Rathbone Greenbank Global Sustainability Fund (S Acc)

A sub-fund of Rathbone Greenbank Global Sustainable Portfolios
Authorised Corporate Director: Rathbones Asset Management Limited
S Acc ISIN GBOBDZVKB97

OBJECTIVES AND INVESTMENT POLICY

We aim to deliver a greater total return than the FTSE World Index, after fees, over any five-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (dividend return because we want to offer you higher returns than global stock markets.

We also compare our fund against the Investment Association (IA) Global sector to give you an indication of how we perform against other funds in our peer group. Like us, the funds in this sector invest globally, although most of them don't invest using a sustainability framework.

We will invest at least 80% of our fund in global shares, with the remainder in cash, short-term deposits and UK government debt. We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within five years.

Our fund's ethical and sustainability criteria are applied by Rathbone Greenbank Investments, an ethical research division of our company, which cannot be influenced by our fund managers. Companies are assessed against positive and negative social and environmental criteria. For us to invest in a company, it must satisfy at least one of the following: strong employment practices, sustainable environmental practices or community engagement and commitment to human rights.

We do not invest in companies engaged in the following:

- Alcohol manufacturing (>10% of sales);
- Poor employment practices; Supplying the nuclear power industry (>5% of sales);
- Alcohol retail (>25% of sales);
- Polluting the environment;
- Pornography production;
- Animal welfare violations;
- Gambling (>5% of sales);
- Pornography retail (>5% of sales);
- Armaments;
- Human rights abuses;
- Tobacco manufacturing;
- Carbon-intensive industries;
- Nuclear power generation (>10% of electricity output);
- Tobacco retail or supply of equipment/packaging to manufacturers (>5% of sales)

Our fund is designed for investors with a basic knowledge of shares who seek growth. You should intend to invest for longer than five years, understand the risks of our fund and have the ability to bear a capital loss.

You can buy and sell shares on each business day of the fund between 9am and 5pm.

The fund offers accumulation shares (shares in which any dividends received are added to the share price) and income shares (shares in which any dividends received are paid to the shareholder).

RISK AND REWARD PROFILE

These numbers rate how the Fund may perform and the risk of losing some or all of your investment. In general the potential for higher returns also implies a higher level of risk. However, the lowest category (1) does not mean a risk free investment. The risk category is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time.

The risk indicator for this fund reflects the following:

- As an asset class, shares have greater risk than either bonds or money market instruments.
 - As this fund is less than five years old, the indicator is not based solely on actual performance.
- The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your shares.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Sustainability Risk: Returns could deviate from the market or funds that don't promote environmental or social characteristics, or that don't avoid investments/sectors e.g., oil, tobacco.

Liquidity risk: Some assets become hard to sell at their expected price, especially in times of market stress. This could mean we have to sell assets below their expected price resulting in a loss. In extreme circumstances, we may suspend the fund to protect your investment, resulting in you being unable to access your money.

Counterparty risk: A company that we deal with may renege on its obligations, costing you money

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money

Currency risk: We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

Concentration risk: The fund invests in a small number of investments. This means that the performance of a single stock within the portfolio has a greater effect on the value of the fund. This can result in large gains or losses based on the performance of a single stock.
