## **Fund Objective & Investment Policy**

The aim of AXA Framlington FinTech Fund ("the Fund") is to provide long-term capital growth over a period of 5 years or more.

The Fund invests in shares of listed companies, principally (meaning at least 80% of its assets) in the financial services sector (e.g. banks, insurance companies and investment related companies), which the Manager believes will provide above-average returns. The Fund invests in companies of any size and based anywhere in the world. The Manager selects shares based upon analysis of a company's financial status, quality of its management, expected profitability and prospects for growth.

The Manager has full discretion to select investments for the Fund in line with the above investment policy and in doing so may take into consideration the MSCI All Country World index.

The MSCI All Country World index is designed to measure the performance of stocks from a number of developed and emerging markets as selected by the index provider. This index best represents the types of companies in which the Fund predominantly invests.

This Fund is actively managed in reference to the MSCI All Country World index, which may be used by investors to compare the Fund's performance.

The Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

## Investment Review

The Fund returned -5.9% over the 12 months to 15 April 2023, underperforming its comparative benchmark, the MSCI ACWI Index, which rose by 1.2%. In the five years to 15 April 2023, the price of Z accumulation units, with net income reinvested, rose by 22.5%. The comparative benchmark increased by 53.4% over the same period. Over the last fiscal year, the broader MSCI ACWI Index was supported by the strong performance of a number of non-fintech companies, most notably in the energy and healthcare sectors. The Fund's performance compared to a range of global fintech peers was strong.

### MACROECONOMIC AND MARKET ENVIRONMENT

Global equity markets were volatile throughout the period. Initial expectations that the wave of global inflation, unleashed by the COVID-19 supply chain disruptions, would soon fade were quickly dispelled as a result of Russia's invasion of Ukraine and subsequent US and European sanctions. Simmering US-China trade tensions proved similarly unhelpful.

Inflation numbers surprised upwards over the summer of 2022, leading most central banks to hike rates aggressively over the year. The US Federal Reserve (Fed) hiked interest rates by 0.50% in May 2022, 0.75% in June, 0.75% in July, September and November, followed by four other consecutive increases until May 2023. US target interest rates moved from 0.00%-0.25% to 5.00%-5.25% over the period. This historically aggressive financial tightening put the high growth/high valuation section of the market under significant pressure, and the shares of technology companies remained under pressure for most of the year.

A temporary lull in market volatility at the end of the summer months was quickly forgotten as inflation data continued to surprise on the upside. In the UK, the announcement of Chancellor Kwarteng's budget plans also led to serious market volatility in September and forced the Bank of England (BoE) to intervene to stabilise the currency. Investors were also spooked by rising energy prices and weakening consumer confidence data, seen as increasing the likelihood of an economic hard landing in 2023 and 2024.

Equity markets started 2023 on a stronger footing as economic data improved, indicating a greater possibility of a soft landing for the US and European economies, alongside improving prospects for China as the country's reopening appeared to progress faster than expected. Signals from the Fed also pointed towards reaching "peak rates" possibly earlier than expected. The European Central Bank (ECB) proved more conservative in their outlook, highlighting sticky core inflation numbers, but that did not prevent investors from rushing back to growth and technology stocks globally. The MSCI All Country World Index rose circa 7% in USD terms in January.

Global stock markets faltered in February as optimism around the long-awaited reopening of the Chinese economy stalled on fears that the post-pandemic recovery wouldn't be as strong or as swift as hoped. Hopes of a dovish pivot from the Fed were also dashed by a hotter than expected inflation print, strong jobs data, and a rebound in consumer spending and business activity that threatened to keep inflation high.

## Investment Review (Continued)

Volatility then engulfed global stock markets in March. The rapid collapse of Silicon Valley Bank (SVB) sparked stability concerns not just within the US regional banking system but across the globe. Credit Suisse had to be taken over by fellow Swiss Bank, UBS in a deal brokered by the Swiss authorities. In the US, the Federal Deposit Insurance Corporation (FDIC) nationalised First Republic Bank and sold it to JP Morgan. Fed Chairman Powell indicated that tighter credit condition expectations had reduced the rate outlook, triggering some big sectorial rotation in the US with technology rallying amid bets on lower interest rates.

### FUND ACTIVITY AND PERFORMANCE DRIVERS

This year's best performing companies for the Fund were payment specialists Network International, Shift4 Payments and Visa; as well as HDFC Bank and ING. Middle East and Africa digital payments specialist Network International received in April a 387p per share offer by CVC Partners and Francisco Partners, soon followed by a 400p per share offer by competing PE firm Brookfield, a c.60% premium reflecting the value of this unique asset. Shift4 Payments remains a poster child for the structural growth opportunity in digital payments and reported net revenue (gross revenue less network fees) of \$728m in the fourth quarter, a spectacular +38% year-over-year growth. Card business Visa continued to deliver double-digit revenue growth revenues throughout the period. On the innovative financials' side, ING, one of the most advanced digital banks in Europe, performed strongly on the back of its gearing to higher euro rates. HDFC Bank also had a strong year, with strong business momentum and a sector-leading risk profile.

Weakest performers were Fidelity National Information Services (FIS), Pagseguro Digital, Zscaler, Q2 Holdings and Lufax. FIS merchant services division's organic growth disappointed throughout the year, largely due to its increasingly apparent failure to properly integrate \$35bn 2019 acquisition Worldpay. FIS since announced its intention to spin off the business. Pagseguro Digital did not perform well due to ongoing interest rates headwinds in Brazil which led to downwards revisions in earnings expectations. Latest management guidance is more encouraging, with the business having by now successfully repriced its services to reflect higher rates. Cybersecurity specialist Zscaler continued to deliver very strong growth over the year but was held by its demanding valuation in the context of rising US rates. Q2 Holdings continued to grow revenues but the shares were impacted by the crisis hitting US regional banks, the company's key target market. We closed our position in Q2 Holdings subsequent to the bankruptcy of SVB. Chinese credit fintech Lufax de-rated as a result of tighter regulation in China, of the lasting impact of COVID-19 restrictions and of persistent selling by foreign holders. The business itself is now well positioned to deliver solid operating performance.

Over the course of the fiscal year, the Fund initially strove to get more exposure to rate-sensitive businesses to benefit from higher rates, then gradually shifted back towards technology businesses on the basis that central banks were rapidly moving towards "peak rate" and that higher rates benefits were increasingly priced-in. In May, we bought shares in DNB to increase financial exposure to Norway where rates were on a solid upwards trajectory. After the summer, we sold out of BlackRock following strong performance and bought GB after the expected private equity deal fell through. We later added global payment solutions specialist Payoneer Global and Mexican bank Grupo Financiero Banorte, that may benefit from its digital investments for many quarters. In January, we sold out of Capital One Financial on deteriorating volume outlook and high exposure to US subprime auto. We also exited our position in FIS as it appeared that the business' underlying issues would take longer than expected to resolve. We re-invested the cash into MercadoLibre and Edenred. Finally, we closed our positions in Block and Bancorp post the SVB events.

### OUTLOOK

So far in 2023, despite some degree of volatility, financial markets have managed to deal with consistent rate hikes, a US regional banking crisis, technology layoffs and increased recession risks without really flinching. How long this will last is unclear. Fed officials remain caught between stubbornly high inflation and economic data increasingly pointing to a US economic slowdown in the second half of the year. The ongoing banking turbulences in the US imply that lending conditions will tighten significantly in the country over the next few quarters, probably reducing the need for further rates hikes. The disconnect is increasing with Europe and China, where economic data remains broadly resilient.

## Investment Review (Continued)

In this unusually opaque environment, stock picking will be even more important than usual. We continue to believe that an equity portfolio focusing on structurally growing fintech businesses with strong balance sheets should perform well regardless of economic fluctuations. The fintech businesses the Fund invests in are through-the-cycle growers. They will undoubtedly represent a larger part of the global economy in five years, even more so in 10 years.

As the global economy gradually works its way towards “peak rates”, we expect investor appetite for Fintech growth stories to gradually recover. The industry’s operating trends remain strong. In the US, payment and enterprise solutions WEX saw Q1 total net revenue increase 18% to \$612m on the back of a 17% growth in total volume across all segments to \$52.3bn. In Europe, Worldline posted strong 13% growth in acquiring volumes in Q1 (in-store +11%, online +19%) as the structural transition from cash and cheques to digital payments continues. Away from payments, the LSE Group's annual subscription value (ASV) ended Q1 at record levels, driven by strong structural demand for data, both financial and extra-financial (environmental, social and governance (ESG)). Overall, fintech adoption continues to progress rapidly regardless of wider economic conditions.

Listed markets’ recent failure to recognize the industry’s structural growth potential and exciting medium-term prospects is increasingly creating attractive investment opportunities for longer-term investors. The Network International takeover bid by private equity highlights the value currently on offer in the asset class.

## Managing Risks

Past performance is not a guide to future performance. The price of units and the revenue from them can go down as well as up and investors may not get back the amount originally invested. An initial charge is usually made when you purchase units. Changes in exchange rates will affect the value of Fund investments overseas. Investment in smaller companies and newer markets offers the possibility of higher returns but may also involve a higher degree of risk.

The Fund is managed in accordance with the objective set out on page 3. By investing in financial markets there are associated risks and the following paragraphs explain the Manager's approach to managing those risks.

### RISK PROFILE

As the Fund invests in a single sector it has the potential to be more volatile than the Fund which invests in a more diversified portfolio of equities across a range of sectors. The Fund also invests in overseas securities and therefore it may hold currencies other than sterling. As a result, exchange rate movements may cause the value of investments to fall or rise. Investments in newer markets and smaller companies offer the possibility of higher returns but may also involve a higher degree of risk. The value of investments and the revenue from them is not guaranteed and can go down as well as up.

### EQUITY RISK

The value of shares in which the Fund invests fluctuate pursuant to market expectations. The value of such shares will go up and down and equity markets have historically been more volatile than fixed interest markets. Should the price of shares in which the Fund has invested fall, the Net Asset Value of the Fund will also fall.

Funds investing in shares are generally more volatile than funds investing in bonds or a combination of shares and bonds, but may also achieve greater returns.

Internal investment guidelines are set, if necessary, to ensure equity risk is maintained within a range deemed suitable based on the Fund's investment objectives and investment policy.

### SMALLER COMPANIES RISK

Investments in smaller companies offers the possibility of higher return but also involve a higher degree of risk than investment in well established, larger companies. The shares of smaller companies can be more volatile which may lead to increased volatility in the price of the units of the Fund.

This is an inherent risk for funds invested within smaller companies. Investment guidelines (including diversification measures), scenario testing as well as other regular monitoring seek to ensure the level of risk is aligned the Fund's investment objectives and investment policy.

### CURRENCY RISK

Assets of the Fund (including cash), and any income paid on those assets, may be denominated in a currency other than the base currency of the Fund. Changes in the exchange rate between the base currency and the currency of an asset may cause the value of the asset/income (expressed in the base currency) to fall as well as rise even if there is no change of the value of such assets in its local currency. This may also cause additional volatility in the Fund's Price. It may not be possible or practicable to hedge against such exchange rate risk.

The Manager aims to reduce the risk of movements in exchange rates on the value of all or part of the assets of the Fund through the use of currency exchange transactions. The Fund may enter into currency exchange transactions either on a spot basis (i.e., exchanging at the current price) or through forward currency transactions (i.e., agreeing to purchase the currency at an agreed price at a future date). Neither spot transactions nor forward currency transactions will completely eliminate fluctuations in the prices of the Fund's securities or in foreign exchange rates, or prevent loss if the prices of

these securities should decline. The performance of the Fund may be strongly influenced by movements in foreign exchange rates because currency positions held by the Fund may not correspond with the securities positions held.

Although these transactions are intended to minimise the risk of loss due to a decline in the value of the hedged currency, they also limit any potential gain that might be realised should the value of the hedged currency increase. Forward currency transactions may also have the effect of reducing or enhancing the Fund's performance due to the difference between the exchange rate available on such transactions compared to the current (spot) exchange rate. Under normal market conditions this difference in exchange rates is mainly caused by the different short term interest rates applicable to the currency of the assets and the base currency of the Fund. Where the interest rate applying to the foreign currency is higher than that of the Fund's base currency, this can reduce the Fund's performance and vice-versa. This impact on performance is usually far less pronounced than the effect of fluctuations of exchange rates that the use of such transactions is intended to reduce, but the impact can be significant over time, particularly where there is a wide gap between the interest rates applicable to the two currencies. The precise matching of the relevant contract amounts and the value of the securities involved will not generally be possible because the future value of such securities will change as a consequence of market movements in the value of such securities between the date when the relevant contract is entered into and the date when it matures. Therefore, the successful execution of a hedging strategy which matches exactly the profile of the investments of any Fund cannot be assured. Furthermore, it may not be possible to hedge against generally anticipated exchange or interest rate fluctuations at a price sufficient to protect the Fund from the anticipated decline in value of its assets as a result of such fluctuations.

Internal investment guidelines are set, if necessary, to ensure currency risk is maintained within a range deemed suitable based on the Fund's investment objectives and investment policy.

## CONCENTRATION RISK

The Fund may hold a small number of stocks. This can give rise to more risk than where investments are spread over a larger number of companies. Whilst this may increase the potential gains, it may also increase the risk of loss to the Fund as a result of the Fund's greater exposure to the performance of individual companies.

Internal investment guidelines seek to ensure suitable levels of diversification based on the Fund's investment objectives and investment policy.

## INDUSTRY SECTOR OR REGION RISK

The Fund may invest in a portfolio of shares which is focused towards one particular market sector or geographic region. This focus may result in higher risk when compared to the Fund that has spread or diversified investments more broadly. Some sectors and regions can experience rapid and extreme price movements when compared with movements in securities markets generally. Investors should note that Funds with a specific focus should be considered for investment as part of a wider diversified portfolio.

Internal investment guidelines seek to ensure suitable levels of diversification based to on the Fund's investment objectives and investment policy.

## STOCK LENDING RISK

The Fund may participate in a stock lending programme managed by an affiliate of the Manager (acting as stock lending agent) for the purpose of lending the Fund's securities via entering into a stock lending authorisation agreement. If the Fund engages in stock lending it will be exposed to counterparty credit risk in that the borrower may default on a loan, become insolvent or otherwise be unable to meet, or refuse to honour, its obligations to return loaned or equivalent securities. In this event, the relevant Fund could experience delays in recovering the loaned securities, may not be able to recover the loaned securities and may incur a capital loss which might result in a reduction in the net asset value of the relevant Fund. The Fund's exposure to its counterparty will be mitigated by the fact that the counterparty will be requested to post collateral, in the form of cash or debt or equity securities, as from time to time set out in the relevant stock lending agreement, and will forfeit its collateral if it defaults on the transaction. If a counterparty defaults and fails

to return equivalent securities to those loaned, the Fund may suffer a loss equal to any shortfall between the value of the realised collateral and the market value of the replacement securities. Such collateral shortfall may arise as a result of inaccurate pricing of the collateral, unfavourable market movements in the value of the collateral, or a lack of liquidity in the market on which the collateral is traded. If the relevant transaction with a counterparty is not fully collateralised, then the Fund's credit exposure to the counterparty in such circumstances will be higher than if the transaction had been fully collateralised. When entering into stock lending the Fund may also be exposed to settlement risk (i.e. the possibility that one or more parties to the transactions will fail to deliver the assets at agreed-upon time) and legal risk, which is the risk of loss due to the unexpected application of a law or regulation, or because a court declares a contract not legally enforceable. In addition to the specific risks identified above stock lending carry other risks, as described in this Risk Factors section, notably (i) counterparty risk, ii) custody insolvency and iii) liquidity risk.

For Stock Lending the risks are partially mitigated by: (i) the lending agent seeking to lend only to counterparties who are considered to have a strong financial standing; (ii) the requirement to receive collateral of good quality and liquidity (the anticipated ability to sell the collateral if needed) covering the value of assets lent, and this amount being regularly reviewed to reflect any market movement in the value of assets lent and received; (iii) carrying out the transaction under legal documentation corresponding to recognised market standards; (iv) limiting the amount of lending to individual counterparties; (v) ensuring the terms of the loan allow it to be requested to be recalled at any time.

## RISK AND REWARD PROFILE

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free. There has been no change from prior year.

## WHY IS THIS FUND IN THIS CATEGORY?

The capital of the Fund is not guaranteed. The Fund is invested in financial markets and uses techniques and instruments which may be subject to sudden and significant variation, which may result in substantial gains or losses.

## ADDITIONAL RISKS

**Liquidity risk:** Under certain market conditions, it may be difficult to buy or sell investments for the Fund. For example, smaller company shares may trade infrequently and in small volumes and corporate and emerging market bonds may be affected by the demand in the market for such securities carrying credit risk, particularly in times of significant market stress. As a result, it may not be possible to buy or sell such investments at a preferred time, close to the last market price quoted or in the volume desired. The Manager may be forced to buy or sell such investments as a consequence of unitholders buying or selling units in the Fund. Depending on market conditions at the time, this could lead to a significant drop in the Fund's value.

Monthly monitoring is conducted, using an in-house liquidity tool, to ensure a high degree of confidence that Fund liquidity will meet the Fund's expected liquidity requirements. Any concerns indicated by the tool are analysed by the Manager's risk team who may also discuss the results with portfolio management staff, or other senior professionals within the firm, as needed, to ensure an appropriate scrutiny.

Based on the analysis, the Manager believes that the liquidity profile of the Fund is appropriate.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

## Fund Information

### FIVE YEAR PERFORMANCE

In the five years to 15 April 2023, the price of Z Accumulation units, with net income reinvested, rose by +22.48%. The MSCI All Country World Index (Net Return)\* increased by +53.41% over the same time period. During the same period the price of Z Income units, with zero income reinvested, rose by +19.05%. ## Notes to the Financial Statements

### 1.1 Accounting policies

a) The Financial Statements have been prepared on a historical cost basis, as modified by the revaluation of investments, and in accordance with Financial Reporting Standard 102 ("FRS 102") and the Statement of Recommended Practice for Authorised Funds issued by the Investment Management Association ("IMA") in May 2014, and amended in June 2017. The Financial Statements have been prepared on a going concern basis. The Financial Statements are prepared in accordance with the Trust Deed and the Financial Conduct Authority's Collective Investment Schemes Sourcebook ("COLL").

There are no material events that have been identified that may cast significant doubt about the Fund's ability to continue as a going concern for the next twelve months from the date these financial statements are authorised for issue. The Manager believes that the Fund has adequate resources to continue in operational existence for the foreseeable future and, they continue to adopt the going concern basis in preparing the financial statements.

b) Dividends on quoted ordinary shares and preference shares are recognised when the securities are quoted ex-dividend. Where such securities are not quoted, dividends are recognised when the right to receive payment is established.

c) The listed investments of the Fund are valued at world close bid prices on the last business day of the accounting year. The fair value of unlisted securities, and unquoted securities where the quotation has been suspended, is estimated by the Manager, using independent sources where available.

d) The functional currency of the Fund is Sterling (GBP). Any transactions in overseas currencies are translated to Sterling at the rates of exchange ruling on the day of any such transaction. Foreign currency balances and investments priced in overseas currencies at the end of the year are converted into Sterling at the exchange rates ruling at 12 noon on the last business day of the accounting year.

e) All expenses are charged in full against revenue on an accruals basis, with the exception of transaction charges which are charged directly to capital. The Manager is entitled to receive (with effect from the dealing day on which units of any class are first allotted) an annual management charge payable on and out of the scheme property of each unit class of the Fund. The annual management charge will be based on the value of the scheme property of the Fund on the immediately preceding dealing day as determined in accordance with the Trust Deed and the Regulations for the purpose of calculating the price of units.

f) Corporation Tax is provided at 20% on revenue, after deduction of expenses. Overseas dividends are disclosed gross of any foreign tax suffered, the tax element being disclosed in the tax note. Where overseas tax has been deducted from overseas revenue, that tax can, in some cases, be set off against Corporation Tax payable, by way of double taxation relief. Deferred taxation is provided on a full provision basis on timing differences arising from the different treatment of items for accounting and tax purposes. Potential future liabilities and assets are recognised where the transactions or events giving rise to them occurred before the balance sheet date. A deferred tax asset is only recognised to the extent that a timing difference will be of future benefit.

g) Bank interest is accounted for on an accruals basis.

h) Revenue equalisation currently applies to the Fund, with the result that part of the purchase price of a unit reflects the relevant share of accrued revenue received or to be received by the Fund. This sum is returned to a unitholder with the first allocation of revenue in respect of a unit issued during a distribution period. The amount representing the revenue equalisation in the unit's price is a return of capital and is not taxable in the hands of the unitholder. The amount of revenue equalisation is calculated by dividing the aggregate of the amounts of revenue included in the price of units issued or sold to unitholders in an annual or interim distribution period by the number of those units and applying the resultant average to each of the units in question. Equalisation on distributions received is deducted from the cost of the investment.

## Notes to the Financial Statements (Continued)

- i) With the exception of the annual management charge, which is directly attributable to individual unit classes, all revenue and expenses are allocated to unit classes pro rata to the value of the net assets of the relevant unit class on the day the revenue or expense is recognised.
- j) The Fund is not required to produce a cash flow statement as it meets the exemption criteria set out in FRS102.7.1A.

### 1.2 Distribution policy

- a) The Fund will distribute any net revenue two months after the accounting year end. Any net revenue deficit will be transferred to the capital account. The type of distribution being made by the Fund is a dividend distribution.
- b) The total revenue received in respect of scrip dividends is separated with an amount equal to the cash alternative credited to revenue and any enhancement credited to capital. The revenue portion forms part of the revenue distribution amount.
- c) Special dividends and share buybacks are treated as revenue or capital depending on the facts of each particular case. It is likely that where the receipt of a special dividend results in a significant reduction in the capital value of the holding, then the special dividend should be treated as capital in nature so as to ensure that the matching principle is applied to gains and losses. Otherwise, the special dividends should be recognised as revenue. Where special dividends are treated as revenue, they are included in the amount available for distribution. The tax accounting treatment follows the principal amount.
- d) If a distribution payment of the Fund remains unclaimed for a period of 6 years after it has become due, it will be forfeited and will revert to and become part of the scheme property.
- e) The annual management charge is charged against revenue for the purposes of calculating the amount available for distribution.

## 2 Financial instruments

The analysis and tables provided below refer to the narrative disclosure on financial instruments risks on pages 8 to 10 of the Manager's Report.

### Price risk sensitivity

At 15 April 2023, if the price of investments held by the Fund increased or decreased by 5%, with all other variables remaining constant, the net assets would increase or decrease by £2,515,102 (2022: £2,899,968) respectively.

### Foreign currency risk sensitivity

Assuming all other factors remain stable, if GBP strengthens by 5% the resulting change in the net assets attributable to unitholders of the Fund would be a decrease of approximately £2,219,426 (2022: £2,656,871). A 5% weakening in GBP would have an equal but opposite effect.

## Notes to the Financial Statements (Continued)

### Interest rate risk sensitivity

As the majority of the Fund's financial assets are non-interest bearing, the Fund is only subject to limited exposure to fair value interest rate risk due to fluctuations in levels of market interest rates. No interest rate risk sensitivity analysis is therefore provided.

### Currency exposures

A proportion of the financial assets of the Fund are denominated in currencies other than Sterling, with the effect that the Fund's balance sheet and total return can be directly affected by currency movements.

	Monetary Exposure	Non-Monetary Exposure	Total
2023	£'000	£'000	£'000

SEBI Fee	2	-
Issuance Fee	11	-
	<b>39</b>	<b>28</b>
<b>Total expenses</b>	<b>627</b>	<b>934</b>

Expenses include irrecoverable VAT where applicable.

### 6 Taxation

#### a) Analysis of tax in the year:

	2023 £'000	2022 £'000
Irrecoverable overseas tax	83	57

## Notes to the Financial Statements (Continued)

### b) Factors affecting total tax charge for the year:

The tax assessed for the year is lower than the standard rate of corporation tax in the UK for an authorised unit trust (20%) (2022: 20%).

The differences are explained below:

	2023 £'000	2022 £'000
Net revenue/(expense) before taxation	150	(321)
Corporation tax at 20%	30	(64)
Effects of:		
Irrecoverable overseas tax	83	57
Movement in excess management expenses	121	187
Revenue not subject to taxation	(151)	(123)
Total effects	53	121
<b>Total tax charge for the year (see note 6a)</b>	<b>83</b>	<b>57</b>

Authorised unit trusts are exempt from tax on capital gains.

### c) Deferred taxation:

There is no provision required for deferred taxation at the Balance sheet date (2022: nil).

### d) Factors that may affect future tax charges:

At the year end, after offset against income taxable on receipt, there is a potential deferred tax asset of £2,089,956 (2022: £1,968,803) relation to surplus management expenses. It is unlikely that the Fund will generate sufficient taxable profits in the future to utilise these amounts and therefore no deferred tax asset has been recognised.

## 7 Distributions

At year end, there was insufficient income on classes D, R and Z to meet expenses and taxation and, as permitted by the Trust Deed, an amount of £84,376 (2022: £344,908) has been transferred from the capital account to revenue account to meet this shortfall.

The distributions take account of income received on the creation of units and income deducted on the cancellation of units, and comprise:

	2023 £'000	2022 £'000
Interim	149	-
Final	-	-
	149	-
Add: Income deducted on cancellation of units	51	(51)
Deduct: Income received on creation of units	(49)	18
<b>Net distribution for the year</b>	<b>151</b>	<b>(33)</b>
<b>Reconciliation to net revenue after taxation:</b>		
Net distribution for the year	151	(33)
Shortfall transfer to capital	(84)	(345)
<b>Net revenue/(expense) after taxation</b>	<b>67</b>	<b>(378)</b>

## Notes to the Financial Statements (Continued)

### 8 Debtors

## Statement of Manager's Responsibilities

### STATEMENT OF THE MANAGER'S RESPONSIBILITIES IN RELATION TO THE REPORT AND ACCOUNTS OF THE FUND

The Financial Conduct Authority's Collective Investment Schemes sourcebook requires the Authorised Fund Manager to prepare financial statements for each annual accounting year which give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland), of the financial affairs of the Fund and of its revenue and expenditure and capital losses for the year.

In preparing the accounts the Manager is required to:

- select suitable accounting policies and apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- comply with the disclosure requirements of the Statement of Recommended Practice for Authorised Funds and the Trust Deed;
- follow applicable accounting standards;
- keep proper accounting records which enable it to demonstrate that the accounts prepared comply with the above requirements; and
- prepare the financial statements on a going concern basis unless it is inappropriate to presume that the Fund will continue in business.

The Manager is responsible for the management of the Fund in accordance with its Trust Deed, Prospectus and the Regulations, and for taking reasonable steps for the prevention and detection of fraud and other irregularities.

## Report of the Trustee

### STATEMENT OF THE TRUSTEE'S RESPONSIBILITIES AND REPORT OF THE TRUSTEE TO THE UNITHOLDERS OF THE AXA FRAMLINGTON FINTECH FUND FOR THE YEAR ENDED 15TH APRIL 2023.

The Depositary in its capacity as Trustee of AXA Framlington FinTech Fund must ensure that the Trust is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook, the Financial Services and Markets Act 2000, as amended, (together "the Regulations"), the Trust Deed and Prospectus (together "the Scheme documents") as detailed below.

The Depositary must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Trust and its investors.

The Depositary is responsible for the safekeeping of all custodial assets and maintaining a record of all other assets of the Trust in accordance with the Regulations.

The Depositary must ensure that:

- the Trust's cash flows are properly monitored and that cash of the Trust is booked in cash accounts in accordance with the Regulations;
- the sale, issue, repurchase, redemption and cancellation of units are carried out in accordance with the Regulations;
- the value of units of the Trust are calculated in accordance with the Regulations;
- any consideration relating to transactions in the Trust's assets is remitted to the Trust within the usual time limits;
- the Trust's income is applied in accordance with the Regulations; and
- the instructions of the Authorised Fund Manager ("the AFM"), which is the UCITS Management Company, are carried out (unless they conflict with the Regulations).

The Depositary also has a duty to take reasonable care to ensure that the Trust is managed in accordance with the Regulations and the Scheme documents of the Trust in relation to the investment and borrowing powers applicable to the Trust.

Having carried out such procedures as we considered necessary to discharge our responsibilities as Depositary of the Trust, it is our opinion, based on the information available to us and the explanations provided, that, in all material respects the Trust, acting through the AFM:

- (i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Trust's units and the application of the Trust's income in accordance with the Regulations and the Scheme documents of the Trust; and
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Trust in accordance with the Regulations and the Scheme documents of the Trust.

## Report of the Independent Auditor

### INDEPENDENT AUDITOR'S REPORT TO THE UNITHOLDERS OF THE AXA FRAMLINGTON FINTECH FUND

#### OPINION

We have audited the financial statements of AXA Framlington FinTech Fund ("the Fund") for the year ended 15 April 2023, which comprise the Statement of Total Return, the Statement of Change in Net Assets Attributable to Unitholders, the Balance Sheet, the related notes and the Distribution Tables, and the accounting policies of the Fund, which include a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards including FRS 102 'The Financial Reporting Standard applicable to the UK and Republic of Ireland' (United Kingdom Generally Accepted Accounting Practice).

In our opinion, the financial statements:

- give a true and fair view of the financial position of the Fund as at 15 April 2023 and of net revenue and net capital losses on the scheme property of the Fund for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice.

#### BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report below. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the "FRC") Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### CONCLUSIONS RELATING TO GOING CONCERN

In auditing the financial statements, we have concluded that the Manager's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Fund's ability to continue as a going concern for a period which is 12 months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Manager with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Fund's ability to continue as a going concern.

#### OTHER INFORMATION

The other information comprises the information included in the Annual Report other than the financial statements and our audit report thereon. The Manager is responsible for the other information contained within the Annual Report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine

whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

## **OPINIONS ON OTHER MATTERS PRESCRIBED BY THE RULES OF THE COLLECTIVE INVESTMENT SCHEMES SOURCEBOOK OF THE FINANCIAL CONDUCT AUTHORITY (THE “FCA”)**

In our opinion:

- the financial statements have been properly prepared in accordance with the Statement of Recommended Practice relating to Authorised Funds, the rules of the Collective Investment Schemes Sourcebook of the FCA and the Trust Deed; and
- there is nothing to indicate that adequate accounting records have not been kept or that the financial statements are not in agreement with those records; and
- the information given in the Manager’s report for the financial year for which the financial statements are prepared is consistent with the financial statements.

## **MATTERS ON WHICH WE ARE REQUIRED TO REPORT BY EXCEPTION**

We have nothing to report in respect of the following matter in relation to which the Collective Investment Schemes Sourcebook of the FCA requires us to report to you if, in our opinion:

- we have not received all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit

## **RESPONSIBILITIES OF THE MANAGER**

As explained more fully in the Manager’s responsibilities statement set out on page 34, the Manager is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Manager is responsible for assessing the Fund’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager either intends to wind up or terminate the Fund or to cease operations, or has no realistic alternative but to do so.

## **AUDITOR’S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

## EXPLANATION AS TO WHAT EXTENT THE AUDIT WAS CONSIDERED CAPABLE OF DETECTING IRREGULARITIES, INCLUDING FRAUD

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our approach was as follows:

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Fund and determined that the most significant are United Kingdom Generally Accepted Accounting Practice (UK GAAP), Investment Management Association's Statement of Recommended Practice (IMA SORP), the FCA Collective Investment Schemes Sourcebook, the Fund's Trust Deed and the Prospectus.
- We understood how the Fund is complying with those frameworks through discussions with the Manager and the Fund's administrators and a review of the Fund's documented policies and procedures.
- We assessed the susceptibility of the Fund's financial statements to material misstatement, including how fraud might occur by considering the risk of management override, specifically management's propensity to influence revenue and amounts available for distribution. We identified a fraud risk with respect to the incomplete or inaccurate income recognition through incorrect classification of special dividends and the resulting impact to amounts available for distribution. We tested appropriateness of management's classification of material special dividends as either a capital or revenue return.
- Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved review of the reporting to the Manager with respect to the application of the documented policies and procedures and review of the financial statements to test compliance with the reporting requirements of the Fund.
- Due to the regulated nature of the Fund, the Statutory Auditor considered the experience and expertise of the engagement team to ensure that the team had the appropriate competence and capabilities to identify non-compliance with the applicable laws and regulations.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

## USE OF OUR REPORT

This report is made solely to the Fund's unitholders, as a body, pursuant to Paragraph 4.5.12 of the rules of the Collective Investment Schemes Sourcebook of the FCA. Our audit work has been undertaken so that we might state to the Fund's unitholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Fund and the Fund's unitholders as a body, for our audit work, for this report, or for the opinions we have formed.

Ernst & Young LLP  
Statutory Auditor

## Further Information (Unaudited)

### REMUNERATION POLICY OF THE MANAGER

The Manager has approved and adopted AXA IM's Global Remuneration Policy, in accordance with the Regulations, which is consistent with, and promotes, sound and effective risk management; does not encourage risk-taking which is inconsistent with the risk profiles of the Fund's or the Trust Deeds, and does not impair compliance of the Manager's duty to act in the best interests of each of the Fund's.

AXA IM's Global Remuneration Policy, which has been approved by the AXA IM Remuneration Committee, sets out the principles relating to remuneration within all entities of AXA IM (including the Manager) and takes into account AXA IM's business strategy, objectives, and risk tolerance, as well as the long-term interests of AXA IM's shareholders, employees and clients (including the Fund's). The AXA IM Remuneration Committee is responsible for determining and reviewing the AXA IM remuneration guidelines, including the AXA IM Global Remuneration Policy, as well as reviewing the annual remuneration of senior executives of the AXA IM Group and senior officers in control functions.

AXA IM provides both fixed and variable remuneration. An employee's fixed remuneration is structured to reward organizational responsibility, professional experience and the individual's capability to perform the duties of the role. Variable remuneration is based on performance and may be awarded annually on both a non-deferred and, for certain employees, a deferred basis. Non-deferred variable remuneration may be awarded in cash or, where appropriate and subject to local laws and regulation, in instruments linked to the performance of AXA IM Funds. Deferred remuneration is awarded through various instruments structured to reward medium and long-term value creation for clients and AXA IM and long-term value creation for the AXA Group. AXA IM ensures appropriate balances between fixed and variable remuneration and deferred and non-deferred remuneration.

Details of the up-to-date Global Remuneration Policy are published online at <https://www.axa-im.com/remuneration>. This includes the description of how remuneration and benefits are awarded for employees, and further information on the AXA IM remuneration committee. A paper copy of the up-to-date Global Remuneration Policy is also available from the Manager free of charge upon request.

In line with the requirements of the Undertakings for Collective Investments in Transferable Securities (UCITS) V, AXA Investment Managers UK Limited is required to make quantitative disclosures of remuneration. These disclosures are made in line with the currently available guidance on quantitative remuneration disclosures. The amounts shown below reflect payments made in respect of the financial year 1 January 2022 to 31 December 2022:

Total amount of remuneration paid and / or allocated to all staff for the year ended December 31, 2022 <sup>(1)</sup>	
Fixed Pay <sup>(2)</sup> (£'000)	220,567
Variable Pay <sup>(3)</sup> (£'000)	274,564
Number of employees <sup>(4)</sup>	2,675

<sup>(1)</sup> Excluding social charges.

<sup>(2)</sup> Fixed Pay amount is based on 2021/22 compensation review final data.

<sup>(3)</sup> Variable compensation, includes:

- the amounts awarded for the performance of the previous year and fully paid over the financial year under review,
- deferred variable remuneration,
- and long-term incentives set up by the AXA Group.

<sup>(4)</sup> Number of employees includes Permanent and Temporary contracts excluding internships (based on Staff list as of 31/12/2022).

**Remuneration to Identified Employee:**

Aggregate amount of compensation paid and / or allocated to risk takers and senior management whose activities have a significant impact on the risk profile of investment vehicles			
	Risk Takers	Senior Management	Total
Fixed Pay and Variable Remuneration (£'000)	136,672	76,261	212,933
Number of employees	277	62	339

**UK Identified Employee Remuneration:**

Weighted amount of compensation paid and / or allocated to risk takers and senior management whose activities have a significant impact on the risk profile of all investment vehicles where AXA IM UK act as Authorised Fund Manager or Alternative Investment Fund Manager			
	Risk Takers	Senior Management	Total
Fixed Pay and Variable Remuneration (£'000)	2,239	1,249	3,488
Number of employees	69	13	82

## THE SECURITIES FINANCING TRANSACTIONS REGULATION

The Securities Financing Transactions Regulation, as published by the European Securities and Markets Authority, aims to improve the transparency of the securities financing markets. Disclosures regarding exposure to Securities Financing Transactions (SFTs) or total return swaps will be required on all reports & accounts published after 13 January 2017. During the year to 15 April 2023 and at the balance sheet date, the Fund did not use SFTs or total return swaps, as such no disclosure is required.

## VALUE ASSESSMENT

It is our duty as Authorised Fund Manager ("AFM") to act in the best interests of our investors. As part of fulfilling this duty, we need to consider whether the charges taken from our Funds are justified in the context of the overall service and value that we provide to our investors.

The FCA have introduced new rules requiring the Boards of AFMs to consider robustly and in detail whether they are delivering value for money to their investors and to explain the assessment annually in a Value Statement made available to the public.

The Value Statement report is available on the AXA IM website:

<https://retail.axa-im.co.uk/fund-centre>
