#### Who we are

At Janus Henderson our mission is to help clients define and achieve superior financial outcomes through differentiated insights, disciplined investments, and world-class service. This means being ever mindful of the futures of the millions of lives that our thinking and our investments help shape. Our diverse client base and robust balance sheet allow us to offer financial strength and stability with which to help investors achieve their objectives.

The human connection matters in all that we do. Teams across Janus Henderson come together every day to deliver outcomes for our clients – and their clients – that make a difference. We are proud of this responsibility as we fulfil our purpose of 'Investing in a brighter future together'. The goals we set, the strategy we create, and the way that we work are all shaped with this ultimate objective in mind.

#### Why us

Choosing Janus Henderson means benefiting from:

#### **Differentiated insights**

- · We are proud of our deep-rooted research culture, which has underpinned our 89-year track record of investing.
- Janus Henderson's investment teams meet thousands of companies each year. Insight from these meetings combined with proprietary analysis results in original views that shape our investment positioning.
- With 340 investment professionals around the world, we benefit from a range of perspectives that we test and share as we seek to differentiate between the winners and losers on behalf of our clients.

#### **Disciplined investments**

- Our investment teams set clearly defined objectives and processes to deliver long-term risk-adjusted returns. We value the trust clients place in us and are disciplined in staying true to our investment style through all market conditions.
- We apply robust controls to ensure that risk taken is in accordance with client expectations and investment manager expectations. We have more than 150 experts in our risk and compliance teams.

#### World class service

- We offer global reach with our broad network of investment and client service specialists. This is combined with the responsiveness, tailored solutions, and personal touch of a local partner.
- Understanding the challenges our clients and their clients face globally, and working in partnership, means we can provide support as we blend our best ideas and capabilities to define appropriate tailored outcomes.
- We seek to contribute to clients' understanding and decision-making we share knowledge through published insights, at events, and by actively participating in debate on the future of investing.

#### Authorised Fund Manager's report for the six months ended 30 November 2023

We are pleased to present the Interim Report & Accounts for Janus Henderson Multi-Manager Diversified Fund (the 'fund') for the six months ended 30 November 2023.

#### Authorised status

This fund is an authorised unit trust scheme and a United Kingdom Undertakings for Collective Investment in Transferable Securities (UK UCITS) scheme complying with chapter 5 of the Collective Investment Scheme Sourcebook (COLL). The operation of the scheme is governed by the Trust Deed, COLL and Prospectus.

The fund was established by a Trust Deed dated 17 May 1991 and authorised by the Financial Conduct Authority (FCA) on 9 May 1991.

Unitholders are not liable for the debts of the fund.

#### Statement of Authorised Fund Manager's responsibilities

The FCA's COLL requires the Authorised Fund Manager (AFM) to prepare financial statements for each annual accounting year and interim accounting period, which give a true and fair view, in accordance with the Statement of Recommended Practice (SORP) for Authorised Funds issued by the Investment Management Association (IMA) in May 2014 and amended in June 2017, UK Generally Accepted Accounting Practice (UK GAAP) (UK Accounting Standards, comprising the Financial Reporting Standard 102 (FRS 102) applicable in the UK and Republic of Ireland), of the financial affairs of the fund and of its revenue/expenditure for the period. The AFM is responsible for the management of the fund in accordance with its Trust Deed, Prospectus and the Regulations. The AFM is also responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

#### Value assessment

The board of Janus Henderson Fund Management UK Limited (JHFMUKL) present the value assessment report for the period to 31 December 2022, made available on our website www.janushenderson.com.

Access by this link (https://www.janushenderson.com/en-gb/investor/notice/value-assessment-report).

The FCA, the UK's financial services regulator, requires all fund management groups to perform a detailed assessment of whether funds are providing value to investors, and publish an annual statement summarising the outcome of this process, known as the value assessment. Our report is published by JHFMUKL, the Board of the AFM (the body responsible for an investment fund) and summarises the period to 31 December 2022. For the period to 31 December 2023, the report is expected to be published on our website at the end of April 2024.

The value assessment considers a minimum of seven criteria set by the FCA. While investment performance and quality of service are clearly important factors, costs and charges paid by investors are also key considerations. At Janus Henderson, ensuring value is delivered to investors has always been central to our process and therefore the value assessment is an extension to the existing ongoing monitoring processes that provide oversight of how the funds are managed.

The report contains an overview of the process that Janus Henderson undertook to perform this assessment along with the conclusions.

#### Macro risks

The Investment Manager continues to monitor closely macro risks, including geopolitical risks, such as the ongoing impact of the Russia/Ukraine conflict and the conflict in the Middle East, market risks, such as stresses in the banking sector and the higher inflationary and interest rate environment. We have established processes to be able to respond timely to changes. We have well-established and tested business continuity and crisis management processes in place, which cover a large number of disruptive scenarios, including cyber threats and market events. The Investment Manager also has embedded market risk monitoring processes, including modelling potential stressed market scenarios, to help inform our investment decisions.

#### **Investment Fund Managers**

Tihana Ibrahimpasic, James de Bunsen and Peter Webster

Please note that with effect from 7 July 2023 Paul O'Connor no longer manages this fund. James de Bunsen and Peter Webster now co-manage this fund with Tihana Ibrahimpasic.

#### Investment objective and policy

The fund aims to provide a return, from a combination of capital growth and income over the long term.

Performance target: To outperform the IA Mixed Investment 0-35% Shares Sector average, after the deduction of charges, over any 5 year period.

The fund invests in Collective Investment Schemes (CIS) (other funds including those managed by Janus Henderson and Exchange traded funds (ETFs)) to provide diversified global exposure to a range of assets including shares (equities) of companies, bonds issued by companies and governments, and to a lesser extent, alternative assets such as property, commodities, private equity and hedge funds. The fund may also invest directly in other assets including developed market government bonds, investment trusts, cash and money market instruments.

The Investment Manager may use derivatives (complex financial instruments) with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the IA Mixed Investment 0-35% Shares Sector average, which is based on a peer group of broadly similar funds, as this forms the basis of the fund's performance target and limits the level of exposure the fund may have to company shares. The Investment Manager has a high degree of freedom to choose individual investments for the fund and to vary allocations between asset types within the constraints of the sector.

#### Strategy

The Investment Manager believes that asset allocation opportunities are generated by inefficient markets over short term periods and the fund's asset mix is actively adjusted to reflect this and to reduce overall risk. The fund will allocate across regional equities, the entire bond universe, alternative asset classes such as property and commodities and cash in weights cognisant of the benchmark index. Asset allocation views can be formed on the grounds of fundamental research, asset class valuations, market sentiment, investor positioning, news flow, technical factors and diversification. Investments are implemented primarily through actively managed funds, while passive (index tracking) instruments (primarily ETFs or derivatives) are used for short term tactical trades or for low cost implementation of pure macroeconomic views. The fund may also hold up to 20% in developed market government bonds.

#### Performance summary

Cumulative performance	Six months 31 May 23 - 30 Nov 23 %	One year 30 Nov 22 - 30 Nov 23 %	Three years 30 Nov 20 - 30 Nov 23 %	Five years 30 Nov 18 - 30 Nov 23 %	Since inception 29 May 91 - 30 Nov 23 %

Class I accumulation (Net), NAV to NAV, net of fees and net income reinvested as at 12 noon valuation point.

Class I accumulation is disclosed as it is the representative unit class.

#### Performance summary (continued)

#### Benchmark usage:

Peer group: IA Mixed Investment 0-35% Shares Sector

Peer group usage: Target

Peer group description: The Investment Association (IA) groups funds with similar geographic and/or investment remit into sectors. The fund's ranking within the sector (as calculated by a number of data providers) forms the basis of the fund's performance target.

Past performance does not predict future returns. The value of an investment and the revenue from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested.

#### Investment review

The fund returned 0.4% based on Class I accumulation (Net) over the period under review, compared with a return of 1.6% in the IA Mixed Investment 0-35% Shares Sector peer group benchmark.

Global equities, as measured by the MSCI World Index, increased by 6.7% in sterling and 9.0% in US dollar terms during the reporting period as inflation cooled and major central banks neared the end of their interest rate hiking campaigns. Markets surged in November – global equity benchmark the MSCI ACWI Index achieved its strongest monthly performance in three years – as investors grew increasingly hopeful that policy makers would cut rates in 2024. However, bouts of uncertainty regarding the direction of monetary policy and anxiety about a global economic downturn dampened sentiment during the period.

In fixed income, the JPM Global Government Bond Index fell by 3.4% in sterling and 1.3% in US dollar terms. Yields on core government bond markets generally increased (prices fell, reflecting their inverse relationship). The US 10-year Treasury yield hit a 16-year high in October – on expectations that interest rates would stay higher for longer. However, yields fell sharply in November as most major central banks appeared close to the end of their monetary tightening campaigns and on growing expectations that rate cuts would follow in 2024. Corporate credit markets, as measured by the Barclays Global Aggregate Corporate Bond Index, performed positively, with investors taking advantage of relatively high yields in credit markets.

In commodity markets, oil prices rose as output cuts by major producers tightened supply, although uncertainty about demand exerted downward pressure towards the end of the period. US crude benchmark West Texas Intermediate, which hit a 2023 high of above US\$90 per barrel in September, ended the period up by more than 10%. Spot gold prices increased and neared a record high in November – they briefly hit an all-time high shortly after the end of the period – as major central banks slowed the pace of monetary tightening and the US dollar weakened.

The fund's equity allocations delivered a positive contribution overall. The fixed income and alternatives holdings detracted, although foreign exchange exposure helped to offset some of these losses.

Within equities, the best performance came from holdings in the Dodge & Cox Worldwide US Stock Fund, the Jupiter UK Special Situations Fund and the iShares Edge MSCI USA Quality Factor UCITS ETF. The main detractors included the WS Lindsell Train UK Equity Fund Income and the FSSA Japan Equity Fund. Within fixed income, the largest losses came from sovereign bonds. High-yield bonds made a positive contribution, while there were smaller gains across other asset classes. Within foreign exchange, hedging of US dollar exposure was a significant contributor, while hedging of the euro was a small positive. Within alternatives, the largest detractors were the macro-focused strategies, followed by a small negative return from real assets. Commodity and private equity holdings made small positive contributions.

The allocations to fixed income and alternatives were reduced during the period, while the cash holding increased. The overall allocation to equities increased slightly. Most of the decline in the fixed income exposure stemmed from reductions to the investment-grade bond, high-yield bond and emerging market debt allocations. There was a small increase in the fund's government bond position, mainly through US Treasuries and euro bonds. Key changes within equities included a reduction in the UK position and increases in the US, Europe excluding the UK and Japanese holdings. Within alternatives, we halved the position size in physical gold following the precious metal's strong performance.

Debates about whether there will be a recession in 2024 continued to rage as interpretations of incoming economic data varied. We remain concerned about the delayed effects of previous monetary policy tightening and the impact that this might have on companies and consumers in 2024. Unemployment is already meaningfully off its low levels in the US and UK – a worrying signal in prior cycles.

At the same time, global equities and credit continue to show limited signs of concern at an aggregate level. High equity valuations, in aggregate, and peak earnings in many regions suggest investors are still fairly sanguine about downside risks. However, this masks some of the details as various regional stock markets appear attractively valued, in our view, with global equities mainly being driven higher by seemingly more expensive US growth stocks.

Within fixed income, credit spreads generally remain tight. This suggests little concern about the outlook, despite rising default rates in lower-quality assets. This switch to a much more dovish outlook has contributed to the recent significant rally in sovereign bonds. While these more defensive assets have seen their valuations move higher, we think they can still offer diversification benefits in the event of an economic 'hard landing' (recession). Overall, the fund remains well diversified across asset classes and regions, given the range of potential risks faced over the next year.

Performance values are at close of business on a bid basis, which will differ from those in the Performance summary.

#### **Operating charges**

Operating charges are expenses associated with the maintenance and administration of the fund on a day-to-day basis that are actually borne by the unit class.

#### Unit class launches and closures

There were no unit classes launched or closed during the period.

# **Ongoing charge figure**

The annualised ongoing charge figure (OCF) of the fund is calculated as the ratio of the total ongoing charges to the average net asset value for twelve months. Ongoing charges are all expenses deducted from the assets of the fund during the period, except for expenses that are explicitly excluded by regulation.

	30/11/23 %	31/05/23 %
Class A accumulation	1.60	1.64
Class A income	1.60	1.64
Class B accumulation <sup>1</sup>	0.84	0.88
Class E accumulation	1.10	1.14
Class E income	1.10	1.14
Class I accumulation	0.90	0.93
Class I income	0.90	0.93

The OCF includes a synthetic element of 0.16% (31/05/23: 0.19%) to incorporate the OCF of underlying funds.

The OCF is calculated in accordance with guidelines issued by the European Securities and Markets Authority (ESMA).

<sup>&</sup>lt;sup>1</sup> Class B accumulation units are no longer available for new investment.

### Risk and reward profile

The fund currently has 7 types of unit class in issue: A accumulation, A income, B accumulation, E accumulation, E income, I accumulation and I income.

Each unit class has the same risk and reward profile which is as follows:

Typically lower potential				Typica	lly higher potential	
risk/reward					risk/reward	
◀						
Lower risk						Higher risk
1	2	3	4	5	6	7

The unit classes appear at 4 out of 7. Units in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

The Synthetic Risk and Reward Indicator (SRRI) is calculated based on historical volatility over a rolling five\* year period, it is reviewed monthly and updated if volatility has changed materially to cause a movement in the SRRI level. The SRRI is an indicator and may not accurately reflect future volatility and market conditions.

The value of an investment and any income from it can go up or down. When you sell your units they may be worth less than you paid for them.

The rating above is based on the historic volatility of the unit classes. Historic data may not be a reliable indication of the future risk profile of the fund. The rating is not guaranteed and may change over time.

Other material risks not captured by the rating:

Charges to Capital Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

**Counterparty Risk and Operational Risk** The fund could lose money if a counterparty with which the fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

**Credit Risk** An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the fund. If this happens or the market perceives this may happen, the value of the bond will fall.

**Derivatives and Leverage** The fund may use derivatives to help achieve its investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses to the fund may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

**Exchange Rates** If the fund holds assets in currencies other than the base currency of the fund, or you invest in a share/unit class of a different currency to the fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates.

**Interest Rates** When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

**Liquidity** Securities within the fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

**Underlying Funds** The fund invests in other funds (including ETFs and investment trusts/companies). This may introduce more risky assets, derivative usage and other risks associated with the underlying funds, as well as contributing to a higher level of ongoing charges.

The full list of the fund's risks are contained in the 'Risk Warnings' section of the fund's prospectus.

There has been no change to the risk rating during the period.

The SRRI conforms to the ESMA guidelines for the calculation of the SRRI.

\* Class E accumulation and Class E income launched on 24 June 2019. As these unit classes do not have a five year history, a synthetic history has been created using the A accumulation and A income unit classes, respectively.

# Notes to the financial statements for the six months ended 30 November 2023

#### Accounting policies

#### **Basis of preparation**

The interim financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the SORP for UK Authorised Funds issued by the IMA in May 2014 and amended in June 2017, FRS 102, the FCA's COLL, the Trust Deed and Prospectus.

The financial statements have been prepared on a going concern basis.

The accounting policies, distribution policy and potential risks are consistent with those of the financial statements for the year ended 31 May 2023 and are described in those annual accounts.

#### **Appendix - additional information**

#### Securities financing transactions

The fund engages in securities financing transactions (SFTs) (as defined in Article 3 of Regulation (EU) 2015/2365, as amended by the Transparency of Securities Financing Transactions and Reuse (Amendment) (EUR Exit) Regulations 2019, SFTs include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions). In accordance with Article 13 of the Regulation (EU) 2015/2365, as amended by the Transparency of Securities Financing Transactions and Reuse (Amendment) (EU Exit) Regulations 2019, the fund's involvement in and exposures related to securities lending for the six months ended 30 November 2023 are detailed below.

#### Global data

There was no stock on loan and no collateral held in respect of SFTs as at 30 November 2023.

#### Re-use of collateral

Cash collateral may be reinvested during the loan transaction to generate additional returns for the benefit of the sub-fund, however there was no collateral reinvested during the period.

#### Return and cost on securities lending activities

The following table details the fund's return and costs for each type of SFTs for the period ended 30 November 2023:

Fund	Total gross amount of stock lending revenue £000	Direct and indirect costs and fees deducted by securities lending agent £000	Net stock lending revenue retained by the fund £000	% return retained by the securities lending agent	% return retained by the fund
Janus Henderson Multi-Manager Diversified Fund*	-	-	-	8	92

<sup>\*</sup> Due to rounding to the nearest thousand, stock lending revenue and commission are below the minimum reporting threshold.
