

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Listed Private Capital Fund, a US Dollar denominated sub fund of the abrdn SICAV I, X Acc GBP Shares (ISIN: LU2444841238). This fund is managed by abrdn Investments Luxembourg S.A.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The Fund aims to achieve a combination of income and growth by investing in shares of companies or funds which invest in global private capital markets.

The Fund aims to outperform the MSCI World Net Total Return Index (USD) benchmark (before charges).

Investment Policy

Portfolio Securities

- The Fund invests at least two-thirds in a diversified portfolio of equity and equity-related securities that provide exposure to global private capital markets. This can include shares of Closed-Ended Funds whose main business activity is to make or manage investments, directly or indirectly, in private equity and private debt markets.
- The Fund may have exposure to currencies other than the Base Currency of up to 100% of its Net Asset Value.

Management Process

- The Fund is actively managed.
- The LPX Composite Listed Private Equity Index (USD) and the S&P Listed Private Equity Net Total Return Index (USD) are used as a reference point for portfolio construction.
- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components of and their respective weightings in the benchmark.
- abrdn integrate environmental, social and governance (ESG) considerations within the investment process. Details of the Equity ESG Integration Approach are published at www.abrdn.com under "Sustainable Investing".

Derivatives and Techniques

- The Fund may utilise financial derivative instruments for hedging and/ or investment purposes, or to manage foreign exchange risks. The use of derivatives for investment purposes is expected to be very limited, mainly in those cases where there are significant inflows into the Fund so that cash can be invested while the investment in equity and equity related securities is maintained.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The Fund invests in companies that are listed on stock markets. The value of these companies is driven by the growth and performance of the underlying private market assets in which they invest. Private market assets have different or additional risks when compared to public market assets. Such risks include the use of leverage (debt), which may magnify losses in adverse market conditions, and reduced transparency in terms of the performance and valuation of private market investments. Because private market assets liquidity is lower than for public market assets and more dependent on a favourable realisation environment when such assets are sold.
- Closed-ended funds (Investment Trusts) may trade at a discount or premium to the value of their underlying assets, meaning that investors in the Fund are exposed to changes in these premiums or discounts as well as changes to the value of the underlying assets held by such funds. A reduction in the premium or an increase in the discount will negatively impact investors' returns.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as

up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Where the share class is described as "hedged", currency hedging techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to the currencies within the fund. Such techniques also give rise to additional risks and costs.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	0.66%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser. The Ongoing Charges figure is an estimate based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund. An estimate is used in order to provide the figure that will most likely be charged. The ongoing charges figure is at 05/06/2023.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

For more information about charges, please see the Prospectus which is available at www.abrdn.com.
