

WS Wise Multi-Asset Income B Inc

Objectives and investment policy

Investors can redeem units on demand, at the daily valuation point of 12 noon (UK time) when this is a normal business day in the UK. For income units, any income received is paid out to you monthly. For accumulation units, any income received is reflected in the price of units. Recommendation: this fund may not be appropriate for investors who plan to withdraw their money in the short-term (within 5 years). The Fund should be viewed as a medium to long-term investment only.

- The Fund is in the above risk category because it invests in a variety of asset classes, but with a bias towards shares.
- A limited number of investments may be held which has the potential to increase the volatility of performance.
- The lowest category does not mean a fund is a risk free investment.
- The value of investments may go down as well as up in response to general market conditions and the performance of the assets held. Investors may not get back the money which they invested.
- There is no guarantee that the Fund will meet its stated objectives and where there is more than one objective there may be periods where not all of the objectives are being met.
- The Fund invests in global shares, with some regions being regarded as more risky. The movements of exchange rates may lead to further changes in the value of investments and the income from them.
- Whilst the intention of using derivatives is to reduce risk, this outcome is not guaranteed and derivatives involve additional risks which could lead to losses.
- There is a risk that any company providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund
