

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Overstone Global Equity Income Fund Class J

A sub Fund of The Overstone Fund

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00B75M3558 ISIN (Income): GB00B75KB221

Objectives and Investment Policy

The Fund's objective is to achieve income and some capital growth, (net of fees) over the longer term (5 years or more).

The Investment Manager will actively manage the Fund. This means that the Investment Manager actively makes decisions about how to invest the Scheme Property of the Fund (and which investments to buy and sell) instead of simply following a market index.

To achieve the objective the Fund will invest in a diversified global portfolio which may include investing up to 100% in equity markets. Although the Fund will be geographically diversified, it will have a concentrated portfolio since it will typically have 15-40 holdings. The Fund may also invest in fixed income assets (up to 30%) e.g. corporate and government bonds, warrants, money market instruments, deposits, cash and near cash. Investment will be made directly but may include indirect exposure through the use of collective investment schemes. No more than 10% of the Fund's assets may be invested in units in other collective investment undertakings. Investment in other collective investment schemes may include those managed or operated by the ACD.

The Fund will be permitted to invest in derivatives for EPM purposes only (including hedging).

The Company uses the Morgan Stanley Capital International (MSCI) World Index and the Morgan Stanley Capital International (MSCI) World High Dividend Yield Index for performance comparison purposes only and the benchmark is not a target benchmark and the Company is not constrained by it.

The indices have been selected as a benchmark for performance because the constituents are representative of the areas in which the Company itself is likely to invest, and it is therefore an appropriate comparator for the Company's performance.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 10.30 pm.

Risk and Reward Profile

The risk rating of the Fund is category 6 due to the volatility of the Fund price which sits in a range of between 15% and 25%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- The Fund has a concentrated portfolio (holds a limited number of investments) and if one or more of these investments declines or is otherwise affected, it may have a pronounced effect on the Fund's value.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- More political, economic or structural challenges face emerging markets or less developed countries than developed countries which may increase volatility and uncertainty.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

| | |
|--------------|------|
| Entry Charge | None |
|--------------|------|

| | |
|-------------|------|
| Exit Charge | None |
|-------------|------|

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out

| | |
|-----------------|-------|
| Ongoing charges | 1.00% |
|-----------------|-------|

Charges taken from the Fund under certain specific conditions

| | |
|-----------------|------|
| Performance fee | None |
|-----------------|------|

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 30th September 2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Charges and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

Performance source: Morningstar Direct

(a) The Fund launched in 2011

(b) The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up
