

# Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## The Jupiter Global Fund - Jupiter Japan Select (the 'Fund'), a sub-fund of The Jupiter Global Fund (the 'Company')

Class L GBP A Inc (ISIN - LU0425093027)

The management company is Jupiter Asset Management International S.A. ("the Management Company").

### Objectives and investment policy

The Fund's objective is to achieve long term capital growth. The Fund will invest primarily in the shares and share-related securities of companies which have their registered office or exercise the predominant part of their economic activities in Japan. Up to 20% of the Fund's assets (excluding liquid assets) may be invested in the shares of companies based elsewhere in Asia.

The Fund will invest primarily in equity and equity related securities (including listed preference shares, listed convertible unsecured loan stock, listed warrants, depositary receipts and other similar securities) of companies which have their registered office or exercise the predominant part of their economic activities in Japan (or, in the case of UCITS or other UCIs, are dedicated to investments in Japan).

The Fund promotes environmental and social characteristics on an ongoing basis within the scope of Article 8 of the Sustainable Finance Disclosure Regulation. The environmental and social characteristics selected for the Jupiter Japan Select include the promotion of the transition to a low carbon economy and the upholding of responsibilities to people and planet.

#### Benchmark Information

TSE TOPIX

The Fund is actively managed and uses the benchmark for index performance comparison purposes only. This means the Investment Manager is taking investment decisions with the intention of achieving the Fund's investment objective without reference to a benchmark. The Investment Manager is not in any way constrained by a benchmark in its portfolio positioning.

Any income arising in relation to this share class is distributed on an annual basis. By default this distribution will be automatically reinvested to purchase more shares, unless you inform us that you wish to receive this income.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- **Derivative risk** - the Fund may use derivatives to reduce costs and/or the overall risk of the Fund (this is also known as Efficient Portfolio Management or "EPM"). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund.
- **Currency (FX) Risk** - The Fund can be exposed to different currencies and movements in foreign exchange rates can cause the value of investments to fall as well as rise.
- **Pricing risk** - Price movements in financial assets mean the value of assets can fall as well as rise, with this risk typically amplified in more volatile market conditions.
- **ESG** - Investments are selected or excluded on both financial and non-financial criteria. The Fund's performance may differ from the broader market or other Funds that do not utilise ESG criteria when selecting investments.
- **Charges from capital** - Some or all of the Fund's charges are taken from capital. Should there not be sufficient capital growth in the Fund this may cause capital erosion.
- For a more detailed explanation of risk factors, please refer to the "Risk Factors" section of the Prospectus.

## Charges

### One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out. In some cases, you might pay less and you can find out the actual entry and exit charges from your financial adviser or distributor.

### Charges taken from the Fund over a year

Ongoing charges	1.72%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure is based on the annual charges as detailed in the prospectus. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- Conversion fee of up to 1.00% of the gross amount being converted may be applied for conversions between classes of the same sub-fund and from one sub-fund to another sub-fund.
- For detailed information about charges, please refer to the Company's prospectus, section "General Information".

## Past performance

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 01/07/2009
- Share/unit class launch date: 01/07/2009
- This chart shows the past performance of the Fund over the last ten full calendar years. If the Fund was launched less than ten years ago, performance is shown since launch. This performance illustration is calculated after the effect of ongoing charges but does not take into account commissions and costs incurred on the issue and redemption of shares. Performance is shown in the base currency of the share class shown.
