Company Information

General information

Schroder Investment Fund Company (SIFCo or the Company) is an umbrella Company comprising fifteen sub funds which have their own investment objectives and policies. As at 30 June 2022 the Company had the following sub funds:

Schroder UK Opportunities Fund¹

Schroder UK Dynamic Smaller Companies Fund

Schroder Sterling Corporate Bond Fund

Schroder European Recovery Fund

Schroder Sustainable UK Equity Fund

Schroder UK Alpha Income Fund Schroder Strategic Credit Fund

Schroder European Sustainable Equity Fund

Schroder Global Recovery Fund

Schroder Multi-Asset Total Return Fund

Schroder India Equity Fund

Schroder Islamic Global Equity Fund

Schroder UK-Listed Equity Income Maximiser Fund

Schroder Global Energy Transition Fund

Schroder Global Sustainable Growth Fund

1 Schroder UK Opportunities Fund merged into Schroder UK Alpha Plus Fund on 2 March 2022 and has commenced winding up.

Principal activities

The Company's principal activity is to carry on business as an Open Ended Investment Company. The Company is structured as an umbrella Company and different sub funds may be established by the Authorised Corporate Director from time to time with the agreement of the Depositary and approval from the Financial Conduct Authority.

The sub funds are operated separately and the assets of each sub fund are managed in accordance with the investment objective and policy applicable to that sub fund.

Liabilities of the Company

The sub funds are segregated portfolios of assets and, accordingly, the assets of each sub fund belong exclusively to that sub fund and shall not be used to discharge directly or indirectly the liabilities of, or claims against, any other person or body, including the Company, or any other sub fund, and shall not be available for any such purpose. Subject to the above, each sub fund will be charged with the liabilities, expenses, costs and charges attributable to that sub fund and within each sub fund charges will be allocated as far as possible according to the net asset value of that particular share class. Any assets, liabilities, expenses, costs or charges not attributable to a particular sub fund may be allocated by the Authorised Corporate Director in a manner which it believes is fair to the shareholders generally. This will normally be pro rata to the net asset value of the relevant sub funds.

Shareholders are not liable for the debts of the Company.

Shareholders are not liable to make any further payments to the Company after they have paid the purchase price of the share.

Significant events

On 2 March 2022, Schroder UK Opportunities Fund merged into Schroder UK Alpha Plus Fund. The last dealing of shares in Schroder UK Opportunities Fund was on 2 March 2022.

Statement of the Authorised Corporate Director's Responsibilities

The Financial Conduct Authority's Collective Investment Schemes sourcebook requires the Authorised Corporate Director to prepare accounts for each annual and half yearly accounting period, in accordance with United Kingdom Generally Accepted Accounting Practice, which give a true and fair view of the financial position of the Company and of its net revenue and the net capital losses on the property of the Company for the period. In preparing the accounts the Authorised Corporate Director is required to:

- select suitable accounting policies and then apply them consistently;
- comply with the disclosure requirements of the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association (now the Investment Association) in May 2014;
- follow generally accepted accounting principles and applicable accounting standards;
- prepare the accounts on the basis that the Company will continue in operation unless it is inappropriate to do so;
- keep proper accounting records which enable it to demonstrate that the accounts as prepared comply with the above requirements;
- make judgements and estimates that are prudent and reasonable.

The Authorised Corporate Director is responsible for the management of the Company in accordance with The Open Ended Investment Companies Regulations 2001 (SI 2001/1228) ('the OEIC Regulations'), the Company's Instrument of Incorporation, Prospectus and the Collective Investment Schemes sourcebook, and for taking reasonable steps for the prevention and detection of fraud, error and non-compliance with law or regulations.

The Authorised Corporate Director's report and accounts for the period ended 30 June 2022 were signed on 25 August 2022 on behalf of the Authorised Corporate Director by:

P. Chislett Directors S. Reedy

Statement of Cross Holdings

As of 30 June 2022 there were no sub fund cross holdings within the Company.

Accounting policies

Accounting policies

Basis of preparation

The accounts have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014 and in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 102 (The Financial Reporting Standard Applicable in the UK and Republic of Ireland (FRS 102)).

The Schroder UK Opportunities Fund was closed on 2 March 2022 and has commenced winding up. Accordingly, the going concern basis of preparation is no longer appropriate, and the Report and Accounts have been prepared on a basis other than going concern. In applying this basis of preparation, the assets and liabilities of the Fund continue to be stated at their fair values which materially equate to their residual values. Costs associated with the termination of the Fund will be borne by the Manager with no provision being made in these financial statements for such costs. No adjustments were necessary in the financial statements to reduce assets to their realisable values or to provide for liabilities arising from the decision.

The accounting policies applied are consistent with those of the annual accounts for the year ended 31 December 2021 and are described in those annual accounts.

Schroder UK Opportunities Fund Fund Information

Significant eventsOn 2 March 2022, Schroder UK Opportunities Fund merged into Schroder UK Alpha Plus Fund. The last dealing of shares in Schroder UK Opportunities Fund was on 2 March 2022.

Review of Investment Activities

From 31 December 2021 to 2 March 2022, the price of Z Accumulation shares on a dealing price basis fell 9.28%. In the same period, the FTSE¹ All Share Index generated a negative total return of 1.35%².

Having ignored the hawkish shift in rhetoric from Western central banks at the end of 2021, during the opening months of 2022 markets then began to doubt whether inflation would prove as transitory as they had hoped. The concerns around inflation were compounded by Russia's invasion of Ukraine at the very end of the period under review. This drove a jump in real bond yields towards the period end which proved a challenge to equity valuations and equities sold off in tandem with bonds.

Publishing group Informa was our top contributor. Events activity was severely impacted by lockdown measures but bounced back during the period on re-opening hopes as Covid-19 restrictions were gradually lifted in many territories. Other positive contributors included Burberry Group, medical devices specialist Smith & Nephew and niche insurer Hiscox. Sentiment improved towards Hiscox amid signs that the pricing environment in European and US end markets is improving following a number of years of heavy industry claims relating to natural disasters and more recently Covid.

High quality stocks as a whole underperformed over the period amid the rotation into deep value areas of the market. This shift accounted for a number of our detractors. At the same time the shift negatively impacted performance as we did not own some very cheap but low quality areas of the market, including energy. Energy has also been a beneficiary of the post-Covid inflationary shock. We sold kitchen retailer/builders merchant Howden Joinery Group, distributor of plumbing and heating products Ferguson and life insurer Legal & General Group. We established a holding in media company Future.

The Fund was merged into the Schroder UK Alpha Plus Fund in March 2022.

Co-Fund Manager: Bill Casev

Bill joined from Janus Henderson where he spent six years as an Equity portfolio manager and research analyst for both long only and long-short funds

Research responsibilities included coverage of European large and mid cap stocks. Bill was also the co-manager of the European Best Ideas Fund alongside John Bennett and laterally Nick Kissack

Previously an Equity Analyst at Bank of America Merrill Lynch and Bradshaw Asset Management

Investment career commenced in 2003

BSc Management (Finance) from Dublin Institute of Technology

CFA Charterholder

Co-Fund Manager: Nick Kissack

Nick joined from Janus Henderson where he spent four years as an Equity portfolio manager and research analyst for both long only and long-short funds

Previously portfolio manager at the Universities Superannuation Scheme with responsibility for both research analysis and portfolio management for the pan European equities portfolio

Nick has worked as both a generalist (Clareville, Henderson) and a sector specialist (Consumer Staples & Discretionary at USS)

Investment career commenced in 2004 at Clareville Capital Partners as a portfolio manager for the long-short Pegasus Fund

Degree in Economics and Finance from the University of York CFA Charterholder

Accounting policies

The applicable accounting policies adopted by Schroder UK Opportunities Fund are disclosed on page 6.

Schroder UK Dynamic Smaller Companies Fund Fund Information

Investment objective and policy

The Schroder UK Dynamic Smaller Companies Fund (the 'Fund') aims to provide capital growth in excess of the FTSE Small Cap ex Investment Trust (Gross Total Return) index (after fees have been deducted) over a three to five year period by investing in equity and equity related securities of small-sized UK companies.

The Fund is actively managed and invests at least 80% of its assets in equity and equity related securities of small-sized UK companies. These are companies that are incorporated, headquartered or have their principal business activities in the UK and, at the time of purchase, are similar in size to those comprising the bottom 10% by market capitalisation of the UK equities market.

The Fund may also invest in companies headquartered or incorporated outside the UK which derive a significant proportion of their revenues or profits from the UK.

The small cap universe is an extensive, diverse and constantly changing area of the UK market. Smaller companies offer investors exposure to some niche growth areas that, often, cannot be accessed through large companies. They also tend to grow more rapidly than larger firms.

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently (for more information please refer to Appendix III. Section 10: Derivatives and Forwards of the Prospectus).

Fund characteristics

The Fund's performance should be assessed against its target benchmark, being to exceed the FTSE Small Cap ex Investment Trust (Gross Total Return) index, and compared against the Investment Association UK Smaller Companies sector average return. The Investment Adviser invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark. The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Adviser and the ACD believe that this benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

Total purchases and sales

	For the period to 30.6.22 £000's	For the year to 31.12.21 £000's
Total purchases	11,049	94,911
Total sales	19,902	100,849

Fund Performance

	Number of shares in issue 30.6.22	Net asset value per share 30.6.22	Net asset value per share 31.12.21
A Accumulation shares	12,723,344	469.29p	614.87p
C Accumulation shares	390,102	526.52p	687.29p

Past performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Review of Investment Activities

From 31 December 2021 to 30 June 2022, the price of Z Accumulation shares on a dealing price basis fell 23.46%. In the same period, the FTSE¹ Small Cap ex Investment Trust index generated a negative total return of 16.41%².

UK small and mid caps (SMIDs) were negatively impacted by a relatively high exposure to UK domestic focused companies. Fears around the impact of high inflation and cost of living crisis on consumer demand have weighed heavily on stock valuations. Consumer discretionary sectors, such as retailers and housebuilders, performed particularly poorly, in line with trends seen across many other developed markets. In tandem with this, many UK SMIDs experienced severe valuation de-ratings as per the trend for growth companies in general to have suffered against the backdrop of rising interest rates.

Healthcare software business EMIS Group was our top individual contributor after recommending a cash bid from US-based healthcare and insurance group UnitedHealth. We benefited from not owning cycle and car parts retailer Halfords, online travel agent On The Beach and casual dining specialist Restaurant Group, which all performed poorly, in line with consumer discretionary sectors more generally. On the negative side, not owning Go-Ahead detracted as the transport operator was the subject of a bidding war. Other detractors included Sensyne Health, Tekmar Group and Windward. We took advantage of share placing to establish a new position in corporate restructuring specialist FRP Advisory Group. We sold a legacy position in Lamprell as the energy services group grapples with the consequences of a failed transition to the renewables sector.

The degree of mis-pricing we're currently seeing is on a par with that following the Dotcom bubble bursting in 2000. That was another period when the valuations of all variety of companies, irrespective of quality, or balance sheet strength, were severely marked down. We remain focused on dynamic businesses creating solutions and products which are driving tomorrow's economy.

Fund Manager: Iain Staples

Joined Schroders in 2012 from Altium, the UK mid-cap broker, where he led the UK Generalist equity research product

Previously worked on the sell-side for 14 years' having cofounded Clear Capital, the independent equity research house

Broking career commenced in 1999 at Hoare Govett in the technology team

Iain started his career at L.E.K. Consulting, the global management consulting firm, in 1995

MA in Mathematics, Cambridge University and MSc in Theoretical Physics, Manchester University

Accounting policies

The applicable accounting policies adopted by Schroder UK Dynamic Smaller Companies Fund are disclosed on page 6.

Schroder Sterling Corporate Bond Fund Fund Information

Investment objective and policy

The Schroder Sterling Corporate Bond Fund (the 'Fund') aims to provide income and capital growth in excess of the Bank of America Merrill Lynch Sterling Corporate & Collateralised (Gross Total Return) index (after fees have been deducted) over a three to five year period by investing in fixed and floating rate securities issued by UK companies and companies worldwide.

The Fund is actively managed and invests at least 80% of its assets in fixed and floating rate securities denominated in sterling (or in other currencies and hedged back into sterling) and issued by UK companies and companies worldwide.

The Fund may also invest in fixed and floating rate securities issued by governments, government agencies, and supra-nationals.

The Fund may invest up to 20% of its assets in below investment grade securities (as measured by Standard & Poor's or any other equivalent credit rating agencies) or in unrated securities.

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently (for more information please refer to Appendix III. Section 10: Derivatives and Forwards of the Prospectus). The Fund may use leverage and take short positions.

Fund characteristics

The Fund's performance should be assessed against its target benchmark, being to exceed the Bank of America Merrill Lynch Sterling Corporate & Collateralised (Gross Total Return) index, and compared against the Investment Association Sterling Corporate Bond sector average return. The Investment Adviser invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark. The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Adviser and the ACD believe that this benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

Total purchases and sales

	For the period to 30.6.22 £000's	For the year to 31.12.21 £000's
Total purchases	187,228	788,380
Total sales	325,222	730,877

Past performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Review of Investment Activities

From 31 December 2021 to 30 June 2022, the price of Z Accumulation shares on a dealing price basis fell 16.35%. In the same period, the Bank of America Merrill Lynch Sterling Corporate & Collateralised Index generated a negative total return of 14.17%¹.

Bond markets took a volatile turn over the period with yields and spreads rising markedly, resulting in significant negative returns. Inflationary pressures became increasingly elevated and persistent, prompting hawkish shifts from central banks and rising interest rates. Inflationary impulses unleashed by a sharp snap-back in demand after the reopening of economies and easing of lockdowns were exacerbated by an energy price squeeze. Inflation indices hit multi-decade highs across the US, UK and eurozone. The UK 10-year yield increased from 0.97% to 2.24% and the 2-year yield from 0.68% to 1.88%. Corporate bonds were negatively impacted by sharply higher yields and spreads.

The Fund suffered a significant negative total return and underperformed the benchmark amid extremely adverse conditions for credit markets. The key detractor was exposure to European real estate given broad fears of the impact of higher interest rates. We increased BBB exposure as we found opportunities to add in favoured sectors including real estate, notably in logistics, and in telecoms. Real estate has had a tough time, but underlying assets generally continue to enjoy good fundamentals. We added exposure in European investment grade and high yield index credit default swaps. We think this prudent given liquidity conditions and the significant value in the market.

We think the dramatic re-pricing seen across corporate bond markets has made them much more appealing again. Credit offers attractive yields, with the potential for a solid recovery and strong returns over the next year. The market is pricing considerable tightening, and a lot of bad economic news. Credit markets appear driven by sentiment much more than by fundamentals. Some issuers, such as in real estate are looking distinctly cheap. Although the past few months have been painful we are confident credit has significant potential to recover with higher yields offering a cushion against volatility in the meantime. Market dispersion has increased and we have seen good quality companies impacted indiscriminately. This spells opportunity. Careful bond issuer selection will be important, particularly looking for issuers with cash flows rising with inflation, or whose business models are resilient to a slowdown.

Co-Fund Manager: **Iulien Houdain**

Julien Houdain joined Schroders in 2019 and holds the role of Head of Credit, Europe and is responsible for managing a range of credit strategies

Julien joined from Legal & General Investment Management where he held the role of Head of Global Bond Strategies

PhD, Ecole Normale Superieure, France, Applied Mathematics Master of Research, University of Paris XII, France, Applied Mathematics

University Paris XII, Graduate in Econometrics

Co-Fund Manager: Daniel Pearson

Daniel Pearson joined Schroders in 2013 following the acquisition of Cazenove Capital

He focused on Investment grade and High Yield Auto, Business services and Property sectors. Prior to this he worked as a high yield credit analyst

He previously worked at 3i Group plc where he initially worked as a portfolio manager in restructuring/SME team before moving to the European buyout team and focused on all aspects of new investments – origination, appraisal, structuring and debt arrangement. From 1990 to 2002 he worked at Hambros plc

BSc in Business Administration from Bath University and an ACCA qualification

Past performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Risk Profile

Risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile. The Fund's risk category is not guaranteed to remain fixed and may change over time. A Fund in the lowest category does not mean a risk-free investment.

For specific risks, including the risk and reward profile, please refer to the Key Investor Information Document available on the following website www.schroders.com.

Notes to the Accounts (unaudited)

Accounting policies

The applicable accounting policies adopted by Schroder Sterling Corporate Bond Fund are disclosed on page 6.

Securities Financing Transactions

The Fund has not engaged in Securities Financing Transactions (as defined in Article 3 of Regulation (EU) 2015/2365, these include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions, margin lending transactions and Total Return Swaps). Accordingly, disclosures required by Article 13 of the Regulation are not applicable for the accounting period ended 30 June 2022.

Schroder European Recovery Fund Fund Information

Investment objective and policy

The Schroder European Recovery Fund (the 'Fund') aims to provide capital growth in excess of the FTSE World Series Europe ex UK (Gross Total Return) Index (after fees have been deducted) over a three to five year period by investing in equity and equity related securities of European companies, excluding the UK.

The Fund is actively managed and invests at least 80% of its assets in equity and equity related securities of European companies, excluding the UK.

The Fund applies a disciplined value investment approach, seeking to invest in a select portfolio of companies that the Investment Manager believes are significantly undervalued relative to their long-term earnings potential.

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries (including the UK), regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The Fund may use derivatives with the aim reducing risk or managing the Fund more efficiently (for more information please refer to Appendix III. Section 10: Derivatives and Forwards of the Prospectus).

Fund characteristics

The Fund's performance should be assessed against its target benchmark, being to exceed the FTSE World Series Europe ex UK (Gross Total Return) Index, and compared against the MSCI Europe Ex UK Value (Gross Total Return) Index and the Investment Association Europe ex UK sector average return. The Investment Manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark. The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmarks have been selected because the Investment Adviser and the ACD believe that these benchmarks are suitable comparison for performance purposes given the Fund's investment objective and policy.

The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Review of Investment Activities

From 31 December 2021 to 30 June 2022, the price of A Accumulation shares on a dealing price basis fell 3.55%. In the same period, the FTSE¹ World Series Europe generated a negative total return of 15.05%².

The Fund uses the Schroders Value Team's bottom-up, deep-value approach to identify recovery stocks. The approach seeks to take advantage of investors' low tolerance for short-term bad news and a tendency to extrapolate current trends when forming future expectations. It enables us to identify companies that have become significantly undervalued relative to their long-term earnings potential.

The Fund posted a negative absolute return but outperformed the target benchmark. The leading individual contributor for the period was industrial sector holding Dassault Aviation, a manufacturer of both military and business jets. Europe's plans to increase defence spending in the wake of Russia's invasion of Ukraine should benefit Dassault.

Some of our energy and energy-sector related holdings were also among the top contributors. Many such firms are lowly valued and the shares responded positively to the pick-up in oil prices. Contributors included oil majors Repsol and Eni, as well as drilling rig operator Drilling Company of 1972 and geophysical data provider TGS. Certain more defensive holdings also added value, including telecoms group Telefonica Deutschland Holding and Orange, and pharmaceutical firm Sanofi.

Among the main individual detractors was contract catering firm Elior Group.

We initiated a position in H. Lundbeck, a Danish pharmaceutical company with a focus on neurological health. Another new holding is Renault. The shares have performed poorly for a number of years but we believe a lot of bad news is baked in to the current share price. We built a position in kitchen manufacturer and retailer Nobia. It generates good margins and returns in its Swedish business but the UK business, Magnet, has suffered. The market currently prices those woes to continue. We made some changes to our financials exposure, selling Nordic bank DNB which is now trading at a premium to the sector and hence we no longer see the valuation as attractive. We bought a new position in Credit Suisse Group. While the investment bank needs to rectify its past mis-steps, we believe there is value in the Swiss retail bank and wealth management division.

We exited Atos due to a change of view compared to our original expectations. We think the journey to reach higher profit margins may take longer than anticipated.

Co-Fund Manager:

Andrew Lyddon

Co-manager of European Income, European Recovery and Global Recovery strategies, with 17 years' investment experience

Past Specialist Value UK equities fund manager

UK equity analyst responsible for Telecommunications and Support Services

Joined Schroders in October 2005 as an Equity Analyst with the Pan European Industrials desk

CFA Charterholder

MSc in Intellectual Property Law, Queen Mary College Degree in Chemistry, Bath University

Accounting policies

The applicable accounting policies adopted by Schroder European Recovery Fund are disclosed on page 6.

Schroder Sustainable UK Equity Fund Fund Information

Investment objective and policy

The Schroder Sustainable UK Equity Fund (the 'Fund') aims to provide capital growth and income in excess of the FTSE All Share (Gross Total Return) index (after fees have been deducted) over a three to five year period by investing in equity and equity related securities of UK companies which meet the Investment Manager's sustainability criteria.

The Fund is actively managed and invests at least 80% of its assets in a concentrated range of equity and equity related securities of UK companies which meet the Investment Manager's sustainability criteria (please see the Fund Characteristics section of the Prospectus for more details). These are companies that are incorporated, headquartered or have their principal business activities in the UK.

The Fund maintains a higher overall sustainability score than the FTSE All Share (Gross Total Return) index, based on the Investment Manager's rating system. More details on the investment process used to achieve this can be found in the Fund Characteristics section of the Prospectus.

The Fund does not invest in certain activities, industries or groups of issuers above certain limits listed under "Exclusion thresholds" in the Fund Characteristics section of the Prospectus.

The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria (please see the Fund Characteristics section of the Prospectus for more details).

The Fund may invest in companies that the Investment Manager believes will improve their sustainability practices within a reasonable timeframe, typically up to two years.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the website https://www.schroders.com/en/uk/private-investor/strategic-capabilities/sustainability/.

The Fund typically holds 30 to 60 companies.

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently (for more information please refer to Appendix III. Section 10:Derivatives and Forwards of the Prospectus).

Fund characteristics

The Fund's performance should be assessed against the target benchmark, being to exceed the FTSE All Share (Gross Total Return) index, and compared against the Investment Association UK All Companies sector average return. The Investment Adviser invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark. The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Adviser and the ACD believe that this benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

Fund Performance

	Number of shares in issue 30.6.22	Net asset value per share 30.6.22	Net asset value per share 31.12.21
A Accumulation shares	3,247,603	308.63p	326.60p
A Income shares	742,215	155.41p	167.13p
C Accumulation shares	476,433	334.83p	353.21p
C Income shares	628,326	168.90p	181.07p
S Income shares	5,516,146	46.09p	49.35p
Z Accumulation shares	6,067,447	352.94p	372.34p
Z Income shares	3,681,534	177.85p	190.67p

Review of Investment Activities

From 31 December 2021 to 30 June 2022, the price of Z Accumulation shares on a dealing price basis fell 5.34%. In the same period, the FTSE¹ All Share Index generated a negative total return of 4.57%².

The Fund underperformed the FTSE All Share Index over the 6 month period. From a stock perspective, key detractors included holdings in consumer electronics circular economy group musicMagpie, sustainable building envelope solutions company Kingspan Group and offshore wind engineering firm Tekmar Group, while not holding outperforming oil major Shell, multinational banking and financial services company HSBC, and British American Tobacco, was also detrimental. We are prohibited from owning Shell and British American Tobacco on sustainability grounds. On the positive side, we were encouraged by our holdings in banking and financial services company Standard Chartered, sustainable transport operator Firstgroup and renewable energy company Drax Group. Meanwhile, not investing in underperforming industrial equipment rental company Ashtead, consumer credit reporting company Experian, and Scottish Mortgage Investment Trust, was also heneficial

The inflationary environment prompted us to review our portfolio holdings. We recognised that certain companies were less likely to benefit from the full re-opening of economies (post pandemic lockdowns) as we had hoped. We believed that rising inflation and increased taxes would have a negative effect on UK consumer spending and would likely negatively impact the valuations of 'growth' companies, whose cash flows are expected to be generated a number of years into the future. As a result, we exited positions in sustainable chemicals company Croda International, recycling technology business TOMRA Systems and sustainable water, climate and ventilation business Genuit Group.

Over the period, we initiated new positions in RPS Group, IP Group and Spectris, all which passed the scrutiny of our sustainable screens and in-depth fundamental research.

Professional services group and environmental consultancy RPS Group has a strong and growing order book, driven by themes such as urbanisation, natural resources and sustainability.

Precision instrument and controls company Spectris has undergone a strategic transformation in recent years. The value creation from this strategy is in our view is not fully reflected in the share price.

Intellectual property commercialisation company IP Group has a portfolio of novel technologies in a range of sectors, with a key theme being 'Cleantech' businesses that are focussed on solutions to combat climate change such as carbon capture and fuel cells.

The first six months of 2022 have been a very volatile period in markets. Russia's invasion of Ukraine has led to questions around both energy and national security around the world. This has re-framed a number of debates in sustainability, such as the approach to the energy transition. In addition, the resurgence of inflation and prospect of further central bank monetary policy action to combat it has led to a material valuation derating in 'growth' assets. Many of these growth assets have been businesses with strong sustainability credentials that we have to date been reluctant to take material exposure to due to concerns over lofty valuations. This approach has served us well in this period. We believe that there will be significant opportunities in the coming months to take positions in businesses with strong sustainability credentials at valuations more attractive than any time in recent years.

Fund Manager: Matt Bennison

Accounting policies

The applicable accounting policies adopted by Schroder Sustainable UK Equity Fund are disclosed on page 6.

Schroder UK Alpha Income Fund Fund Information

Investment objective and policy

The Schroder UK Alpha Income Fund (the 'Fund') aims to provide income and capital growth in excess of the FTSE All Share (Gross Total Return) index (after fees have been deducted) over a three to five year period by investing in equity and equity related securities of UK companies.

The Fund is actively managed and invests at least 80% of its assets in equity and equity related securities of UK companies. These are companies that are incorporated, headquartered or have their principal business activities in the UK.

'Alpha' funds invest in companies in which the Investment Manager has a high conviction that the current share price does not reflect the future prospects for that business.

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently (for more information please refer to Appendix III. Section 10: Derivatives and Forwards of the Prospectus).

Fund characteristics

The Fund's performance should be assessed against its target benchmark, being to exceed the FTSE All Share (Gross Total Return) index, and compared against the Investment Association UK Equity Income sector average return. The Investment Adviser invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark. The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Adviser and the ACD believe that this benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

Z Accumulation shares	8,943,044	251.17p	254.68p
Z Income shares	16,372,215	161.44p	167.70p

Review of Investment Activities

From 31 December 2021 to 30 June 2022, the price of Z Accumulation shares on a dealing price basis fell 1.26%. In the same period, the FTSE¹ All Share Index generated a negative total return of 4.57%².

The first half of 2022 saw equity markets rotate sharply as stocks that are perceived as growth stocks – which we have less exposure to - saw their share prices underperform. Companies in commodity areas of the market, such as mining and oils, performed strongly, as did defensive areas such as telecoms, healthcare and utilities. Overall, this shift has benefited portfolio performance.

Performance contributions came from a bounce-back in some of our industrials and our preferred holdings in the healthcare sector. Within industrials, QinetiQ Group continued to benefit from its organic growth potential and Johnson Matthey saw a boost from Standard Industries building a 5% stake. These are both examples where we added to positions on share price weakness as we had conviction in the long-term investment case. In healthcare, GSK's upcoming split into separate pharmaceutical and consumer healthcare businesses was well received by the market and medical equipment group ConvaTec performed strongly. Asia focussed bank Standard Chartered was another large individual contributor. The most significant negative for relative performance was owning less than the index in the energy sector that benefitted from rising power prices.

Economies, companies and markets are adjusting to a wide range of issues and risks that include inflationary pressures, supply chain disruption and concerns over the potential for a recession. The wide spectrum of issues and risks in the market today emphasise the importance of a diversified portfolio. Our flexible investment approach allows us to blend holdings with different characteristics into a portfolio we believe can perform in a range of macroeconomic and market environments and achieve a dividend yield premium to the FTSE All-Share index.

With an increased risk of recession the outlook for dividends is less clear. Dividends overall are still recovering from their pandemic low in 2020 with mid cap stocks recovering the fastest. Oil, mining and banking sectors continue to drive overall market payments higher. Whilst several large companies rebased their dividends to lower levels this means that they are better covered by earnings and offer scope for reinvestment opportunities and future growth. The level of yield from UK companies is still attractive compared to other asset classes and international peers. Merger and acquisition activity also continues apace as private equity firms in particular find UK companies attractively valued compared to overseas peers. Some of our holdings have benefited from this activity such as specialty chemical company Johnson Matthey and we are actively engaging to try to ensure bids fully value our companies.

Accounting policies

The applicable accounting policies adopted by Schroder UK Alpha Income Fund are disclosed on page 6.

Schroder Strategic Credit Fund Fund Information

Investment objective and policy

The Schroder Strategic Credit Fund (the 'Fund') aims to provide income and capital growth in excess of the ICE BofA Sterling 3 Month Government Bill Index (after fees have been deducted) over a three to five year period by investing in fixed and floating rate securities of companies worldwide but this cannot be guaranteed and your capital is at risk.

The Fund is actively managed and invests at least 80% of its assets in fixed and floating rate securities denominated in sterling (or in other currencies and hedged back into sterling) issued by companies worldwide. The Fund may also invest in fixed and floating rate securities issued by governments, government agencies and supra-nationals worldwide.

The Fund may invest more than 50% of its assets in below investment grade securities (as measured by Standard & Poor's or any other equivalent credit rating agencies) or in unrated securities.

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently (for more information please refer to Appendix III. Section 10: Derivatives and Forwards of the Prospectus). The Fund may use leverage and take short positions.

Fund characteristics

The Fund's performance should be assessed against its target benchmark the ICE BofA Sterling 3 Month Government Bill Index and compared against the Investment Association Strategic Bond sector average return. The target benchmark has been selected because the target return of the Fund is to deliver or exceed the return of that benchmark as stated in the investment objective. The comparator benchmarks has been selected because the Investment Adviser and the ACD believe that this benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

Z Accumulation shares	68,540,123	58.45p	65.39p
Z Income shares	34,016,202	40.73p	46.79p

Review of Investment Activities

From 31 December 2021 to 30 June 2022, the price of Z Accumulation shares on a dealing price basis fell 10.38%. In the same period, the ICE BofA Sterling 3 Month Government Bill Index generated a total return of 0.23%¹.

Bond markets took a volatile turn over the period with yields and spreads rising markedly, resulting in significant negative returns. Inflationary pressures became increasingly elevated and persistent, prompting hawkish shifts from central banks and rising interest rates. Inflationary impulses unleashed by a sharp snap-back in demand after the reopening of economies and easing of lockdowns were exacerbated by an energy price squeeze. Inflation indices hit multi-decade highs across the US, UK and eurozone. Credit markets, high yield particularly, have come under significant pressure amid sharply rising yields and spreads.

The portfolio generated a significant negative total return amid extremely adverse conditions. With markets falling indiscriminately the main detractors were sectors where we are most exposed, namely real estate, healthcare and telecoms. Healthcare and telecoms remain among our largest sector exposures. Market dislocation has presented new opportunities over the past six months across sectors. We have almost 80% of the Fund in high yield, reflecting our view on relative value between high yield and investment grade, as well as the carry available in shorter dated BB corporate bonds.

The market price action of June has strengthened our view that corporate bonds offer attractive value now that a significant amount of inflation, liquidity and economic slowdown risk premia has been priced into the market. European high yield valuations are now implying a default rate which is not supported by improved leverage positions post-Covid and balance sheet cash levels. However, having witnessed a rise in market rates that correlates also with weaker risk assets, sentiment is understandably weak and sensitive to negative headlines. Nevertheless, the credit markets are a much different proposition to what they were 12 months ago; with attractive yields and spreads making for much more robust break-even yields, and now with signs that inflation drivers are peaking and growth slowing, Central Banks may not need to reach the levels of tightening that have already been priced in. With Central Banks no longer a price insensitive corporate financier or liquidity provider, issuer selection will be essential, but will likely be ultimately rewarding for the more bottom-up focused, and active investors. As we are optimistic for future returns, we will keep some dry powder on hand to act when future relative value opportunities become available.

Fund Manager: Peter Harvey

Peter joined Schroders in July 2013 following the acquisition of Cazenove Capital

Having joined Cazenove Capital in 2005, where he was head of the European credit team, Peter is now part of the London based fixed income team at Schroders

He has 31 years' experience analysing and investing in corporate debt

Peter studied management and international relations at St Andrews University

Risk Profile

Risk and reward indicator

The risk category is based upon the Fund's risk target and there is no guarantee that the Fund will achieve it. The Fund's risk category is not guaranteed to remain fixed and may change over time. A Fund in the lowest category does not mean a risk-free investment.

For specific risks, including the risk and reward profile, please refer to the Key Investor Information Document available on the following website www.schroders.com.

Accounting policies

The applicable accounting policies adopted by Schroder Strategic Credit Fund are disclosed on page 6.

Securities Financing Transactions

The Fund has not engaged in Securities Financing Transactions (as defined in Article 3 of Regulation (EU) 2015/2365, these include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions, margin lending transactions and Total Return Swaps). Accordingly, disclosures required by Article 13 of the Regulation are not applicable for the accounting period ended 30 June 2022.

Schroder European Sustainable Equity Fund Fund Information

Investment objective and policy

The Schroder European Sustainable Equity Fund (the 'Fund') aims to provide capital growth in excess of the FTSE World Series Europe ex UK (Gross Total Return) index (after fees have been deducted) over a three to five year period by investing in equity and equity related securities of European companies, excluding the UK, which meet the Investment Manager's sustainability criteria.

The Fund is actively managed and invests at least 80% of its assets in a concentrated range of equity and equity related securities of European countries, excluding the UK, which meet the Investment Manager's sustainability criteria (please see the Fund Characteristics section of the Prospectus for more details). The Fund typically holds 30 to 50 companies.

The Fund maintains a higher overall sustainability score than the FTSE World Series Europe ex UK (Gross Total Return) index, based on the Investment Manager's rating system. More details on the investment process used to achieve this can be found in the Fund Characteristics section of the Prospectus.

The Fund does not invest in certain activities, industries or groups of issuers above certain limits listed under "Exclusion thresholds" in the Fund Characteristics section of the Prospectus.

The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria (please see the Fund Characteristics section of the Prospectus for more details).

The Fund may invest in companies that the Investment Manager believes will improve their sustainability practices within a reasonable timeframe, typically up to three years.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the website https://www.schroders.com/en/uk/private-investor/strategic-capabilities/sustainability/.

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries (including the UK), regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The Fund may use derivatives with the aim reducing risk or managing the Fund more efficiently (for more information please refer to Appendix III. Section 10: Derivatives and Forwards of the Prospectus).

Fund characteristics

The Fund's performance should be assessed against the target benchmark, being to exceed the FTSE World Series Europe ex UK (Gross Total Return) index, and compared against the Investment Association Europe ex UK sector average return. The Investment Adviser invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark. The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Adviser and the ACD believe that this benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

² Q2 Income shares launched on 11 January 2022.

Review of Investment Activities

From 31 December 2021 to 30 June 2022 the price of Z Accumulation shares on a dealing price basis fell 19.66%. In the same period, the FTSE¹ World Series Europe ex UK Index generated a negative total return of 15.05%² in sterling terms.

The Fund has a sustainable approach at its core, striving to have a positive impact on both society and corporate behaviour while aiming to deliver attractive returns for investors. The portfolio managers seek to identify undervalued sustainable businesses by embedding sophisticated ESG (environmental, social, governance) analysis in their well-established fundamental investment process.

European shares fell during the period amid rising inflationary pressures, expectations of interest rates hikes, supply chain disruptions, and Russia's invasion of Ukraine. The Fund underperformed the index in this period.

Worries about recession risk and the outlook for consumer spending weighed on some of our growth-oriented consumer holdings, especially those in the midcap part of the market. These included retailer About You Holding and streaming provider Viaplay Group (formerly Nordic Entertainment). Mid cap holdings saw additional share price pressures as investors favoured the greater stability and larger liquidity of large cap stocks.

The underperformance of small & mid caps has been challenging for portfolio performance in the short term, but we believe exposing the portfolio to overlooked small & mid caps should be performance accretive longer term as we uncover greater mispriced opportunities in this space.

Kion Group, a market leader in forklifts and warehouse equipment, was another detractor. This year it has faced rising costs amid higher prices of steel and other crucial inputs. Its main competitor warned on profits in March, while Kion followed suit in early April citing supply chain constraints.

On the positive side, Bank of Ireland Group was the leading individual contributor. The rising interest rate environment is favourable to banks. Bank of Ireland is attractively valued and faces a less competitive market in Ireland following the withdrawal of a rival bank.

Among portfolio changes, we have built a holding in in skincare specialist Beiersdorf, which also has an industrial adhesives business. Beiersdorf has new management who are taking steps to improve sales growth and potentially put the strong balance sheet to work. We also made some changes to our industrials positioning, exiting Alfa Laval and initiating a position in SKF. Ball bearings maker SKF is undergoing a transformation designed to tilt the business towards structurally growing end markets, such as electric vehicles and renewable energy.

It has been a very weak six months for European shares. The concerns for investors have remained largely the same throughout the year so far: the war in Ukraine, energy shortages, disrupted supply chains, rising inflation, the need for tighter monetary policy, and the resulting pressure on consumers and corporate earnings.

Against such a tough macroeconomic backdrop, few companies will be immune. Those with pricing power – i.e. the ability to raise prices without losing sales volumes – should fare best. We therefore feel now is the time for a focus on individual stocks, and not for top-down calls. Our Blend approach means we are not relying on taking large style or factor bets, but focus instead on individual mispriced opportunities while retaining diversification.

Co-Fund Manager: Scott MacLennan

Scott is co-manager of Schroder ISF European Sustainable Equity since 2018 and co-manager of Schroder European Sustainable Equity Fund since 2021

Fund manager for European ex UK institutional portfolios since 2017

Joined Schroders in 2015 as an analyst covering the European Consumer sector

Previously a Fund Manager at Neptune Investment Management focusing on the UK

Investment experience commenced in 2012

CFA all examinations passed

MA in Classics, Cambridge University

Co-Fund Manager: Nicholette MacDonald-Brown

Head of the European Blend Team

Nicholette is responsible for the management of the Schroder ISF European Large Cap and is co-manager for the Schroder European Sustainable Equity Fund, Schroder ISF European Sustainable Equity, Schroder ISF Sustainable European Market Neutral and Schroder ISF European Dividend Maximiser

Joined Schroders in August 2011

Previously spent 11 years at Goldman Sachs. Responsible for number of sectors for Goldman Sachs Investment Partners, a global multi asset class hedge fund. Former roles included research and portfolio management responsibilities for Global, EAFE and single country products, and Co-Head of the UK and European Small Cap Equity Team

Accounting policies

The applicable accounting policies adopted by Schroder European Sustainable Equity Fund are disclosed on page 6.

Schroder Global Recovery Fund Fund Information

Investment objective and policy

The Schroder Global Recovery Fund (the 'Fund') aims to provide capital growth in excess of the MSCI World (Net Total Return) Index (after fees have been deducted) over a three to five year period by investing in equity and equity related securities of companies worldwide which are considered to be undervalued relative to their long term earnings potential.

The Fund is actively managed and invests at least 80% of its assets in equity and equity related securities of companies worldwide that have suffered a set back in either share price or profitability, but where long term prospects are believed to be good.

The Fund applies a disciplined value investment approach, seeking to invest in a select portfolio of companies that the Investment Adviser believes are significantly undervalued relative to their long-term earnings potential.

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The Fund may use derivative instruments for investment purposes as well as for efficient portfolio management (for more information please refer to Appendix III. Section 10: Derivatives and Forwards).

Fund characteristics

The Fund's performance should be assessed against its target benchmark, being to exceed the MSCI World (Net Total Return) index, and compared against the MSCI World Value (Net Total Return) index and the Investment Association Global sector average return. The Investment Manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark. The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmarks have been selected because the Investment Adviser and the ACD believe that these benchmarks are suitable comparisons for performance purposes given the Fund's investment objective and policy.

¹ X Income shares launched on 13 May 2022.

Review of Investment Activities

From 31 December 2021 to 30 June 2022, the price of Z Accumulation shares on a dealing price basis fell 2.31%. In the same period, MSCI World index generated a negative net return of 11.34%¹.

The portfolio outperformed over the six month period. The period was marked by sharply rising inflation and growing expectations that major central banks would need to lift interest rates faster than had previously been expected. This resulted in markets turning away from expensive growth stocks and towards lowly-valued parts of the market. Russia's invasion of Ukraine also sparked a jump in oil prices, which favoured the previously unloved oil & gas sector.

Our holding in emerging markets focused lender Standard Chartered supported fund returns. The rising interest rate environment is beneficial for banks as they can price loans at higher rates. Petroleum refiner HF Sinclair was another leading individual contributor. Demand for petrol products remains robust. HF Sinclair has also begun production of renewable diesel at its plant in Wyoming. The company said it remains committed to returning \$1 billion in cash to shareholders over the next 12 months. The position in oil major Repsol also added value amid ongoing strong demand for oil and oil products. Certain defensive holdings also found favour amid the volatile markets and rising worries about recession. Beverages group Molson Coors and pharmaceutical firm Bristol-Myers Squibb added value.

On the negative side, our position in Russian oil & gas group Lukoil was the main detractor from relative returns as the shares fell sharply given Russia's shocking and illegal invasion of Ukraine. We sold our position.

New positions in the period include US TV business AMC Networks, European car maker Renault, and flooring manufacturer Mohawk Industries. We exited Publicis after strong share price performance.

Our job, as always, is to continually tilt the portfolio towards the areas of opportunity. That means we are rotating away from the stocks which have done well for us over the past two years: the mining, oil and gas and banking shares. We are increasingly looking at cyclicals, but only where balance sheets are strong enough to withstand potentially tough times.

Accounting policies

The applicable accounting policies adopted by Schroder Global Recovery Fund are disclosed on page 6.

Schroder Multi-Asset Total Return Fund Fund Information

Investment objective and policy

The Schroder Multi-Asset Total Return Fund (the 'Fund') aims to provide capital growth and income of the ICE BofA Sterling 3 Month Government Bill Index plus 4% per annum (before fees have been deducted*) over rolling three year periods by investing in a diversified range of assets and markets worldwide. The Fund also aims to target a volatility (a measure of how much the Fund's returns may vary) range of 4% - 8% over the same period. This cannot be guaranteed and your capital is at risk.

*For the relevant fees of each unit class please visit the Schroder website https://www.schroders.com/en/uk/

The Fund is actively managed and invests directly, or indirectly through collective investment schemes, exchange traded funds, real estate investment trusts and closed ended funds, and derivatives in equity and equity related securities, fixed and floating rate securities, commodities and currencies worldwide. The weightings of these holdings are adjusted in response to changing market conditions.

The Fund may invest more than 10% of its assets in collective investment schemes (including other Schroder funds).

The Fund may invest in below investment grade securities (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies) or in unrated securities.

The Fund may invest up to 20% of its assets in asset-backed and mortgage-backed securities.

The Fund may also invest in warrants and money market instruments, and may hold cash. The investment strategy of the Fund and its use of derivatives may lead to situations when it is considered appropriate that prudent levels of cash or cash equivalent liquidity will be maintained, which may be substantial or even represent (exceptionally) 100% of the Fund's assets.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently (for more information please refer to Appendix III. Section 10: Derivatives and Forwards of the Prospectus). The Fund will use leverage and take short positions.

Fund characteristics

The Fund's performance should be assessed against its target benchmark of the ICE BofA Sterling 3 Month Government Bill Index plus 4% per annum. The Fund also aims to target a volatility (a measure of how much the Fund's returns may vary) range of 4% - 8% over the same period. The target benchmark has been selected because the target return of the Fund is to deliver or exceed the return of that benchmark as stated in the investment objective.

Total purchases and sales

	For the period to 30.6.22 £000's	For the year to 31.12.21 £000's
Total purchases	12,510	64,793

Past performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Review of Investment Activities

From 31 December 2021 to 30 June 2022, the price of Z Accumulation shares on a dealing price basis fell 8.29%. In the same period, ICE BofA Sterling 3 Month Government Bill Index plus 4% generated a total return of 2.20%.

This period has been characterised by multi-decade high inflation, a slowdown in global growth giving rise to stagflationary fears and, consequently, plummeting global markets. The challenge has been that rising interest rates represent a major regime change after years of quantitative easing. With central banks forced to focus on tackling inflation, equity and bond markets have sold-off sharply together, rendering bonds a less effective hedge in contrast to previous cycles. All in all, it has been a dire market environment but one in which our dynamic asset allocation protects performance. The defensive actions we had taken earlier in the year to address the economic factors have helped to protect the portfolio as markets fell. Gains from currency and commodities were insufficient to offset losses from return-seeking assets. Equities were the largest detractor, specifically our allocation to global equities weighed on performance. From a portfolio activity perspective, we reduced the portfolios overall risk by selling return-seeking equities in favour of risk-reducing hedges.

In seeking to achieve a total level of return (cash plus benchmark), there will inevitably be periods of underperformance, when broad market performance is significantly lower than the cash plus benchmark, like this year. While the stagflationary environment has intensified, we think that there is still a fair chance of a 'muddling-through scenario', where global inflation is to peak at some point later this year, providing the Fed opportunities to step back from the current hawkish stance. However, the risk of a recession is clearly rising and valuations do not yet fully reflect this so we maintain a cautious, diversified stance. Nonetheless, our dynamic approach to asset allocation means we are well placed to seize opportunities as the growth picture darkens in the next few months - history has taught us that the best valuation opportunities tend to emerge in recessions.

Co-Head of Investment and Group Chief Investment Officer:

Johanna Kyrklund, CFA

Joined Schroders in March 2007 and is based in London

As Group CIO, Johanna oversees investment performance, philosophy and process for all asset classes (excluding private assets), reinforcing a culture of collaboration across all desks

In addition, Johanna leads the Multi-Asset Investments division, is a member of the Group Management Committee (GMC) and Chairs Global Asset Allocation Committee

Responsible for investments on behalf of Multi-Asset clients globally and is the lead portfolio manager of the Schroder Diversified Growth Strategy

Prior to joining Schroders, Johanna specialised in tactical asset allocation strategies

From 2005 she worked at Insight Investment where she managed an unconstrained global macro absolute return fund. From 1997 to 2005 she worked at Deutsche Asset Management where she was Head of Asset Allocation in the UK and fund manager of the Deutsche tactical asset allocation fund

CFA Charterholder

Degree in Philosophy, Politics and Economics from Oxford University

Johanna is a member of the Cambridge University Investment Board and the Railpen Investment Board

Co-Fund Manager:

Merrick Styles is Senior Fund Manager at Schroders, which involves management of the DGF and Total Return Products. He joined Schroders in 2019 and is based in London

Merrick was Senior Fund Manager at Barings from 2015 to 2019, which involved management of multi-asset portfolios. Chair of the asset allocation and fixed income groups

He was Co-Head of Investments at Amundi from 2012 to 2015, which involved management of currency, global fixed income and multi-asset portfolios. One of 5 senior portfolio architects to set the team views

He was Head of Absolute Return at Amundi from 2005 to 2012, which involved management of currency, global fixed income and multi-asset portfolios. One of 5 senior portfolio architects to set the team views

MSc in Investment Management from CASS Business School; PhD in Automotive Engineering from Cranfield University; BSc in Mechanical Engineering from University of Southampton

Exchange rate changes may cause the value of any overseas investments to rise or fall.

Risk Profile

Risk and reward indicator

The risk category was calculated using simulated historical performance data and may not be a reliable indicator of the Fund's future risk profile. The Fund's risk category is not guaranteed to remain fixed and may change over time. A Fund in the lowest category does not mean a risk-free investment. For specific risks, including the risk and reward profile, please refer to the Key Investor Information Document available on the following website www.schroders.com.

Accounting policies

The applicable accounting policies adopted by Schroder Multi Asset Total Return Fund are disclosed on page 6.

Securities Financing Transactions

The Fund engaged in Securities Financing Transactions (as defined in Article 3 of Regulation (EU) 2015/2365, these include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions, margin lending transactions and Total Return Swaps). In accordance with Article 13 of the Regulation, the Fund's involvement in and exposures related to Securities Financing Transactions (SFTs) for the accounting year ended 30 June 2022 are detailed below.

Global data

Amount of assets engaged in each type of SFTs and Total Return Swaps

The following table represents the fair value of assets engaged in each type of SFTs (including Total Return Swaps) in the Fund currency.

	Amount of assets	% of AUM
Total Return Swaps	£000's 155	0.39%

Concentration data

Ten largest collateral issuers

As at 30 June 2022, there are no collateral securities and commodities received in respect of Total Return Swaps.

Top ten counterparties

The following table provides details of the top ten counterparties (based on gross volume of outstanding transactions), in respect of SFTs and Total Return Swaps, as at the reporting date.

Counterparty	Outstanding Transactions
	£000's
Total Return Swaps	
J.P. Morgan	155

Aggregate transaction data

Type and quality of collateral

As at the balance sheet date, no collateral was received in respect of Total Return Swaps.

Maturity tenor of collateral

As at the balance sheet date, no collateral was received in respect of Total Return Swaps.

Currency of collateral

As at the balance sheet date, no collateral was received in respect of Total Return Swaps.

Maturity tenor of SFTs and Total Return Swaps

The following table provides an analysis of the maturity tenor in respect to SFTs and Total Return Swaps, as at the reporting date.

Maturity	Less than 1 day £000's	1 to 7 days £000's	1 to 4 weeks £000's	1 to 3 months £000's	3 to 12 months £000's	More than 1 year £000's	Open maturity £000's	Total £000's
Total Return Swaps	-	-	155	-	-	-	=	155

Country in which counterparties are established

The following table provides details of the country of incorporation of counterparties across all SFTs and Total Return Swaps, as at the reporting date.

Counterparty	Country of Incorporation
J.P. Morgan	United Kingdom

Settlement and clearing

Туре	Settlement	Total Value outstanding £000's
Total Return Swaps	Bilateral	155

Securities Financing Transactions (continued)

Safekeeping of collateral

Collateral received

As at the balance sheet date, no collateral was received in respect of Total Return Swaps.

Collateral granted

As at the balance sheet date, no collateral was granted in respect of Total Return Swaps.

Return and cost

Gross Return

All returns from Total Return Swaps transactions accrue to the Fund and are not subject to any returns sharing arrangements with the Authorised Corporate Director or any other third party.

	Total Return Swaps return* £000's	% of overall returns
Net interest on Total Return Swaps	1	0.15
Net realised gains	525	80.28
Net change in unrealised gains	128	19.57
Total	654	100.00

^{*}Expressed in absolute terms.

Schroder India Equity Fund Fund Information

Investment objective and policy

The Schroder India Equity Fund (the 'Fund') aims to provide capital growth in excess of the MSCI India (Net Total Return) index (after fees have been deducted) over a three to five year period by investing in equity and equity related securities of Indian companies.

The Fund invests at least 80% of its assets in equity and equity related securities of Indian companies or companies which have their principal business activities in India. Typically, the Fund holds 30 to 70 companies.

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including other Schroder funds), warrants and money market instruments, and hold cash.

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently (for more information please refer to section 6 of Appendix I of the Prospectus).

Fund characteristics

The Fund's performance should be assessed against its target benchmark, being to exceed the MSCI India (Net Total Return) index. The Investment Adviser invests on a discretionary basis and is not limited to investing in accordance with the composition of this benchmark. The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

Total purchases and sales

	For the period to 30.6.22 £000's	For the year to 31.12.21 £000's
Total purchases	3,790	11,793
Total sales	10,060	9,559

Fund Performance

	Number of shares in issue 30.6.22	Net asset value per share 30.6.22	Net asset value per share 31.12.21
L Accumulation shares	2,000	58.76p	69.36p
X Accumulation shares	41,337,000	60.16p	70.72p
Z Accumulation shares	2,887,053	58.58p	69.18p

Past performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Review of Investment Activities

From 31 December 2021 to 30 June 2022, the price of Z Accumulation shares on a dealing price basis fell 15.44%. In the same period, the MSCI India Index generated a negative net return of 5.48% in sterling terms.

Over the period, the Fund has reduced its underweight in the information technology sector and increased its overweight position in the materials and financial sectors. The exposure to the energy sector continues to remain zero. The Fund has diversified its holdings by buying into a few chemical companies like Sumitomo Chemical India and Navin Flourine International. It has also added Indian Hotels (hotel company) and Delhivery (logistics company). The Fund has exited its positions amongst others in auto ancillary company Endurance Technologies and mortgage player Aptus Value Housing Finance India.

While Indian equities have fared better relative to other emerging markets, markets have been volatile and generating negative returns. Large index sectors like financials and information technology have fallen more than the index whereas the energy sector has generated strong performance on the back of rising crude prices. The utilities sector also performed well as it is generally considered as a defensive play during uncertain market conditions. Stock prices of some cyclical businesses like metals reversed their gains from 2021.

The Fund continues to be biased towards quality and growth. The allocations to stocks across the portfolio reflect assessments of individual company earnings potential and their respective ability to outperform broader sectors over the medium to long term. The strategy remains stock specific and sector or index agnostic.

Fund Manager:

Asian Investment Team

The Fund is managed by the Schroders Asian investment team and advised by Axis AMC, who have eleven investment professionals based in Mumbai

Axis AMC is a joint venture between Axis Bank and Schroders

Source: Refinitiv Eikon Datastream

Past performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Risk Profile

Risk and reward indicator

The risk category was calculated using simulated historical performance data and may not be a reliable indicator of the Fund's future risk profile. The Fund's risk category is not guaranteed to remain fixed and may change over time. A Fund in the lowest category does not mean a risk-free investment. For specific risks, including the risk and reward profile, please refer to the Key Investor Information Document available on the following website www.schroders.com.

The applicable accounting policies adopted by Schroder India Equity Fund are disclosed on page 6.

Schroder Islamic Global Equity Fund Fund Information

Investment objective and policy

The Schroder Islamic Global Equity Fund (the 'Fund') aims to provide capital growth in excess of the Dow Jones Islamic Market World (Net Total Return) index (after fees have been deducted) over a three to five year period by investing in equity and equity-related securities of companies worldwide.

The Fund is actively managed and invests its assets in equity and equity-related securities of Shariah compliant companies worldwide. The Fund also focuses on a range of equity factors (also commonly known as investment styles). Companies will be simultaneously assessed on all targeted equity factors using a fully integrated systematic, bottom-up investment approach.

The Fund will focus on a range of equity factors (also commonly known as investment styles) that may include the following:

- Low volatility involves evaluating indicators such as share price movement and historical performance to determine those securities that the Investment Adviser believes will experience smaller price movements than the global equity markets on average.
- Momentum involves evaluating trends in stocks, sectors or countries within the relevant equity market.
- Quality involves evaluating indicators such as a company's profitability, stability and financial strength.
- Value involves evaluating indicators such as cash flows, dividends and earnings to identify securities that the Investment Adviser believes have been undervalued by the market.
- Small cap involves investing in small-sized companies being companies that, at the time of purchase, are considered to be in the bottom 30% by market capitalisation of the global equity market and exhibit attractive characteristics based on the styles described above.

The Fund may also hold cash

The Fund may also hold warrants acquired as a result of corporate actions performed by the issuers of the Fund's equity holdings. The Fund will not otherwise invest in warrants.

The Fund will not use derivatives.

The Fund is limited to investing in accordance with the composition of the benchmark but has the discretion to vary the weightings in the benchmark's securities.

Fund characteristics

The Fund's performance should be assessed against its constraining benchmark being the Dow Jones Islamic Market World (Net Total Return) index and compared against the Investment Association Global sector average return. The Investment Adviser is limited to investing in accordance with the composition of the benchmark but has the discretion to vary the weightings in the benchmark's securities. The benchmark has been selected because the Investment Adviser is constrained by reference to the value, price or components of that benchmark as stated in the investment objective. The comparator benchmark has been selected because the Investment Manager and the Manager believe that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

Total purchases and sales

	For the period to 30.6.22 £000's	For the year to 31.12.21 £000's
Total purchases	51,883	104,526
Total sales	48,951	100,672

Fund Performance

	Number of shares in issue 30.6.22	Net asset value per share 30.6.22	Net asset value per share 31.12.21
Q2 Accumulation shares	236,780,606	56.28p	65.47p
Z Accumulation shares	14,362,551	54.47p	63.42p

Past performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Review of Investment Activities

From 31 December 2021 to 30 June 2022, the price of Z Accumulation shares on a dealing price basis fell 14.63%. In the same period, the Dow Jones Islamic Market World Index generated a negative return of 16.05%¹.

Equities fell in the first half of 2022. The widespread shock caused by the Russian invasion of Ukraine and its grave humanitarian implications fed through to financial markets from February. The ongoing invasion amplified existing concerns over inflationary pressures and these were confirmed when central bankers were forced to tighten monetary policy to curb persistent high inflation, leaving investors facing rising recession risks around the world.

The year started well for style factors. It was encouraging to see the continued outperformance of cheaper, higher quality stocks as our Value and Profitability measures respectively picked up where they left off at the end of 2021. The events in Ukraine put a damper on the equity rally and most investment styles. However, Value stocks were more resilient in the falling markets and were comfortably the largest contributor to excess returns. In response to the unfortunate events related to the war, we reduced our exposure to Russia and temporarily paused all trading in mid-February.

Q2 was a more difficult period for most investment styles, particularly in June, with investors increasingly focussed on macro-economic issues rather than company fundamentals, which are the basis for our stock selection. The portfolio held up better than the benchmark over H1 despite underperformance in June eroding some earlier gains as cheaper, seemingly profitable stocks gave back some performance.

Looking forward, we remain on target to introduce new environmental and social factors and portfolio construction enhancements later this year.

Fund Manager:

Schroders Systematic Investments Team led by Ashley Lester, PhD.

The Schroders Systematic Investments Team was established in 2011 and manages around £20 billion (as at 31 May 2022) across a range of quantitative equity strategies

The investment team consists of 14 members based in

Source: Refinitiv Eikon Datastream.

Past performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Risk Profile

Risk and reward indicator

The risk category was calculated using simulated historical performance data and may not be a reliable indicator of the Fund's future risk profile. The Fund's risk category is not guaranteed to remain fixed and may change over time. A Fund in the lowest category does not mean a risk-free investment. For specific risks, including the risk and reward profile, please refer to the Key Investor Information Document available on the following website www.schroders.com.

Notes to the Accounts (unaudited)

Accounting policies

The applicable accounting policies adopted by Schroder Islamic Global Equity Fund are disclosed on page 6.

Schroder UK-Listed Equity Income Maximiser Fund Fund Information

Investment objective and policy

The Schroder UK-Listed Equity Income Maximiser Fund (the 'Fund') aims to provide income by investing in equity and equity related securities of large UK companies.

The Fund aims to deliver an income of 7% per year but this is not guaranteed and could change depending on market conditions.

The Fund invests at least 80% of its assets in a passively managed portfolio from the top 100 listed UK companies by market capitalisation.

To seek to enhance the yield, the Investment Manager selectively sells short dated call options over individual securities held by the Fund, portfolios of securities or indices by agreeing strike prices above which potential capital growth is sold.

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently (for more information please refer to Appendix III. Section 10: Derivatives and Forwards of the Prospectus).

The Fund's investment strategy will typically underperform a similar portfolio of equities without a derivative overlay in periods when the underlying equity prices are rising, and has the potential to outperform when the underlying equity prices are falling.

Fund characteristics

The Fund's performance should be assessed against its target benchmark of 7% income per year, and compared against the FTSE 100 (Net Total Return) index and the Investment Association UK Equity Income sector average return. The target benchmark has been selected because the target return of the Fund is to deliver or exceed the return of that benchmark as stated in the investment objective. The comparator benchmarks have been selected because the Investment Manager and the Manager believe that each of these benchmarks is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Review of Investment Activities

The Fund aims to deliver an income of 7% per year (although this is not guaranteed and could change depending on market conditions). The Fund has so far announced two distributions for the current year (ending 31 December 2022).

From 31 December 2021 to 30 June 2022, the price of Z Accumulation shares¹ on a dealing basis fell 0.70%. In comparison, the FTSE 100 (Net Total Return) Index generated a negative return of 0.99%² and the Investment Association UK Equity Income sector average generated a negative total return of 5.50%².

The Fund invests in a portfolio of large UK-listed companies and looks to distribute an income of 7% p.a. by combining the resulting dividends with a covered call option overlay strategy. The equity portfolio seeks to provide exposure that broadly mirrors the FTSE 100 index, while the option strategy allows us to generate an enhanced income by exchanging some of the potential capital growth in the stocks we own for an upfront cash payment. Our aim is to sell just enough potential capital growth across the range of holdings to meet the income target, while still benefiting from the first phase of any share price growth.

The Fund has so far announced two distributions for the current yield year (ending 31 December 2022). These equate to a percentage distribution of 1.87% for the three months ending 31 March 2022, and 1.92% for the three months ending 30 June 2022 (total of 3.78%, all figures for the Z Inc share class).

From a performance perspective, 2022 has so far provided a more challenging backdrop for equities generally. Having ignored the hawkish shift in rhetoric from Western central banks at the end of 2021, during the opening months of this year, markets then began to doubt whether inflation would prove as transitory as they had hoped. The concerns around inflation were compounded by Russia's invasion of Ukraine. This drove a jump in real bond yields which proved a challenge to equity valuations and equities sold off in tandem with bonds. The UK equity market has held up relatively well this year however, helped by its relatively high weighting in commodities and energy stocks, and limited exposure to underperforming technology names.

The Fund's equity portfolio broadly mirrors the exposure of the FTSE 100 and returns have been similar. The option strategy, while continuing to deliver the income enhancement, has been slightly negative for performance over the period as a whole, but positive in recent months as share prices have weakened. This behaviour is in line with expectations for the strategy - we would typically expect the option strategy to detract when the underlying share prices are rising, and to contribute positively when the underlying share prices are falling.

Looking ahead, we believe the Fund's income target remains sustainable, and the Fund is currently on track to deliver the 7% income objective for a second consecutive year. The dividend yield on the FTSE 100 has increased year to date, which means that we have greater flexibility in terms of the level of income taken via the options and the amount of the portfolio we overwrite – a higher underlying dividend yield means we can generate a lower proportion of the required income via the options.

The dealing price of Z Accumulation shares reflects the reinvestment of the distribution.

Co-Fund Manager:

Mike Hodgson

Head of Risk Managed Investments and Structured Funds, based in London, having re-joined Schroders in 2011

Over 35 years of experience in financial markets. Mike started his career in 1987 at J Henry Schroder & Co. Limited as Principal Interest Rate Derivatives Trader and then was promoted to Global Head of Structured Products and Equity Derivatives

In 2000, he moved to Citigroup as a result of its acquisition of J Henry Schroder where he was European Head of New Product Development In 2004, Mike joined ABN AMRO Bank NV (which then became Royal Bank of Scotland NV in 2007) as Global Head of Equity Derivatives Structuring moving on to become Head of Fund Derivatives Trading and Structuring

PhD in Physics, Cambridge University and BSc (Hons) in Physics, Imperial College, London

Co-Fund Manager:

Scott Thomson

Managing Maximiser funds since joining the Structured Fund Management team in 2009

Investment career commenced in 1995 at Morgan Grenfell Asset Management as an equity analyst

Joined Schroders in 1997, managing the deal implementation team and becoming a junior fund manager on the EAFE team; joined the Investment Process Resource Unit, a quantitative fund management team, in 2004 as assistant fund manager on an absolute return and an international 130/30 equity fund

BA (Hons) in Applied Economics, University of Abertay, Dundee

Co-Fund Manager:

Ghokhulan Manickavasagar

Joined Structured Fund Management as a fund manager in 2017

Investment career commenced in 2003 on joining Schroders' Service Management Unit

Performance Analyst at Schroders from 2006 to 2007, before becoming a Quantitative Analyst within the Multi-Asset team. Responsible for providing portfolio construction solutions and managing the Diversified Trend strategy for the Multi-Asset business. He was a member of the Strategic Investment Group Multi-Asset (SIGMA) specialising in Commodity research

MSc in Information Technology from Queen Mary, University of London

BSc in Biochemistry from Queen Mary, University of London

Co-Fund Manager:

Jeegar Jagani

Managing Maximiser funds since joining the Structured Fund Management team in 2012

Investment career commenced in 2003 at Royal London Asset Management on the performance desk before moving into the quantitative team as a Quantitative Analyst in June 2005

Joined Schroders' Portfolio Solutions team in 2008 as a fund management assistant and Fund Manager in February 2009

Chartered Financial Analyst

BSc (First) Mathematics and Computer Science (University of Surrey)

Risk Profile

Risk and reward indicator

The risk category was calculated using simulated performance data and may not be a reliable indicator of the Fund's future risk profile. The Fund's risk category is not guaranteed to remain fixed and may change over time. A Fund in the lowest category does not mean a risk-free investment.

For specific risks, including the risk and reward profile, please refer to the Key Investor Information Document available on the following website www.schroders.com.

Schroder Global Energy Transition Fund Fund Information

Investment objective and policy

The Schroder Global Energy Transition Fund (the 'Fund') aims to provide capital growth by investing in equity and equity related securities of companies worldwide that are associated with the global transition towards lower carbon sources of energy and which meet the Investment Manager's environmental, social and governance (ESG) criteria.

The Fund is actively managed and invests at least 80% of its assets in a concentrated range of equity and equity related securities of companies worldwide that contribute to the global transition towards lower carbon sources of energy, such as lower carbon energy production, distribution, storage, transport and associated supply chain material providers and technology companies. The Fund will only invest in companies that generate at least 50% of their revenue from activities contributing to the transition, or those which play critical roles in the transition and are increasing their exposure to such activities.

The Fund typically holds 30 to 60 companies.

The Fund will not invest in companies that generate any revenue from fossil fuels, nuclear power, weapons, tobacco or alcohol.

The Fund will only invest in companies that do not cause significant environmental or social harm and have good governance procedures, as determined by the Investment Manager's ESG rating (please see the Fund Characteristics section of the Prospectus for more information). These may include companies that the Investment Manager actively engages with to challenge identified areas of weakness in ESG performance, where it is confident that they will improve their ESG practices within a reasonable timeframe, which will typically be six month to two years, depending on the specific engagement topic.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the internet site https://www.schroders.com/en/uk/private-investor/strategic-capabilities/sustainability/.

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently (for more information please refer to section 10 of Appendix III of the Prospectus).

Fund characteristics

The Fund does not have a target benchmark. The Fund's performance should be compared against the MSCI Global Alternative Energy (Net Total Return) index, the MSCI All Country World (Net Total Return) index and the Investment Association Global sector average return. The comparator benchmarks have been selected because the Investment Adviser and the ACD believe that these benchmarks are a suitable comparison for performance purposes given the Fund's investment objective and policy.

S Income shares	149,116,315	47.00p	51.34p
Z Accumulation shares	32,741,348	47.33p	51.44p
Z Income shares	13,316,989	46.89p	51.22p

Review of Investment Activities

From 31 December 2021 to 30 June 2022, the price of Z Accumulation shares on a dealing price basis fell 9.26%. In comparison, the MSCI Global Alternative Energy Index generated a negative net return of 1.19%¹, the MSCI All Country World Index generated a negative net return of 10.98%¹ and the Investment Association Global sector generated a negative total return of 14.37%¹.

Energy transition shares experienced volatility in the period, reflecting the wider pressures on broader equity markets. Russia's invasion of Ukraine in late February caused a global shock. The grave human implications fed through into markets, with equities declining and commodity prices soaring, given that Russia is a key producer of several important commodities including oil, gas, and wheat. This contributed to a further surge in inflation as well as supply chain disruption.

Our underweight position in Danish wind turbine supplier Vestas Wind Systems contributed to gains in the period. Vestas has been facing a challenging environment with supply chain constraints and higher raw material costs pressuring margins. However, despite a number of short-term challenges, we remain confident of its long-term growth potential given its leading position within the expanding wind energy market and the increasing policy support for renewables.

Our position in Schneider Electric detracted from gains in the period as global supply chain problems and geopolitical issues prompted a broad sell off. However, the company continues to demonstrate better than expected organic growth and margin improvement. Schneider Electric is a global leader in the field of manufacturing power distribution and automation systems and continues to benefit from strong demand for energy efficiency solutions.

We added to some quality names such as Schneider Electric and Legrand during the period. We also took some profit and reduced risk in names that had materially outperformed, such as Enphase Energy, SolarEdge Technologies, Acciona Energia Renovables and EDP Renovaveis during the period.

Co-Fund Manager: Mark Lacey

Mark Lacey joined Schroders in 2013 Head of Resource Equities - Global Thematics Portfolio Manager of Schroder ISF Global Energy Transition fund

Portfolio Manager of Schroder ISF Global Energy fund Formerly portfolio manager of Investec Global Energy funds Formerly head of global energy at Goldman Sachs

Was previously ranked as #1 energy investment specialist in Thompson Extel survey $\,$

Career commenced in 1996 at Credit Suisse Asset Management, managing gold and resource equity funds

Co-Fund Manager: Alexander Monk

Alexander Monk is a portfolio manager for the resource equity team at Schroders. He joined Schroders in 2016 and is based in London.

Alexander was a Sustainable Investment Analyst at Schroders from 2016 to 2018, which involved analysing sustainability risks and opportunities associated with companies in the utilities and telecommunications sectors.

Qualifications: MSc in Environmental Policy and Regulation from the London School of Economics and Political Science (LSE); BA in Geography from Oxford University.

Risk Profile

Risk and reward indicator

The risk category was calculated using simulated performance data and may not be a reliable indicator of the Fund's future risk profile. The Fund's risk category is not guaranteed to remain fixed and may change over time. A Fund in the lowest category does not mean a risk-free investment.

For specific risks, including the risk and reward profile, please refer to the Key Investor Information Document available on the following website www.schroders.com.

Accounting policies

The applicable accounting policies adopted by Schroder Global Energy Transition Fund are disclosed on page 6.

Schroder Global Sustainable Growth Fund Fund Information

Investment objective and policy

The Schroder Global Sustainable Growth Fund (the 'Fund') aims to provide capital growth in excess of the MSCI All Country World (Net Total Return) Index (after the deduction of fees) over any three to five year period by investing in equity and equity related securities of companies worldwide which meet the Investment Manager's sustainability criteria.

The Fund is actively managed and invests at least 80% of its assets in a concentrated portfolio of equity and equity related securities of companies worldwide. The Fund only invests in companies that have a positive rating based on the Investment Manager's sustainability criteria (please see the Fund Characteristics section of the Prospectus for more details).

The Fund typically holds 30 to 50 companies.

The Fund only invests in companies that have good governance procedures, as determined by the Investment Manager's rating criteria (please see the Fund Characteristics section of the Prospectus for more details). These may include companies that the Investment Manager believes will improve their governance practices within a reasonable timeframe, typically six months to two years.

The Investment Manager also engages with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the website https://www.schroders.com/en/uk/private-investor/strategic-capabilities/sustainability/.

The Fund does not invest in the sectors listed in the Fund Characteristics section of the Prospectus.

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently (for more information please refer to Appendix III. Section 10: Derivatives and Forwards of the Prospectus).

Fund characteristics

The Fund's performance should be assessed against its target benchmark, being to exceed the MSCI All Country World (Net Total Return) index. The Investment Adviser invests on a discretionary basis and is not limited to investing in accordance with the composition of this benchmark. The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

Total purchases and sales

	For the period to 30.6.22 £000's	For the period to 31.12.21 £000's
Total purchases	133,052	265,614
Total sales	36,754	63,819

Fund Performance

	Number of shares in issue 30.6.22	Net asset value per share 30.6.22	Net asset value per share 31.12.21
L Accumulation shares	29,660,004	50.90p	58.65p
L Income shares	3,011,327	50.48p	58.51p
S Accumulation shares	36,285,424	51.13p	58.84p
S Income shares	362,452,314	50.48p	58.51p
X Accumulation shares	53,250,699	51.45p	59.07p
X Income shares	93,564,874	50.48p	58.52p
Z Accumulation shares	7,389,240	50.87p	58.62p
Z Income shares	2,968,628	50.44p	58.49p

Review of Investment Activities

From 31 December 2021 to 30 June 2022, the price of Z Accumulation shares on a dealing price basis fell 13.95%. In the same period, the MSCI All Country World Index generated a negative net return of 10.98% in sterling terms¹.

Global equities advanced from the end of 2021 as investors focused on economic resilience and corporate earnings. However, Russia's invasion of Ukraine in late February caused a global shock. The grave human implications fed through into markets, with equities declining and commodity prices soaring, given that Russia is a key producer of several important commodities including oil, gas, and wheat. This contributed to a further surge in inflation as well as supply chain disruption. Elsewhere, Chinese equities were negatively affected by renewed Covid-19 outbreaks, leading to new lockdowns in some major cities.

The Fund underperformed the benchmark in the period. Stock selection was negative, particularly in industrials and consumer staples. Our zero-weight allocations to energy and utilities also weighed on performance. Conversely, our holdings in financials, information technology and healthcare added value during the period. By region, our positions in Continental Europe, Japan and North America detracted from gains. Pacific ex Japan, emerging markets and the UK added value during the period.

Pharmaceutical company AstraZeneca achieved a robust performance in the period. The drugmaker reported stronger than expected Q1 sales and profit, driven by its Covid-19 vaccine, but said that it expected sales of the vaccine to fall in 2022 as there was now a global oversupply. AstraZeneca remains one of our preferred names in the sector and is one of the fastest growing large cap pharmaceutical stocks, underpinned by an attractive product line-up and strong pipeline of new products.

Global recruitment and human resources technology company Recruit Holdings detracted in the period on investor fears that the Ukraine/Russia crisis could delay the global economic recovery, weakening the jobs market. The Japanese company, which operates the Glassdoor and Indeed job recruitment websites, has managed its costs well amidst uncertainty in the global job market as a result of the Covid-19 pandemic. Recruit remains a global leader in online recruitment, and we believe it is attractively valued, well managed and well positioned for growth as the job market recovers.

We initiated a new position in Australian financial services company Macquarie Group during the quarter. We sold our holding in Bank Central Asia and trimmed our positions in Alphabet, Nestle and Texas Instruments during the period.

Co-Fund Manager: Katherine Davidson

Katherine joined Schroders as a graduate in the Global and International Equities team in 2008. Katherine is the lead portfolio manager of the Global Sustainable Growth Fund and is a Sustainability Specialist within the team. She has managed the Global Sustainable Growth Fund since its inception in 2010. Katherine is also one of the team's Global Sector Specialists and has responsibility for the consumer discretionary sector.

Katherine is a CFA Charterholder.

Co-Fund Manager: Charles Somers

Charles is a Portfolio Manager for the Schroder ISF Changing Lifestyles, Schroder ISF Global Sustainable Growth, and a specialist institutional global equity portfolio. He also has global sector responsibility for consumer staples and discretionary as one of the team's Global Sector Specialists.

Charles initially joined Schroders in 1998 as a research analyst on the US desk in London. In 2001 he was seconded to Schroders' New York office, where he covered healthcare and financial stocks. He returned to London in 2002 to join the Pan European research team, taking responsibility for the consumer staples sector. In 2006 Charles left Schroders to take a position as a portfolio manager at Intrinsic Value Investors, a long-only fund management company focused on European equities. He returned to Schroders in 2008 to take the position of Global Sector Specialist for consumer discretionary and consumer staples.

Charles is a CFA Charterholder.
