* Non-executive Director.

About the Fund

BlackRock UK Smaller Companies Fund (the “Fund”) is a UCITS scheme under the COLL Sourcebook. The Fund was established on 13 March 1973. The Fund was previously known as Rowan Securities Fund until 5 May 1987, when the investment objective was changed and the name was changed to Mercury UK Smaller Companies Fund. On 30 September 2000 the Fund changed its name to Merrill Lynch UK Smaller Companies Fund. The Fund changed its investment objective on 1 October 2006. The Fund adopted its present name with effect from 28 April 2008. The Fund's FCA product reference number is 108428.

Assessment of value

The FCA requires UK fund managers to complete an annual assessment of whether their UK authorised funds provide value for investors. Our assessment considers fund and unit class level performance, costs and charges, and service quality, concluding with an evaluation of whether investors receive value. BlackRock has fulfilled its obligations for the reporting requirement, including assessing relevant charges, and published the annual assessment of value statements on the BlackRock website on 31 October 2022 in a composite report for all funds managed by BlackRock Fund Managers Limited subject to these requirements. The next annual assessment is due for publication by the end of October 2023.

Fund Manager

As at 31 August 2023, the fund manager was Roland Arnold.

Significant Events

Changes in the Directors of the Manager

K Henry was appointed as a Director effective 3 March 2023.

S Corrigan resigned as a Director effective 2 May 2023.

S Sabin was appointed as a Director effective 18 August 2023.

Investment Manager's Report

for the six months ended 31 August 2023

Investment Objective

The aim of the Fund is to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) (gross of fees) over the long term (5 or more consecutive years beginning at the point of investment) by investing in shares of smaller companies incorporated or listed in the UK.

Comparator benchmark	Investment management approach
Numis Smaller Companies plus AIM ex-Investment Trusts Index	Active

Performance Summary

The following table compares the Fund's realised performance against the performance of the comparator benchmark during the financial period ended 31 August 2023.

	Fund return %	Comparator benchmark %
Class D Accumulation Units	(7.36)	(6.94)

Further information on the performance measures and calculation methodologies used is detailed below:

- Fund returns shown, calculated net of fees, are the performance returns for the primary unit class of the Fund which has been selected as a representative unit class. The primary unit class represents the class of unit which is the highest charging unit class, free of any commissions or rebates, and is freely available. Performance returns for any other unit class can be made available on request.
- Fund returns are based on the NAV per unit as at close of business for reporting purposes only, for the purpose of fair comparison and presentation with the comparator benchmark close of business valuation point.
- Due to the Financial Reporting Standard 102 ("FRS 102") and the Statement of Recommended Practice for Authorised Funds ("SORP") requirements, including the accounting policy for the valuation point at 12 noon, there may be differences between the NAV per unit as recorded in the financial statements and the NAV per unit calculated in accordance with the Prospectus.

All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and the return of your initial investment amount cannot be guaranteed. Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product.

Global Economic Overview

Global equities, as represented by the MSCI All Country World Index ("ACWI"), returned 5.37% (in GBP terms) during the six months ended 31 August 2023. Equities recovered from pessimism induced by high inflation (the rate of increase in the prices of goods and services) and rising interest rates, although inflation has begun to slow down in many parts of the world. Indicators of continued resilience, such as robust consumer spending and tight labour markets, tempered investors' concerns about slowing global economic growth.

Investment Manager's Report continued

The US economy grew strongly in the first six months of 2023 as both consumer and government spending rose, and consumers showed signs of growth in continued spending in July and August 2023. While several prominent regional banks failed during the period, prompt government action limited the impact on the wider economy. The US jobs market continued to show strength, and unemployment remained at historically low levels. In Japan, the economy accelerated during the first six months of 2023, and the government lifted strict border controls although exports declined near the end of the period under review. The UK economy was nearly flat in the first six months of 2023 before contracting in July 2023 amid weakness in exports as global trade cooled. Modest growth resumed in the Eurozone in the first six months of 2023, but high interest rates continued to weigh on the region's economy and retail sales fell in July 2023. UBS's takeover of the failed Credit Suisse at the behest of regulators stabilised markets.

Most emerging market economies continued to expand, although fluctuating commodity prices and the higher interest rate environment presented significant economic challenges. The Chinese economy grew at a slow pace relative to the country's historical rate while falling consumer prices raised concerns about deflation (general decline of the price level of goods and services).

The world's largest central banks continued to implement measures aimed at monetary policy tightening, although the pace of tightening slowed in some regions. The US Federal Reserve ("the Fed") raised interest rates three times, pausing once before resuming with another increase at its July 2023 meeting. However, this represented a significantly slower pace of interest rate increases compared to the sharp tightening seen during the second half of 2022 from the Fed. The Fed also continued to reduce some of the accumulated bond holdings on its balance sheet.

The Bank of England ("BoE") raised interest rates four times, as inflation remained high despite showing some signs of easing. The European Central Bank ("ECB") also increased interest rates at each of its four meetings in an effort to control rising prices in the Eurozone. Furthermore, the ECB began to reduce the size of its balance sheet in March 2023 by allowing some of its outstanding bonds to mature without reinvestment.

Global equity performance was positive overall, as inflationary pressure eased and the global economy continued to grow despite slowdown in some regions. US stocks surged as the Fed tightening slowed and innovations in the technology sector drove significant gains. European stocks performed well as tourism rebounded strongly, supporting consumer spending. Meanwhile, Asian stocks gained as Japan's economy picked up and investor interest in semiconductor companies surged. Equities in emerging markets also gained, helped by the slowing pace of interest rate increases.

Global bond prices (which move inversely to yields) rose slightly overall, as moderating inflation led investors to anticipate an end to the current monetary policy tightening cycle. US treasury prices rose fractionally, sustained by the changing economic environment, as well as the failure of several US banks and subsequent government intervention. UK gilt prices declined slightly, as large borrowing requirements and persistent inflation raised concerns among investors. European government bonds gained slightly, while Japanese government bond prices were volatile, driven by periodic substantial purchases from The Bank of Japan to keep yields within its yield cap. Global corporate bond prices advanced as continued resilience in the global economy drove investor optimism and both high-yield and investment-grade bonds gained.

In the commodities markets, Brent crude oil prices rose moderately as several large oil producing and exporting countries cut production levels. European natural gas prices remained steady, having retreated significantly from the highs following Russia's invasion of Ukraine. Gold prices rose amid the slowing pace of Fed interest rate increases and elevated inflation.

Investment Manager's Report continued

In the foreign exchange markets, the US dollar performance was mixed against other global currencies. The euro and sterling appreciated relative to the US dollar, while the Japanese yen and Chinese yuan declined. Continued interest rate increases from the ECB and BoE, even as the Fed slowed its pace of interest rate hikes, drove the increase in the relative value of the euro and sterling.

Fund Performance Review and Activity

Over the six month period to 31 August 2023, the Fund's performance return was (7.36%) and the active return was (0.42%), underperforming its comparator benchmark which returned (6.94%) (active return is the difference between the Fund's return and the comparator benchmark return).

With growing concerns around the outlook for the UK economy and the challenge in its fight against persistent inflation, notably sticky services inflation as a result of the tight labour market, small and mid-caps continued to underperform. UK GDP growth showed the economy grew 0.2% during the second quarter, which was slightly stronger than the Bank of England forecast of 0.1%, and an acceleration compared to the prior two quarters.

The Fund has underperformed its benchmark during the period. Security selection within consumer discretionary detracted the most, while security selection within technology contributed to relative performance.

During the six month period the following were the largest contributors to and detractors from the Fund's return relative to the comparator benchmark:

Largest Contributors		Largest Detractors	
Stock	Effect on Fund return	Stock	Effect on Fund return
4imprint [#]	0.60%	Watches Of Switzerland [#]	(0.60%)
Hill & Smith [#]	0.42%	Aston Martin Lagonda Global [^]	(0.55%)
Cvs [#]	0.40%	Burford Capital [^]	(0.44%)
Baltic Classifieds [#]	0.39%	On The Beach [#]	(0.38%)
Numis [#]	0.33%	Carnival [^]	(0.33%)

[#] Overweight position - holds more exposure than the comparator benchmark.

[^] Underweight position - holds less exposure than the comparator benchmark.

Watches of Switzerland ("WOSG") was the top detractor from performance during the period. Shares have been weak due to market concerns that demand would deteriorate. Most recently the share price fell after the announcement of Rolex acquiring Bucherer (a privately held luxury watch retailer and competitor of WOSG). The team still has conviction in the position, but position size has been reduced because there is a greater risk.

4imprint was the top contributor to relative performance during the period. 4imprint reported better than expected performance in their half year results and raise full year guidance. The company highlighted record levels of demand with order growth of 18% year on year and favourable returns on marketing spend.

Investment Manager's Report continued

The following table details the significant active positions, where the Fund was overweight (held more exposure than the comparator benchmark) and underweight (held less exposure than the comparator benchmark), at 31 August 2023 and 28 February 2023:

Top overweight positions			
31 August 2023		28 February 2023	
Sector	Active Weighting	Sector	Active Weighting
Industrials	8.02%	Industrials	7.75%
Technology	4.05%	Consumer Discretionary	7.36%
Consumer Discretionary	3.82%	Telecommunications	2.14%

Top underweight positions			
31 August 2023		28 February 2023	
Sector	Active Weighting	Sector	Active Weighting
Financials	(7.05%)	Financials	(5.98%)
Consumer Staples	(4.19%)	Consumer Staples	(4.21%)
Real Estate	(1.97%)	Real Estate	(2.87%)

Where the Fund is underweight to a sector, the return from such sector will have an opposite effect on the Fund's active return. This may result in a sector being listed as a contributor/detractor but not listed on the Fund's Portfolio Statement.

The team has reduced the exposure within the energy sector, by selling Gulf Keystone Petroleum, Jadestone Energy and Longboat Energy. We purchased a new holding in Senior to gain exposure to the aerospace recovery.

Notes to Financial Statements (unaudited)

for the six months ended 31 August 2023

Accounting Policies

The financial statements have been prepared in accordance with United Kingdom Generally Accepted Accounting Practice ("UK GAAP") and the Statement of Recommended Practice for Authorised Funds (the "SORP") issued by the Investment Management Association (now known as the Investment Association) in May 2014 and amended in June 2017.

The accounting policies applied are consistent with those of the financial statements for the year ended 28 February 2023 and are described in those annual financial statements.

Supplementary Information

Efficient Portfolio Management Techniques

The Manager may, on behalf of the Fund and subject to the conditions and within the limits laid down by the FCA, the Prospectus, as amended from time to time, and the ESMA Guidelines (as adopted by the FCA), employ techniques and instruments relating to transferable securities. These include repurchases/reverse repurchase transactions ("repo transactions") and securities lending, provided that such techniques and instruments are used for efficient portfolio management purposes.

Securities Lending

Securities lending transactions entered into by the Fund are subject to a written legal agreement between the Fund and the Stock Lending Agent, BlackRock Advisors (UK) Limited, a related party to the Fund, and separately between the Stock Lending Agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is transferred under a title transfer arrangement and is delivered to and held in an account with a tri-party collateral manager in the name of The Bank of New York Mellon (International) Limited ("the Trustee") on behalf of the Fund. Collateral received is segregated from the assets belonging to the Fund's Trustee or the Stock Lending Agent.

The following table details the value of securities on loan as a proportion of the Fund's total lendable assets and Net Asset Value (NAV) as at 31 August 2023 and the income earned for the period ended 31 August 2023. Total lendable assets represents the aggregate value of assets forming part of the Fund's securities lending programme. This excludes any assets held by the Fund that are not considered lendable due to any market, regulatory, investment or other restriction.

Securities on loan			
% of lendable assets		% of NAV	Income earned £000's
0.13		0.13	1

The total income earned from securities lending transactions is split between the relevant Fund and the Stock Lending Agent. The Fund receives 62.5% while the Stock Lending Agent receives 37.5% of such income, with all operational costs borne out of the Stock Lending Agent's share.

The following table details the value of securities on loan (individually identified in the Fund's portfolio statement) and associated collateral received, analysed by counterparty as at 31 August 2023.

Counterparty	Counterparty's country of establishment	Securities Lending	
		Amount on loan	Collateral received
		£000's	£000's
BNP Paribas	France	347	400
HSBC Bank	UK	164	189
Total		511	589

All securities on loan have an open maturity tenor as they are callable or terminable on a daily basis.

Supplementary Information continued

Collateral

The Fund engages in activities which may require collateral to be provided to a counterparty ("collateral posted") or may hold collateral received ("collateral received") from a counterparty.

The following table provides an analysis by currency of the underlying cash and non-cash collateral received/posted by way of title transfer collateral arrangement by the Fund, in respect of securities lending transactions, as at 31 August 2023.

Currency	Cash collateral received	Cash collateral posted	Non-cash collateral received	Non-cash collateral posted
	£000's	£000's	£000's	£000's
Securities lending transactions				
AUD	–	–	1	–
CNY	–	–	77	–
EUR	–	–	4	–
GBP	–	–	33	–
HKD	–	–	4	–
JPY	–	–	43	–
NOK	–	–	43	–
SGD	–	–	1	–
USD	–	–	383	–
Total	–	–	589	–

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions cannot be sold, re-invested or pledged.

The following table provides an analysis of the type, quality and maturity tenor of non-cash collateral received/posted by the Fund by way of title transfer collateral arrangement in respect of securities lending transactions, as at 31 August 2023.

Collateral type and quality	Maturity Tenor						Open transactions	Total
	1 - 7 days	8 - 30 days	31 - 90 days	91 - 365 days	More than 365 days			
	£000's	£000's	£000's	£000's	£000's	£000's		
Collateral received - securities lending								
Fixed income								
Investment grade	–	5	3	–	203	–	211	
Equities								
Recognised equity index	–	–	–	–	–	371	371	
ETFs								
Non-UCITS	–	–	–	–	–	7	7	
Total	–	5	3	–	203	378	589	

Supplementary Information continued

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received as collateral is based on the respective contractual maturity date, while for equity securities and ETFs received as collateral are presented as open transactions as they are not subject to a contractual maturity date.

As at 31 August 2023, all non-cash collateral received by the Fund in respect of securities lending transactions is held by the Fund's Trustee (or through its delegates).

The following table lists the top ten issuers (or all the issuers if less than ten) by value of non-cash collateral received by the Fund by way of the title transfer collateral arrangement across securities lending transactions as at 31 August 2023.

Issuer	Value £000's	% of the Fund's NAV
United States of America (Government)	178	0.05
Tencent Holdings Ltd	45	0.01
Alibaba Group Holding Ltd	43	0.01
United Kingdom of Great Britain and Northern Ireland (Government)	33	0.01
Equinor ASA	27	0.01
Amazon.com Inc	24	0.01
Kuaishou Technology	22	0.01
Recruit Holdings Co Ltd	18	0.01
Tokyo Electron Ltd	18	0.01
Philip Morris International Inc	17	0.01
Other issuers	164	0.01
Total	589	0.15

About us

BlackRock is a premier provider of asset management, risk management, and advisory services to institutional, intermediary, and individual clients worldwide. As of 30 September 2023, the firm manages £7.18 trillion across asset classes in separate accounts, mutual funds, other pooled investment vehicles, and the industry-leading iShares® exchange-traded funds.

Through BlackRock Solutions®, the firm offers risk management and advisory services that combine capital markets expertise with proprietary-developed analytics, systems, and technology.

BlackRock serves clients in North and South America, Europe, Asia, Australia, Africa, and the Middle East. Headquartered in New York, the firm maintains offices in over 38 countries around the world.
