

### Nutrition Fund

A sub-fund of BlackRock Global Funds

Class D2 GBP Hedged

ISIN: LU0827887943

Management Company: BlackRock (Luxembourg) S.A.

## Objectives and Investment Policy

- ▶ The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets.
- ▶ The Fund invests globally at least 70% of its total assets in the equity securities (e.g. shares) of companies engaged in any activity forming part of the food and agriculture value chain as described in the prospectus.
- ▶ The Fund invests in companies which are actively combatting global sustainability challenges within the nutrition theme across the sustainable nutrition trends described in the prospectus. The companies are rated by the Investment Adviser (IA) based on their ability to manage the risks and opportunities associated with the nutrition theme and their environmental, social and governance (ESG) risk and opportunity credentials.
- ▶ The Fund adopts a "best in class" approach to sustainable investing. This means that the Fund selects the best issuers (from an ESG perspective) for each relevant sector of activities (without excluding any sector of activities). More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes. The Fund may gain limited exposure to issuers that do not meet the nutrition and/or the ESG criteria described above.
- ▶ The investment universe of the Fund is represented by any company worldwide which, in the opinion of the IA, prioritises changing consumer preferences towards nutrition as a key strategic driver of its business ("Factset Nutrition Universe"). The weighted average ESG rating of the Fund will be higher than the ESG rating of the Factset Nutrition Universe after eliminating at least 20% of the least well-rated securities from the Factset Nutrition Universe.
- ▶ The IA may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets). Any ESG rating or analysis referenced above will apply only to the underlying securities of FDI's used by the Fund
- ▶ The Fund is actively managed. The IA has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The MSCI All Countries World Index should be used by investors to compare the performance of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be non-distributing (i.e. dividend income will be included in their value).
- ▶ The Fund's base currency is US Dollar. Shares for this class are bought and sold in Sterling. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$100,000 or other currency equivalent.

## Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
  - ▶ The risk category shown is not guaranteed and may change over time.
  - ▶ The lowest category does not mean risk free.
  - ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - Investments in agriculture securities are subject to environmental or sustainability concerns, taxes, government regulation, price and supply changes.

- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2023. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
