This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Fund's current Prospectus shall have the same meaning herein.

GAM Star Global Growth

hereafter the "Fund", a sub-fund of GAM Star Fund p.l.c.

Z Acc - GBP (the "Share Class") **ISIN: IE00B8H60G28**

Manager: GAM Fund Management Limited part of GAM Group AG.

Objectives and investment policy

- The investment objective of the Fund is to achieve long term capital growth.
- The Fund seeks to achieve this objective by investment primarily in open ended collective investment schemes which gain exposure to equities (e.g. shares), Fixed Income Securities (with no restriction on the minimum credit rating), property, commodities and currencies.
- It is intended that the Fund will maintain a bias towards growth and may invest up to 100% of net assets in equities. The Fund's exposure to Fixed Income Securities, property, commodities and currencies may be on an ancillary basis.
- Macro considerations will be used in determining the allocation of investments in order to achieve the Fund's investment objective.
- The Fund is considered to be actively managed in reference to Lipper Global Mixed Asset GBP Flexible/ Average 1 month deposit rate (the "Benchmarks") by virtue of the fact that it uses the Benchmarks in the appropriate currency for performance comparison purposes. However, the Benchmarks are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the Benchmarks.
- Shares in the Fund can be bought and sold daily (every Business Day of the Fund).
- The Fund has several share classes. These may differ with regard to fees, minimum investment, currency, use of revenues and investor qualification.
- Any income arising from this Share Class will be accumulated. Other share classes of the Fund may distribute income.
- The fund manager has discretion in managing the investments of the Fund.
- The Fund may use a number of simple derivative instruments for investment purposes and/or efficient portfolio management purposes. Further information on the Fund's use of derivatives can be found under the Derivatives section within the Fund's Supplement. Although the use of derivatives may give rise to an additional exposure any such additional exposure will not exceed the Fund's Net Asset Value.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The risk indicator is based on the volatility of the Fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by proxy fund, benchmark data or a simulated historical series as appropriate.

- The Fund is assigned to the above category based on its historical fluctuations in value.
- The indicator helps investors to have a better understanding of the potential gains and losses related with the Fund. In this context, even the lowest category does not represent a risk-free investment.
- This profile is determined using historical data, as such may not be a reliable indication for the future risk profile. It is not guaranteed and may shift over time.
- This allocation to a risk category may change over time because the future performance of the Fund may fluctuate differently from in the past.
- The Fund does not offer the investor a guaranteed return. Nor does it guarantee the fixed repayment of the money invested in the Fund by the investor.

Further risks that may have a significant effect on the net asset value of the Fund include:

- **Liquidity Risk (Fund of Funds):** investments in other funds are subject to the liquidity of those underlying funds. If underlying funds suspend or defer payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected.
- **Credit Risk / Debt Securities:** bonds may be subject to significant fluctuations in value. Bonds are subject to credit risk and interest rate risk.
- **Operational Risk / Third Parties:** investments in other funds have direct and indirect dependence on other service providers. The Fund may suffer disruption or loss in the event of their failure.
- **Currency Risk - Non Base Currency Share Class:** non-base currency share classes may or may not be hedged to the base currency of the Fund. Changes in exchange rates will have an impact on the value of shares in the Fund which are not denominated in the base currency. Where hedging strategies are employed, they may not be fully effective.
- **Capital at Risk:** all financial investments involve an element of risk. Therefore, the value of the investment and the income from it will vary and the initial investment amount cannot be guaranteed.
- **Equity:** investments in equities (directly or indirectly via derivatives) may be subject to significant fluctuations in value.

The "Risk Factor" section of the Prospectus and the "Risk Factor" section of the Fund Supplement for this Fund give you more details about all the risks for the Fund – see under "Practical Information" for how to obtain a copy.
