⁶⁴ General Information*

^{*} These collectively comprise the Authorised Corporate Director's Report.

Report of the Authorised Corporate Director (the "Manager")

The Company

The Invesco UK 2 Investment Series is an open-ended investment company with variable capital ("ICVC"), incorporated in England and Wales on 11 April 2003 under registered number IC221.

The Company is a "UK UCITS Scheme" and an "Umbrella Company" (under the OEIC Regulations) and therefore new Funds may be formed by the Manager, subject to regulatory approval. Any changes to Funds or share classes will be included in an updated Prospectus.

The Company is a Financial Conduct Authority ("FCA") authorised scheme complying with the FCA's Collective Investment Schemes sourcebook.

Terms used in this report shall have the same meaning as defined in the Prospectus.

At 31 March 2024, the Company consisted of two Funds:

Invesco UK Equity Income Fund (UK)
Invesco UK Enhanced Index Fund (UK)

Accounting Periods

Annual accounting date 31 March Interim accounting date 30 September Distribution payable on 31 May Interim distribution payable on 30 November

Invesco UK Enhanced Index Fund (UK) will make monthly distributions on the O Accumulation shares and O Income shares, with the payment date being the last day of the month following the end of the distribution period.

Should expenses and taxation exceed revenue in a distribution period for a share class, no distribution will be payable for that class.

Launch of New 'O' Share Classes

New share classes, O Accumulation shares and O Income shares were launched at 1,000p per share for the Invesco UK Enhanced Index Fund (UK) on 13 March 2024.

Further details can be obtained from the most up to date relevant fund and share class specific Key Investor Information Document(s).

Reduction in Ongoing Charge

On 1 December 2023, we reduced the Ongoing Charge (Fund Management Fee) for some of the share classes of most of our funds. For details of the reductions, broken down by fund and share class, please see "Ongoing Charge reductions effective on 1 December 2023" within the "News and announcements" section of our website.

Where applicable, the Key Investor Information Documents (KIIDs) reflect these reductions.

For details of all of the costs and charges of our funds, please see our Costs and Charges document available on our website: www.invesco.com/uk/icvc-charges

Remuneration Policy (Unaudited)

On 18 March 2016, Invesco Fund Managers Limited (the "Manager") adopted a remuneration policy consistent with the principles outlined in the European Securities and Markets Authority ("ESMA") Guidelines, on sound remuneration policies under the UCITS Directive.

The policy was revised in 2023, to include specificities for some Invesco EU regulated Management Companies. The Manager was not impacted by the changes.

The purpose of the remuneration policy is to ensure the remuneration of the staff of the Manager is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UK UCITS it manages and does not impair the Manager's compliance with its duty to act in the best interests of the UK UCITS it manages. The Manager's summary remuneration policy is available from the corporate policies section of our website (www.invesco.com/uk). Paper copies of the full remuneration policy can be obtained for free from the registered office of the Manager, Invesco Fund Managers Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, UK upon request.

The remuneration policy is reviewed annually by the Compliance, Human Resources and Risk Management functions, who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Manager are responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the remuneration policy to assess its ongoing compliance with the Invesco Group's remuneration policies and procedures.

Invesco Fund Managers Limited specific disclosures

The Manager does not employ any direct staff. The aggregate total remuneration of Invesco staff involved in UK UCITS related activities of the Manager in respect of performance year (1 January 2023 to 31 December 2023) is £40.71m of which £26.39m is fixed remuneration and £14.32m is variable remuneration. The number of beneficiaries apportioned to UK UCITS activities is 211.

The Manager has identified individuals considered to have a material impact on the risk profile of the Manager or the UK UCITS Schemes it manages ("Identified Staff"), who include board members of the Manager, senior management, heads of control functions, other risk takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers. Identified Staff of the Manager are employed by Invesco.

Report of the Authorised Corporate Director (the "Manager")

Remuneration Policy (Unaudited) continued The aggregate total remuneration paid to the Identified Staff of the Manager for UK UCITS related activities for the performance year (1 January 2023 to 31 December 2023) is £19.74m of which £6.57m is paid to Senior Management and £13.17m is paid to other Identified Staff. Please note that remuneration for UK UCITS Schemes Identified Staff includes remuneration for staff employed by delegates.

Managing the risks presented by conflicts

Financial markets have been impacted since February 2022, due primarily to geopolitical tensions arising from Russia's incursion into Ukraine and the impact of a subsequent range of sanctions, regulations and other measures which impaired normal trading in Russian securities. On 28 February 2022, Invesco Fund Managers Limited suspended the purchase of all Russian securities in its funds and this suspension was still in place as at 31 March 2024. No Russian securities were held by the Funds on 31 March 2024. The Directors continue to review the situation in order to navigate through this period of heightened uncertainty.

On 7 October 2023 Palestinian militants launched an assault on Israel, leading to an Israeli invasion of Gaza. This conflict has created extensive uncertainty on the political and economic front. The longer-term impact on economies, markets, industries and individual issuers continues to evolve. The Directors are monitoring the situation and continue to review during this period of uncertainty to assess any impact the situation may have on any of our Funds.

Task Force on Climate-related Financial Disclosures ("TCFD") Portfolio Reports

For each Fund, we publish a Task Force on Climate-related Financial Disclosures ("TCFD") Portfolio Report which provides detailed climate-related information on the Fund. You can access these reports directly on our website via the following link: www.invesco.com/uk/icvctcfd. These reports, in conjunction with our group-level TCFD report https://www.invesco.com/content/dam/invesco/emea/en/pdf/2022_IVZ_Global_TCFD_Report.pdf, provide a detailed overview of our approach to climate-related governance, strategy and risk management as well as metrics and targets. We encourage all investors in the Funds to review these reports to gain a deeper understanding of our commitment to managing climate-related risks and opportunities.

Risk Profile

Shareholders should be aware of the risks inherent in investing in securities and other financial instruments. Financial markets can be vulnerable to unpredictable price movements and are affected by a number of factors, both political and economic.

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments.

As one of the key objectives of the Invesco UK Equity Income Fund (UK) is to provide income, the ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

The Invesco UK Equity Income Fund (UK) may invest in private and unlisted equities which may involve additional risks such as lack of liquidity and concentrated ownership. These investments may result in greater fluctuations of the value of the Fund. The Manager, will ensure that any investments in private and unlisted equities do not materially alter the overall risk profile of the Fund.

The Funds primarily invest in a single country or a small number of countries (i.e. have a geographically concentrated investment strategy), the Funds may be subject to a greater degree of volatility and risk than one that is geographically diversified. In such cases, the Funds' investments will be more susceptible to fluctuations in value resulting from economic or business conditions in the country where the Funds are invested. The aggregate return of the Funds may therefore be adversely affected by unfavourable developments in that country.

The Funds may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Funds. The Manager, however, will ensure that the use of derivatives within the Funds does not materially alter the overall risk profile of the Funds.

A more detailed description of risk factors that apply to these Funds is set out in the Prospectus.

Report of the Authorised Corporate Director (the "Manager")

Value Assessment (Unaudited)

The Manager conducts an assessment of value for each Fund on an annual basis. The Value Assessment report is made available to investors annually in a composite report for all the funds in Invesco's ICVC range on our website (www.invesco.com/uk) within the Corporate Policies section (which is located under "About us"). The latest Value Assessment report for the year ended 31 December 2023 was published in May 2024.

Holdings in other Funds of the Company

As at 31 March 2024, no Funds held shares in any other Fund of the Company.

Liability

The Company is structured by having different Funds. The assets and liabilities of each Fund are segregated in accordance with the law of England and Wales. As a consequence the assets of a Fund will not be available to meet the liabilities of another Fund within the Company.

The Shareholders are not liable for the debts of the Company.

ISA Eligibility

All the Company's Funds qualify for stocks and shares ISA investment. None of the Funds qualify for cash ISA investment.

Certification of the Annual Report by the Manager

In accordance with the requirements of the Open-Ended Investment Companies Regulations 2001, we hereby certify these financial statements on behalf of the Directors of Invesco Fund Managers Limited.

Director - Rene Marston

Director - Alan Trotter

Report of the Authorised Corporate Director (the "Manager")

Risk and Reward Profiles

for the year 1 April 2023 to 31 March 2024

Invesco UK Equity Income Fund (UK)									
Lower Risk Higher Risk									
Typically	ower rewards Typically higher rewards								
1	2 3 4 5 6 7								

Invesco UK Enhanced Index Fund (UK)									
Lower Risk Higher Risk									
Typically	lower rev	ower rewards Typically higher rewards							
1	2	3	4	5	5 6 7				

The risk categories shown are not a measure of capital losses or gains, but of how significant the rises and falls in the share class prices have been historically. For example a share class whose price has experienced significant rises and falls will be in a higher risk category, whereas a share class whose price has experienced less significant rises and falls will be in a lower risk category. As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile. Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

A share class in risk category 1 indicates its price has experienced very low rises and falls historically.

A share class in risk category 2 indicates its price has experienced minor rises and falls historically.

A share class in risk category 3 indicates its price has experienced very moderate rises and falls historically.

A share class in risk category 4 indicates its price has experienced moderate rises and falls historically.

A share class in risk category 5 indicates its price has experienced significant rises and falls historically.

A share class in risk category 6 indicates its price has experienced very significant rises and falls historically.

A share class in risk category 7 indicates its price has experienced major rises and falls historically.

For more information on our Funds' risk and reward profiles, please refer to the most up to date relevant Fund and share class specific Key Investor Information Documents ("KIIDs"), which are available at www.invesco.com/uk or by contacting us.

Report of the Authorised Corporate Director (the "Manager")

Securities Lending (Unaudited)

for the year 1 April 2023 to 31 March 2024

Securities Lending

Securities lending transactions entered into by the Funds, including transfer of collateral received in exchange for securities lent, are subject to a written legal agreement between Invesco Asset Management Limited (the "investment adviser", on behalf of the Funds); Citibank UK Limited (the "Depositary"); and The Bank of New York Mellon, London Branch (the "Securities Lending Agent").

Collateral received is segregated from the assets belonging to the Depositary or the Securities Lending Agent.

The following table details the value of securities on loan as a proportion of the Funds' total lendable assets and Net Asset Value ("NAV") as at 31 March 2024. The income earned from securities lending is also shown for the year ended 31 March 2024. Total lendable assets represents the aggregate value of assets forming part of the Funds' securities lending programme. This excludes any assets held by the Funds that are not considered lendable due to any market, regulatory, investment or other restriction.

Securities on loan

Fund	% of lendable assets	% of NAV	£'000
Invesco UK Equity Income Fund (UK)	0.86	0.61	24
Invesco UK Enhanced Index Fund (UK)	2.91	2.79	63

The Funds entered into the securities lending programme on 10 February 2021.

The total income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. The Securities Lending Agent shall retain 10% of the securities lending revenues generated as compensation for its securities lending services and the Fund shall be entitled to the remainder of such net securities lending revenues.

The following table details the value of securities on loan and associated collateral received, analysed by counterparty as at 31 March 2024.

	Se	curities Lending	
	Counterparty's country of	Amount on loan	Collateral received
Counterparty	establishment	£'000	£'000
Invesco UK Equity Income Fund (UK)			
BNP Paribas Arbitrage	France	719	798
Citigroup Global Markets Limited	UK	1,663	1,829
Natixis S.A.	France	3,367	3,722
The Bank of Nova Scotia	Canada	626	689
Total		6,375	7,038

The Bank of Nova Scotia	Canada	3,118	3,432
UBS AG	Switzerland	25	26
Total		24,694	27,104

All securities on loan have an open maturity tenor as they are recallable or terminable on a daily basis.

Collateral

The Funds engage in activities which may require collateral to be provided to a counterparty ("collateral posted") or may hold collateral received ("collateral received") from a counterparty.

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received as collateral is based on the respective contractual maturity date, while for equity securities and exchange traded funds ("ETFs") received as collateral are presented as open transactions as they are not subject to a contractual maturity date.

As at 31 March 2024, all non-cash collateral received by the Funds in respect of securities lending transactions is held by the Funds (or through its delegates).

The following table lists the top ten issuers (or all the issuers if less than ten) by value of non-cash collateral received by the Funds by way of the title transfer collateral arrangement across securities lending transactions as at 31 March 2024.

Notes applicable to the financial statements of all Funds

1 Accounting Policies

a) Basis of preparation

The financial statements have been prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities held at fair value through profit and loss. The financial statements have also been prepared in accordance with the United Kingdom Generally Accepted Accounting Practice ("UK GAAP"), as defined within the UK Financial Reporting Standard ("FRS 102") and the Statement of Recommended Practice 'Financial Statements of UK Authorised Funds' (the "SORP"), issued by the Investment Management Association (now known as the Investment Association) in May 2014 and updated in June 2017, the COLL and the Company's Instrument of Incorporation and Prospectus.

b) Recognition of revenue

- Dividends on quoted ordinary shares, collective investment schemes and preference shares are recognised when the securities are quoted ex-dividend. Where such securities are not quoted, dividends are recognised when they are declared.
- ii) Interest on bank balances and deposits is recognised on an accruals basis.
- iii) Revenue arising on debt securities is accreted or amortised over the life of such securities and recognised at a consistent rate over the life of the instrument (effective yield accounting). Future cash flow on all debt securities are considered when calculating revenue on an effective yield basis and where purchase costs are considered to reflect incurred credit losses, such losses are taken into account so that interest is recognised at a reasonably expected commercial rate. Accrued interest purchased and sold on interest-bearing securities is excluded from the capital cost of these securities and dealt with as part of the revenue of the Company.
- iv) All revenue is recognised at a gross amount that includes any withholding taxes but excludes any other taxes, such as attributable tax credits.
- All REIT dividend revenue is recognised on an accruals basis and the allocation between income and capital is estimated when the security goes ex-dividend based upon previous income/capital allocations.
- vi) Returns from derivative securities are taken to capital and/or revenue depending on the motive and circumstances surrounding the particular transaction. The net revenue/expense on derivative positions are recognised as revenue and form part of the Company's distribution.
- vii) Distributions and accumulations, excluding equalisation, receivable on the underlying collective investment schemes are recognised as revenue when the shares are quoted ex-dividend. The Manager rebates an amount equivalent to the ongoing charge suffered on this Fund's share in the underlying collective investment schemes. Each rebate is paid to either the capital or revenue element of the Fund depending on whether the fee of the underlying Fund is charged to capital or revenue.
- viii) Income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. The Securities Lending Agent shall retain 10% of the securities lending revenues generated as compensation for its securities lending services and the Fund shall be entitled to the remainder of such net securities lending revenues.

c) Stock dividends

Ordinary stock dividends are recognised wholly as revenue and are based on the market value of the shares on the dates they are quoted ex-dividend. Where an enhancement is offered, the amount by which the market value of the shares on the date they are quoted ex-dividend exceeds the cash dividend is taken to capital.

d) Special dividends and share buy-backs

The underlying circumstances behind both special dividends and the proceeds from share buybacks are reviewed on a case by case basis in determining whether the amount is capital or revenue in nature. Amounts recognised as revenue will form part of the Fund's distribution. Any tax treatment thereon will follow the accounting treatment of the principal amount.

e) Underwriting commission

Underwriting commission is wholly recognised as revenue when the issue takes place, except where the Company is required to take up all or some of the shares underwritten, in which case an appropriate proportion of the commission received is deducted from the cost of those shares.

f) Expenses

All expenses, except for those relating to the purchase and sale of investments are charged initially against revenue and are accounted for on an accruals basis.

g) Revenue allocation to share classes

Revenue is allocated each day pro rata to the capital value of assets attributable to each class and taxation is computed by reference to the net revenue after expenses and tax attributable to each class.

Notes applicable to the financial statements of all Funds

1 Accounting Policies continued

h) Measurement basis

The measurement basis used in preparing the financial statements is fair value for investments and historical cost for all other assets and liabilities.

i) Basis of valuation of investments

All investments are valued at their fair value as at the balance sheet date.

All investments have been valued on the last business day of the year at bid market value net of any accrued revenue, at close of business. Where there is no price source from an active market for an investment, the Manager will assess any information available from internal and external sources in order to arrive at an estimated fair value. The fair value is established by using measures of value such as the price of recent transactions, earnings multiple and net assets. The Manager of the Company also makes judgements and estimates based on their knowledge of recent investment performance, historical experience and other assumptions that are considered reasonable under the circumstances. The estimates and the assumptions used are under continuous review by the Manager with particular attention paid to the carrying value of the investments. Over-the-counter derivative contracts shall be valued on the basis of unrealised gain or loss on the contract using current settlement price. When settlement price is not used, the over-the-counter derivative contracts will be valued at their fair value in accordance with the method of valuation (as used on a consistent basis) as shall have been agreed between the Manager and the Depositary.

Valuation of unquoted equity instruments

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value by the Invesco European Pricing Committee (EPC).

The role of the EPC is to provide oversight of the pricing & valuation of investments in European domiciled funds and portfolios. Members provide insight and technical knowledge from their respective areas to sign off any pricing related recommendations (including but not limited to Fair Value of securities, markets and restricted currencies) from the Pricing team, as detailed in the Invesco Pricing Policy and EPC Terms of Reference.

As part of any determination of a level 3 security's fair value, the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company;
- Consideration of seniority of the securities held and terms of repayment upon realisation;
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding;
- Consideration of any outstanding payments to be made by Invesco;
- Industry statistics or events (such as mergers, acquisitions and the risk of default).

j) Exchange rates

Assets and liabilities in foreign currencies are translated into Sterling at the exchange rates ruling at close of business on the last business day of the year. Revenue items denominated in foreign currencies are translated into Sterling at the exchange rates ruling at the times of the transactions. Foreign exchange gains and losses arising from translation are included in the Statement of Total Return and are included in net capital gains/(losses) on investments.

k) Taxation and deferred taxation

Provision is made for corporation tax at the current rate on the excess of taxable revenue over allowable expenses. Corporation tax is charged at 20% of the revenue liable to corporation tax less expenses. Provision is made on all material timing differences arising from the different treatment of items for accounting and tax purposes. A deferred tax asset is recognised only to the extent that there will be taxable profits in the future against which the asset can be offset. Overseas capital gains tax is accounted for on an accruals basis.

I) Efficient portfolio management

Where appropriate, certain permitted transactions such as derivatives or forward currency transactions are used for efficient portfolio management. Where such transactions are used to protect or enhance revenue, the revenue and expenses derived therefrom are included in 'Revenue' or 'Interest payable and similar charges' in the Statement of Total Return. Where such transactions are used to protect or enhance capital, the gains and losses derived therefrom are included in 'Net capital gains/losses' in the Statement of Total Return. Any positions on such transactions open at the period end are reflected in the Balance Sheet at their marked to market value.

Notes applicable to the financial statements of all Funds

1 Accounting Policies continued

m) Dilution adjustment

The need to apply a dilution adjustment will depend on the volume of sales (where they are issued) or redemptions (where they are cancelled) of shares. The Manager may apply a dilution adjustment on the issue and redemption of such shares if, in its opinion, the existing Shareholders (for sales) or remaining Shareholders (for redemptions) might otherwise be adversely affected, and if applying a dilution adjustment, so far as practicable, is fair to all Shareholders and potential Shareholders. In particular, the dilution adjustment may be applied in the following circumstances for all Funds in the Invesco UK 2 Investment Series:

- where over a dealing period a Fund has experienced a large level of net issues or redemptions relative to its size. For these purposes a large level of net dealing is defined as 1% or more of the net asset value of the Fund in question (as calculated at the last valuation point); or
- where the Manager considers it necessary to protect the interests of the Shareholders of the Company.

On the occasions that the dilution adjustment is not applied there may be an adverse impact on the total assets of the Fund which may otherwise constrain the future growth of the Fund in question.

Please refer to Appendix 6 of the Prospectus which shows the size of typical dilution adjustments by Fund and an indication of the frequency of application of such adjustments.

2 Distribution Policies

The Funds will distribute all revenue disclosed in the annual financial statements (less expenses and taxation). The ordinary element of stock dividends is treated as revenue and forms part of the Fund's distribution. Should expenses and taxation exceed revenue for a share class, there will be no distribution for that share class and the shortfall will be met from capital. All Fund accumulations and distributions are paid as dividend distributions.

In calculating the amount to be distributed, the following Funds allocate the Manager's ongoing charge to capital, thereby increasing the amount available for distribution:

Invesco UK Equity Income Fund (UK)

Distributions which have remained unclaimed by Shareholders for more than six years are credited to the capital property of the Fund.

Marginal tax relief is not taken into account when determining the distribution.

3 Shareholders' Funds

The Manager's entry charge and Fund Management Fee ("FMF") are as follows:

		Entry charge %	Fund Management Fee %
Invesco UK Equity Income Fund (UK)	- Trail classes	0.0	1.61

On 1 December 2023, we reduced the Ongoing Charge (Fund Management Fee) for some of the share classes of most of our funds. See Reduction in Ongoing Charge on page 2 for details.

References in this report to Trail classes mean the Accumulation Shares and Income Shares.

Notes applicable to the financial statements of all Funds

3 Shareholders' Funds continued

The net assets attributable to each share class, the net asset value per share and the number of shares in issue of each share class are shown in the comparative tables of each Fund. These can be found on:

Invesco UK Equity Income Fund (UK)
Invesco UK Enhanced Index Fund (UK)

pages 20 to 24 pages 40 to 44

Each share class has the same rights on a winding up of the Company.

4 Generic Risk Factors

In pursuing their investment objectives, the Funds of the Company hold a number of financial instruments that may comprise securities and other investments, cash balances and debtors and creditors that arise directly from their operations. Political and economic events in the major economies of the world, such as the United States, Japan and the European Union, will influence stock and securities markets worldwide.

The main risks from the Funds' holding of financial instruments are set out below together with the Manager's policy for managing these risks.

Counterparty risk

The Funds may enter into derivatives transactions or place cash in bank deposit accounts, which would expose the Funds to the credit of its counterparties and their ability to satisfy the terms of such contracts. In the event of a bankruptcy or insolvency of a counterparty, the Funds could experience delays in liquidating positions and significant losses, including declines in the value of investments during the year in which the Funds seek to enforce its rights, inability to realise any gains on their investments during such year and fees and expenses incurred in enforcing their rights.

In order to mitigate this risk, the Funds conduct trades through reputable counterparties. A diligent process to select and approve a new counterparty, as well as monitoring existing counterparties, is in place. During the approval process, various verifications are performed such as assessing the counterparty's operational capabilities as well as their credit quality. On an ongoing basis, market analysis is reviewed by the firm's trading and credit research teams in order to detect warning signs of a counterparty default. If the firm believes high risk of default exists, the counterparty is removed with immediate effect from the approved counterparty list.

Currency exchange risk

The Funds' assets may be invested in securities denominated in currencies other than Sterling. As a result, changes in exchange rates may adversely affect the value of any investment, which will have a related effect on the price of shares.

Currency exchange risk may be mitigated by hedging the exposure through the use of forward currency contracts.

Custody risk

The assets owned by each Fund are held on trust for the Fund by a custodian that is also regulated by the Financial Conduct Authority. The Financial Conduct Authority requires that the custodian ensures that there is legal separation of non-cash assets held under custody and that records are maintained that clearly identify the nature and amount of all assets under custody, the ownership of each asset and where the documents of title to that asset are located. In case of a potential bankruptcy of the custodian, cash positions in the Fund are not protected and there may be a delay in regaining full control of the non-cash assets.

Investing in Financial Derivative Instruments

There are certain investment risks which apply in relation to the use of derivatives. Derivatives may be used to provide protection for an investment or as a cheaper or more liquid alternative for an investment. However, should the Manager's expectations in employing such techniques and instruments be incorrect, a Fund may suffer a substantial loss, having an adverse effect on the net asset value of shares. Such instruments may cause greater fluctuations of the net asset value of the Fund concerned. Transactions in derivatives are used in the Funds for both efficient portfolio management and investment purposes. Derivatives exposure is managed within the investment limits set by the Manager to ensure that the use of derivatives does not materially alter the overall risk profile of a Fund.

Liquidity risk

The Funds may be affected by a decrease in market liquidity for the securities in which they invest, which may mean that the Funds may not be able to sell some securities at a fair price in a timely manner. In order to mitigate this risk, a substantial proportion of the Funds' assets consist of readily realisable assets.

Furthermore, Invesco monitors liquidity risk for each portfolio against its required minimum liquidity threshold. This includes holding a high enough proportion of assets that can be liquidated quickly and with a

Notes applicable to the financial statements of all Funds

4 Generic Risk Factors continued

Liquidity risk continued

limited impact on price, also depending on its actual or hypothetical redemption profile, investment strategy, regulatory framework or contractual obligations. This is done by implementing a monitoring framework focused on Liquidation Size and Liquidation Cost.

Liquidity results are monitored at Fund level on a daily basis including against internally defined limits.

Market price risk

The Funds are exposed to the risks normally associated with investment in stocks and shares such as general economic conditions, market events or the performance of underlying stocks. As such the prices of and the income generated by the Funds' securities may go down as well as up and an investor may not get back the full amount invested.

Adhering to investment guidelines and avoiding excessive exposure to one particular issuer can mitigate market risk.

Taking charges from capital

Where the investment objective of a Fund is to treat the generation of income as a higher priority than capital growth, or the generation of income and capital growth have equal priority, all or part of the ongoing charge as well as other fees and expenses of the Fund may be taken from capital instead of income. The Funds take such fees and expenses from capital in order to manage the level of income paid and/or available to Shareholders. This may result in capital erosion or may constrain capital growth.

Calculation methods of the Risk Exposure

Following the assessment of the investment policy of each Fund of the Company, Invesco Fund Managers Limited has decided to use Value at Risk ("VaR") for the assessment of the global exposure of each Fund.

Value-at-Risk ("VaR") is a statistical measurement. It intends to measure the maximum potential loss at a given confidence level (probability) over a specific time period under normal market conditions. All of the positions within the portfolio are taken into account for the VaR calculation, not just derivatives.

Absolute and Relative VaR are calculated daily using a VaR risk model based on a six years historical simulation methodology. This method for calculating VaR contains no standard distribution assumption and assumes that history repeats itself.

Under the relative VaR approach, the VaR of the Fund is compared to that of a benchmark or reference portfolio. With this approach, the choice of benchmark is important and hence the Manager will choose a leverage free benchmark with similar risks to the Fund.

The calculation standards used for the VaR model are in compliance with the provisions in box 15 of Committee of European Securities Regulators' ("CESR") Guidelines on Risk Measurement and the calculation of Global Exposure and Counterparty Risk for UCITS (Ref: 10-788) (CESR's Guidelines).

The Absolute VaR of a UK UCITS cannot be greater than 20% of its NAV. The Relative VaR of a UK UCITS cannot be more than two times the VaR of the reference portfolio. Invesco Fund Managers Limited monitors that the (VaR of the UK UCITS Scheme)/(2* VaR of the reference portfolio) is not greater than 100%.

The calculation of the Absolute and Relative VaR is carried out in accordance with the following parameters:

From 1 April 2023 to 31 July 2023:

- one-tailed confidence interval of 99%;
- holding period equivalent to one month (i.e. 20 business days);
- effective observation period (history) of risk factors of two years;
- daily calculation.

From 1 August 2023 to 31 March 2024:

- one-tailed confidence interval of 99%;
- holding period equivalent to one month (i.e. 20 business days);
- effective observation period (history) of risk factors of six years;
- time weighted/1 year half-life;
- daily calculation.

In line with box 25 of CESR's Guidelines, as the Funds use the VaR approach to monitor the global exposure, Invesco Fund Managers Limited calculates the leverage for each Fund on a daily basis, as the sum of the absolute value of the notionals of the derivatives used. With respect to financial derivative instruments which do not have a notional value attached to them, the calculation of the value is based upon the market

Notes applicable to the financial statements of all Funds

4 Generic Risk Factors continued

Calculation methods of the Risk Exposure continued

value of the equivalent position of the underlying asset that is attached to the financial derivative instrument and applied consistently and appropriately.

The average level of leverage figures provided below does not take into account any netting and hedging arrangements that the Funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purpose.

The table below details the VaR approach for each Fund and, for those Funds utilising the relative VaR methodology, it details the reference portfolio. The table also details the minimum, maximum and average daily VaR utilisation that occurred during the one year period ending 31 March 2024, as well as the daily average level of leverage for each Fund during the one year period ending 31 March 2024.

5 Investment Objective and Policy

The investment objective and policy of each Fund can be found on:

Invesco UK Equity Income Fund (UK)
Invesco UK Enhanced Index Fund (UK)

page 17 page 38

The Funds may also hold cash and near cash assets only to the extent that this may reasonably be regarded as necessary for the pursuit of the Fund's investment objective, to fund redemptions of shares in that Fund, for the efficient management of the Funds in accordance with its investment objective or for other purposes which may reasonably be regarded as ancillary to the investment objectives of the Funds. They may also borrow, providing such borrowing is on a temporary basis and does not exceed the limits laid down in the regulations.

6 Functional Currency

The Company's functional and presentational currency is Sterling. The financial statements are presented to the nearest $\mathfrak{L}'000$.

7 Bank Balances and Overdrafts

Bank balances and overdrafts are held by the Custodian, and are subject to the Custodian's variable credit and debit interest rates respectively.

8 Transactions and Balances with Related Parties

Invesco Fund Managers Limited (and its associates), as Manager, is a related party and acts as principal in respect of all transactions in the shares of the Company.

Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4, within each Fund. Management fee rebates are disclosed in note 2 and note 3 within each Fund. Amounts due at the end of the accounting year for Fund Management Fees are disclosed in note 10 within accrued expenses, within each Fund.

All issued and redeemed shares transacted with the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and balances due from and to the ACD are shown in notes 8 and 10 to the financial statements of each Fund.

Invesco Fund Managers Limited and its associates (including other authorised investment companies managed by Invesco Fund Managers Limited) held the following shareholdings in the Funds:

Investment report for the year

The Investment Objective and Policy of the Invesco UK Equity Income Fund (UK)

The Fund aims to achieve income and capital growth over the long term (5 years plus). The Fund invests at least 80% of its assets in shares or other equity related securities of companies incorporated, domiciled or carrying out the main part of their economic activity in the UK. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including private and unlisted equities and non-UK companies), money-market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for efficient portfolio management purposes only, to reduce risk, reduce costs and/or generate additional capital or income. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 31 March 2024.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.com/uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 21 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 21 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

This is a Comparator Benchmark. Given its geographic focus the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Investment report for the year

Strategy, review and outlook

The Fund returned 12.3% in the year ending March 2024. This placed the Fund in the first quartile of its peer group, the IA UK All Companies Sector, which returned 7.5%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

It was a positive year for UK equity markets despite disappointing GDP readings, as falling inflation and the belief that interest rates will start to fall in the second guarter of 2024 boosted UK equities.

It was a positive year for UK equity markets despite disappointing GDP readings, as falling inflation and the belief that interest rates will start to fall in the second quarter of 2024 boosted UK equities.

The Office for National Statistics (ONS) figures showed the UK fell into a recession at the end of 2023, as UK gross domestic product (GDP) fell by 0.3% in the final quarter of the year. This was following a 0.1% fall in the third quarter of 2023, with two consecutive quarters of contracting GDP being defined as a technical recession. However, the UK economy showed its resilience by returning to growth in January, as GDP rose 0.2% with growth primarily driven by the services sector.

UK inflation continued to fall in 2023, but then Office for National Statistics (ONS) figures showed UK inflation rose unexpectedly to 4% in December, up from 3.9% in November. It remained unchanged in January before falling to 3.4% in February, the lowest level since September 2021. This was a slightly larger fall than consensus estimates, with the Bank of England (BoE) forecasting inflation to continue its downward trend as a result of falling energy costs. Core inflation, which excludes energy and food prices, fell from 5.1% to 4.5% in February.

The Bank of England (BoE) continued to raise interest rates during 2023. The BoE raised interest rates by 0.25% in August, the 14th consecutive rise as interest rates rose to 5.25%. They were then left unchanged at the next five meetings, keeping interest rates at 5.25%, a 15-year high. The BoE now expects inflation to fall slightly below its 2% target in the second quarter of the year. Markets are pricing in three 0.25% interest rate cuts this year, which they expect to begin by June, as Governor Andrew Bailey said things were 'moving in the right direction'.

UK chancellor Jeremy Hunt presented a 'budget for long-term growth'. There were few surprises with many of the measures, including a reduction in national insurance contributions paid by workers, having been well trailed. The Office for Budget Responsibility forecasts the UK economy will expand by 0.8% in 2024.

UK wage growth continued to slow in the three months to January, as ONS data also showed that vacancies continued to decline. Average total pay grew at an annual rate of 5.6% (including bonuses) in the three months to January when compared to a year ago, but with the National Minimum Wage set to increase by 12.4% in April to £11.44, inflationary pressures may endure. The yield on UK 10-year bonds rose from 3.6% at the start of the year to just under 4% by the quarter end.

UK consumer confidence remained unchanged in March after a year of near-persistent increases, according to a survey by research group GfK. However, UK consumer confidence relating to their personal finances (a sub-index of its overall consumer confidence index), reached the highest level in more than two years.

The biggest contributors to Fund performance were CRH and Next. CRH reported strong full-year results while Next share price rose after full-year results that were in line with consensus estimates after multiple upgrades, whilst also sounding particularly optimistic on the outlook for the UK consumer. Cash flow remained strong as they plan to return around $\mathfrak{L}600$ million back to shareholders through dividends and share buybacks.

The biggest contributor to positive Fund performance at a sector level came from Financials, with Burford Capital contributing strongly following news of a favourable decision by a US court in relation to a long-running legal case against the Argentinian government. Barclays was a strong contributor following strong full-year results, pledging to return £10bn to shareholders in the form of share buybacks and dividends. Lancashire was a further strong contributor to performance along with Investment management firm Man, following strong full-year results showing continued net inflows with record assets under management.

The biggest detractor to Fund performance was CVS following an announcement by the UK Competition and Markets Authority that it has provisionally decided to launch a formal investigation into the veterinary market. Future was a further area of detraction following a trading update that was negatively received by markets.

Basic Materials was the worst performing sector for the Fund as specialist chemicals company Croda International and the Fund's holding in Anglo American detracted from performance.

The near-term global macroeconomic environment continues to give us some cause for concern around inflation and interest rates. Although inflation has moderated somewhat, labour markets in the UK continue to be relatively near full levels of employment, and the National Minimum Wage is set to increase by 12.4% in April 2024, which will add to inflationary pressures. As a result, we continue to expect that inflation will be stickier than many observers believe, and that in the medium to long term it will remain appreciably higher than prepandemic.

Investment report for the year

Strategy, review and outlook

Despite the caution engendered by macro-economic views, we remain optimistic at the medium to long-term outlook for UK equities. We expect an increased focus on cash generation in UK equities and the low starting point for valuation will combine to overcome inertia in relative performance.

We believe that over the next 10 years, in an environment of higher interest rates and higher inflation than we have experienced since the Global Financial Crisis, value as a factor will be more important. An environment that is different, calls for equity exposure that is different, and sector exposures in the UK are very different to other global equity markets. The FTSE All-Share Index offers low correlation to US markets, but still has scale, breadth, and depth of companies.

UK equities we believe continue to offer compelling exposure to a broad range of internationally orientated and cash generative companies, which in many cases trade at valuations below global peers.

UK equities offer exposure to a very different mix of sector weightings, and companies that are in many cases lowly valued relative to their global peers. Analysis of correlation in total returns shows that the FTSE All-share index is significantly less correlated with the S&P 500 index and MSCI Japan index, than is the MSCI Europe ex-UK index. For an asset allocator with significant equity exposure to the US, the UK therefore offers important diversification.

On 1 December 2023, the Ongoing Charge (Fund Management Fee) was reduced for the Accumulation shares, the Income shares, the Accumulation shares (No Trail), the Income shares (No Trail), the Z Accumulation shares and the Z Income shares. See Reduction in Ongoing Charge on page 2 for Details.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

M Accumulation shares and M Income shares were issued at 200p on 24 March 2023. The operating charges and direct transaction costs percentages figures disclosed have been annualised for the period ended 31 March 2024. For the purpose of calculating the change in net assets per share these figures are actual and have not been annualised.

5 Interest payable and similar charges	01.4.23 to 31.3.24 £'000	01.4.22 to 31.3.23 £'000
Bank interest	-	25

Notes to the financial statements

6 Taxation	01.4.23 to 31.3.24 £'000	01.4.22 to 31.3.23 £'000
a) Analysis of charge for the year		
Overseas tax	153	217
Total tax charge	153	217

There is no corporation tax charge for the year (2023 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2023 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

	01.4.23 to 31.3.24 £′000	01.4.22 to 31.3.23 £'000
Net revenue before taxation	24,563	26,101
Corporation tax at 20% (2023 - 20%)	4,913	5,220
Effects of: Movement in unrecognised tax losses Overseas tax Revenue not subject to tax	2,311 153 (7,224)	2,798 217 (8,018)
Total tax charge	153	217

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Fund had surplus management expenses of £1,339,200,000 (2023 - £1,327,645,000). It is unlikely that the Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £267,840,000 (2023 - £265,529,000) has not been recognised.

7 Distributions	01.4.23 to 31.3.24 £'000	01.4.22 to 31.3.23 £'000
Accumulations and distributions paid 30 November 2023 Accumulations and distributions paid 31 May 2024	21,991 13,635	24,559 14,625
Amounts deducted on redemption of shares Amounts received on issue of shares	35,626 1,229 (178)	39,184 1,291 (164)
	36,677	40,311
The distributable amount has been calculated as follows:		
Net revenue after taxation	24,410	25,884
Equalisation on conversions	-	1
Fund Management Fee taken to capital	12,267	14,426
	36,677	40,311
8 Debtors	31.3.24 £'000	31.3.23 £'000
Accrued revenue	4,427	3,614
Amounts receivable for issue of shares	289	225
Overseas tax recoverable	511	241
Sales awaiting settlement	-	1,638
	5,227	5,718
9 Cash and bank balances	31.3.24 £'000	31.3.23 £'000
Cash and bank balances	3,188	4,541

Notes to the financial statements

10 Other creditors	31.3.24 £′000	31.3.23 £'000
Accrued expenses	1,003	1,128
Amounts payable for redemption of shares	2,701	2,079
Purchases awaiting settlement	-	2,008
	3,704	5,215

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2023 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 15. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £53,029,000 (2023 - £62,595,000) and amounts paid in respect of purchases in the accounting year is £55,241,000 (2023 - £51,204,000). Amounts received in respect of dividends in the accounting year is £69,000 (2023 - £36,000). Amounts due at the end of the accounting year for Fund Management Fees of £1,003,000 (2023 - £1,128,000) are disclosed in note 10 within accrued expenses.

13 Risk factors

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 12 to 14.

The specific risk factors relating to the Fund are disclosed more fully in the risk profile section beginning on page 03.

a) Counterparty risk

The Fund had zero positive counterparty exposure to OTC derivatives at the balance sheet date (2023 - Nil). The counterparty OTC exposure is the positive exposure of cleared and non-cleared OTC derivatives, including FX forwards, to the different counterparties used by the portfolio, measured on a marked-to-market basis net of applicable legally enforceable netting and collateral.

b) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.3.24		
Level 1: Quoted prices	1,021,658	-
Level 2: Observable market data	23,950	-
Level 3: Unobservable data	1,262	-
	1,046,870	-
31.3.23		
Level 1: Quoted prices	1,052,738	-
Level 2: Observable market data	20,486	-
Level 3: Unobservable data	_	-
	1,073,224	_

The majority of financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 relate to daily priced open-ended funds. These instruments are valued at their fair value as at noon of the last business day prior to the Fund's year end. Instruments classified as level 3: Unobservable data mainly comprise non-market traded and unquoted securities.

Notes to the financial statements

13 Risk factors continued

b) Valuation of financial instruments continued

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value. The Manager has used several valuation methodologies as prescribed in the International Private Equity and Venture Capital valuation guidelines to arrive at their best estimate of fair value. Valuation techniques used by the Manager are set out in Accounting Policies note 1 (i). The fair value is established by using measures of value such as:

- Price of recent transactions Management determine the fair value based on the price of recent transactions made by management or a third party.
- Milestone analysis Management assess the investment company's progress against milestones expected
 at the time of investment in order to determine whether an adjustment is required to the transaction
 price to determine fair value.
- Multiples Earnings or Revenue multiples are selected from comparable public companies based on geographic location, industry, size, risk profile, earnings growth prospects, target markets and other factors that management consider reasonable. A discount for lack of liquidity may then be applied to represent the adjustment to comparable company multiples to reflect the illiquidity of the portfolio companies relative to the comparable peer group. Management determines the discount for lack of liquidity based on its judgement, after considering market liquidity conditions and company specific factors such as the development stage of the portfolio company. One of the most common forms of multiples used for cash generating companies are EV/EBITDA multiples as EBITDA is generally seen to represent a good proxy for free cash flow. These are applied where appropriate based on the development of underlying portfolio companies but other multiples such as EV/Revenue may also be considered.
- Net assets Management determine the fair value based on the net asset value of the underlying portfolio company

In applying the above valuation techniques in arriving at the fair value the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company;
- Consideration of seniority of the securities held and terms of repayment upon realisation;

Transaction

- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding;
- Consideration of any outstanding payments to be made by Invesco; and
- Industry statistics or events (such as mergers, acquisitions and the risk of default).

14 Portfolio transaction costs

for the year 1 April 2023 to 31 March 2024

Purchases (excluding derivatives)	Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	58,828	40	0.07	218	0.37
Total purchases	58,828	40		218	
Total purchases including transaction costs	59,086				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £′000	%
Equity instruments Collective investment schemes	174,650 47	93 -	0.05	- -	-
Total sales	174,697	93		-	
Total sales net of transaction costs	174,604				
Derivative transaction costs		-		-	
Total transaction costs		133		218	
Total transaction costs as a % of average net assets		0.01%		0.02%	

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 April 2022 to 31 March 2023

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	83,465	41	0.05	311	0.37
Total purchases	83,465	41		311	
Total purchases including transaction costs	83,817				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	198,398	105	0.05	1	0.00
Total sales	198,398	105		1	
Total sales net of transaction costs	198,292				
Derivative transaction costs		-		-	
Total transaction costs		146		312	
Total transaction costs as a % of average net assets		0.01%	0.03%		

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.24% (2023 - 0.19%).

Group 1: shares purchased prior to 1 October 2023

Group 2: shares purchased on or after 1 October 2023

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Investment report for the year

The Investment Objective and Policy of the Invesco UK Enhanced Index Fund (UK)

The Fund aims to achieve capital growth and outperform the FTSE All Share ex Investment Trusts Index net of fees (the "Benchmark") over a rolling 5 year period. The Fund invests at least 80% of its assets in shares or other equity related securities of companies incorporated, domiciled or carrying out the main part of their economic activity in the UK. There is no guarantee that the Fund will achieve its target and an investor may not get back the amount invested. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including non-UK companies), moneymarket instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for efficient portfolio management purposes only, to reduce risk, reduce costs and/or generate additional capital or income. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 31 March 2024.

Performance				Percer	ntage growth

Invesco UK Enhanced Index Fund (UK) (Z Accumulation shares) FTSE All-Share ex Investment Trusts	-20.3	27.0	14.1	3.9	11.3
Index (Net Total Return) ¹	-19.0	25.5	13.8	3.9	8.4

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.com/uk or by contacting us.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 40 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 40 is based on the close of business bid price. FTSE All-Share ex Investment Trusts Index (Net Total Return)¹ data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

This is a Target Benchmark. The Fund aims to outperform the Benchmark net of fees over a rolling 5 year period. The Fund has a high correlation to the Benchmark and has similar risk characteristics aiming for a tracking error target of 1.5%. As a result, this will limit the extent to which the Fund's performance will deviate from the Benchmark. The Fund's performance can be measured against the Benchmark.

Investment report for the year

Strategy, review and outlook

The Fund increased by 11.3% in the year ending March 2024 compared to a 8.4% increase in the FTSE All-Share ex Investment Trusts Index (Net Total Return).

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. FTSE All-Share ex Investment Trusts Index (Net Total Return) data source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

Throughout 2023, the UK equity market experienced fluctuations due to shifts in inflation, interest rate adjustments by the Bank of England and varying economic data. Initially, the market struggled with inflationary pressures, leading to increased interest rates to cool the economy. Despite these challenges, there were periods of recovery influenced by positive corporate earnings and a temporary easing of inflation, which provided some uplift for the market.

As the year progressed, the fourth quarter showed optimism with a notable decrease in inflation and steady interest rates, prompting discussions of potential future rate cuts. Entering 2024, the UK economy showed resilience with signs of emergence from a prevailing recession, supported by falling inflation and modest GDP growth.

The Fund's performance is generated through a quantitative bottom-up multi-factor investment process based on three factors: Momentum, Quality and Value. Relative risk is controlled with the help of an optimiser, an analysis tool that recommends trades to maximise portfolio exposure to the selected stocks within pre-determined risk/return parameters. In terms of portfolio construction, we tightly constrain the risk taken in sectors and industries.

Looking at the performance attribution of the Fund, we saw that all IQS factors added to the Fund's performance over the past year, with Momentum and Value being the main contributors to active performance. Quality contributed slightly positively during the period.

Regarding changes in the portfolio, we recently added shares of Mondi and National Grid due to their high Momentum and Quality scores. We also added Persimmon to the portfolio, due to its high Quality and Value scores. Conversely, we sold shares of BAE Systems, HSBC and Reckitt Benckiser due to their deteriorating factor scores.

Our diversified and disciplined approach to stock selection using our Multi-Factor Model favours companies that, in our view, are attractively valued, have good earnings and price momentum and have management that acts in the interest of shareholders. The team is committed to adding value for clients through the systematic application of factor investing. Disciplined portfolio construction and cost-effective trading are integral to our investment process, which we believe should help us preserve value added through stock selection and reduce the probability of significant underperformance.

Georg Elsäesser and Michael Rosentritt, Fund Managers

M Accumulation shares and M Income shares were issued at 200p on 12 August 2022. The operating charges and direct transaction costs percentages figures disclosed have been annualised for the period ended 31 March 2024. For the purpose of calculating the change in net assets per share these figures are actual and have not been annualised.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

O Accumulation shares and O Income shares were issued at 1,000p on 13 March 2024. The operating charges and direct transaction costs percentages figures disclosed have been annualised for the period ended 31 March 2024. For the purpose of calculating the change in net assets per share these figures are actual and have not been annualised.

Notes to the financial statements

6 Taxation	01.4.23 to 31.3.24 £'000	01.4.22 to 31.3.23 £'000
a) Analysis of charge for the year		
Overseas tax	55	28
Total tax charge	55	28

There is no corporation tax charge for the year (2023 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2023 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

	01.4.23 to 31.3.24 £'000	01.4.22 to 31.3.23 £'000
Net revenue before taxation	32,273	28,587
Corporation tax at 20% (2023 - 20%)	6,455	5,717
Effects of: Movement in unrecognised tax losses Overseas tax Revenue not subject to tax	27 55 (6,482)	93 28 (5,810)
Total tax charge	55	28

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Fund had surplus management expenses of £5,381,000 (2023 - £5,245,000). It is unlikely that the Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £1,076,000 (2023 - £1,049,000) has not been recognised.

7 Distributions	01.4.23 to 31.3.24 £'000	01.4.22 to 31.3.23 £'000
Accumulations and distributions paid 30 November 2023 Accumulations and distributions paid 31 May 2024	17,359 14,047	16,315 13,393
Amounts deducted on redemption of shares Amounts received on issue of shares	31,406 4,064 (3,252)	29,708 1,193 (2,342)
The distributable amount has been calculated as follows:	32,218	28,559
Net revenue after taxation	32,218	28,559
	32,218	28,559
8 Debtors	31.3.24 £'000	31.3.23 £'000
Accrued revenue Amounts receivable for issue of shares Overseas tax recoverable	5,504 2,796 194	5,672 3,729 150
	8,494	9,551
9 Cash and bank balances	31.3.24 £'000	31.3.23 £'000
Amount held at futures clearing houses and brokers Cash and bank balances	246 2,829	2,411 3,658
	3,075	6,069

Notes to the financial statements

10 Other creditors	31.3.24 £'000	31.3.23 £′000
Accrued expenses	171	161
Amounts payable for redemption of shares	3,230	1,484
	3,401	1,645

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2023 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 15. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £326,596,000 (2023 - £194,769,000) and amounts paid in respect of purchases in the accounting year is £293,019,000 (2023 - £238,855,000). Amounts received in respect of dividends in the accounting year is £1,622,000 (2023 - £465,000). Amounts due at the end of the accounting year for Fund Management Fees of £171,000 (2023 - £161,000) are disclosed in note 10 within accrued expenses.

13 Risk factors

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 12 to 14.

The specific risk factors relating to the Fund are disclosed more fully in the risk profile section beginning on page 03.

a) Counterparty risk

The Fund had zero positive counterparty exposure to OTC derivatives at the balance sheet date (2023 - Nil). The counterparty OTC exposure is the positive exposure of cleared and non-cleared OTC derivatives, including FX forwards, to the different counterparties used by the portfolio, measured on a marked-to-market basis net of applicable legally enforceable netting and collateral.

b) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.3.24		
Level 1: Quoted prices	855,600	_
Level 2: Observable market data	21,167	_
Level 3: Unobservable data	· -	-
	876,767	-
31.3.23		
Level 1: Quoted prices	738,352	-
Level 2: Observable market data	54,744	-
Level 3: Unobservable data	-	-
	793,096	_

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 relate to daily priced open-ended funds. These instruments are valued at their fair value as at noon of the last business day prior to the Fund's year end.

Invesco UK Enhanced Index Fund (UK) Notes to the financial statements

14 Portfolio transaction costs for the year 1 April 2023 to 31 March 2024					
Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%

Total transaction costs as a % of average net assets		0.04%		0.24%	

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 April 2022 to 31 March 2023

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	393,832	183	0.05	1,916	0.49
Total purchases	393,832	183		1,916	
Total purchases including transaction costs	395,931				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	388,450	186	0.05	1	0.00
Total sales	388,450	186		1	
Total sales net of transaction costs	388,263				
Derivative transaction costs		4		-	
Total transaction costs		373		1,917	
Total transaction costs as a % of average net assets		0.05%		0.27%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.06% (2023 - 0.06%).

Group 1: shares purchased prior to 1 October 2023

Group 2: shares purchased on or after 1 October 2023

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

¹ Share classes launched 13 March 2024.

Regulatory statements

Statement of the Manager's Responsibilities

The Collective Investment Schemes sourcebook ("COLL") requires the Manager to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Company as at the end of the year and of the net revenue or expense and the net capital gains or losses on the scheme property of the Company for the year then ended. In preparing the financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future;
- comply with the disclosure requirements of the Statement of Recommended Practice relating to Financial Statements of Authorised Funds;
- follow applicable accounting standards; and
- keep proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements.

The Manager is responsible for the management of the Company in accordance with the Prospectus and the OEIC Regulations.

The Manager is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of Depositary's Responsibilities

The Depositary is responsible for the safekeeping of all the property of the Company which is entrusted to it and ensuring proper registration of tangible moveable property, and for the collection of income arising from all such scheme property. It is the duty of the Depositary to take reasonable care to ensure that the Company is managed and operated by the Manager in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook ("the Sourcebook"), the Open-Ended Investment Companies Regulations 2001 (SI 2001/ 1228) (the "OEIC Regulations"), the Company's Instrument of Incorporation, and the Prospectus, as appropriate, concerning: the pricing of and dealing in Shares in the Company; the application of income of the Company; and the investment portfolio and borrowing activities of the Company.

Depositary's Report to Shareholders

Having carried out procedures and enquiries considered duly necessary to discharge our responsibilities as Depositary of the Company, based on information and explanations provided to us, we believe that, in all material respects, the Company, acting through the Manager:

- (i) has carried out the issue, sale, redemption and cancellation and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Sourcebook, and where applicable, the OEIC regulations, the Company's Instrument of Incorporation, and the Prospectus;
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company; and
- (iii) has otherwise, ensured the proper operation of the Company.

Citibank UK Limited London 24 June 2024

Independent auditors' report to the Shareholders of Invesco UK 2 Investment Series

Report on the audit of the financial statements Opinion

In our opinion, the financial statements of Invesco UK 2 Investment Series (the "Company"):

- give a true and fair view of the financial position of the Company and each of the sub-funds as at 31 March 2024 and of the net revenue and the net capital gains on the scheme property of the Company and each of the sub-funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law), the Statement of Recommended Practice for UK Authorised Funds, the Collective Investment Schemes sourcebook and the Instrument of Incorporation.

Invesco UK 2 Investment Series is an Open Ended Investment Company ("OEIC") with two sub-funds. The financial statements of the Company comprise the financial statements of each of the sub-funds. We have audited the financial statements, included within the Annual Report Including Long Form Financial Statements (the "Annual Report"), which comprise: the balance sheets as at 31 March 2024; the statements of total return and the statements of change in net assets attributable to shareholders for the year then ended; the distribution tables; and the notes to the financial statements, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's or any sub-funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the Authorised Corporate Director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's or any sub-funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the Authorised Corporate Director with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Authorised Corporate Director is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Based on our work undertaken in the course of the audit, the Collective Investment Schemes sourcebook requires us also to report certain opinions as described below.

Authorised Corporate Director's Report

In our opinion, the information given in the Report of the Authorised Corporate Director for the financial year for which the financial statements are prepared is consistent with the financial statements.

Independent auditors' report to the Shareholders of Invesco UK 2 Investment Series continued

Responsibilities for the financial statements and the audit

Responsibilities of the Authorised Corporate Director for the financial statements

As explained more fully in the Statement of the Manager's Responsibilities, the Authorised Corporate Director is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Authorised Corporate Director is also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Authorised Corporate Director is responsible for assessing the Company's and each of the sub-fund's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Authorised Corporate Director either intends to wind up or terminate the Company or individual subfund, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of noncompliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company/ industry, we identified that the principal risks of noncompliance with laws and regulations related to breaches of the Collective Investment Schemes sourcebook, and we considered the extent to which non-compliance might have a material effect on the financial statements, in particular those parts of the sourcebook which may directly impact on the determination of amounts and disclosures in the financial statements. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to posting inappropriate journal entries to increase revenue or to increase the net asset value of the Company or the sub-funds. Audit procedures performed included:

- Discussions with the Authorised Corporate Director, including consideration of known or suspected instances of non-compliance with laws and regulation and fraud;
- Reviewing relevant meeting minutes, including those of the Authorised Corporate Director's board of directors;
- Identifying and testing journal entries, specifically any journals posted as part of the financial year end close process; and
- Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's Shareholders as a body in accordance with paragraph 4.5.12 of the Collective Investment Schemes sourcebook as required by paragraph 67(2) of the Open-Ended Investment Companies Regulations 2001 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting Opinion on matter required by the Collective Investment Schemes sourcebook

In our opinion, we have obtained all the information and explanations we consider necessary for the purposes of the audit.

Collective Investment Schemes sourcebook exception reporting

Under the Collective Investment Schemes sourcebook we are also required to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.
