Sanlam Short Duration Corporate Bond Fund – Class I1 GBP Base Inc

a Sub-Fund of MLC Global Multi Strategy UCITS Funds Plc (the “Company”)
Sanlam Asset Management (Ireland) Limited IE000BLBMDR4

Objectives and Investment Policy

Objectives and Investment Policy

Investment objective

The investment objective of Sanlam Short Duration Corporate Bond Fund (the “Fund”) is to achieve income returns and ready access to capital.

Investment Policy

The Fund is actively managed and invests predominantly in a variety of Sterling, US Dollar and Euro short-dated investment grade corporate bonds (not limited to any particular sector or geographical region), of no more than 6 years maturity.

The Fund may also invest up to a maximum of 30% of its assets in bonds issued by governments, their agencies, local authorities, instrumentalities, and public international bodies, including without limitation, Supranational bonds, Short dated Gilts and Government T-Bills.

The Fund's investments will primarily be in debt instruments (government or corporate, fixed or floating, rated or unrated) listed or traded primarily in the UK but also on stock exchanges or markets as set out in Appendix IV of the Prospectus.

If considered appropriate, in certain market conditions (e.g. instances of extreme market volatility) or where a defensive investment strategy is deemed appropriate, the Fund may be invested in cash or ancillary liquid assets (including money market instruments such as bank deposits and treasury bills).

The Fund may use financial derivative instruments (“FDI”) for efficient portfolio management and hedging purposes to protect against market or currency movements, to reduce costs, or to earn income or capital.

Further information on sustainability factors that may be relevant to this Fund can be found in the prospectus or on our website at www.sanlam.ie

You can sell your shares in the Fund any day (except Saturday or Sunday) that banks are open in Ireland and the UK.

Your shares may pay you income, any income you may be entitled to will be paid on a quarterly basis.

The Fund does not track a benchmark nor is the Fund constrained by the value, price or components of a benchmark or any other aspect. The Fund is also not aiming to match or exceed the return of any benchmark.

Recommendation: The Fund is suitable for investors seeking income and ready access to capital and who are prepared to accept a medium degree of volatility. Investment in the Fund should be viewed as an investment which should be held for a minimum period of 1 year.

Risk and Reward Profile

Lower risk Higher risk

← Typically lower rewards Typically higher rewards →

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Fund is in category 3 as it invests in securities that can vary significantly in price from day to day due to a variety of factors. Therefore the chance to make large gains means the risk of suffering large losses.

A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making higher gains.

The seven-category scale is complex. For example, a category 2 fund is not twice as risky as a category 1 fund. The category is based upon the annual calculation of the Fund's risk calculation relevant to the nature of the types of instruments the Fund invests in. The risk category shown is not guaranteed and may change over time.

The Fund invests substantially in short dated corporate bonds and therefore will carry a lower degree of interest rate risk than funds investing predominately in long term fixed income or equity securities. There can be no assurance that the securities in which the Fund invests will not be subject to credit difficulties leading to the loss of some or all of the sums invested in such securities or other instruments. The Fund may bear the risk of settlement default with parties with whom it trades.

The price of any security which is constituted as a bond is affected by the

issuer's or counterparty's credit quality. Lower quality bonds are generally more sensitive to changes than higher quality bonds. Even within bonds considered investment grade, differences exist in credit quality and some investment grade debt securities may have speculative characteristics. Lower rated securities generally have a greater risk of default than higher rated securities.

Unrated securities or those with a rating considered to be below investment grade reflect a greater possibility that the issuer may be unable or unwilling to make timely payments of interest and principal and thus default. If this happens, or is perceived as likely to happen, the values of those debt securities will usually be more volatile.

The price at which an asset is valued by the Fund may not be realisable in the event of sale. This could be due to a mis-estimation of the asset's value or due to a lack of liquidity in the relevant market.

Some of the exchanges and markets on which each Fund may invest may prove to be illiquid or highly volatile from time to time and this may affect the price at which the Fund may liquidate positions to meet repurchase requests or other funding requirements. Prospective investors should also note that the securities of small capitalisation companies are less liquid and this may result in fluctuations in the price of the Shares of the Fund. Furthermore, the performance of the Fund may be affected by changes in economic and marketing conditions and in legal, regulatory and tax requirements.

The Fund may use FDI for efficient portfolio management and hedging. It may be that the use of FDI causes losses to the Fund.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus and the supplement of the Fund.

Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it.

One-off charges taken before or after you invest	
Entry charge	Up to 5.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.	
Charges taken from the Sub-Fund over a year	
Ongoing charge	0.94%
Charges taken from the fund under certain specific conditions	
Performance fee	None

Any entry charge shown is a maximum figure. Where charges are shown in some cases you might pay less; you can find this out from your financial advisor or distributor.

The ongoing charge is based on the expenses for the previous 12 month period ending December 2023. This figure, which excludes portfolio transaction costs, may vary from year to year.

A dilution levy may be charged on a purchase or sale of shares in the Fund in some cases. It may be necessary to reduce the difference between the cost of buying or selling the Fund's investments and the Fund's mid-market share price. Any dilution levy charged will be paid into the Fund.

The Fund's annual report for each financial year will include detail on the exact charges made.

You can find out more details about the charges including performance fees and how they are calculated by looking at the Sub-Fund's prospectus and supplement which are available at www.sanlam.ie.

Past Performance

Past performance is not a reliable indicator of future results.

The past performance takes account of all charges and costs, excluding entry and exit charges.

The performance of this class is calculated in British Pounds.

The Fund launched on 29 July 2022. This class started to issue shares on 29 July 2022.
