the greater the risk (potential loss).

Value-at-Risk (VaR) and Conditional VaR (CVaR): VaR measures with a degree of confidence the maximum the Fund could expect to lose in any given time frame. Assuming a normal (Gaussian) distribution, this is a function of the volatility of the Fund's returns. The higher the volatility, the higher the VaR, the greater the risk. CVaR calculates the expected tail loss, under the assumption that the VaR has been reached.

Volatility, Tracking Error (TE): Volatility measures the size of variation in returns that a Fund is likely to expect. The higher the volatility the higher the risk. TE measures the expected magnitude of divergence of returns between the Fund and benchmark over a given time.

Risk Decomposition: Volatility, tracking error and VaR may be broken down to show contribution from market related factors ("Systematic" Risk) and instrument specific (Idiosyncratic Risk). This is not a different measure as such, but is intended to highlight the sources of volatility and VaR.

Concentration Risk: By grouping the portfolio into various different exposures (e.g. country, sector, issuer, asset, etc.), we are able to see where, if any, concentration risk exists.

Stress Tests and Scenario Analysis: This captures how much the current portfolio will make or lose if certain market conditions occur.

Back Testing: This process helps to assess the adequacy of the VaR model and is carried out in line with UCITS regulatory requirements (FCA COLL 6.12). Excessive levels of overshoots and the reasons behind them are reported to the Board.

To generate these risk analytics the risk team relies on third party calculation engines, such as APT, RiskMetrics and Axioma. Once the data has been processed, it is analysed by the risk team, generally reviewing absolute and relative risks, change on month and internal peer analysis. Any issues or concerns that are raised through the analysis prompt further investigation and escalation if required. Breaches of hard limits are also escalated immediately. All client mandated and regulatory risk limits are monitored on a daily basis.

Stress tests are intended to highlight those areas in which a portfolio would be exposed to risk if the current economic conditions were likely to change. An economic event may be a simple change in the direction of interest rates or return expectations, or may take the form of a more extreme market event such as one caused through military conflict. The stress test itself is intended to highlight any weakness in the current portfolio construction that might deliver unnecessary systematic exposure if the market were to move abruptly.

Stress testing is performed on a regular basis using relevant historical and hypothetical scenarios.

Continued

ii) Liquidity risk

Liquidity risk is defined as the risk that a portfolio may need to raise cash or reduce derivative positions on a timely basis either in reaction to market events or to meet client redemption requests and may be obliged to sell long term assets at a price lower than their market value. Liquidity is also an important consideration in the management of portfolios: Portfolio Managers need to pay attention to market liquidity when sizing, entering and exiting trading positions.

Measuring liquidity risk is subject to three main dimensions:

- · Asset Liquidity Risk how quickly can assets be sold.
- Liability Risk managing redemptions as well as all other obligations arising from the liabilities side of the balance sheet.
- · Contingency Arrangements or Liquidity Buffers utilising credit facilities etc.

Liquidity Risk Management Framework

abrdn has a liquidity risk management framework in place applicable to the funds and set out in accordance with its overall Risk Management Process, relative to the size, scope and complexity of the funds. Liquidity assessment and liquidity stress testing is typically performed monthly, monitoring both the asset and liability sides. Asset side stressed scenarios are considered based on the nature of different asset classes and their liquidity risks to demonstrate the effects of a market stress on the ability to sell-down a fund. Liability side analysis includes stress scenarios on the investor profile as well as liabilities on the balance sheet. Any particular concerns noted or liquidity risk limit breaches are escalated to the relevant Committees and Boards, if material.

iii) Counterparty credit risk

Counterparty credit risk is the risk of loss resulting from the fact that the counterparty to a transaction may default on its obligations prior to the final settlement of the transaction's cash flow. Credit risk falls into both market risk and specific risk categories. Credit risk is the risk that an underlying issuer may be unable (or unwilling) to make a payment or to fulfil their contractual obligations. This may materialise as an actual default or, or to a lesser extent, by a weakening in a counterparty's credit quality. The actual default will result in an immediate loss whereas, the lower credit quality will more likely lead to mark-to-market adjustment.

Transactions involving derivatives are only entered into with counterparties having an appropriate internal credit rating that has been validated by the credit research team and approved by the relevant credit committee. Appropriate counterparty exposure limits will be set and agreed by these committees and the existing credit exposures will be assessed against these limits.

iv) Operational Risk

Operational risk can be defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk also includes the breakdown of processes to comply with laws, regulations or directives.

Operational Risk Management

An Operational Risk Management Framework is in place to identify, manage and monitor appropriate operational risks, including professional liability risks, to which the Management Company and the Funds are or could be reasonably exposed. The operational risk management activities are performed independently as part of one of the functions of the Risk Division.

abrdn plc (the "Group") Risk Management Framework is based upon the Basel II definition of operational risk which is "the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events".

The Group's management of operational risk is therefore aimed at identifying risks in existing processes and improving existing controls to reduce their likelihood of failure and the impact of losses. The Group has developed a framework that embodies continuous improvement to internal controls and ensures that the management of risk is embedded in the culture of the Group.

The identification, management, monitoring and resolution of events, risks and controls are facilitated via the Group's risk management system, Shield. The system is designed to facilitate the convergence of governance, risk and compliance programmes and automate a comprehensive review and assessment of operational risks.

abrdn Emerging Markets Equity Enhanced Index Fund

For the year ended 31 January 2023

Investment Objective

To generate growth over the long term (5 years or more) by investing in emerging markets equities (company shares).

Performance Target: To exceed the return of the MSCI Emerging Markets Index, by 0.75% per annum over rolling three year periods (before charges). The performance target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the performance target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities that are constituents of the MSCI Emerging Markets Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- · Indirect investment may be achieved via derivatives.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, cash and to a small extent equities which are not constituents of the above index.

Management Process

- The management team use their discretion (active management) to identify the investments they believe are most appropriate for the fund's objective.
- The management team uses numerical techniques to select investments, seeking to improve the level of return that can be achieved for a level of risk similar to that of the index.
- In seeking to achieve the performance target, the MSCI Emerging Markets Index is also used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 2.5%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the MSCI Emerging Markets Index over the longer term.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to maintain allocations to company shares while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- Derivative usage in the fund otherwise is expected to be very limited.

Performance Review

For the year ended 31 January 2023, the value of abrdn Emerging Markets Equity Enhanced Index Fund A Accumulation shares decreased by 4.67% compared with a decrease of 3.00% in the performance target MSCI Emerging Markets Index +0.75%.

Fund return source: Lipper; Basis: total return, published NAV to NAV, gross of expenses, gross income reinvested, GBP.

Performance target source: Lipper, Basis: close of business return, income reinvested, gross of expenses.

(www.msci.com)

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Market Review

Emerging market equities retreated over the year under review. Stocks maintained a broad downtrend for most of the period as major central banks tightened monetary policy to counter rising price pressures, which were exacerbated by Russia's invasion of Ukraine. The inflationary consequences of the war prompted central banks to act aggressively, triggering recession fears. Multiple interest rate hikes by the US Federal Reserve (Fed) boosted the US dollar, which further dented sentiment towards emerging markets. Compounding concerns were negative developments in China, including

abrdn Emerging Markets Equity Enhanced Index Fund

Continued

regulatory scrutiny across sectors, an ongoing property crisis, tensions with the US and stringent lockdowns due to Beijing's zero-Covid policy.

Losses were pared towards the period-end as emerging market equities staged an impressive comeback on China's rapid reversal of zero-Covid, strong policy support and signs of stabilisation in the US-China relationship. Risk appetite was further bolstered by hopes of slowing rate hikes in view of moderating inflation, while broadly encouraging economic data from the US and Europe eased fears of a deep global recession.

Portfolio Review

The Fund underperformed its benchmark over the 12 months under review.

The investment process underlying the Fund targets simultaneous exposure to a broad range of factors that academic and empirical research has shown deliver superior returns over the long term. Examples of such factors are value, quality and momentum. Combining these factors within a multifactor framework then allows the fund to reap the benefits of diversification with the aim of outperforming throughout the market cycle.

The performance of our proprietary quality factors over the period was mixed, with profitability and capital structure underperforming while accruals outperformed. The fund's composite value strategy (a blend of several value metrics ranging from deep, cyclical measures of value such as book yield to value metrics with more defensive attributes such as dividend yield) and free cash flow yield both outperformed in part due to the selloff in non-value growth stocks. Our two momentum-based strategies namely trend, which is based on the momentum of individual industries, and sentiment also outperformed.

At the stock level, an active position in Vanguard International Semiconductor detracted from performance. Shares of the Taiwanese chip manufacturer fell after it forecast a lower capacity utilisation rate due to soft demand. The stock scored highly on our measures of sentiment. However, the Fund benefited from an active position in Mahindra & Mahindra. Shares of the Indian automobile manufacturer were buoyed by the rebound in automobile sales post-pandemic. Mahindra & Mahindra had a positive score according to our measure of free cash flow yield. In addition, an overweight holding in PetroChina, which rose on higher oil prices, proved favourable. The Chinese oil and gas company ranked highly based on our value metrics.

Outlook

While the US continues to unwind years of loose monetary policy to tackle inflation, emerging market central banks are approaching the tail end of their rates cycle. Larger emerging economies have relatively resilient currency reserves and current account positions compared to the past, and corporate balance sheets have emerged stronger from the pandemic, making them better prepared for any global recession. Meanwhile, the potential for a counter-cyclical recovery in China remains intact, now that Beijing has reversed its zero-Covid policy and is focusing on getting growth back on track. Macro policy is likely to stay accommodative, with more legroom to support growth due to relatively low inflation. Beyond China, other emerging markets are set to benefit from a global supply chain rearrangement post-pandemic - with international companies diversifying into economically resilient markets like India and regions such as South-East

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Risk and reward indicator table as at 31 January 2023.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities.
 These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The fund invests in emerging market equities and/or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- Investing in China A shares involves special considerations and risks, including greater price volatility, a less developed regulatory and legal framework, exchange rate risk/controls, settlement, tax, quota, liquidity and regulatory risks.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- The fund may invest in companies with Variable Interest Entity (VIE) structures in order to gain exposure to industries with foreign ownership restrictions. There is a risk that investments in these structures may be adversely affected by changes in the legal and regulatory framework.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

* The fixed general administration charge was introduced from 1 August 2021. The fee is paid to the ACD and covers fees payable to facilitate payment of certain common fund costs inclusive of the ongoing registration and general administration expenses of the fund. This is exclusive of the ACD and covers fees payable to facilitate payment of certain common fund costs inclusive of the ongoing registration and general administration expenses of the fund. This is exclusive of the ACD and covers fees payable to facilitate payment of certain common fund costs inclusive of the ongoing registration and general administration expenses of the fund. This is exclusive of the other payment of certain common fund costs inclusive of the ongoing registration and general administration expenses of the fund. This is exclusive of the other payment of certain common fund costs inclusive of the ongoing registration and general administration expenses of the fund. This is exclusive of the other payment of certain common fund costs inclusive of the ongoing registration and general administration expenses of the fund. This is exclusive of the other payment of certain common fund costs inclusive of the other payment of the o may additionally pay out of its scheme property other fees and expenses including those incurred by the Custodian. The audit fee for the year, including VAT, was £9,120 (2022: £8,400).

** These figures represent the charges to 31 July 2021, which have now been replaced by the fixed general administration charge.

Continued

	2023 £'000	2022 £′000
(b) Factors affecting current tax charge for the year		
The tax assessed for the year is less than (2022: less than) the standard rate of corpor Investment Companies (20%). The differences are explained below:	ration tax in the UK for funds of authorised Open-	-Ended
Net revenue before taxation	3,768	2,976
Corporation tax at 20% (2022: 20%)	753	595
Effects of:		
Revenue not subject to taxation	(821)	(642)
Overseas taxes	350	325
Overseas tax expensed	(4)	(8)
Excess allowable expenses	72	55
Overseas capital gains tax	99	172
Deferred tax	(130)	70
Total tax charge for year (note 5a)	319	567

(c) Deferred tax

Provision at the end of the year	100	230
Deferred tax charge in statement of total return for year (note 5a)	(130)	70
Deferred tax charge at the start of the year	230	160

(d) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £3,777,000 (2022: £3,705,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

6 Distributions (including the movement between net revenue and distributions)

	2023 £′000	2022 £′000
Distribution	3,402	2,547
Add: Income deducted on cancellation of shares	159	137
Deduct: Income received on issue of shares	(143)	(33)
Total distributions for the year	3,418	2,651
Movement between net revenue and distributions		
Net revenue after taxation	3,449	2,409
Overseas capital gains tax on realised gains	99	172
Overseas deferred capital gains tax on unrealised gains	(130)	70
Total distributions for the year	3,418	2,651

Details of the distribution per share are set out in this fund's distribution table.

Aberdeen Standard Liquidity Fund (Lux) - Sterling Fund*	251	10
Net liquidity	269	269

^{*} Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

9 Provisions for Liabilities

	2023 £′000	2022 £′000

11 Related Party Transactions

abrdn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdn Fund Managers Limited at the end of the accounting year are disclosed in notes 7 and 10.

Amounts payable to abrdn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 10.

12 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of collective investment schemes and derivatives during the year, or in the prior year.

Collective investments operate within the terms of the offer document or prospectus. Typically we do not invest into funds that require an initial charge to be made. The underlying price may contain an estimation of cost known as a dilution levy which is applied from time to time.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

14 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

15 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

	Net foreign	Net foreign currency exposure 2022	
	currency exposure 2023		
Currency	€,000	£′000	
Brazilian Real	4,996	4,567	
Chilean Peso	682	459	
China Renminbi	5,894	3,655

Currency	Net foreign currency exposure 2023 £′000	Net foreign currency exposure 2022 £'000
Kuwaiti Dinar	692	-
Malaysian Ringgit	905	1,963
Mexican Peso	2,531	2,027
Philippines Peso	650	129
Polish Zloty	320	751
Qatari Riyal	583	968
Russian Ruble	1	1,896
Saudi Riyal	2,691	2,216
South Africa Rand	3,669	2,592
South Korean Won	12,040	12,823
Taiwan Dollar	15,377	17,860
Thai Baht	2,214	662
Turkish Lira	1,134	922
UAE Dirham	1,544	1,349
US Dollar	7,787	7,932
Total	102,755	102,772

At 31 January 2023, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £5,138,000 (2022: £5,139,000).

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 31 January 2023, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £5,313,000 (2022: £5,290,000).

Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

Continued

At the balance sheet date the fund had the following exposures:

		2023		
Leveraged instruments	Market exposure £'000	Market value £′000	Market exposure £'000	Market value £'000
Futures	339	22	178	(3)
Total market exposure	339	22	178	(3)

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2023 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash	Market value of stock £'000	Total £′000	Percentage of total net assets %
Bank of America Merrill Lynch	22	(9)	-	13	0.01
	22	(9)	-	13	0.01

2022 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash	Market value of stock £'000	Total £'000	Percentage of total net assets %
Bank of America Merrill Lynch	(3)	18	-	15	0.01
	(3)	18	-	15	0.01

Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

All stock lending is conducted by the stocklending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

At the balance sheet date the fund had the following positions.

		Collateral (he	eld)/pledged	
2023	Stock on loan*	Cash	Stock	Net exposure
Counterparties	€′000	€,000	£′000	€,000
Total	-	-	-	-

The Prospectus outlines allowable collateral. There have been no changes in the year.

The fund receives 85% of the revenue returns from stock lending. The gross earnings for the year are £5,000 (2022: £25,000) and expenses paid to the lending agent, Securities Finance Trust Company, are £1,000 (2022: £4,000).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2023 £807,000 (2022: £497,000).

Distribution Table

For the year ended 31 January 2023 (in pence per share)

Final dividend distribution

Group 1 - shares purchased prior to 1 February 2022

Group 2 - shares purchased between 1 February 2022 and 31 January 2023

	Revenue	Equalisation	Distribution paid 31/03/23	Distribution paid 31/03/22
A Accumulation				
Group 1	14.6834	-	14.6834	11.6863
Group 2	5.3585	9.3249	14.6834	11.6863
B Accumulation				
Group 1	7.4625	-	7.4625	5.9385
Group 2	4.9407	2.5218	7.4625	5.9385
N Accumulation				
Group 1	3.8250	-	3.8250	3.1605
Group 2	3.1118	0.7132	3.8250	3.1605
X Accumulation				
Group 1	5.3029	-	5.3029	4.4174
Group 2	3.3586	1.9443	5.3029	4.4174

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

European Income Fund (closed)

For the year ended 31 January 2023

The European Income Fund is no longer open to investors, having redeemed all shares on 6 November 2012. At the time of the share cancellation all securities were sold. It is the intention of the ACD to terminate the fund at a later date once the residual assets and liabilities are settled. As a result the financial statements for this fund has not been prepared on a going concern basis. Certain legal claims have been made in relation to the fairness of taxes paid by the fund over their life time. These claims are currently still subject to legal process. When any such claim reaches the point where it carries the certainty that it will result in a windfall gain to the fund, that gain will be recognised in the financial statements. The fund will continue in this prolonged closure phase until such claims have been fully pursued. Thereafter the fund will be formally terminated.

3 Taxation

	2023 £′000	2022 £′000
(a) Analysis of charge in year		
Total taxation (note 3b)	-	-

(b) Factors affecting current tax charge for the year

The tax assessed for the year is greater than (2022: equal to) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net expense before taxation	(3)	(2)
Corporation tax at 20% (2022: 20%)	(1)	-
Effects of:		
Excess allowable expenses	1	-
Total tax charge for year (note 3a)	-	-

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £389,000 (2022:£388,000) due to surplus ACD expenses. It is unlikely that the Fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the year or the prior year.

5 Related Party Transactions

abrdn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party.

There were no transactions with abrdn Fund Managers Limited in the current or prior year.

6 Shares in Issue Reconciliation

The fund is closed and has no share classes in issue.

7 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

A one per cent increase in the value of the fund's floating rate financial assets would have the effect of increasing the return and net assets as at year end date by £2,500 (2022: £2,500). A one per cent decrease would have an equal and opposite effect.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

The interest rate risk profile of the fund's investments at the year end consists of:

2023	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £′000
Currency				
UK Sterling	249	-	(11)	238
Total	249	-	(11)	238

Continued

2022	Floating rate financial assets £'000	Fixed rate financial assets £'000	Total £′000	
Currency				
UK Sterling	251	-	(20)	231
Total	251	-	(20)	231

Liquidity risk

The corporation tax payable creditor is payable on the termination of the fund which will be completed once the tax reclaims have been fully pursued, $2023 \, \$8,000 \, (2022: \$18,000)$. The audit fee is payable within a year, $\$3,000 \, (2021: \$2,000)$.

Pan-European Equity Fund (closed)

For the year ended 31 January 2023

The Pan-European Equity Fund is no longer open to investors, having redeemed all shares on 28 July 2011. At the time of the share cancellation all securities were sold. It is the intention of the ACD to terminate the fund at a later date once the residual assets and liabilities are settled. As a result the financial statements for this fund has not been prepared on a going concern basis. Certain legal claims have been made in relation to the fairness of taxes paid by the fund over their life time. These claims are currently still subject to legal process. When any such claim reaches the point where it carries the certainty that it will result in a windfall gain to the fund, that gain will be recognised in the financial statements. The fund will continue in this prolonged closure phase until such claims have been fully pursued. Thereafter the fund will be formally terminated.

6 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

A one per cent increase in the value of the fund's floating rate financial assets would have the effect of increasing the return and net assets as at year end date by £1,500 (2022: £1,500). A one per cent decrease would have an equal and opposite effect.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

The interest rate risk profile of the fund's investments at the year end consists of:

2023	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £′000
Currency				
UK Sterling	145	-	(2)	143
Total	145	-	(2)	143

2022	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £′000
Currency				
UK Sterling	148	-	(2)	146
Total	148	-	(2)	146

Liquidity risk

The audit fee is payable within a year, £2,000 (2021: £2,000).

Pan-European SRI Equity Fund (closed)

For the year ended 31 January 2023

The Pan-European Equity SRI Fund is no longer open to investors, having redeemed all shares on 28 July 2011. At the time of the share cancellation all securities were sold. It is the intention of the ACD to terminate the fund at a later date once the residual assets and liabilities are settled. As a result the financial statements for this fund has not been prepared on a going concern basis. Certain legal claims have been made in relation to the fairness of taxes paid by the fund over their life time. These claims are currently still subject to legal process. When any such claim reaches the point where it carries the certainty that it will result in a windfall gain to the fund, that gain will be recognised in the financial statements. The fund will continue in this prolonged closure phase until such claims have been fully pursued. Thereafter the fund will be formally terminated.

1 Expenses

	2023 £'000	2022 £′000
Other:		
Audit fee	3	2
	3	2
Total expenses	3	2

Irrecoverable VAT is included in the above expenses, where relevant. The audit fee for the year, including VAT, was £2,400 (2022: £2,400).

2 Taxation

	2023	2022
	£′000	£'000
(a) Analysis of charge in year		
Total taxation (note 2b)	-	-

(b) Factors affecting current tax charge for the year $\,$

The tax assessed for the year is greater than (2022: equal to) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net expense before taxation	(3)	(2)
Corporation tax at 20% (2022: 20%)	(1)	-
Effects of:		
Excess allowable expenses	1	-
Total tax charge for year (note 2a)	-	_

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £52,000 (2022: £51,000) due to surplus ACD expenses. It is unlikely that the Fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the year or the prior year.

3 Creditors

	2023 £′000	2022 £′000
Corporation tax payable	63	63
Other accrued expenses	3	2
Total creditors	66	65

4 Related Party Transactions

abrdn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party.

There were no transactions with abrdn Fund Managers Limited in the current or prior year.

5 Shares in Issue Reconciliation

The fund is closed and has no share classes in issue.

6 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

A one per cent increase in the value of the fund's floating rate financial assets would have the effect of increasing the return and net assets as at year end date by £3,000 (2022: £3,000). A one per cent decrease would have an equal and opposite effect.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

The interest rate risk profile of the fund's investments at the year end consists of:

2023	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £′000
Currency				
UK Sterling	308	-	(66)	242
Total	308	-	(66)	242

2022	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £′000
Currency				
UK Sterling	310	-	(65)	245
Total	310	-	(65)	245

Liquidity risk

The corporation tax payable creditor is payable on the termination of the fund which will be completed once the tax reclaims have been fully pursued, 2023 £63,000 (2022: £63,000). The audit fee is payable within a year, £3,000 (2021: £2,000).

Remuneration

Undertakings for Collective Investment Transferrable Securities V Directive (UCITS V) Remuneration Disclosure UCITS V Fund Annual Report and Accounts

Remuneration Policy

The abrdn plc Remuneration Policy applies with effect from 1 January 2022. The purpose of the abrdn plc Remuneration Policy (the "Policy") is to document clearly the remuneration policies, practices and procedures of abrdn as approved by the abrdn plc Remuneration Committee (the "Committee"). The Policy is available on request.

The Policy applies to employees of the abrdn group of companies ("Group" or "abrdn") including UCITS V Management Companies ("ManCos") and the UCITS V funds that the ManCo manages.

Remuneration Principles

abrdn applies Group wide principles for remuneration policies, procedures and practices ensuring that:

- · Remuneration within the Group is simple, transparent and fair.
- Our Policy supports our long-term strategy by reinforcing a performance-driven culture. It aligns the interests of our employees, shareholders and, importantly, our clients/customers.
- Our remuneration structure recognises the different challenges and priorities of roles and Vectors and Functions across the organisation as appropriate.
- Remuneration policies, procedures and practices promote good conduct, including sound and effective risk management and do not encourage risk taking that exceeds the level of tolerated risk appetite.
- Remuneration extends beyond the provision of fixed and variable pay, with a focus on the retirement provision and the wellbeing needs of our employees, as part of our remuneration philosophy. Total remuneration delivered is affordable for the Group.

Remuneration Framework

Employee remuneration is composed principally of fixed and variable elements of reward as follows:

- a) Fixed reward (fixed remuneration: salary and cash allowances, if appropriate); and Benefits (including pension).
- b) Variable reward (bonus, a proportion of which may be subject to retention or deferral depending on role and regulatory requirements; and senior employees may also be awarded a long-term incentive award).

Appropriate ratios of fixed: variable remuneration will be set to as to ensure that:

- a) Fixed and variable components of total remuneration are appropriately balanced and
- b) The fixed component is a sufficiently high proportion of total remuneration to allow abrdn to operate a fully flexible policy on variable remuneration components, including having the ability to award no variable remuneration component in certain circumstances where either individual and/or Group performance does not support such award.

Remuneration

Continued

Base salary

Base salary provides a core reward for undertaking the role and depending on the role, geographical or business market variances or other indicators, additional fixed cash allowances may make up a portion of fixed remuneration. Periodic reviews take into account the employee's role, scope of responsibilities, skills and experience, salary benchmarks (where available) and, where relevant, any local legislative or regulatory requirements.

Benefits (including retirement benefit where appropriate)

Benefits are made up of core benefits which are provided to all employees; and extra voluntary benefits that may be chosen by certain employees which may require contribution through salary sacrifice or other arrangements.

Retirement benefits are managed in line with the relevant legislative requirements and governance structures. In certain, very limited circumstances, a cash allowance may be offered in lieu of a retirement arrangement.

Annual Performance Bonus Awards

Employees who have been employed during a performance year (1 January to 31 December) may be eligible to be considered for an annual bonus in respect of that year.

Annual bonuses are based upon Group, Vector, Function, Team and Individual performance (with individual performance assessed against agreed goals and behaviours). The variable remuneration pool for all eligible employees, including Identified Staff or Material Risk Takers ("MRTs"), is determined initially by reference to profitability and other quantitative and qualitative financial and non-financial factors including risk considerations (on an ex-post and ex-ante basis). In reaching its final funding decision, the Committee exercises its judgement to ensure that the outcome reflects holistic Company performance considerations.

abrdn Fund Managers Limited has specific obligations to act in the best interests of the UCITS funds it manages and its investors. Accordingly, the performance of the underlying funds and the interests of investors (including, where relevant, investment risk) are also taken into account as appropriate. The Risk and Capital Committee and the Audit Committee formally advise the Committee as part of this process.

The overall bonus pool is allocated to vectors and functions based on absolute and relative performance for each vector and function, and their alignment with strategic priorities and risk considerations. Allocation by region and subdivision/team is determined on a discretionary basis by the vector, regional and functional heads based on the absolute and relative performance of the constituent teams and alignment with strategic priorities.

Individual annual bonus awards are determined at the end of the 12-month performance period with performance assessed against financial and nonfinancial individual objectives, including behaviour and conduct. Individual awards for Identified Staff are reviewed and approved by the Committee (with some individual award approvals delegated, as appropriate, to the Group's Compensation Committee, over which the Committee retains oversight). In carrying out these approvals, the Committee seeks to ensure that outcomes are fair in the context of overall Group performance measures and adjusted, where appropriate, reflect input from the Risk and Capital Committee and the Audit Committee. Variable remuneration awards are subject to deferral for a period of up to three years. A retention period may also be applied as required by the relevant regulatory requirements. Deferral rates and periods comply, at a minimum, with regulatory requirements and may exceed these. In addition to the application of ex-ante adjustments described above, variable remuneration is subject to ex-post adjustment (malus / clawback arrangements).

Other elements of remuneration – selected employees

The following remuneration arrangements may be awarded in certain very limited circumstances:

Carried Interest Plans - These arrangements are designed to reward performance in roles where a carried interest plan is appropriate. Selected employees are granted carried interest shares in private market funds established by the Group.

Buy-Out Awards/Guaranteed Bonuses – These are intended to facilitate/support the recruitment of new employees. Buyouts are not awarded, paid or provided unless they are in the context of hiring new employees. Guaranteed bonuses are not awarded, paid or provided unless they are exceptional and in the context of hiring new employees and limited to the first year of service. These awards are only made where such a payment or award is permitted under any relevant remuneration regulations and are designed to compensate for actual or expected remuneration foregone from previous employers by virtue of their recruitment.

Retention and Special Performance Awards / LTIP - Supports retention and/or the delivery of specific performance outcomes. The Company may determine that it is appropriate to grant an exceptional award in limited circumstances. Awards are structured to deliver specific retention and/or performance outcomes. Retention and/or special performance awards comply with all relevant regulatory requirements.

Severance Pay - Payment made to support an employee whose role is considered to be redundant. Severance payments comply with any legislative and regulatory requirements and any payments are inclusive of any statutory entitlement. In the event of severance, the treatment of any individual elements of an employee's remuneration is governed, as appropriate, by relevant plan or scheme rules.

Remuneration

Continued

Control Functions

The Group ensures that, as appropriate, senior employees engaged in a control function are independent from the business units they oversee and have appropriate authority to undertake their roles and duties. These include, but are not necessarily limited to, Risk, Compliance and Internal Audit function roles. Senior employees engaged in a control function are remunerated in a way that ensures they are independent from the business areas they oversee, have appropriate authority, and have their remuneration directly overseen by the Remuneration Committee.

Conflicts of interest

The Remuneration Policy is designed to avoid conflicts of interest between the Group and its clients and is designed to adhere to local legislation, regulations or other provisions. In circumstances or jurisdictions where there is any conflict between the Policy and local legislation, regulations or other provisions then the latter prevail. Where the Committee receives input from members of management on the remuneration arrangements in operation across the Group this never relates to their own remuneration.

Personal Investment Strategies

The Company adheres to the regulatory principles and industry best practice on the use of personal hedging strategies which act in restricting the risk alignment embedded in employee remuneration arrangements.

UCITS V Identified Staff / MRTs

The 'Identified Staff' or MRTs of abrdn Fund Managers Limited are those employees who could have a material impact on the risk profile of abrdn Fund Managers Limited or the UCITS V Funds it manages. This broadly includes senior management, decision makers and control functions. For the purposes of this disclosure, 'Identified Staff' includes employees of entities to which activities have been delegated.

Quantitative remuneration disclosure

The table below provides an overview of the following:

- · Aggregate total remuneration paid by abrdn Fund Managers Limited to its entire staff; and
- · Aggregate total remuneration paid by abrdn Fund Managers Limited to its UCITS V'Identified Staff'.

Amounts shown reflect payments made during the financial reporting period in question. The reporting period runs from 1 January 2022 to 31 December 2022 inclusive.

		Total Remuneration		
	Headcount	£'000		
abrdn Fund Managers Limited¹	1,101	160,808		
of which				
Fixed remuneration		122,073		
Variable remuneration		38,735		
abrdn Fund Managers Limited 'Identified Staff' ²	85	52,178		
of which				
Senior Management ³	46	34,570		
Other 'Identified Staff'	39	17,608		

¹ As there are a number of individuals indirectly and directly employed by abrdn Fund Managers Limited this figure represents an apportioned amount of abrdn's total remuneration fixed and variable pay, apportioned to the Management Company on an AUM basis, plus any carried interest paid. The Headcount figure provided reflects the number of beneficiaries calculated on a Full Time Equivalent basis.

² The Identified Staff disclosure relates to UCITS V MRTs and represents total compensation of those staff of the Management Company who are fully or partly involved in the activities of the Management Company

³ Senior management are defined in this table as Management Company Directors and members of the abrdn plc Board, together with its Executive Committee, Investment Management Committee and Group Product Committee.

Further Information

abrdn OEIC VI was incorporated on 31 August 1999, incorporated under the FCA Regulations. The Company is an openended investment company (OEIC) with variable capital under regulation 14 (authorisation) of the OEIC Regulations.

Consumers' rights and protections, including any derived from EU legislation, are currently unaffected by the result of the UK referendum to leave the European Union and will remain unchanged unless and until the UK Government changes the applicable legislation.

Documentation and Prices

Copies of the current Prospectus and Key Investor Information Documents (KIIDs) for the abrdn OEIC VI, daily prices, together with the latest Annual (and if issued later the interim) Report and Accounts for any fund, are available to download at **abrdn.com**. A paper copy of the Report and Accounts is available on request from the ACD.

Notices/Correspondence

Please send any notices to abrdn Fund Managers Limited, PO Box 12233, Chelmsford, CM99 2EE. Any notice to the ACD will only be effective when actually received by the ACD. All notices will be sent to the investor at the address set out in the Application form or the latest address which the investor has notified to the ACD, and will be deemed to have been received three days after posting. Events detailed in these terms and conditions will be carried out on the dates specified, unless the dates are a non-business day, when they will be carried out on the next business day.

Complaints and Compensation

If you need to complain about any aspect of our service, you should write to the Complaints Team, abrdn, PO Box 12233, Chelmsford, CM99 2EE, who will initiate our formal complaints procedure. If you prefer, you may call the Complaints Team on 01224 404490 or email **complaints@abrdn.com** in the first instance. Alternatively if you have a complaint about the Company or funds you can contact the Depository directly. A leaflet detailing our complaints procedure is available on request. We will endeavour to respond to your complaint as soon as possible and will notify you of our outcome within 8 weeks. If the complaint is not resolved by us to your satisfaction then you may have the right take your complaint to the Financial Ombudsman Service (FOS). To contact the FOS Service you should write to The Financial Ombudsman Service, Exchange Tower, London, E14 9SR, email **complaint.info@financial-ombudsman.org.uk** or telephone 0800 023 4567 (free for landlines and mobiles) or 0300 123 9123 (calls cost no more than calls to 01 and 02 numbers) or +44 20 7964 0500 (available from outside the UK – calls will be charged).

We are covered by the Financial Services Compensation Scheme, which means if we become insolvent, you may be entitled to compensation. The level of compensation will depend on the type of business and the circumstances of your claim. Investments are covered up to £85,000 for claims against firms that fail on or after 1 April 2019. Details are available from the FSCS Helpline on 0800 678 1100 or 020 7741 4100 and on the FSCS website: www.fscs.org.uk.

UCITS

The funds were certified under the Undertaking for Collective Investment in Transferable Securities (UCITS) directive, which allows the ACD to market the funds in member States of the European Union subject to relevant local laws, specifically marketing laws.
