M&G Episode Growth Fund

a sub-fund of M&G Investment Funds (4)

Sterling Class I – Income shares ISIN no. GB00B708D148

Managed by M&G Securities Limited

Objective and investment policy

Objective: The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, that is higher than the average return of the IA Mixed Investment 40-85% Shares Sector over any five-year period.

Core investment: The fund typically invests in a mix of assets, including company shares, bonds, convertibles and currencies. The fund may invest in these assets directly, via derivatives or through other funds. At least 25% of the fund is held in sterling and at least 50% of the fund is held in US dollar, sterling, yen and euro combined.

Other investments: The fund may invest in other assets (such as property) via derivatives or through other funds.

Derivatives usage: For investment purposes and to reduce risk and costs.

Strategy in brief: The fund has a very flexible investment approach, with the freedom to invest in different types of assets in response to changes in economic conditions and the valuation of assets. The fund typically invests 40-85% of its assets in company shares and convertibles, 15-50% in bonds or cash, and up to 10% in other assets. These allocations reflect the net exposure of the portfolio. The approach combines in-depth research to work out the "fair" value of assets over the medium to long term, with analysis of market reactions to events to identify investment opportunities. In particular, the fund manager seeks to respond when asset prices move away from a reasonable sense of "fair" long term value due to the market's reaction to events.

Benchmark: IA Mixed Investment 40-85% Shares Sector

The benchmark is a target which the fund seeks to outperform. The sector has been chosen as the fund is a constituent of the sector. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund.

For unhedged and hedged share classes, the benchmark is shown in the share class currency.

Other information

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund may be paid out to you quarterly.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

■ The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 5 because its Net Asset Value has shown medium to high rises and falls in value historically.

■ The risk number shown is not guaranteed and may change over time.

■ The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

■ The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

■ Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

■ The fund invests in other funds, which are subject to the risks associated with the type of assets held in those funds.

■ The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.

■ Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

■ The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

■ Convertibles are subject to the risks associated with both bonds and company shares, and to risks specific to the asset class. Their value may change significantly depending on economic and interest rate conditions, the creditworthiness of the issuer and the performance of the underlying company shares. In addition, issuers of convertibles may fail to meet payment obligations and their credit ratings may be downgraded. Convertibles may also be harder to sell than the underlying company shares.

■ In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

■ The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

■ Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.73%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge is based on expenses for the period/year ending 31 October 2023. This figure may change from year to year. It excludes portfolio transaction costs. This figure includes extraordinary expenses and underlying charges for closed-ended-funds, such as investment trusts and Real Estate investment trusts.

For Income shares, the ongoing charge is taken from investments held in the fund's portfolio and not from the income these investments produce. The deduction of this charge will reduce the potential growth of your investment.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.co.uk/literature
